PREFACE.

In sending the present essay of a Pâli Grammar to the press, I feel bound to say a few words of explanation as to the plan I have followed. First of all, I must state that it was not my intention to give a complete Grammar of the Pâli Language, as this can only be done when all the principal books of the Buddhist Canon will have been published; nor was it my intention to write a Comparative Grammar of Indian vernaculars, as for this purpose the space granted to me would have been too small. I only intended to help the students of Buddhistical literature, by collecting the idiomatical peculiarities of the sacred language, comparing it chiefly to Sanskrit, and in a few cases also to the other Indian vernaculars. As the publication of Pâli texts has taken so wide dimensions during the last ten years, I thought it would not be out of place to consider and work out the new materials that have come into our possession through these books, mostly unknown to Childers and the others who made Pâli Grammar an object of their studies. Even E. Kuhn, whose "Beiträge zur Pâli Grammatik" have been of great help to me, and whose plan I followed almost throughout my book, only

PREFACE.

worked from a comparatively small number of texts, and just the oldest and most interesting, like Vinaya and Jâtaka, were all but unknown to him.

It would be rather out of place in an elementary Grammar to enter into a long discussion about the age and origin of the Pâli language. A few words on the subject will be sufficient: Kuhn, following Westergaard, holds Pâli to be the vernacular of Ujjein, the capital of Mâlava at the time when Mahinda, the son of Asoka, took the sacred Canon with him to Ceylon (Beiträge, p. 7). On the other hand, Oldenberg, rejecting that tradition, considers Pâli to be the original language of the Kâlinga country (Vinayapitaka, Introduction, p. liv). He compares the language of the large inscription at Khandagiri (Cunningham, Corpus Inscriptionum, i. 98), and finds only very little difference between this and the Pâli. From this he concludes that there must have been, about a hundred and fifty years before Mahinda, a frequent intercourse between Kalinga and the island; in fact, that the religion, together with its language, was brought over from there to Ceylon. I had myself formed a similar idea, independently from Oldenberg, by a careful examination of the first settlements of the Gangetic tribes in Ceylon (see my Report II. to the Government of Ceylon, reprinted Ind. Ant. IX. 9); and, recently, Mr. Nevill, in the Journal of the Ceylon Branch of the Royal Asiatic Society, has pointed out that the ancient civilized and populous district of Ceylon, the socalled Kalâwa, is not to be looked for at the south coast near Galle, as most people believe, but in the northwestern district of the island, which is now almost a desert. We therefore all agree that the Aryan immigrants did not come by sea from Bengal, in which case they would have landed somewhere at the east or south coast, but that they crossed over from some port in Southern India; and, under these circumstances, it is not at all unlikely that the point from which they started may have been the kingdom of Kâlinga. To the person of Mahinda we need not attach much importance from a chronological point of view, perhaps not more than to the person of Vijaya, the first Gangetic immigrant in Ceylon according to tradition.

About the age of the Pâli language it is even more difficult to form a certain opinion than about its native country. The late R. C. Childers, in the Preface to his Dictionary, p. ix., attributed a very high antiquity to it, with especial reference to an inscription on the Sthûpa of Bharhut, which contains a quotation from Cullavagga, vi. 4. This argument, however, is not conclusive, as already P. Goldschmidt pointed out in the Journal of the Ceylon Branch of the Royal Asiatic Society for 1879. It was generally expected that we would get some help from the Ceylon inscriptions for fixing the age of the Pâli language, but unfortunately this expectation has not been fulfilled, as all those inscriptions from which we might derive an argument are not sufficiently dated. Real Pâli inscriptions

have not been found in Ceylon-not more than in Cambodia. Those that approach nearest are almost identical in their language with the above mentioned Khandagiri inscription. There is, for instance, the one at Kirinde (No. 57 of my Ancient Inscriptions in Ceylon), which, for palæographical reasons, I have assigned to the first or second century A.D., about the time when, according to tradition, the doctrines of Buddhism were first reduced to writing in Pâli. The language of this inscription agrees in many points with Pâli, but it is too short, and the date is too uncertain that I could follow Goldschmidt, who felt inclined to make use of it for fixing the age of the sacred language. Neither can I agree with Kern. who holds Pâli to be an artificial language altogether. It is certain that some considerable time must have elapsed before the Pâli recension of the Canon was completed, and that through the continguity of cognate vernaculars, like the Magadhî, a number of words and forms found their way into Pâli which originally did not belong to it : in this way the socalled Mågadhisms, which Kern induces to prove the artificial character of the language, are easily explained. In spite of these, Pâli conserved a certain purity during the whole middle age, and even late texts like the Dâthâvamsa and Attanagaluvamsa (thirteenth century), although they introduce a large number of compounds after the Samscritic fashion, are comparatively free from dialectic peculiarities. Not before the time when the second part of the Mahâ-

PREFACE.

vamsa was composed we find a wholesale import of Sinhalisms into the language, scarcely disguised by Pâli terminations, as, *e.g.*, mahâlâno, 'Chief Secretary,' translated back from the Sinhalese mahâlaenan.

I have only occasionally attempted in this book to distinguish between the different periods of the language. When the student will have overcome the first difficulties, he will find all the necessary information on this subject in Fausböll's Introduction to "Ten Jâtakas" and Trenckner's "Pâli Miscellany." I may say here so much, that on the whole the forms of the Sinhalese MSS. are older and more genuine, while the Burmese often replace them by more modern, more common, or more regular ones. I reserve for another occasion the interesting task to prove this by comparing a certain number of MSS., especially of grammatical texts.

Another part of the Grammar, which is totally wanting in my essay, is the Syntax; but here I hope that the classical languages, with which no doubt nearly all my readers are acquainted, will fill up the gap. Sanskrit, so to say, has no Syntax at all, but expresses all the relations in a sentence merely by compounds. This way, however, was given up at an early date by the Indian vernaculars, and a form of construction was introduced which bears a close resemblance to the Syntax of the classical languages. Under these circumstances, I have thought it best, as I had no space to give a complete Syntax to add at the end

PREFACE.

the Grammar a short Jâtaka, with an analysis that might help the student to understand the Pâli construction.

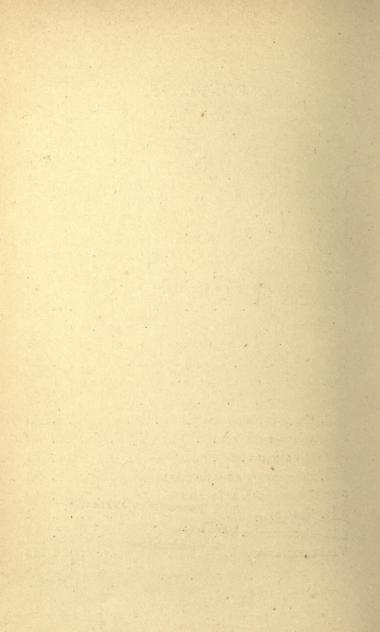

The texts I principally took my examples from are the historical books Dîpavamsa and first part of the Mahâvamsa, for which I compared the new edition published by Sumangala and Baţuwantudâwa in 1880; besides the Vinaya, the three published volumes of the Jâtaka, the Milindapanha, and the first year's publications of the Pâli Text Society, including Anguttara Nikâya, Buddhavamsa and Cariyâpiţaka. The second year's publications reached me when the book was already in the press, but I availed myself of the opportunity to mention some particularly interesting forms from Thera- and Therîgâthâ and Khuddasikkhâ. Of Fausböll's Sutta Nipâta I could use for the Grammar only the stanzas given in the foot-notes of his translation ("Sacred Books," vol. xiii): the edition of the text came into my hands when I had very nearly done.

E. MÜLLER.

CARDIFF, June, 1884.

ABBREVIATIONS.

The abbreviations are the same as in Childers' Dictionary, and besides the following new ones :--

Ang. = Anguttara Nikâya ed. Morris.

Ass. S. = Assalâyanasutta ed. Pischel.

Beitr. = Beiträge zur vergleichenden sprachforschung

herausgeg. von Bezzenberger.

Bv. = Buddhavamsa ed. Morris.

C. = Cullavagga ed. Oldenberg.

Cariy. = Cariyâpițaka ed. Morris.

Dâth. = Dâthâvamsa ed. Cumâra Swâmi.

Dhm. = Dhâtumañjûsâ ed. Batuwantudâwe.

Dîp. = Dîpavamsa ed. Oldenberg.

Gr. = Sept Suttas Pâlis ed. Grimblot.

Hem. = Hemacandra ed. Pischel.

It. = Itivuttaka.

I. O. C. = India Office Catalogue.

K. Z. = Kuhn's Zeitschrift für vergleichende Sprachforschung.

M. = Mahâvagga ed. Oldenberg.

M. N. = Majjhima Nikâya.

Naigh. = Naighanțuka.

P. M. = Pâli Miscellany, by Trenckner.

Pâïyal. = Pâïyalacchî ed. Bühler.

Rûp. = Das sechste Kapitel der Rûpasiddhi herausgegeben von Grüwedel.

Saddhammop. = Saddhammopâyana ed. Baţuwantudâwe.

S. N. = Sutta Nipâta ed. Fausböll.

Samanta Pâs. or S. P. = Introduction to the Samanta Pâsâdikâ in the third vol. of Oldenberg's Vinaya.

Suttavibh. = Suttavibhanga ed. Oldenberg.

Vinaya Texts = Vols. xiii. and xvii. of Max Müller's Sacred Books.

CORRIGENDA.

- P. 24, line 10 from top : Vegha is, as Dr. Morris tells me, a mistake for vekha = veshka, 'leathern strap.'
- P. 25, line 3 from bottom: A verb ussati does not exist. The correct reading is *ñassati*.
- P. 112, line 5 from top: The ending \hat{u} belongs to the third person plural.

PÂLI GRAMMAR.

§ 1. The Alphabet.

THERE are three Alphabets in which Pâli manuscripts are written-the Sinhalese, the Burmese and the Kambodian. They all are derived from the Açoka Alphabet used in the ancient inscriptions of India, but represent a more current and an easier style of writing. The Devanâgarî Alphabet, which was used by Spiegel in editing his Anecdota Pâlica, is never found in Pâli manuscripts. We shall, however, for the convenience of those who have studied Samskrit, in the following table give the Devânagarî letters corresponding to the Sinhalese characters. Since Fausböll's edition of the Dhammapada, published in 1855, nearly all editors of Pâli books in Europe have made use of the Roman character, as being easier to learn and less tiring to the eye. Unfortunately, a uniform way of transcription has not yet been arrived at in Pâli, any more than in Samskrit; but the method followed by Fausböll and Childers is now almost generally adopted, and shall also be used in this book.

I. VOWELS.

a = w. $\hat{a} = w$. i = z. $\hat{i} = \frac{z}{2}$. u = z. $\hat{u} = z$. e = v. o = w.

PALI GRAMMAR.

II. CONSONANTS.

- 1. Gutturals.—k= क. kh = ख. $g = \pi$. gh = u. $\dot{n} = s$.
- 2. Palatals.— $c = \overline{a}$. $ch = \overline{a}$. $j = \overline{a}$. $jh = \overline{a}$. $\tilde{n} = \overline{a}$.
- 3. Cerebrals.— $\mathfrak{t} = \mathfrak{z}$. $\mathfrak{th} = \mathfrak{z}$. $\mathfrak{d} = \mathfrak{z}$. $\mathfrak{dh} = \mathfrak{z}$. $\mathfrak{n} = \mathfrak{v}$.
- 4. Dentals. $-\mathbf{t} = \mathbf{\pi}$. $\mathbf{th} = \mathbf{\Psi}$. $\mathbf{d} = \mathbf{\xi}$. $\mathbf{dh} = \mathbf{\Psi}$. $\mathbf{n} = \mathbf{\pi}$.
- 5. Labials. $-p = \mathbf{v}$. $ph = \mathbf{v}_h$. $b = \mathbf{v}$. $bh = \mathbf{v}$. $m = \mathbf{v}$.

6. Liquids.
$$-\mathbf{y} = \mathbf{u}$$
. $\mathbf{r} = \mathbf{\tau}$. $\mathbf{l} = \mathbf{z}$. $\mathbf{v} = \mathbf{u}$.7. Sibilants. $-\mathbf{s} = \mathbf{x}$. $\mathbf{h} = \mathbf{z}$. $\mathbf{l} = \mathbf{z}$ (Vedic).

Besides, there is the niggahîta, corresponding to the Samskrit anusvâra, and marked by a small circle in the middle of the line. It is always used at the end of words, and in the middle before a sibilant. Before another consonant the nasal of the corresponding class may be used instead.

§ 2. Pronunciation.

The Pronunciation is, on the whole, the same as in Samskrit. The vowels a, i, u are short, the others are long : e and o are only long when they stand in an open syllable, viz., before a single consonant. When they stand before two consonants they are pronounced short, but are long *metri causâ*. The aspirates are pronounced like the corresponding surds with the addition of an h. Therefore th does not correspond to the English th, but rather to the German in *Thun*, *That*. *Ch* has the same pronunciation as the simple c = English chin child.

It is very difficult for a European to pronounce the cerebrals or linguals correctly. In India and Ceylon the natives almost constantly express our dentals by their cerebrals in words taken over from our language. It seems, therefore, that our dentals agree more with their linguals in pronunciation than with their dentals. I have, however, not been able to mark in the spoken language any difference between the pronunciation of the dentals and of the cerebrals.

The nasals are pronounced according to the class to which they belong. The guttural nasal never occurs alone, but is always followed by an explosive of its class; it sounds like English ng or nk respectively. The palatal nasal sometimes occurs doubled when an assimilation has taken place $(\tilde{n}\tilde{n})$, and then it has the sound of the Spanish \tilde{n} in doña, or of the French gn in campagne. The dental nasal is exactly pronounced like n, and the labial like m.

The niggahîta, or nasal breathing at the end of the word, is pronounced in Ceylon almost with the same force as a guttural nasal=English ng in king. Before other consonants it is only a representative of the nasal of the corresponding class, and is pronounced accordingly.

Compound consonants are almost regularly assimilated in Pâli. We therefore do not require a table of the combinations of consonants similar to that which exists in the Devanâgarî Alphabet. The rules according to which the assimilation takes place will be given in a special chapter, and the few groups

PALI GRAMMAR.

of compound consonants that still exist in Pâli will be added as an appendix to the Table of Alphabets.

The pronunciation is the same as that of the single consonants.

§ 3. Vowels.

The vowels found in Pâli are the same as in Samskrit, with the exception of the r and l vowels, and the diphthongs ai and au.

The *r* vowel is mostly represented in Pâli by one of the other vowels:-

(1) By a in accha=riksha, vijambhati=vijrimbhati, Jât. i. 12; tasita = trishita, Dâth. iii. 44; mattha and matta = mrishta, gaha = griha, maccu = mrityu.

(2) By i in ina = rina, 'debt;' kisa = kriça, 'lean;' giddha
= gridhra, 'greedy;' miga = mriga, 'deer;' bhisî = brisî, 'mat;' sigâla = çrigâla, 'jackal.'

(3) By u in usabha = rishabha, 'bull;' puthu = prithu,
'broad;' pucchati = pricchati, 'to ask;' vutthi = vrishti, 'rain.'

(4) By the consonant r accompanied by the vowels i or u, in *iritvija* = ritvij, 'brahminical priest;' rite = rite, Kacc. 126; iru = ric in *irubbeda* = rigveda, rukkha = vriksha, braheti = brimhayati; the latter root takes also sometimes the vowel a, as in *abbahati*, Dh. 96, and in the participle braha.

(5) By e in geha, which is already found in Samskrit.

The diphthongs ai and au of the Samskrit become e and o in Pâli, that is to say, they are reduced from the second degree of vowel strengthening called vriddhi in Samskrit to the first called guna; this process is called vuddhi by the Pâli grammarians. Examples are Gotama = Gautama, Kondañña = Kaundinya, Erâvana = Airâvana, dvelhaka = dvaidhaka, mettî = maitiî. These diphthongs may, however, be further reduced to the simple vowels *i* and *u*, in the same way as it is done with the original *e* and *o*. We have *mitti*=maitrî, Jât. i. 468; *issariya*= aiçvarya, *ussukka* = autsukya, Dh. 268.

The rules laid down by the grammarians concerning the use of the vuddhi and of the simple vowel are very lax. Kacc., p. 214, prescribes the vuddhi before a single consonant, but at p. 219 he allows the forms with the simple vowel as well, e.g., *abhidhammika*, *vinateyya*, *ulumpika*.

There are also two instances where an u derived from an *r*-vowel (see above, no. 3) becomes o by vuddhi, viz., pothujjanika, 'belonging to an unconverted person,' derived from puthujjana = prithagjana and modangika, 'one who beats the drum,' derived from mutinga = mridanga.

§ 4. Change of Vowels.

A short a of the Samskrit is subject to different changes in Pâli. It may become :—

(1) e in ettha = atra, 'there,' according to Childers, and S. Goldschmidt's Prâkritica, pp. 21-23. Kaccâyana, p. 110, derives it from etatha by shortening of the syllable eta into e; but Hemacandra, i. 57, has the right explanation. Similar forms are ubhayettha=ubhayatra, 'on both sides,' given in the commentary, Dhp. p. 96, while the text at v. 15 has ubhayattha, heithâ and heithato, 'below' = adhastât; pure, 'before,' with its compositions puresamana, 'the companion who precedes a bhikkhu;' purebhattam, 'before the morning meal;' puretaram, Dh. 84, 135; antar in antepura = antahpura, 'harem' (antopuram, Dh. 162, 291); antovatthumhi, Mah. 253; antaravatthumhi, Jât. i. 232; antorukkhatâ, Jât. i. 7; pheggu = phalgu, 'empty.' In $seyy\dot{a} = cayy\hat{a}$, 'couch,' the change of a to e is effected by the following y, and the same has taken place in $peyy\dot{a}la = pariy\hat{a}ya$, if the derivation given by Oldenberg, K. Z. xxv. p. 315, and Trenckner, Pâli Miscellany, p. 66, is correct.

(2) a becomes i in tipu = trapu, 'lead,' kalimbhaka = kadamba, 'point,' C. v. ii. 3; pilåla=palåla, 'straw,' Jåt. i. 382; timisa = tamasa, 'darkness,' Mil. 283, and timisså = tamisrå, Jåt. iii. 433; nilicchita = nirashta according to Trenckner, Påli Misc. p. 55. A great many more examples might be adduced for this change, which is a very frequent one in Påli.

(3) a becomes u principally through the influence of a labial, that may stand either before or after the vowel, or even at some distance from it. Examples are sammuñjani and sammujjanî, Jât. i. 161 = sammârjanî, 'a broom ;' nibbusitattâ = nirvasitâtmâ, Grimblot, Sept suttas Pâlis, 23; nimujjati == nimaji, 'to sink;' puthujja = prithagja, 'common,' Fausböll, Sutta Nipâta 171; pannuvîsati = pañcavîsati, 'twenty-five,' Jât. iii. 138. There are, however, also examples of this change where there is no labial contact, e.g. thunanti, 'they sound,' from stan (the participle nitthanamana occurs at Jat. i. 463, and nitthananta Jât. ii. 362); bhrúnahu = bhrúnahan, 'killing the embryo,' Fausb., S. N. 122; ajjuka = arjaka, 'the white parnâsa;' âqu=âgas, 'sin ;' pajjunna = parjanya, 'cloud ;' sajju = sadyas, 'instantly;' sajjulasa = sarjarasa, 'resin,' M. vi. 7. In $us\hat{u}y\hat{a} = as\hat{u}y\hat{a}$, 'envy,' and in $ku\bar{n}kutha =$ kankushta, 'a sort of earth,' the change is due to the assimilation of the vowels.

(4) a becomes o in sammosa = sammarsha, 'confusion,' Gr. 25, Mil. 266, anto = antar, 'inside,' and its compositions, tirokkha = tiraska, 'absent,' Suttavibh. i. 185. Samskrit \hat{a} is subject to the following changes :---

(1) It becomes e in pårevata = påråpata, 'pigeon' (påråpata occurs at Jåt. i. 242); mettika = måtrika, Cariy. i. 9, 11; khepeti = kshapayati, from kshap, the causative of kshi according to Trenckner, Påli Misc., p. 76, and Senart, Mahâvastu, p. 492; theto = sthåtri, Brahmajålasutta, p. 5; seleti = çådayati, 'to fall off,' Buddhavamsa i. 36 (usselheti, C. i. 13, 2 = Suttavibh. i. 180, is a compound of this, and has nothing to do with ussolhi, as the translators of the passage would make out, Vinaya Texts, ii. 349). The change is effected by a y standing before or after the vowel in åcera=åcârya, 'teacher,' Khuddasikkhâ xv., comp. Hem. i. 73; påtihera (or påtihira) = prâtihârya, 'a miracle;' nibbedheti = nirvyâdhayati, 'to transpierce,' Mah. 143.

(2) It becomes o in tumo = tmanâ, 'self,' C. vii. 2, 3, Oldenberg K. Z. xxv. 319; parovara = parâvara, from para + avara, 'perfect,' Fausb., S. N. 59, 193; doso=doshâ, 'at night;' dhovati = dhâv, 'to wash.'

(3) It becomes \hat{u} in some compositions with the root $g\hat{a}$, 'to go,' like $addhag\hat{u}$, 'a traveller;' $p\hat{a}rag\hat{u}$, 'one who has crossed to the other side,' probably through an intermediate o (see no. 2), as we have atigo, Dhp. v. 370; $p\hat{a}rago$, Mah. 60, 250; $vivarantag\hat{u}$, Jât. ii. 208. The same change takes place in compositions with $j\hat{n}\hat{a}$, 'to know;' as, $vi\tilde{n}\tilde{n}\hat{u}$, 'clever;' $salba\tilde{n}\tilde{n}\hat{u}$, 'omniscient;' $vada\tilde{n}\tilde{n}\hat{u}$ = vadanya, 'bountiful,' is clearly constructed after the false analogy of these forms, but has nothing to do with $j\tilde{n}\hat{a}$. Tada $\tilde{n}\tilde{n}u$, Saddhammopâyana, v. 177, is composed with $j\tilde{n}\hat{a}$, and is different from $tada\tilde{n}\tilde{n}a$ = tad + anya, occurring at v. 149 of the same poem. Samskrit i is subject to the following changes :-

(1) It becomes a in $k dkanik d \doteq k kinik a, 'a small coin ;' pathavi = prithivî, 'the earth ;' pokkharani = pushkarinî, 'lotus tank ;' gharani = grihinî, 'wife,' M. viii. 1, 12 ; patanga = phadinga, 'a flying insect,' Dh. 412, Mil. 272 ; sákhalya, 'friendship,' Childers s. v. sakhilo, and some futures like icchasam, pamādassam, mentioned by Trenckner, Pâli Misc., p. 75. A doubtful form is ânañja, Jât. i. 415, ii. 325 ; Suttavibh. i. 4 ; Sâmaññaphalasutta ed. Grimblot, p. 143. A various reading is ânañca, which is found besides in Mahâparinibbânas., p. 34, and Burnouf, Lotus, pp. 306, 467, 866 ; but Buddhaghosa, at Suttavibh. i. 267, explains it by ânejjappatte, acale, niccale and if this is correct it can have nothing to do with Samskrit ânantya, but must be derived from the Pâli root <math>inj$ = Samskrit ing, 'to move.' Comp. Childers, s. v. ânejjap, and p. 454, and Senart, Mahâvastu, p. 399.

(2) It becomes e in etta, 'so much' = Skt. iyant, Senart, Mahâvastu, p. 384 (but not etto, 'hence,' which is derived from etta = eta, Goldschmidt, Prâcritica, p. 21-23); vihesâ = vihimsâ, 'vexation,' and the verb viheseti, 'to annoy,' Jât. iii. 295; vehâgamana = vihâgamana, 'coming through the air,' Mah. 157; vematika = vimatika, 'inconsistent;' vemajjha = vimadhya, 'the middle;' Vessabhâ = Viçvabhû, 'a name of Buddha;' mañjettha = mañjishtha, 'light red;' keratika, Jât. i. 461, and kerâțiya, Jât. iii. 260 = kirâța, 'hypocrite,' (comp. Indian Antiquary, vi. 40); esikâ = ishîkâ, 'pillar' (but îsikâ, Sâmaññaph. S. ed. Gr. p. 144), Brahmaj. S 18, neuter pl. esikâni, Jât. ii. 95; terovassika, 'more than a year old' = Skt. tirovarshika, like Vedie tiro ahnya, Morris' Report on Pâli Literature, p. 6; dvebhâga, dvebhâva, dvebhâmaka = dvibhâga, dvibhâva, dvibhûmaka; pettâpiya = pitrivya,

Trenckner, Pâli Misc. 62; mâtâpettibhara, 'supporting one's parents,' = mâtri + pitribhara, tekiccha, 'curable,' from cikitså, etthi = ishti, 'wish,' Khuddasikkhå. A difficult form is the adverb seyyatha, 'just as,' in a comparison, which is explained in different ways by the grammarians. Trenckner, Pâli Misc. p. 75, explains it as a Magadhizing form, corresponding to the Skt. tadyathâ, and he is followed by Senart, Mahâvastu, p. 415, who adduces the corresponding form of the northern Buddhists sayyathidam, already mentioned by Léon Feer, Etudes Bouddhiques, p. 313. I believe this explanation preferable to that of E. Kuhn, who considers it as a potential âtmanepadam of the root as 'to be.' A form seyathâ occurs in the inscription of Bhabra, Cunningham, Corpus Inscriptionum Indicarum, p. 111. A similar change of a to e is in yebhuyya = yad + bhûyas, Instr. yebhuyyena, 'generally,' 'mostly.' The corresponding form of the northern Buddhists is yobhûyena, Senart, Mahâvastu 422.

(3) It becomes u in kukkusa = kiknasa, C. x. 27, 4, kukku
= kishku, 'measure of length,' M. vii. 1, 5; nicchubhiyati =
kshiv, 'to spit out,' Mil. 188; also written nichubhati, Cariyâp.
ix. 23, Bv. xi. 15, Jât. iii. 512, 513; participle, nicchuddha,
Mil. 130, Dh. 8, 202; râjula = râjila, 'a lizard;' geruka =
gairika, 'red chalk,' M. i. 25, 15.

(4) It becomes o in onojeti, 'to dedicate,' M. i. 22, 18 = avanejayati according to Kern, Buddhism, p. 92.

Samskrit i is subject to the following changes :---

(1) It becomes a in kosajja, 'idleness' = kausîdya; bhasma = bhîshma, 'dreadful,' C. vii. 4, 8 (another form bhesma occurs Ab. 167, and bhisma in the Mahâsamaya ap. Grimblot, p. 288).

(2) It becomes à in tiracchâna = tiraccîna, 'an animal.'

(3) It becomes e in khela = krîdâ, 'play,' Dâţh. i. 41, Pischel Beitr. iii. 254 ; kelâyatha, Mil. 73, âvelâ = âpîda, 'a garland ;' Prâk. âmela, Hem. i. 105 ; ereti, 'to utter,' Dh. v. 134 ; according to Trenckner, Pâli Misc. p. 76 = ireti. E for i is found frequently in derivative syllables, as in the absolutive gahetvâ for grihîtvâ, in âjâneyya for âjânîya, and similar forms given by Kacc. p. 196. There is a present seyyasi = çîryasi, from çar, 'to throw down,' occurring only in this form Jât. i. 174, Dh. 147. The commentary explains it by visinnaphalo hoti. Çrî becomes se in the names of two plants, sepannî = çrîparnî and sephâlikâ = çrîphâlikâ.

(4) It becomes u in the root thubh = shthîv, 'to spit;' also written thuh, as in nitthuhati, S. i. 132; nutthuhati, C. vi. 20, 2, M. viii. 1, 11. The form nitthuh occurs also in Prâkrit, Deçînâmamâlâ, iv. 41.

Samskrit u is subject to the following changes :--

(1) It becomes a in sakkhali = çashkuli, Jât. ii. 281, Suttavibh. i. 55; agaru and agalu=aguru, 'Agallochum;' dudrabhi = dundubhi, 'drum,' M. i. 6, 8; vâkarâ or vâkara, Jât. iii. 541 = vâgurâ, 'net;' phallati = phull, 'to bear fruit,' and pharati = sphur, 'to flash.' Bâhusacca is derived by Childers from bâhuçrutya, by Fausböll from bâhusmârtya; the analogy of muțthasacca, however, adduced by Childers, points to the latter etymology. Rathesabha, 'king,' is according to Trenckner, Pâli Misc. p. 59 = ratheçubh; according to Senart, Mahâvastu, p. 427 = ratha + rishabha.

(2) It becomes *i* in *dindima* = dundubhi, 'drum,' Dîp. 96; *khipati* =: kshu, 'to sneeze;' *muditâ* = mudutâ, Senart, Mahâvastu 629. The identity of *sippî* and çuktî, 'pearl oyster,' assumed by Trenckner, Pâli Misc. 60-75, remains doubtful. (3) It becomes o chiefly before a double consonant, as in okka = ulka, 'torch,' Jât. i. 34; pottha = pusta, 'a modelled figure,' Jât. ii. 432, and its derivative, potthalika or potthanika, M. vi. 23, 3, C. vii. 3, 4; Prâk. puttalia, Pâïyalacchî 117; vokkamati = vyutkramati (comp. Pischel's remarks to Hem. i. 116); <math>pâmokkha = pramukhya (pâmukkha, Jât. i. 371). There are, however, also instances of the change before a single consonant, as kolañña = kulaja, 'of good family,' Mil. 256 (for the termination comp. aggañña and Senart's remarks Mahâvastu, p. 617); koliya, Jât. iii. 22, and koliniya, Jât. ii. 348 (if the reading koleyya is not to be preferred, kulina occurs at Mah. 245); and kolaputti, which is not to be considered as a vuddhi with Trenckner, Pâli Misc. p. 64. Pâli koti represents the Skt. kuți as well as koți, Lotus 432; anopama, Jât. i. 89; Mahâvastu 511 is = anupama, Mah. 240.

Samskrit \hat{u} is subject to the following changes:

(1) It becomes d in masåraka = masûraka, 'a sort of bed,' C. vi. 2, 3. Bhåkuți, Suttavibh. i. 181 = bhrûkuți, 'eye-brow,'most probably goes back to the Skt. bhrakuți or bhrikuți. The common Pâli word bhamu is not, as Childers explained it, a careless pronunciation of bhrû, but an abbreviation of bhamuka or bhamuha = bhrûmukha, as is shown by the Prâk. bhamayâ, Hem. ii. 167. The Sinhalese baema also goes back to this form.

(2) It becomes i or i in bhiyo, bhiyyo = bhûyas, and in niyura = nûpura, 'bracelet,' which, however, might stand for nidhura.

(3) It becomes o in oja = ûrjas, 'strength,' Jât.i.68, Dh. 132;
 onavîsativasso = ûnav^o, 'less than twenty years old.'

Samskrit e is subject to the following changes :--

(1) It becomes a in milakkha = mleccha (comp. K. Z xxv. 327), and in some verbal forms like akaramhasa, Dh. p. 147.

(2) It becomes \hat{a} in $k\hat{a}y\hat{a}ra = \text{key}\hat{u}ra$, 'bracelet,' C. v. 2, 1, Jât. iii. 437.

(3) It becomes *i* before double consonants, as in *pasibbaka*= prasevaka, 'bag'; *paţivissaka* = prativeçaka, 'neighbouring;' *ubbilla* = udvela in *ubbillabhâva*, 'lengthiness,' Saddhammopâyana 136; but also before single ones, as *abhijîhana* from jeh, Jât. 546, v. 49, according to Trenckner, Pâli Misc. 78; *apavînati*, Jât. 409, v. 4, from *veņ*; *pahiņaka* and *paheṇaka*, 'offering,' Prâk. paheṇaya, Pâïyal. 206.

(4) It becomes o in mankato = matkrite, Mil. 384; and in atippago = atiprage, 'too early,' corresponding to atiprâgah of the northern Buddhists, Mahâvastu 418.

Samskrit o is subject to the following changes :--

It becomes *u* before a double consonant, and *û* before a single, as in *junhâ* = jyotsnâ, 'a moon-lit night;' *tutta* = tottra, 'a pike used to guide an elephant,' Cariy. iii. 5, 2; *tadûpiya*, 'suitable, corresponding,' which is not = *tadrâpya*, as Childers suggested. Trenckner, Pâli Misc. p. 77, identifies it with Skt. tadopya, which is derived from the root vap in composition with *â*, and ascribes the change of *o* to *û* to the following *i*; but Senart, Inscriptions de Piyadasi i. 188, and Mahâvastu 493, takes it as a compound of tad + opaya. *Visûka* = viçoka, 'spectacle;' *dûbha* = droha, 'deceiving,' Mah. 49; *khajjûpanaka*, Trenckner, Pâli Misc. 59, for *khajjo panaka* = khadyota, 'the fire-fly;' *ârûgya* = ârogya, -'good health,' M. N. 66. Also an *o* contracted from ava is subject to this change, as in *ussâva* = avaçyâya, 'dew;' *ujjhâ* = avadhyâ, 'to blame;' and *uddeti* = *oddeti* = ava + dî, according to Morris, Anguttaranikâya i. 24, 4. Comp. the remarks of Fausböll, Two Jâtakas 13, the verb *niddâyati*, Jât. i. 215, *niddâpeti*, C. vii. 1, 2, identified by Oldenberg with nirdâtâ, Manu vii. 110. An example of an *o* changed to *u* before a single consonant is *ukkusa* = utkroça, 'the osprey,' only written *ukkûsa* at Jât. 486, v. 2, where the \hat{u} is required by the metre.

§. 5. Change of Quantity.

Long vowels before a double consonant are generally shortened. The reason is given by Kacc. vii. 5, 13-14, where he says that a short vowel before a double consonant as a long vowel is called garu. This rule, however, is not always followed by the manuscripts, where we often find a long vowel before a double consonant, especially when the long vowel is the result of a contraction. Fausböll, in the preface to his edition of the Dhammapada, p. vii., was the first to call attention to this inconsistency of the manuscripts, and afterwards Senart, Kacc. pp. 4, 5, has discussed it at some length. The principles established by him have been followed on the whole by the recent editors of Pa'i texts, as far as the groups with assimilated consonants are concerned; and also Childers, in his Pâli Dictionary, has adopted them with a few exceptions, so he writes ajjavam instead of ajavam, Kacc. 216 = Skt. arjava, dabbî = Skt. dârvî, dâtta = dâtra, following Abhidhânappadîpikâ. Kuhn, in his Pâli Grammar, p. 18, condemns this way of writing, and allows the long vowel only in those instances in which a contraction has taken place, as in nâgghati = na + agghati, piyâppiya = piya + appiya. The Sinhalese editions generally follow the method of the manuscripts.

Before a nasal we generally find the law observed, as santa, danta, vanta = çânta, dânta, vânta, Kacc. 295, but the editors of the second part of the Mahâvamsa write láñganakicca, Mah. 39, 28. Before other groups of consonants the editions are less consistent: we have ativâkya, Ab. 122, Dh. 57; sakya, sakka, sakiya = çâkya, Mah. 9, 55, Abh. 5, 336; âkhyâta and akkhâta, Kacc. 5, 220; pahatvâna = pahâtvâ, 'having left behind,' Dh. v. 243, 415; dussîlya, Dh. v. 162 = dauḥçîlya, 'wickedness;' balya, 'childhood,' Dh. v. 63, but bâlya, Ab. 250, 1079; ñatvâ and bhitvâ, from jñâ and bhî, Kacc. 303, Dh. 85, 379; kamyatâ = kâmyatâ, 'desire;' bahya = bâhya, 'external.'

Another possibility of avoiding the contact of a long vowel with a double consonant is to put the single consonant of the group resulting by assimilation, as in *âjava* = ârjava, Kacc. 216, Ten Jât. 98; kâsu = karshû, ' hole,' ûmi = ûrmi, ' wave.' Ab. 662; but ummi, Mil. 346; bhânaka = bhândaka, 'jar,' Suttavibh. 90, Ascoli Kritische Studien, p. 211; bhûja = bhûrja, 'the birch;' ahâsi = ahârshît,' 'he took.' The same process may take place after a short vowel, which then is lengthened, as in sájiva for sajjîva = sad + jîva, 'rule of conduct,' Pât. 5, 65, comp. Senart, Mahâvastu 481; vûpakâsati = vyupakarsh, 'to make clear,' M. i. 25, 20, Pât. 109; svâtana = çvastana, 'belonging to to-morrow,' Dh. 231; våka = valka, 'bark of a tree;' sankâpayati = sankappayati, 'to arrange,' M. iii. 1, 2 (there are, however, two various readings, sankâyati, C. x. 18, and Anguttaranikâya, p. 117, and sankâmeti, Suttavibh. i. 50, which render the etymology doubtful). Several compounds with the preposition ud, as $\hat{u}hadeti = ud + had$, 'to befoul with excrement;' *uhata* = ud + hata, 'destroyed,' Dh. 375, Mahâvastu, 379, 566; *ûhasana*, from ud + has, 'laughter,'

Mil. 127. Uhanati, M. i. 49, 4, Suttavibh. ii. 40, seems to be synonymous with *ühadati*, mentioned before; and I believe the translation given by Davids and Oldenberg, 'threw their bedding out,' not to be correct. The passive *ühaññi* is found M. i. 25, 15, the past participle *ühata*, C. viii. 10, 3; and another compound of the same root, *ohaneti*, occurs in the same signification, Cariy. ii. 5, 4, where it is in parallel to *uccârapassâvam katvâ*, Jât. ii. 385.

The opposite way is to shorten the vowel before a double consonant, as in the instances given above, and this can also be done where a single consonant follows a long vowel. Frequent instances occur in the genitive plural of stems ending in u or as; as bahunnam = bahûnâm, Dhp. 81, pitunnam = pitrînâm; and of numerals. as tinnam, pañcannam. But there are also a number of other words belonging to this category; as bhummi = bhûmi, 'earth,' C. xii. 2, 5; mattisambhava = mâtris°, Dh. v. 396; mâtumattika = mâtrimâtrika, Suttavibh. i. 16; unhissa = ushnisha, 'diadem,' Bv. p. 68, note; vanibbaka = vanîpaka (which is found Cariy. i. 4, 5), 'beggar,' with change of p to bb; niddha = nida, 'nest,' from ni + sad, (comp. Hem. i. 106, Weber Indische Streifen i. 141, Ascoli 284); sutta = syûta, 'sewn;' dattha = dâthâ, 'jaw,' Mil. 150; abba $hati = \hat{a} + brih$, 'to take down,' and its causative abbaheti, 'to pluck,' M. vi. 20, 2, C. vii. 4, 5; jannu = jânu, 'knee,' Mahâparinibb. 69; avassayim for avâsayim (comm. vâsam kappesim), 'I lived,' Jat. ii. 80. Syllables ending with y are especially often treated in this way; as abhibhuyya = abhibhûya, Dh. v. 328; bhiyyo = bhiyo for bhûyas, mentioned above; jiyyati = jîyati, 'to decay,' Dh. 179, and the suffix iyya =îya.

The same transformations we have hitherto mentioned can

also take place in syllables which contain an e or an o, with the only difference that these diphthongs always remain as they are; they are considered long before a single consonant and short before a group, as stated by the grammarian Moggallâna (Alwis, Introduction, p. xvii. note, Catal. 41, 184). Generally, however, the syllable conforms to the condition, according with the etymology of a word. The following are exceptions, where the simple consonant stands for the double : vetheti = veshtavati, 'to surround;' sekha = çaiksha, 'a disciple;' apekhå and apekkhå, 'desire,' = apekshå, upekhå and $upekkh\hat{a}$, 'equanimity;' vimokha = vimoksha, 'release.' Y is always doubled after e, as in seyyo = creyas, 'better;' maccudheyya = mrityudheya, 'death:' the only exception is keyūra, 'bracelet,' Ab. 287, which generally becomes kâyūra (see above). V after o is only doubled in yobbana = yauvana, 'youth.' After the prefix o, contracted from ava, a double consonant formed by assimilation always remains, as in abbocchinna = avyavacchinna, 'unbroken,' Mil. 72; okkhitta=avakshipta, 'cast down,' Pât. 20, 21; and even a simple consonant is often doubled, as in ossajjati = avasrij, 'to give up;' ossakkamâna = avasarpamâna, 'scattered,' Jât. i. 139; abbhokkirana = abhyavakirana, ' covering,' and, with change of o to u, abbhukkirati, Jât. ii. 311.

The cases of change of quantity are by no means yet exhausted by the rules and examples given above. We have numerous instances where the change is due entirely to the metre, and others again where no reason is visible. We will try in the sequel to keep separate as much as possible these two cases, and mention those instances which are supported by the Prâkrit dialects.

The roots terminating in â, as jñâ, dâ, sthâ, almost regularly

shorten the vowel in composition, and in derived forms, as, e.g., $pa \tilde{n} \tilde{n} a v \hat{a} = praj \tilde{n} \hat{a} vant$, 'wise,' always written with \check{a} except in a passage of the Cûlakammavibhangasutta, quoted by Gogerly, Ev. 31. From sthâ we have patthăpeti, 'to bring forward.' The same occurs in samkhata = samkhyâta, Dh. v. 70, where, however, it might also be shortened by a confusion with samkhata = samskrita. \hat{A} in the middle of a root is shortened in gahati and gaheti, 'to dive,' = gâh, and its compositions ogahi, Mah. 152; ogaha, Jât. iii. 289; vigayhati and vigahapeti. Suffixes with long vowels are very often shortened, as, e.g., agahita=agrihita, 'seized,' Dh. 107; appatita=apratîta, 'displeased,' Pât. 4, 5; sadevika = sadevîka, 'accompanied by his queen,' Mah. 205; vipaccanika = vipratyanîka, 'hostile,' Grimblot 1; paccanika, Cariy. ii. 8, 4; ahirika=ahrîka, 'shameless,' Dh. 44; saluka = çalûka, 'the root of the water-lily,' M. vi. 35, 6. Especially the suffix iya is almost regularly shortened, as in pâniya = pânîya, 'water,' M. i. 26, 4; sakiya = svakîya, 'own;' upâdâniya = upâdânîya, 'sensual,' in a passage of the Samyuttaka Nikâya quoted by Oldenberg, Buddha 435; pâtidesaniya = pratideçanîya, 'a class of priestly sins requiring confession,' constantly written so in the Pâtimokkha and Suttavibhanga; gariya = gariyas, 'heavier,' Dh. 245, &c. Shortening by svarabhakti is very frequent in Pâli, as in bhariyâ = bhâryâ, 'wife;' âcariya = âcârya, 'teacher;' $suriya = s\hat{u}rya$, 'sun,' and numerous other examples.

Lengthening of vowels occurs principally, in prepositions, as in *abhidosika*, 'stale,' from *abhidosa*, 'evening,' Suttavibh. i. 15; patibhoga = pratibhoga, 'surety,' comp. Mahâvastu 582; pavacana = pravacana, 'the Holy Scriptures' (the same in the language of the northern Buddhists, Mahâvastu 566); pakata = prakata, 'clear, evident;' paheti, 'to send' = prahi, from

C

PALI GRAMMAR.

the false analogy of the aorist $p\hat{a}hesi$; $p\hat{a}y\hat{a}ti$ and $p\hat{a}y\hat{a}to$, from prayâ, 'to depart,' Jât. i. 146; Rhys Davids, Buddhist Suttas, p. 241, note. There are, however, some other instances of lengthened vowels besides: a privativum is lengthened in $\hat{a}ya$ sakya, 'disgraceful,' from a + yaças, Jât. ii. 33, iii. 514, in paccâmitta = pratyamitra, 'enemy.' Other vowels in $\hat{a}linda$ = alinda, 'terrace;' $\hat{a}jira$ = ajira, 'court,' Mab. 215; $p\hat{a}y\hat{a}sa$ = $p\hat{a}yasa$, 'rice porridge;' $g\hat{a}vuta$ = gavyûti, 'a measure of length;' ummâra = udumbara, 'threshold;' sabbâvâ = sarvavat, 'entire;' kharâpinda, 'lump of glass,' Dîp. 102. Lengthening is very frequent also when a word is repeated in composition; as phalâphala = phala + phala, 'wild fruits, berries;' divâdivassa, 'at an unusual hour,' Ten Jât. 16, Ch. Addenda; khandâkhandam, 'in pieces;' kiccâkiccâni, 'all sorts of duties.'

According to the law given by Kaccâyana, vii. 5, 13, that a short vowel before a double consonant is considered as a long one, we have to treat here also those cases where a single consonant after a short vowel is doubled, and a double one simplified, because the quantity of the syllable is changed by this process. In these cases it is sometimes very difficult to distinguish what is due to the metre, and what not. A clear instance of metrical change would be appabodhati, Dh. v. 143, if Subhûti's opinion is right, that it stands for apabodhati; Weber, however, and Max Müller refer it to alpabodhati, 'parvi facere,' and Fausböll to a + prabodhati. Subhûti's view in supported by apparajita = aparajita, 'unconquered,' Cariv. i. 2, 2. Other instances are saparijjana, 'with his attendants,' Cariy. ii. 8, 2; kappilâyam, Cariy. ii. 9, 2; nikkhani for nikhani, 'he buried,' Cariy. iii. 14, 4; abhinivassatha, 'he lived,' Cariy. i. 10, 3; upavassatha, ib. i. 10, 5; paddhâna, Bv. xvii. 16; uttassati = uttrasati, 'he trembles,' Cariy. iii. 13, 4 (participle

uttrassa, M. x. 2, 16); suppatha, Ab. 193; kummiga = kumriga, Mil. 346; paggharati, 'to ooze,' Dh. 81; abhisammayo, Bv. vi. 3; paribbasâna = parivasâna, 'abiding,' Fausböll, S. N. 152. The following are instances from prose texts where the doubling cannot be ascribed to metrical influence: patikkula = pratikûla, 'contrary ;' jâtassara = jâtasara, 'a natural pond ;' sakkâya=svakâya, 'individuality;' anuddayâ=anudayâ, 'compassion and anuddayata, Suttavibh. i. 247; vibbheda=vibheda, 'division,' Jât. i. 212; umma=uma, 'flax,' Mil. 118; cheppa= çepa, 'tail,' M. v. 9, 1; cikkhalla=cikhalya, 'mud,' M. vii. 1, 1; niggahîta = nigrihîta, 'restrained,' okkassa = avakrishya, 'having dragged away,' Mahâparinibb. 3; upakkilesa = upakleça, 'sin;' upassattha = upasrishta, 'oppressed,' Jât. i. 61; vikkhâyitaka from vi + khâd, comp. Kern, Buddhism, 402; patiekka = pratyeka, 'individual' (regular form pacceka);kallahâra = kahlâra, 'the white water-lily;' mukkhara = mukhara, 'noisy,' Minayeff, Pât. 59; vissajjeti, from vi + srij, 'to give away,' and avissajjiya, avissajjika, C. vi. 15, 2, M. viii. 27, 5 (but visajja in a metrical passage Mahâparinibb. 17), and avissatthaka, Jât. i. 434.

Compared with these instances of doubling a consonant, the instances of the opposite process are but few, and they are nearly all to be ascribed to metrical influence. So we have dukha instead of dukkha=duḥkha, 'sorrow,' Dh. v. 83; putha instead of puttha=pushta, 'fed,' Dh. v. 218; kaṇikā=karṇikâ, 'an ear ornament,' Ab. 574. In prose texts I have only found kaṇikāra = karṇikâra, 'the tree Pterospernum acerifolium,' Jât. ii. 25; and bhadanta, also written bhaddanta=bhadrânta, 'a venerable man, a Buddhist priest.'

PALI GRAMMAR.

§ 6. Nasal Vowels.

The anusvåra or niggahîta can stand before every consonant, but before an explosive sound it may also migrate into the nasal of the corresponding class. So you may write kumkuma or kunkuma, samcarati or sañcarati, samdâsa or sandâsa, tamdita or tandita, kambala or kambala. In the first instance, however, before a guttural it is usual to transcribe the nasal by a simple n without any diacritical sign. Before h the anusvâra can be changed into the palatal or cerebral nasal, as $pa\tilde{n}ha =$ praçna, 'question,' but panhi = priçni, 'variegated;' in both instances the origin of the group is the same, viz., from cn, but the usage has been fixed in different ways. From panha is derived apannaka for apanhaka, 'certain,' always spelt with the cerebral group. Paripanhati is spelt with the cerebral in Minayeff's Pâtimokkha, p. 17, 92; but in the corresponding passage of the Suttavibh. ii. 141, we have paripañhali, which I consider to be more correct. Prâk. panha, Hem. ii. 75. In the same way we have tanhâ=trishnâ, 'thirst,' sanha=clakshna; but its derivative, spelt sanhita, Mah. 104. Osanhati, at C. v. 2, 3, is also spelt with the cerebral, and I believe this to be the correct spelling, as the n is already found in Samskrit. I cannot account for the change of \tilde{n} to n in apannattika=aprajñaptika, 'not existing,' in ana=âjñâ, 'order,' anapeti, anapana, &c.

Before a y the anusvâra can remain, or the whole group can migrate into $n\bar{n}$, as e.g. samyoga or sannoga. Before r, s, v it is always retained. Before l the anusvâra is always assimilated, as in sallápa = samlâpa, 'conversation.' Before a vowel it becomes m in poetry when a short syllable is required, the nasal vowels being invariably considered as long. The grammarian Vanaratana, according to Trenckner, Pâli Misc. 80, remarks that h may be joined to any one of the five nasals; for h with the guttural nasal I can adduce no example, but for h with the dental nasal we have cinha = cinha, 'mark,' pubbanha, Mil. 17; majjhanha = madhyâhna, 'midday,' Ab. 767; sâyanha = sâyâhna, 'evening,' seems to be always spelt with the cerebral.

The nasal vowel is sometimes replaced by a long one, as in siha = simha, 'a lion;' visati = vimsati, 'twenty;' sandåsa = samdamça, 'tongs;' ddthd = damshtrâ, 'jaw.' This happensoften in the preposition sam when it is followed by r, as in<math>sdråga = samråga, 'passion;' sdrambha = samrambha, 'clamour;' sdrambhi, 'clamorous,' Jât. iii. 259; sdrdniyo, Mahâparin. 2, is according to Senart's explanation, Mahâvastu, p. 599 = samrañjñiya for samrañjaniya, and = sârâyaniya of the northern Buddhists, which etymology is confirmed by the passage of the Lalitavistara, p. 530, where we read sammodanîh samrañjanîh kathâh kritvâ, corresponding to the Pâli sammodanîyam katham sdrdniyam vitisdretvâ, comp. also Vinaya texts, ii. 364. Sârdham loses its anusvâra in the compound saddhivihârika, 'fellow priest,' and also in the simple word in a passage of Buddhaghosa quoted C. 318.

The opposite process is the development of an unorganic anusvâra out of an explosive consonant. This process has taken very large dimensions in the Sinhalese down from the 10th or 11th century (see my Contributions to Sinhalese Grammar, pp. 12, 13), but we find the beginning of it already in Pâli, and it is not merely the corrupt spelling of the Simhalese writers as Childers believed (see Childers, s. v. nagaram). Moreover, a form nangaram occurs in the Samskrit of the northern Buddhists, Mahâvastu pp. 83, 440, so that we have

PALI GRAMMAR.

no reason to doubt its correctness in Pâli. Nânga for nâga, 'snake,' Dh. 102, occurs again in the introduction to the Samanta pâsâdikâ, and seems to be also a correct form. Other instances are sanantana=sanâtana, 'perpetual,' which Childers explains as sanam + tana; pinja=piccha, 'wing,' (piccha occurs at M. v. 2, 3); mahimsa=mahisha, 'buffalo,' Cariy. ii. 5, 1, and mahimsakamandala, 'the Andhra country;' the insertion is especially frequent in syllables which originally contain an r; sammunjani=sammarjani, 'a broom' (also written sammujjani, Jat. i. 161); samvari=çarvarî, 'the night;' dandha=dridha, 'slow' according to Trenckner, Pâli Misc. p. 65, and its derivatives dandhati, Jat. i. 345, Feer Etudes Bouddhiques 133, Cariy. viii. 13 (dantayi is a mistake); dandhâyanâ, Mil. 59, 105; dandhayitattam, Mil. 115; mankato=matkrite, Mil. 384; mankulâ=matkuna, 'bug,' Pât. 91, comp. Skt. mankhuna; añc= arc, 'to worship' according to Weber (we find, however, accayissam, Dâth. v. 17, and accita, Ab. 750); another anc occurs, Jât. i. 417, to explain udañcanî; sanda=sâdra, 'thick, coarse;' singâla=çrigâla, 'jackal;' vitamsâ=vitastâ, Mil. 114; nantaka =naktaka or laktaka, ' dirty cloth,' Jât. iii. 22, which Trenckner, Pâli Misc. 81, believes to be borrowed from an aboriginal language: the regular form lattaka occurs Dhp. 190. Some participles must be mentioned here of verbs that have n in the present, as randha=raddha, from randheti, 'to destroy,' Mil. 107, Jât. 537 v. 108, 538 v. 85; bandha=baddha, 'bound,' Kacc. 130, M. viii. 12, 1, where Buddhaghosa has baddham; pilandha=pinaddha, from pilandhati, 'to rear,' Mil. 337. The aorist agañchi, and the future gañchati or gañchîti, from gacchati, 'to go,' occur according to Trenckner, Pâli Misc. pp. 71-74, only in Sinhalese manuscripts, while the Burmese almost constantly write agacchi; besides, in the compound adhigacchati the aorist does not take the nasal, and in the plural before -imsa, -ittha, -imha, the form ganchi is very rarely used. I believe these forms to have followed the false analogy of adanchi from damç, 'to bite,' Jât. 444 v. 3, and of *ahanchi*, M. i. 6, 8, hanchema, Jât. ii. 418, from han, 'to strike,' which both have the nasal in the root.

We often find a nasal added at the end of a word, as in sakkaccam = satkritya, 'respectfully;' kudácanam = kudâ +cana, 'ever ;' aññadatthum=anyad+astu, 'only, exclusively ;' in a passage of the Samyuttaka Nikâya, quoted by Trenckner, P. M. 67, tatthañca=tatra ca, Mah. 5. In two instances we find n instead of the anusvâra: cirann âyati, Kacc. 26, and satánan esa dhamma for satánam, Jayaddisa Jâtaka. Besides, at the end of the first part of compounds, not only in such cases where it is to be considered as an accusative, as in atalamphassa=atalasparca, 'not touching the bottom;' sabbañjaha, 'leaving everything;' such instances are viralañjana = virala+jana, 'thinly peopled,' Att. 204; andhantama=andha +tamas, 'thick darkness;' attantapa, 'self-tormenting,' Childers s.v. puggala; ganamgana, 'with many linings, M. v. 1, 30; rathandhuri = ratha+dhur, 'the yoke of the carriage,' Saddhammopâyana v. 468; kabalimkâra=kabalîkâra (the writing of the Burmese MSS.) 'material food,' Gr. 43; jayampati, 'husband and wife,' most probably standing for jâyâpati and also tudampati, would go back to the same form if Childers' etymology is right; comp. Kuhn's Lit. Bl., no. 1, art. 2. The contracted form jampati occurs Dâth. iv. 25.

§ 7. Vowels Added or Dropped.

A vowel in the middle of a word has been elided in agga for

agra = agåra, 'house,' only used in compounds; dhîtå = duhitâ, 'daughter;' *jaggati* for jâgarati, 'to watch;' and in the termination *mhe* for mahe, of the 1st person pl., âtmanepadam.

A vowel at the beginning is dropped in laikára=alankára, 'ornament, decoration,' Dîp. 47; numati=anumati, 'consent,' Dîp. 35; valañjeti=avalañjeti, 'to use, to spend' (the full form occurs Jât. i. 111, Suttavibh. ii. 266); pinása, 'catarrh' =apinása, Skt. pînasa; parajjhati for aparajjhati, from râdh, 'to be injured;' pavana=upavana, 'side of a mountain,' according to Subhûti, Jât. i. 23, and perhaps vegha=avekshâ, 'care,' Mahâparin. 25, Rhys David's Buddhist Suttas p. 37.

About *pi* for api, *ti* for iti, *va* for iva and eva, we shall speak hereafter in the chapter on Sandhi.

The only instance of a vowel added in the beginning of a word is itthi=stri (istri in the Gâthâs of the northern Buddhists), an evolution which bears the closest similarity to that in the Romance languages, as, e.g. *ispirito*=spiritus.

§ 8. Consonants.

(1) Gutturals.—A Sanskrit guttural is represented by a palatal in cunda=kunda, 'turner,' Mil. 331; *iñj* and its compound samminj were also believed to come under this rule by Fausböll, Dhp. 273, and Weber, Ind. Stud. iii. 147, Ind. Streifen i. 131, iii. 397, who identified it with Skt. *ing*; other etymologies of these difficult words have been suggested since, of which I will only mention two, that of Senart, Mahâvastu p. 418, who believes samminj to stand for samvriñj, and that of Oldenberg, K. Z. xxv. 324, who derives it from añc. Against Senart there is only this to say, that the root vriñj occurs in the form vinn, Suttavibh. ii. 264, in the form vinj, Suttavibh. i. 127 (comp. Trenckner, P. M. 59); and Oldenberg leaves the double *m* entirely unexplained. The form saminjayati occurs also in the Brihad Âranyaka Upanishad, 6, 4, 23; and perhaps after all this may be the right etymology (Boehtlingk-Roth. s. v. sam + ing).

(2) Palatals.-A Skt. palatal is represented by a guttural in bhisakka = bhishaj, 'physician' (but Satabhisaja = çatabhishaj, Ab. 60); milakkha = mleccha for milaska, K. Z. xxv. 327; pabhanguna=prabhanjana, 'destruction.' Of much greater importance than this is the change of palatals to dentals, very frequent not only in Pâli but throughout the Indian vernaculars. Especially the Sinhalese, down from the 9th century, is fond of this change, of which I have given numerous examples in my Contributions to Sinhalese Grammar, pp. 17, 18. An instance of this change in Skt. is samsridbhis, from samsrij, T.B. i. 8, 1, 1, Cat. B. v. 4, 5. 3. As in Sinhalese throughout, so we find in Pâli already a limited number of instances where j passes into d, and c to s, seldom into t: digucchati and jiquechati=jugupsati, 'to despise;' tudampati compared with jayampatî and jampatî, Dâth. iv. 25, see Childers s. v.; digacchâ and jiyhacchâ=jighatsâ, 'hunger,' Pischel Beitr. iii. 249; pariccadi from pariccajati=parityaj, 'to forsake.' So s for c or ch in ussita=ucchrita, 'lofty,' Dîp. 19, Suttavibh. i. 79 (ucchita, Ab. 708), and its compound samussita in a passage of Papañca Sûdanî Alwis. Intr. 79; another samussita=samuccita, 'accumulated,' occurs at Dh. v. 147; ussaya, Suttavibh. ii. 224, must mean 'dispute, quarrel,' but I am not sure about its etymology; ussati, various reading, Ang. i. 5, 5, is explained by Morris as being the present of ussita=ucchrita, but I doubt very much the correctness of this identification; ussa=ucca,

'distinguished,' Fausböll, S. N. 164: t for c in tikicchå = cikitså, 'medicine;' uttittha for ucchittha=ud+cishta, 'left over,' M. i. 24, 1, Mil. 213, 214, see also Vinaya texts i. 152; vitacchika = vicarcikå, 'scabies.' In upacika, 'white ant'= Skt. upadîkâ, the Pâli seems to have retained the original palatal, while the Skt. has turned it into the dental: see Trenckner, P. M. 62. In kasina=kritsna, 'entire,' and dosina=jyantsna, 'clear, spotless,' I believe the t to be dropped first, and then the consonants to have been separated by svarabhakti (see above, and Ascoli, Krit. Stud. 249).

(3) Cerebrals.-As in all Indian vernaculars cerebralization has been carried in Pâli much further than in Sauskrit, although not so far as in Sinhalese and some other Prâkrits. The opposite process, viz. change of a Skt. cerebral to a dental in Pâli is very rare: cetaka=cețaka, 'servant,' Suttavibh. ii. 66, Cariy. ii. 4, 7; kotthuka=kroshtå, 'jackal,' Mil. 23, 118 (kotthuka, Jat. ii. 108); dendima=dindima, 'drum,' Jat. i. 355; dindima, Dîp. 86, Bv. i. 32, may either be the same or=dundubhi, 'kettle-drum;' dindibha = tittibha, 'name of a bird,' Ab. 643; kubbana=kurvana, 'doing.' In khanu=sthanu, 'the stump of a tree,' I believe the spelling with the dental to be the correct one, as we have it Dh. 107, Mil. 34, and in khânuka, Jât. i. 483; as for khanati, which Trenckner, Pâli Misc. 58, 59, believes to have influenced khanu, it is also spelt with the dental in several instances, and where it is spelt with the cerebral this can be easily accounted for by assuming a confusion with the root, 'kshan.' Ghâna=ghrâna, 'the nose,' is always spelt with the dental; gona, 'bullock,' spelt gona, Jât. ii. 300, is derived from the root gur, 'to growl;' gonaka most probably =gaunika, 'a woollen coverlet,' Gr. 9, M. v. 10, 4 (comp. Pischel, Beitr. iii. 236). Besides, we have the dental instead of

the cerebral in the terminations of the aorist-*ittho*=ishthâs, -*ittha*=ishta.

The Pâli has one sound belonging to the cerebral class which does not exist in classical Samskrit, but only in the dialect of the Vedas, viz. the cerebral l, distinguished from the dental by a dot under the line. It is very difficult to give exact rules for the use of this ! as the manuscripts are even less consistent in this respect than with regard to the dental and cerebral n. Generally speaking, l or lh between two vowels represents d, dh, but we find it used promiscuously also for the dentals. I have collected a number of instances from Pâli texts which will illustrate the use of these sounds : *âlulati* Pât. xvi., but âlulati Jât. i. 25, ii. 9, âlolâpeti Alw. i. 103; bubbula=budbuda, 'a bubble,' Jât. i. 68, bubbulaka, Samanta Pâsâd. 336, but bubbula, Mah. 175, 213, Att. 10, 190, bubbulaka, Dh. 31, 336; palása, 'leaf,' Dh. 42, but palása, 'pride,' Mil. 289; kabala, 'mouthful,' Pât. 22, Mah. 121, but kabala, Jât. i. 68, Mil. 180, kabalikâ, M. vi. 14, 5; kukkula, 'hot ashes,' Ab. 36, but kukkula, Jat. i. 73, 423; mála, 'pavilion,' M. iii. 5, 9, but mála, Gr. 2, Mil. 16, 47; cola, 'cloth,' Pât. 86, Mah. 219, colaka, C. v. 9, 4, but cola, Mil. 74, colaka, M. i. 25, 15, Mil. 53; celukkhepa, 'waving a cloth,' Mah. 99, 113, but celukkhepa, Samanta Pâsâd. 336; gâlha, 'deep,' Jât. ii. 75, but gâlha, Jât. i. 155, gâlhaka, Jât. i. 265; gâdha also is found in a later text, Saddhammopâyana, v. 394.

(4) Dentals.—The change of a dental to a cerebral is generally caused by a preceding r in the original form of the word; for instance, pajjunna=parjanya, Mah. 129 (pajjunna, Jât. i. 331), 'cloud,' katākata=kritākrita, 'done and undone,' M. vi. 14, 7, but katākata, Dh. v. 50; sakkata=saṃskrita, 'Saṃskrit,' in a passage of Buddhaghosa quoted C. 322 but sakkata, Kacc. 10; påsanda, 'heretical,' most probably = pârshadya, Kern, Açoka, 58. In a great many instances, however, an r has no effect on a following dental, as in muddika = mridhvika, M. vi. 35, 6; in attha = artha, 'cause,' alsospelt attha and atta; in the verb vattati, 'to begin,' = vartate (vattati means 'to be right,' see Childers, s. v.); pati and pati= prati (see Childers, s. v.); sithila, 'loose,' and sathila, 'crafty,' both from grath (comp. Hem. i. 89), sâthalika, Ang. ii. 5, 3. The n of the preposition ni preceded by pa = pra is always changed into n, as, e.g., panidahati=pranidhâ; after pari it is generally changed, as in parinayaka, Mil. 38, Jat. ii. 393; we find, however, also parinâyaka, Mah. 63, Mahâparin. 5, and parinaya= parinaya, 'marriage,' Ab. 318, parinibbana, parinitthanti, S. P. 332. On the other hand we have also instances where the change of a dental into a cerebral is not due to a preceding r, as in sûnâ=cûnâ, 'a slaughter-house,' also spelt sûnâ, M. vi. 10, 2, Suttavibh. i. 59; jannu = jânu, 'kuee,' Mahâparin. 69, Ab. 742; sakuņa=çakuna, 'a bird;' sakkuņāti = çaknoti, 'to be able;' sanim, sanikam=canais, 'slowly' or 'quickly;' sobhana = cobhana, 'resplendent;' dinna, past participle of dâ, 'to give,' in pariyadinna, Mil. 289; kavițtha and kapițțha, Jât. i. 237,=kapittha, 'the tree Feronia Elephantum;' kapithana=kapitana, 'the tree Thespesia Populneoides,' Suttavibh. ii. 35; patisallâna = pratisamlayana, 'seclusion,' spelt with the dental, Dîp. 63, Jât. ii. 77 and Mil. 138, v. l.; patisallina=pratisamlina, 'secluded,' spelt with the dental, M. ii. 1, 2; vipáteti = vipáteti, 'to crush,' C. v. 11, 1, if the reading introduced by Oldenberg is correct, but perhaps we ought to stick to vipphådetvå, given by the manuscripts, and derive this form from visphur with change of r to d, as in some other instances given below, p. 33. Vibhîțaka=vibhîtaka, 'beleric myrobalan,' Ab. 567, Jât. ii. 161, spelt with the dental, M. vi. 6, Att. 213; vidaddhata=vidagdhata, 'gallantry,' Att. 199; unnata=unnata, 'high,' Ab. 289, unnametave, Fausb. S. N. xi., unnati, ib. 158; sanati=svan, 'to sound,' Mil. 414, but sanita, Ab. 747, sanantâ, Fausb. S. N. 131. In some cases the change of the dental to the cerebral is due to the influence of a sibilant, as in most derivatives of the root sthâ, 'to stand,' e.g., thâmo=sthâman or sthâmas, 'strength,' Gr. 121, v. l., Kacc. 315, Sutta Nipâta, 34, ap. Senart, Mahâvastu, 628, spelt also thâmo several times (comp. Hem. iv. 267), thâna=sthâna, 'standing,' thapeti, caus., &c.; exceptions are indapatta=indraprastha, 'name of a town;' majjhatta=madhyastha, 'impartial,' where the aspiration is dropped besides, and santhagara=samstha + agâra, 'a royal rest-house,' M. vi. 31, 1, Mahâparin. 60. In derivations of the root vas, 'to dwell,' we find the cerebral and the dental used promiscuously. The past part. is vuttha or uttha, Kacc. 291; in composition adhivattha, Jat. i. 99, adhivuttha, Mahâpar. 23, upavuttha, Cariy. ii. 3, 2, parivuttha, Pât. 6: for the absolutive parivatthabba in the same line we should adopt the reading given in the foot-note. The roots dah 'to burn,' and das 'to bite,' take the cerebral d in those forms where there is no cerebral in the second syllable; there are, however, exceptions to this, as dayheyya, Mil. 84, Att. 192, 208, Dâth. iii. 10, upadamseti, Suttavibh. ii. 309; in some compositions of dah the d is changed to l, as in vilayhase (v. l. vilayhase and vidayhase), Jât. ii. 220, âlâhana, 'a cemetery,' parilâha, 'fever, pain.'

D is often changed to l, as in *âlimpana*, 'light'=*âdîpana*, Mil. 43; *âlimpâpeti*, 'to kindle,' Suttavibh. i. 85; *dohala*=dauhrida, 'the longing of a pregnant woman,' and *dohalinî*, Jât. ii. 395, Kacc. 203, *bila*=*vida*, 'part, bit;' in *bilasâ*, Kacc. 91, *bilaso*, Kh. 30, ulu=udu, 'lunar mansion,' $dveld=\hat{a}p\hat{p}da$, Prâk. âmela, Hem. i. 105, 202, 234; kovildara=kovidara, 'Bauhinia variegata;' uldra=udara, 'noble.' Dh passes into l in gharagolikd=grihagodhikâ, 'lizard.' N is changed to l in ela=enas, 'fault,' nela, 'faultless,' from the same, not as Trenckner suggests, from nariya (Childers, add. s. v.): comp. anelaka, Senart, Mahâvastu 572, pilandhati = pinah, 'to wear,' pilandhitvâ, Jât. i. 100.

Change of d to y, forming an analogy to the ya-çruti of the Jainaprâkrit, occurs in goyâna=godâna, in Aparagoyâna, 'name of one of the four Mahâdîpas, sâyati, 'to taste,'=svâdate, khâyita=khâdita, 'eaten,' and kâyitabba, C. v. 34, vikkhâyitaka, 'one of the Asubhakammațthânas,' Kern, Buddhism, 402. Avâhayi, Jât. ii. 354, must be derived from the root had, which we have in ohadâmase of the following verse.

I here add those cases where t is changed to l and t to r without being able to decide whether we have to adopt an intermediate form with d, d or not: $dlavi=\hat{a}tavi$, 'name of a city in India;' $dlavika=\hat{a}tavika$, 'dwelling in forests;' kakkhala=kakkhata, 'hard, solid,' Prâk. kakkhada, Pischel, Beitr. iii. 251 (kakkata, Mah. 57); khela=kheta, 'saliva,' in khelápaka, C. vii. 3, 1=khetâtmaka according to Kern, Buddhism, 180; kulaňka=kutaňka, 'roof,' in kulaňkapádaka, C. vi. 3, 4 (v. 1. kulunkap^o); palaccara=pataccara, 'old clothes.'

(5) Labials.—P is changed to m in sumanta = suparta,
'sleeping,' Mil. 368; dhûmâyati = dhûpâyati, 'to fumigate,'
Jât. i. 360, Samanta Pâsâd. 315, Dîp. 83. Bh is changed to m in dindima=dundubhi, 'a drum;' m is changed to v in vîmams =mîmâms, Kacc. 243.

(6) Half-vowels :---

(a) I is often changed to v, as in kiva=kiyant, 'how

much;' tivangika=tryangika, 'having three angas,' Saddhammop. v. 65; tivangula=tryangula, 'triangular,' Samanta Pâsâd. 336; kanduvati = kandûyati, 'to scratch,' Suttavibh. i. 117; migava=mrigayâ, 'hunting,' M. x. 2, 15; navutta=nayuta, 'a large number,' Dh. 143; sampavanka=samparyanka, 'friend,' Mahâparinibb. 6, Feer, Etudes Bouddh. 51, Weber, Indische Streifen, iii. 397; paţivimsa or paţivisa, M. vii. 11, 1, C. xii. 1, 1, Suttavibh. i. 60=pratyamça, 'portion,' with samprasârana, vivina=vijana, 'lonely,' Cariy. i. 1, 3; pavecchati, 'to give,' Jât. i. 28, Mil. 375, is identified with some hesitation to payacchati by Trenckner, Pâli Misc. 61. Y is changed to b in pubba = pûya, 'pus, matter;' jalâbu = jarâyu, 'the womb;' nibbujjhati=niryudh, 'to struggle,' C. i. 13, 2, Suttavibh. i. 180, partic. nibbuddha, Gr. 9, Mil. 232; to bh in sarabhû= sarayu, 'name of a river.'

Y is changed to r in kulira=kuliya, 'mattress,' according to Buddhaghosa, Suttavibh. ii. 40, 357, Pât. 86, spelt kulira, C. vi. 2, 3; vedhavera = vaidhaveya, ' the son of a widow;' sâmaņera=çrâmaņeya, 'a novice,' Kacc. 188; bâhira=bâhya, 'external' (bâhiya, Jât. i. 422); antarârati=antarâyati, 'to run into danger.' It is changed to l in laṭṭhi = yashṭi, 'stick,' jotalati = jyotayati, 'to lighten,' Kacc. 234, upakkamâlati = upakramâyati, 'to manœuvre,' ib. 235; to h in nahuta=nayuta, 'a vast number,' ranañjaha=ranañjaya, 'victorious in the battle,' Mil. 21, Trenckner, Pâli Misc. 83, sahampati=svayampati, 'epithet of Brahmâ,' M. i. 5, 5, Vinaya Texts, i. 86, upaṭṭhâhaka=upaṭṭhâyaka, C. i. 18, 5. Y is changed to j (as in Prâkṛit, see E. M. Beiträge zur Gramm. d. Jainaprâk. p. 31) in jantâghara, jantaggha=yantragriha, 'bath-room,' Oldenberg K. Z. xxv. 325.

(b) V is changed to y in $d\hat{a}ya = d\hat{a} \cdot a$, 'forest' $d\hat{a}yap\hat{a}la$, M.

x. 4, 2, comp. Senart, Mahâvastu, 633, *lâyati*, 'to reap,' Jât. i. 215, and *lâyeti*, Suttavibh. i. 64 = lâveti, châya = çâva, 'the young of an animal,' Ten Jât. iii. (generally châpa), caccara =catvara, 'a courtyard,' through an intermediate catyara. V is changed to b in paribbasâna, 'abiding,' from vas, Fausb. S. N. xii. 152; vârabâna = vâravâna, 'a woman's jacket;' sibbana, 'sewing,'=sîvana, and sibbinî, 'a needle,' M. viii. 1, 18, comp. Prâk. sivvinî, Pischel Beitr. iii. 260 (most probably from false analogy of sibbati=sîvyate, 'to sew'); subbaco=suvacas, 'compliant;' subbutthi=suvrishti, 'abundance of rain;' thabaka = stavaka, 'a cluster of blossoms;' balibadda=balivarda, 'an ox;' sambâhati=samvâh, 'to shampoo,' Jât. i. 293, Suttavibh. i. 83; sâribâ=çârivâ, 'name of a plant;' kabala=kavala, 'mouthful;' kabalikâ=kavalikâ, 'compress,' M. vi. 14, 5.

V is hardened to p in $l\hat{a}pa = l\hat{a}va$, 'quail,' Jât. ii. 59; $paj\hat{a}pat\hat{a}$ = prajåvatî, 'wife;' $pett\hat{a}piya = pitrivya$, 'cousin,' Trenckner, Pâli Misc.62; $pal\hat{a}pa = pal\hat{a}va$, 'chaff;' $ch\hat{a}pa = c\hat{a}va$, 'the young of an animal;' $opil\hat{a}peti$, 'to sink,' M. iv. 1, 3, vi. 26, 6, according to Trenckner, Pâli Misc. 63, from plu (Childers, add. derives it from pîd); $av\hat{a}purati$, 'to open' $ap\hat{a}punanti$ amatassa, $dv\hat{a}ram$, It. 84, v. 2, and $p\hat{a}purati$ or $p\hat{a}rupati$, 'to dress,' from var; $apad\hat{a}na = avad\hat{a}na$, 'legend;' and also $sapad\hat{a}nam$, 'regularly,' (Trenckner, Mil. 428, derives it from sapadi + ayana, which I do not quite understand) = sa + avadâna, according to Senart, Mahâvastu, 595; $sup\hat{a}na = suv\hat{a}na$, 'dog,' Mil. 147; dhopana= dhovana, 'cleaning,' Jât. ii. 117; $sip\hat{d}tik\hat{a} = civ\hat{a}tik\hat{a}$, M. vi. 7. C. v. 11, 2, 27, 3 (in the two latter passages, however, it seems to have another meaning—Buddhaghosa explains it by kosaka, 'a sheath').

(7) Liquids :-

The change of r to l is frequent enough in Pâli, although not

quite so frequent as in some other Indian dialects, especially the Mâgadhî of the inscriptions. Instances are ludda=rudra. 'dreadful,' Trenckner, Pâli Misc. 59; lujjati=ruj, 'to break,' M. viii. 21, 1 (Dhm. vinâse), and its compound palujjati, M. iii. 5, 9, Mahaparinibb. 40; paloka, 'the necessity of dissolution,' ib.; sajjulasa=sarjarasa, 'resin,' M. vi. 7; elâluka = ervâruka, 'cucumber,' Jât. i. 205, 312; elanda=eranda, 'Ricinus,' Assalâyanasutta 35; salaļa=sarala, 'a flower,' Jât. i. 13; puthuloma =prithuroman, 'a fish;' the preposition pari in palibodha, 'hindrance,' which, according to Childers, is the result of a confusion between parirodha and paribadha; palibuddhati, 'to hinder,' paligha = parigha, 'an iron beam;' paligedha, a compound of gedha, 'greed,' Ang. ii. 4, 7 (it has nothing to do with the Sinhalese pali, 'reverend,' in the Tissamahârâma inscription); palipanna=paripanna, 'covered,' M. viii. 26, 1; paligunthita, 'entangled' (also spelt palikundhita, Jât. ii. 92); páligunthima, 'laced,' M. v. 2, 3; palivetheti = parivesht, 'to wrap up,' phâlibhadda, Jât. ii. 163 = pâribhadra, 'the coral tree,' Prâk. phâlihadda, Hem. i. 232, 254; sukhumâla = sukumâra, 'youthful,' by amalgation with sukhuma, Trenckner 66; agalu =aguru, 'Agallochum;' vala=var, 'water;' kaţula = kaţura, 'buttermilk,' M. vi. 17, 1, Suttavibh. i. 66.

R is changed to d in purindada=purandara, 'a name of Iudra,' also written purinda, Cariy. i. 9, 3, sârandada, 'name of a yakkha,' Mahâparin. 4; it is changed to y in sâyanîya= sâranîya, according to Senart Mabâvastu 599 (see above, p. 21), mâtyâ, petyâ = mâtrâ, pitrâ, Jât. 527, v. 3, 5, 528, v. 26, Trenckner, Pâli Misc. 56.

L is changed to r in *åkurati*, from *åkula*, 'troubled ;' the Dhm. v. 94 has a verb *kura saddådanesu*, which possibly may be identical with *åkurati*, although it is not known from any

D

other text; kira = kila, 'they say;' årammana = âlambana, 'support,' arañjara=aliñjara, 'water-jar.'

L is changed to n in naláta = lalâta, 'forehead ;' nangala = lângala, 'plough ;' nangula = lângula, 'tail ;' dehanî = dehalî, 'threshold ;' tintinî = tintilî, 'the tamarind tree,' comp. tintinanta, Jật. i. 243.

(8) Sibilants :--

As there is only one sibilant in Pâli, ç and sh are also represented by s. There are, however, a few exceptions to this rule: ç is represented by ch in *chava* = çava, 'corpse,' M. iii. 12, 7, and as an adjective 'vile,' *châpa* and *châya*, 'the young of an animal,' *cheppâ* = çepa, 'tail;' it is represented by d in $d\hat{a}ka = c\hat{a}ka$, 'pot-herb,' M. vi. 35, 6; 36, 8.

H sometimes returns to its original medial aspirate, and this gives us Pâli forms which are older than the corresponding ones in Samskrit: the root nah in composition with api, ava, upa, vi, gives pilandhati, onandhati, upanandhati, vinandhati; these forms show us that the original form of the root was nadh and not nagh, as one would feel inclined to think from comparing the Latin necto, (see Whitney's Samskrit Grammar, p. 76.) Similar forms are agghati, 'to cast,' compared with arahati, dubbhati, 'to cheat,'=druh, Jât. i. 267, iii. 13, 192, and the adjectives belonging to the same root, dúbhin, Jât. ii. 386, dúbhaka, Jât. i. 363; adrúbháya, 'truly, without falsehood,' M. x. 2, 17; ghammati=hammati, 'to go,' Naigh. 2, 14, Prâk. hammaī, Hem. iv. 162, Hâla 694, ghañña, 'destruction,' from han; the root har is found in its older form in samgharitabba v. l. to samharitabba, M. i. 25, 10. Dh. 143.

A curious change of h to s occurs in senesika = snaihika, 'oily,' M. vi. 1, 4, and golisa = goliha, 'name of a plant.'

§ 9. General Remarks referring to Consonants of Different Classes.

(1) Aspiration is very frequent in Pâli with hard and soft consonants. Instances are: satthi=çakti, 'ability,' dhona= drona, 'a measure of capacity,' Dh. 43, Fausb. S. N. 58, 149; sukhumála=sukumára, 'youthful;' thambhakari=stambakari, 'rice;' kiñcikkha=kiñcid+ka, 'some trifle;' khalopi=karoți, 'pot,' Mil. 107, according to Trenckner, Pâli Misc. 60 (also spelt kalopi); Khandha=Skanda, 'the god Skanda,' through confusion with khandha, 'shoulder;' paccaggha = pratyagra, 'new ;' phâliphulla, 'in full blossom,' Jât. i. 52, Mahâparin. 53; phâlibhadda = pâribhadra, Jât. ii. 163; phâsu, 'agreeable,'= prâcu according to Trenckner, Pâli Misc. 81-I have derived it, following Paul Goldschmidt, from a hypothetical form smarçu (see my contrib. to Sinh. Gr. p. 13, note); phâsukâ=pârçukâ, 'a rib,' also written pâsukâ, C. x. 10, 1; phussa=pushya, 'name of a month,' and phussita=pushpita, 'blossoming;' phârusaka=parûsaka, 'Grewia Asiatica,' M. vi. 35, 6; phalu =paru, 'joint;' phallava=pallava, 'sprout,' Jât. iii. 40; sankhalika = sankalika, 'heap,' Jat. i. 433, Suttavibh. i. 105, Ang. p. 114, through confusion with sankhalikâ, 'chain,' Senart, Mahâvastu 387; the reverse process is found in Prâk., where crinkhala is changed to samkala, according to Hem. i. 189; valabhamukha=vadabamukha, erapatha=airavata, 'king of the Nâgas, Jât. ii. 145=C. v. 6, spelt erapatta Saddhammopâyana v. 349, erakapatta, Dh. 344; apatha=apata, 'path,' Trenckner, Mil. 298, M. v. 1, 25, Samanta Pas. 300; sunakha, 'dog,' and lâmakha, 'vile,' Jât. ii. 430, are most probably older forms, as

PALI GRAMMAR.

we have the aspiration also in Prâk. suņaho, Hem. i. 52, Pischel Beitr. vi. 92.

(2) The aspiration is dropped in khudå=kshudhå, 'hunger;' khudita, 'hungry;' upådisesa=upadhiçesha (and with change of the position of the component parts sesopadi, Dath. ii. 36), Oldenberg, Buddha, p. 437, ff.; matta=mrishta, 'polished;' abhivatta=abhivrishta, 'wet from rain,' Mil. 176; anovatta, Jât. i. 18; patanga = phadinga, 'flying insect;' paggava = phalgava, from phalgu, 'herb,' Jât. ii. 105; anangana, 'free from impurity,' compared with anhas, 'sin,' Jainaprâk. ananhaya (E. M. Beitr. p. 33); rajovajalla and rajojalla, Ass. S. 13, Jât. i. 390, 'dust and dirt,'=rajas+jhalla, comp. Jainapr. jalla, E. M. Beitr. 34; avajjeti=avadhyå, 'to reflect,' Senart, Mahâvastu 377; a curious instance of dropped aspiration is kâ, Jât. ii. 258=khâ, 'spring,' Naigh., and perhaps we have to notice the same process in kakkåreti, 'to express disgust,' Jât. ii. 105, Five Jat. 29,=khat or khat+kareti, which, however, might be also derived, with Childers, from kat + kareti. As in Greek, two aspirations are not allowed in two syllables following each other, and when this happens the first is dropped, as, e.g., nikkaddhati=nishkrish, 'to cast out.'

(3) There are also instances where the aspirate drops its first part and h alone remains, as is done frequently in Samskrit and later on in all the vernaculars. I believe, however, that a number of instances, especially those with bh, are only due to the bad writing of the Sinhalese, in whose alphabet h and bhare so easily confounded; M. i. 1, 3, four MSS. have the form *have*, but Buddhaghosa reads *bhave*, which shows us clearly the etymology of the word; the same process can be observed in the form *hupeyya*, M. i. 6, 9 (according to Trenckner, Pâli Misc. p. 62, a Burmese error for *huveyya*). Other instances are momuhato from momugha, 'foolish,' Fausb. S. N. 161, ruhira = rudhira, 'blood,' Jât. i. 274, ii. 276, Cariy. i. 9, 13, C. vii. 3, 9; at Bhikkhunîpâc. 60, Minayeff, p. 108, reads ruhita, the Suttavibh. ii. 316 rúhita with the v. l. rudhita, 'boil.' Suhita, Jât. xx. 1, 4, quoted by Minayeff, § 43, is = Skt. suhita and not sukhita.

(4) Softening of a hard consonant, that is to say, substitution of a sonant for a surd, is frequent enough in Pâli, as in pasada=prishata, 'the spotted antelope,' Cariy. iii. 13, 2; uda=uta, 'or;' ruda=ruta, 'cry,' Jât. i. 207 (comp. ii. 388, where we have the readings rûda and rûta); kalandaka=kalantaka, 'squirrel;' patigacca = patikacca (v. l.) from patikaroti, 'to provide against future events,' M. i. 31, 1, Trenckner at Mil. 48, 421; vedhati=vyathayati, 'to tremble;' balasata= parasvant, 'rhinoceros,' Trenckner, P. M. 59; sujá=sruc, 'a ladle ;' puñj for puñch=proñch, 'to wipe,' Jât. i. 47, 318, 352. A certain instance of this change is in my opinion jhâyati= kshâ, 'to burn,' although Trenckner, P. M. 65, objects; I have found several new forms of this verb and its causative jhapeti or jhapeti, in addition to those given by Childers : jhatvå, Jåt. ii. 262 (Comm. kilametvâ); jhatta, Mah. 146, Dh. 325; nijjhatta, Mil. 209, and most probably also japeti, Mil. 171, which seems to be a misprint; comp. nijhapeti, 'to injure,' in Açoka's pillar edict, no. iv. Cunningham, p. 112; Kern, Ind. Ant. v. 273; Prâk. jhijjai, Hem. ii. 3.

Instead of p we generally find v in this case, as in *åvelå*= âpîda, 'garland;' *theva*=stepa, 'drop,' Pischel Beitr. iii. 239, vi. 102 (Hem. ii. 125 derives it from stoka); posâvana, 'supporting,' according to Childers=posâpana; vyâvața=vyâprita, covered,' Trenckner, P. M. 63, and veyyâvacca, veyyâvațika, 'service.'

(5) The reverse process, hardening of a soft consonant, or substitution of a surd for a sonant, occurs in payaka=prayâga, 'sacrifice,' Jât. 543; ajakara = ajagara, 'the boa constrictor,' Jât. iii. 484; kilâsu = glâsnu, 'lazy,' Suttavibh. i. 8; katupika, 'going up to the waist,' Jat. 119, compared with katupaga, Suttavibh. ii. 340; dűrűpaka, Jât. ii. 167; kulupika, C. x. 13, 1; samsati for samsadi, loc. of samsad, 'congregation,' Jât. iii. 493, 495; parisati and parisatim, loc. of parishad, Suttavibh. ii. 285; kusîta for kusîda, 'lazy,' already in the Maitrâyanî Samhitâ; pipa=piba, 'drink,' Jât. i. 459; pokkharasâtaka=pushakarasâdaka, 'name of a bird;' dhopana=dhovana, 'washing,' Jât. ii. 117; laketi = lageti, 'to stick;' and lakanaka, 'anchor,' Mil. 377; thaketi=sthagayati, 'to cover,' sometimes spelt thakk°., Suttavibh. ii. 54; palikha = paligha, 'an iron beam,' Jât. 545; chakala = chagala, 'goat,' Suttavibh. i. 166; chakana=chagana, 'dung,' M. vi. 9; palikunthita=parigunthita, 'entangled,' Jât. ii. 92; pabbaja = balvaja, 'reed' (spelt babbaja, Suttavibh. i. 90); pappata = parvata, 'mountain,' I. O. C. 104; tippa for tibba = tîvra, 'sharp,' Mil. 148; tuvamtuva, 'quarrel' = dvandva, through confusion with the pronoun tvam; pâceti = pra+aj, 'to drive,' and pâcana, 'a goad,' Cariy. i. 1, 1; sateratá = çatahradâ, 'lightning;' jannutaggha=janudaghna, 'knee-deep,' Prak. °thaggha, Paiyal. 249; Yamataggi=Jamadagni, 'name of a rishi;' vipätikā=vipādikā, 'abscess on the foot.' The root dha in some derivations substitutes th, as pithiyati, 'is covered' = apidhiyate (for which the Burmese write pidhiyati); upatheyya, 'cushion.' A similar process with regard to the root dhmâ can be observed in santhamam=sandhaman, 'blowing,' Jât. i. 122.

 (6) An interchange between the different classes of mutes is not infrequent in Pâli. Instances are kipillika = pipîlika, 'an ant,' also written pipîlika, Saddhammopâyana, v. 23. pipillika, Jât. i. 202; takkola = kakkola, 'Bdellium,' Jât. i. 291, also used as name of a country, Mil. 359, where it most probably corresponds to Skt. Karkota; jalúpiká = jalúkiká, 'a leech,' Mil. 407, originally jalauka, 'living in the water ;' khajjopanaka = khadyota, 'the fire-fly,' Dh. 338, Dâth. iii., 78; qaddûhana = dadrûghna, 'a small measure of space or time,' Trenckner, P. M. 89; kalopi = karoți (written khalopi, Mil. 107, Ab. 456), 'a pot;' *âlupa* = âluka, 'ebony,' Jât. 446, v. 1; chiggala = chidra + la, 'hole,' Childers, s. v. tâla, Pakudha = Kakudha, C. v. 8, 1. In most of these cases the reason of the change is dissimilation, as we find it also in phasulika = parçukâ+ika, 'a rib,' M. i. 61, 1; sallalikata = çalyakîkrita, 'pierced,' Jât. i. 180. Other instances are not quite so easy to explain, such as rumbh for rudh in sannirumbhitvâ, Jât. i. 62, 80, 163, ii. 6 (v. l. sannirujjhitvâ), comp. Fausböll, Ten Jât. 93, and sakk if this is really = sarp, as Trenckner, P. M. 60, believes; perhaps we ought to derive it from cankram with a similar abbreviation of the reduplicated root, as in jaggati for jågarati, but I give this merely as a hypothesis. The change of c to s would make no difficulty; the dissimilation adduced by Trenckner does not hold good for all instances, as in osakkati, ussakkati, nissakkati, visakkiya, Suttavibh. i. 74, we have no p in the prepositions; comp. also Prâk. osakka, 'departed,' Pâival. 178. Khânu, 'the stump of a tree,' is rightly referred to Skt. sthânu by the Prâk. grammarians Vararuci and Hemacandra, and the same change of sth to kh is also adopted for the explanation of duhkha = duhstha by Jacobi K. Z. xxv. 438 ff., comp. Ascoli 236. Chambhati is derived from stambh, 'to tremble,' by Trenckner; Ascoli, p. 256, rejects this derivation, but does not suggest any other instead. From the Samskrit of the northern Buddhists we might compare icchattam = itthattam 'existence,' Mahâvastu, 417.

PALI GRAMMAR.

§ 10. Consonants Added or Dropped.

A consonant is dropped in the beginning of a word in $\hat{u}k\hat{a}$ or $\hat{u}ka = y\hat{u}ka$, 'louse,' Prâk. $\hat{u}k\hat{a}$, Pischel Beitr. iii. 241.

A consonant is added at the beginning of some verbal forms commencing with a u, which originates from Samprasâraṇa, as in vuccati = ucyate, vutta = upta, 'sown,' Mil. 375; vutthaand vusita from vasati, 'to dwell;' vusîmat, 'accomplished,' Fausböll, S. N. 208. This euphonic v is not only used after vowels but also after anusvâra, and sometimes even at the beginning of a line, as in vutthahante, Mah. 30. Where the uis long, we have to assume two prepositions, as in vupasamati $= vyupa^\circ$, comp. Senart, Mahâvastu, p. 441, and the same where the v is followed by o, as in $vokkamati = vyutkram^\circ$, Hem. i. 116; and Pischel's remarks, avossajimsu, Dâth. iii. 15.

In the middle of a word consonants are often elided through Samprasâraṇa. The syllable ya is contracted to i in mahâbodhingana = mahâbodhyangana, 'the yard of the great Bo tree,' Mah. 176; pațivimsa or pațivisa, 'portion,'= pratyamça; aticchatha, 'go further on,' from ati+acch; nibbijjhati = nirvyadh, 'to pierce;' saccika = satyaka, 'true,' Mil. 226; pattiya = pratyaya and pattiyâyati, 'to believe,' Jât. i. 426 v. l.; it is contracted to e in vedhati = vyath, 'to tremble;' to i in vitivatta = vyativritta, 'having passed;' avivadâta = avyavadâta, 'confused,' Fausböll, S. N. 149; vîtihâra = vyatihâra, 'long step.'

The syllable $y\hat{a}$ is contracted to \hat{i} in visiveti = viçyâpayati, 'to warm oneself,' sometimes written visibbeti through confusion with visibbati, 'to unsew,' e. g., M. i. 20, 15 Pât. 15, Suttavibh. ii. 115; from the same root $\hat{a}\hat{s}\hat{i}yat\hat{i} = \hat{a}cy\hat{a}yat\hat{i}$, 'to

40

cool oneself,' Mil. 75; thîna = styâna, 'idleness,' but patthinna, 'stiff,' M. viii. 11, 2; to i in anabhijjhita = anabhidhyâta, 'not coveted,' M. viii. 12, 2, where, however, the y is also contained in the group jjh; to e in jeyyo=jyâyas, 'better;' ajjheyyaka =âdhyâyaka, 'teacher,' Rasavâhinî 19.

The syllable va is contracted to u in supina = svapna, 'sleep;' turita = tvarita, 'hasty;' kuthita, 'cooked,' from kvath, Vinaya texts, ii. 57; it remains doubtful whether the root kuth, 'to be distressed,' Dhm. Mil. 250, Suttav. i. 108, is the same; Dh. 155 we have $koddhetv\hat{a}$, 'having cooked;' to o in sobbhanu = svarbhanu, 'the ascending node;' sobbha =çvabhra, 'hole,' and kussobbha, 'small water,' Fausböll, S. N. 131; to d in catdha = catu + ahan, 'four days,' M. i. 72, 2.

The syllable $v\hat{a}$ is contracted to u in $latukik\hat{a}$ from latvåka, 'quail;' the syllable $v\hat{i}$ in duratta = dviråtra, 'two nights.' Dohalinî, which Kacc. 203 also considers as a compound of dvi, has nothing to do with this numeral.

Aya and ayi are contracted to e in a great number of causative verbs and also in a few primitives, as apasseti = apâçrayati, 'to lean,' C. vi. 20, 2; neti = nayati, 'to lead;' apassena = apâçrayana; ajjhena = adhyayana, 'reading,' Jât. iii. 114, Fausböll, S. N. 40; acceka = atyayika, 'accidental.' Aya and dya are contracted to e in paleti = palâyati, 'to flee;' to â in Kâtiyânî and Kaccânî=Kâtyâyanî, Jât. iii. 427; Moggallâna= Maudgalyâyana, ekânika = ekâyanika, Mil. 402; upațthâka = upatthâyaka, 'servant,' also written upațthaka with ă, Bv. ii. 70; patisallâna = pratisamlayana, 'solitude;' abbhâna = abhyayana, 'rehabilitation;' upajjha = upâdhyâya, 'preceptor;' abhiñña = abhijîâya, 'having known;' pațisankha = pratisankhyâya, 'having reflected.'

The group ariya is first changed to ayira and then contracted

PALI GRAMMAR.

to era in âcera = âcârya, 'teacher,' Khuddasikkhâ; or to îra, as in *parihîrati*=pariharyati; asamhîra = asamharya, 'unconquerable,' Dîp. 31.

Iya is contracted to i in kittaka = kiyattaka, from kiyant, 'how much;' to e in etta, ettaka = iyatta, from iyant, Mahâvastu, p. 384; in Prâk. we have kettia and ettia, Hem. ii. 157, Goldschmidt, Prâkritica, p. 23. Trenckner takes etta to be abridged from ettaka, Pâli Misc. 65, note 23.

Ava is contracted to o very often in compounds formed with the preposition ava, as onita=avanita, 'cleansed,' in the phrase onîtapattapâni, frequent in the Vinaya, see Vinaya Texts i. 83; ojahati=avahâ, 'to forsake,' aorist passive ohiyi, Dh. 158, ohiyyaka, 'left behind,' Suttavibh. i. 208; odahati = avadhâ, 'to deposit;' vossagga=vyavasarga, Lotus, 312, and avossajjimsu, Dâth. iii. 15; ogadha=avagâdha, 'belonging to;' ora = avara and avâra, 'lower' and 'hither;' opatta = avapattra, 'without leaves,' Jât. iii. 496; uddosita=udavasita, 'stable,' M. iii. 5, 9, C. x. 24, Suttavibh. i. 200, Ab. 213. Other instances are pahonaka = prabhavanaka, 'sufficient,' and pahuna = prabhavana, Mah. 205; pona = pravana, 'sloping;' opeti = âvapati, 'to put,' Trenckner, Pâli Misc. 78; osâpeti causative of âviç, 'to sling,' Jât. i. 25. In anavaya = anavayava, 'perfectly versed in,' Mil. 10, and appatissa=appatissava, Jât. i. 217, the last syllable is dropped because the word was too long.

Instead of *o* we also find *u* in the same or similar cases, as dhadati=avahad, 'to befoul with excrement' (see above, p. 15); ujjháyati = avadhyâ, 'to be annoyed;' $u\tilde{n}\tilde{n}\hat{a} = avaj\tilde{n}\hat{a}$, 'contempt,' and $u\tilde{n}\tilde{n}\hat{a}tabba$, Feer. Et. Bouddh. 128; $\dot{a}huneyya =$ $\dot{a}havanîya$, Mahâparin. 20 comp. the commentary to Ang. ii. 4, 4.

The group apa can undergo the same changes as ava, and it

CHANGES OF CONSONANTS AT THE END OF A WORD. 43

is sometimes difficult to find out which preposition we must assume as the corresponding Samskrit word : *ovaraka*=apavaraka, 'store-room,' Jât. i. 391; *oggata*=apagata in *oggate suriye*, 'after sunset,' Suttavibh. ii. 268, *ottappa* = apatrâpya, 'fear of sinning,' Senart, Mahâvastu 463.

Other contractions have taken place in oka=udaka, 'water;' Kuçinârâ = Kuçinagara; koṭṭhaka = koyashṭika, 'paddy bird,' Five Jât. 36; jantaggha=yantragriha, 'bath-room,' Suttavibh. i. 55; paccūsamaya = paccūsasamaya, 'morning;' changula = shaḍangula, 'six inches,' Mah. 211; pavissāmi for pavisissāmi, Jât. ii. 68; sosârita=su + osârita; dosârita=durosârita, 'duly and unduly restored,' M. ix. 4, 11; vivicchâ = vicikicchâ, 'doubt;' dūpadhārita = durupadh°, Suttavibh. ii. 275, the opposite to sūpadhārita, 'well kept in mind,' M. v. 13, 9.

Metathesis is very frequent in Sinhalese, see my Contrib. to Sinh. Grammar, p. 14; in Pâli we have only a few instances, as upâhanâ=upânah, 'shoe;' pârupana for pâvaraṇa or pâvurana, Suttavibh. i. 180, 'upper robe,' see Pischel, Beitr. iii. 247; kasața=sakața, 'insipid,' Mil. 119, Dh. 275, Jât. ii. 97, Ang. ii. 5, 5; cilimikâ, C. vi. 2, 6 and cimilikâ, Suttavibh. ii. 40, most probably go back to a form cilamîlikâ or ciliminikâ, 'an ornament,' Vyut. 208, comp. Vinaya texts ii. 153.

§ 11. Changes of Consonants at the End of a Word.

According to the rule given above, p. 23, we only find vowels or nasals at the end of a Pâli word. Every nasal is changed into anusvâra and a preceding long vowel shortened in consequence. Very often the anusvâra is dropped altogether especially in verse when a short syllable is required by the metre, as *etam*, *buddhâna sâsanam* = etad buddhânâm çâsanam, 'this is the command of the Buddhas,' Dh. v. 183. Other cases will be treated of in the chapter on Sandhi.

Before a word beginning with a consonant the anusvâra can be changed into the nasal of the corresponding class, as in *hirin tarantam*, Jat. iii. 196. Before a word beginning with a vowel the anusvâra may be changed into m, as in *caram atandito* for caran=carant, Dh. v. 305.

The termination as generally becomes o whatever the consonant beginning the next word may be, as in the nom. sing. of a-stems almost regularly. There are a few exceptions to this rule which are considered as Mâgadhisms by most grammarians. A passage of this kind occurs in the Sâmaññaphalasutta Gr. p. 121, n'atthi attakâre n'atthi parakâre n'atthi purisakâre, ' there is no action on our part, there is no action on the part of others. there is no human action.' Another Magadhizing passage from Majjhima Nikâya is quoted by Trenckner, Pâli Misc. p. 75: ânañjâdhimuttassa purisapuggalassa ye lokâmisasaññojane se vante, where we find the e used for a neuter noun. I feel sure that a more careful study of Pâli literature will furnish us a great many more passages of this kind. They all agree in this point, that the nom. in e is only formed of stems in a and never of any consonantal stems, the same rule which holds good for the Jainaprâkrit, see E. M. Beitr. zur Gram. d. Jainapr. p. 38. About the origin of this e several opinions have been advanced, but I will not discuss them here, as the subject belongs more especially to Prâkrit grammar. The vocatives bhante and bhikkhave are taken over directly from the Magadhi.

Besides these nominatives in e we have several adverbs terminating in as, which change the as to e, as suve=çvah, 'tomorrow;' tadahe=tadahas, 'on that day,' which also occurs in

CHANGES OF CONSONANTS AT THE END OF A WORD. 45

the form tadahu; atippage (and atippago)=atiprâgaḥ, Senart, Mahâvastu 418, most probably also tâvade, yâvade, which, however, are explained by Childers as abridged forms of tâvadeva, yâvadeva.

The s is dropped and the a alone remains in okamokata for okamokatas, 'from the water,' Dh. v. 34; tavatimsa = trayastrimça, 'thirty-three;' and with lengthening of the a, rajapatha = rajahpatha, 'dust-hole;' jaramarana = jaras + marana, 'decay and death.'

The syllable as is changed to u through an intermediate o in tadahu, mithu=mithas, 'mutually;' mithubheda, M. vi. 28, 8; sajju=sadyas, 'instantly.'

Other consonants at the end of a word are simply dropped, and the remaining vowel generally is not changed. There are, however, some cases where it is lengthened, shortened, or a nasal is added :---

(1) It is lengthened in dhi = dhik, 'fie;' braha = brihat, 'mighty;' parisa = parishad, 'assembly.'

(2) It is shortened, as in kayira for kayirâ = kuryât, Das.,
 Jât. 28; assa=syât, &c.

(3) A nasal is added, as in the verbal terminations um=us, eyyum=eyyus, isum=ishus, sanam=sanat, 'always;' sanim= çanais, 'slowly' or 'quickly,' Mah. 156; visum = vishvak, 'separately;' khattum=kritvas, a form which occurs also in the Samskrit of the northern Buddhists, see Senart, Mahâvastu 541; manam = manâk, 'nearly,' Jât. i. 149, M. ii. 12, 1, the same form in Prâk. Hem. ii. 169; tiriyam=tiryak, 'across.'

§ 12. Compound Consonants.

Compound consonants are generally assimilated, as in all Prâkrit dialects. Sometimes the assimilation is avoided by inserting a vowel, as we have seen above, p. 12. In the beginning of a word, instead of a double surd or sonant resulting from assimilation, a single surd or sonant is written, and instead of a surd or sonant aspirate only the aspirate.

The assimilation is generally progressive, so that the first consonant is assimilated to the second, especially so with explosives.

Kt becomes tt in mutta=mukta, 'released' (but kk in patimukka, 'fixed'); satti=çakti, 'power' (also written satthi); sattu=çaktu, 'barley' (also written satthu at Pât. 89); sippi 'pearl oyster,' which Trenckner, Pâli Misc. 60, identifies with cukti, I believe to be borrowed from some vernacular language.

Kth becomes tth, as satthi=cakthi, 'thigh.'

Gdh becomes ddh, as in duddha=dugdha, 'milk.'

G+bh=bbh: pabbhâra=prâgbhâra, 'a cave.'

D+g=gg: khagga=khadga, 'a sword.'

T+k=kk: ukkára=utkára, 'dung.'

T+p=pp: uppatati=utpat, 'to jump.'

D+g=gg: puggala=pudgala, 'individual.'

D+gh=ggh: uggharati=ud+ghri, 'to ooze.'

D+b=bb: bubbula=budbuda, 'a bubble.'

D+bh=bbh: ubbhijjati=ud+bhid, 'to burst;' ubbhitodaka =udbhritodaka, Gr. 140.

P+t=tt: vutta=upta, 'shaven.'

B+j=jj: paţikujjeti=prati+kubj, 'to cover,' Jât. i. 50, 69, Mahâparin. 56, Mahâvastu 377. $\begin{array}{l} B+d=dd: \ sadda= cabda, \ `a \ sound.'\\ B+dh=ddh: \ laddha= labdha, \ `taken.'\\ \end{array}$

When an explosive meets a following nasal the assimilation is generally retrogressive, or is avoided by the insertion of a vowel. There are, however, some instances also of progressive assimilation :---

K+n becomes kk in sakkoti or sakkunåti (where the double k can only be explained by false analogy)=çaknoti, 'to be able;' kukkusa=kiknasa, 'grain,' C. x. 27, 4.

K+m = mm: rummavati = rukmavati, 'name of a verse,' Vuttod. ap. Fryer, Pâli Studies, p. 8.

G+n=gg in aggi or aggini=agni, 'fire,' Kacc. 54, Jât. iii. 320; gini, S. N. 3.

Gh + n = ggh: viggha = vighna, 'obstacle.'

 $J+n=\tilde{n}\tilde{n}: a\tilde{n}\tilde{n}d=\hat{a}j\tilde{n}\hat{a}$, 'order.' [In $o\tilde{n}dta$ and $ava\tilde{n}dta=$ avajata, 'low born,' Pât. 83, and $kola\tilde{n}\tilde{n}a=$ kulaja, 'high born,' Mil. 256, the roots *jan* and *jñd* are confounded.]

D+m: kudumala=kudmala, 'a bud.'

T+n: sapatti = sapatni, 'hostile,' but gahapatani = grihapatni, 'house-wife,' ratana=ratna, 'jewel.'

T+m: attå and åtumå=åtmå, 'self;' tumo=tmanå, Oldenberg K. Z. xxv. 319.

Th+n=tth: abhimatthati=abhimathnâti, 'to grind.'

D+m: chadda=chadman, 'roof;' paduma=padma, 'lotus;' dammi=dadmi, 'I give.'

Dh+n: bunda=budhna, 'the root of a tree.'

Dh+m: idhuma = idhma, 'fire-wood ;' venudhama = venudhma, 'a flute-player ;' and from the same root uddhumâyati = uddhmâ, 'to be blown up.'

P+n: pappoti and papunati=prapnoti, 'to obtain;' supina and soppa=svapna, 'sleep.' P+m: pâpimâ=pâpman, 'sinful.'

Groups containing a nasal and following explosive generally remain unchanged; the following are exceptions :---

Nc becomes $\tilde{n}\tilde{n}$ in $pa\tilde{n}\tilde{n}asa = pa\tilde{n}c\hat{a}cat$, 'fifty;' nn in $pan-nuvisam = pa\tilde{n}cavimcati$, 'twenty-five,' Jât. iii. 138; nn in pannarasa, 'fifteen,' pannarasi, 'the day of the full or new moon,' comp. Sinh. panas, Prâk. panavannâ, Pischel, Beitr. iii. 245.

Nj becomes nn in vinnitva and vinnapetva from vrinj, Suttavibh. ii. 264, but avinji, Suttavibh. i. 127, avinjana, ib. 121, and with hardening of the j to ch, avinchana, C. v. 14, 3, 4.

Nd becomes nn in *punnarika* = pundarîka, 'lotus,' in a passage of the Ang. quoted by Oldenberg, Buddha 424; simplified in *bhânaka*=bhândaka, 'a jar;' *dd* in *deddubha*=dundubha, 'a kind of lizard.'

Mb becomes mm in ammâ = ambâ, 'mother;' ârammana = âlambana, 'support.'

When two nasals meet progressive assimilation takes place, as in *ummagga* = unmârga, 'an underground watercourse,' *ninna*=nimna, 'deep.'

Groups containing y generally assimilate the same to the other element. If, however, the first element is a dental the whole group passes into the palatal class. In many cases the assimilation is avoided by the insertion of an i or the group remains unchanged.

 Gutturals: ussukka = autsukya, 'zeal ;' sokhiya = saukhya, 'happiness;' åkhyåta=âkhyåta, 'announced ;' yogga =yogya, 'proper.'

(2) Palatals: vuccati = ucyate, pass. of vac; joti = jyotis, 'light;' jiyd and $jyd = jy\hat{a}$, 'the bow-string;' and adejjha = adhijya, Jât. iii. 274.

(3) Cerebrals: kudda = kudya, 'a wall;' âdhya, addha = âdhya, 'rich;' puñña=punya, 'good.'

(4) Dentals: $dhacca = \hat{a}hritya$ for $\hat{a}h\hat{a}rya$, 'having told;' dhacca = avahadya, 'having befouled;' ekacca = ekatya, 'a certain,' according to Senart, Mahâvastu 388, comp. ekacciya, M. viii. 14, 2 (Childers and Trenckner, Pâli Misc. 56 derive it from ekatara); $dvajjati = avadhy\hat{a}$, 'to consider;' anna = anya, 'other;' cicca = cintya for cintayitvâ. The assimilation does not take place in cetya, cetiya = caitya, 'a relic-shrine;' vyattaya = vyatyaya, 'opposition;' pataggi = pratyagni, 'fire in return;' pdtanki = pratyankin, 'a sedan chair,' M. viii. 10, 3; pdtekka from pratyeka, 'singly' (the regular form pacceka occurs frequently); pasidiya = prasîdya, 'believing,' Mah. 5; in compositions with ud we obtain the group yy, as uyyoga =udyoga, 'departure.'

(5) Labials: tappati=tapyate, pass. of tap; labbhati=labhyate, pass. of labh; lepya=lepya, 'plastering.'

(6) After r we generally find epenthesis, as in *dcariya* = $\hat{a}c\hat{a}rya$, 'teacher;' suriya = $\hat{s}\hat{u}rya$, 'sun;' and sometimes the position of the sounds is inverted so that we have the group *yir* instead of the group *riy*, as in *ayira* = $\hat{a}rya$, J $\hat{a}t$. ii. 349; *bhayirá*=bhâryâ, 'wife;' *kayirá*=kuryât optative, and *kayirati* = kriyate, passive of kar. Besides, we have cases of retrogressive and progressive assimilation; when retrogressive assimilation takes place we get the group *yy* and sometimes a single *y*, when progressive assimilation, we obtain a single *r*, as this consonant cannot be doubled, with a long vowel before it. Instances are: $ayya = \hat{a}rya$, 'noble;' *jiyyati*, *jiyati*, and *jirati*=jar, 'to grow old;' seyyasi=çîryasi, from çar, 'to decay,' J $\hat{a}t$. i. 174, Dh. 147; *paripûrati* = paripûryate, 'to be filled.' The group *ry* is changed to *ll* in *vipallâsa*=viparyâsa, 'change,'

Е

Suttavibh. i. 7: pallanka = paryanka, 'couch;' pallattha = paryasta, 'posture,' Jât. i. 163.

L+y is either preserved or assimilated : kalyâna and kallâna =kalyâna, 'fortunate.'

V+y is often written by in the beginning of a word where it represents the preposition vi; this is the spelling of the Burmese MSS. while the Sinhalese write vy ; in a few instances I have found it in the middle of a word, viz. korabya=kauravya, Jât. ii. 371 ; upasambyâna=upasamvyâna, 'the outer garment,' Ab. 292. We also find examples of assimilation in the beginning, as vavatthåpeti = vyavasthåpayati, 'to settle ;' våyamati =vyâvam, 'to struggle;' vodaka = vyudaka, 'without water;' vossajjati=vyavasrij, 'to relinquish.' In the middle of a word vy remains as in pathavyå, Db. 32, or is divided by i, as in puthuviya, Mah. 19, puthuviyam, Att. 8; it may however also be assimilated to bb, as in abbocchinna = avyavachinna, 'unbroken,' Mil. 72; abbohârika=avyavabârika, Suttavibh. i. 91; bhâtubba = bhrâtrivya, 'cousin,' Bâlâvatâra, p. 36; abhabba= abhavya, 'unable ;' sibbati = sîvyati, 'to sew ;' pasibbaka, 'a bag,' from the same root. The y is altogether dropped in gâvuta=gavyûti, 'a measure of length.' The forms in tayya= tavya, given by the Grammarians as $\tilde{n}\hat{a}tayya = j\tilde{n}\hat{a}tavya$, pattayya = prâptavya, I believe do not belong to the living language. After a sibilant we have progressive assimilation; the only exception is *álasya* or *álasiya*=âlasya, 'sloth,' Dh. 49.

In the group hy the position of the elements is reversed, so that it becomes yh, as mayham = mahyam; exceptions are báhya, 'external' (also báhira with change of y to r) and etihya = aitihya, 'oral tradition,' Ascoli 244. Assimilation takes place in leyya = lehya, 'to be licked;' epenthesis in hiyyo or hiyo=hyas, 'yesterday.' For yh in vuyhati=ubyate we also find *lh*: *vulhati* (Ascoli 244 derives this from the part. *vůlha*, I doubt whether the form is correct).

R before an explosive is always assimilated, and if the explosive is a dental the group may become cerebral; in a few instances also the influence of the r is shown by aspiration.

(1) Gutturals: sakkharå = çarkarå, 'sugar,' spelt sakkarå, Jåt. i. 238; vagga=varga, 'class;' digha=dîrgha, 'long,' with compensation; kakkasa=karkaça, 'rough.'

(2) Palatals: acci = arci, 'flame,' spelt acchi in a passage of Samyuttaka Nikâya quoted by Oldenberg, Buddha 434; mucchati = mûrchati, 'to faint;' sajja = sarja, 'the sal tree.'

(3) Cerebrals: kanna=karna, 'the ear;' kannakita=karnakrita, Suttavibh. ii. 282.

(4) Dentals: pârivațțaka = parivartaka, 'a robe lent to a priest and returned by him after a period,' Pât. 8. 13. 78, but pârivattaka Suttavibh. ii. 59 ; âvațța=âvarta, 'whirlpool,' Mah. 213, but âvatta, Jât. i. 70 ; vațțaka=vartaka, 'quail ;' vațțati= vartati, 'to be right,' but âvattati and nibbattati ; attha = artha, 'reason,' but ațța, 'lawsuit ;' kevațța=kaivarta, 'fisher,' also spelt kerațțha în Wastergaard's Catalogue 21a ; chaddeti =chard, 'to throw away,' also spelt chaddh, Jât. i. 277 ; parimaddati = parimard, 'to excel,' also spelt parimaddh, Jât. i. 145 ; addita = ardita, 'afflicted,' Mah. 3, but addita, Bv. ii.' 129 ; daddhi=dardhya, 'sloth,' Trenckner, Pâli Misc. 65. A curious metathesis takes place în gadrabha = gardabha, 'a donkey,' but în gaddabhanda=gardabhânda, 'the tree Thespesia populneoides,' the assimilation is regular.

(5) Labials: kappúra = karpûra, 'camphor;' abbuda = arbuda, 'a high number;' gabbha = garbha, 'womb;' kamma = karma, 'action.' The group *rv* becomes *bb*, as in *pabbaha* = parvata (spelt *pappata* sometimes in Burmese MSS.); *cappeti* = carv, 'to chew,' C. 317.

(6) Sibilants: assimilation in dassana = darçana, 'sight;' epenthesis in arisa = arças, 'hemorrhoids;' árissa = ârsha, 'rishiship,' Kacc. 216. The group rsh is turned into h in kahápana = karshâpana, káhiti = kârshyati. From barsh we have a present hamsati, 'to rejoice,' Suttavibh. i. 8, Kacc. 390.

(7) Before h we always have epenthesis, as in *arahati* = arhati, *barihisa*=barhis, 'sacrificial grass.'

R following an explosive is also generally assimilated, but here we find several instances where it is retained or a vowel is inserted :—

(1) Gutturals: vakka=vakra, 'crooked;' khidda (and kila)
=krîdâ, 'play;' khumseti = kruç, 'to curse,' comp. Pischel,
Beitr. iii. 253; vagga = vyagra, 'irregular,' Oldenberg K Z.
xxv. 324; paccaggha=pratyagra, 'new;' with epenthesis kiriya
=kriyâ, 'deed;' kurûra=krûra, 'cruel.'

(2) Palatals: vajira=vajra, 'thunder-bolt.'

(3) Dentals: sattu = çatru, 'enemy,' spelt satthu, Dîp. 21; såvitthî = sâvitrî, M. vi. 35, 8, spelt såvittî, Fausb. S. N. 75; tattha, yattha, kattha = tatra, yatra, kutra, 'there,' 'where,' parattha=paratra, 'elsewhere;' sotthiya=çrotriya, 'a brahmin;' sabbathattâ=sarvatratvât, 'in every way,' according to Web-r, Indische Streifen iii. 397; haliddi = haridrî, 'turmeric myrobolan,' Suttavibh. ii. 35, spelt haliddhi, C. 317. The r is retained in utrâsa = uttrâsa, 'terror,' Jât. ii. 336, participle utrasta, Mil. 23, and utrassa, M. x. 2, 16 (uttasati occurs Att. 205, Jât. i. 326, uttasta, Jât. i. 414); dudrabhi = dundubhi, 'drum;' yâtrâ = yâtrâ, 'expedition;' adrûbha, 'undeceitful,' M. x. 2, 17 (adûbha, Jât. i. 180). The group dr is changed to nd in sanda=sâdra, 'coarse,' to jj in khujja=kshudra, 'small,' Saddhammop. 93; dhr to jjh in gijjha=gridhra 'vulture.'

(4) Labials: After p the r is assimilated, as in piya=priya, 'dear;' pati = prati, 'in return;' phositum from prush, 'to sprinkle,' M. vi. 14, 5, parippositvâ, M. i. 25, 15, paripphosaka, Gr. 140. Br is generally retained, as in braviti, from brû, 'to speak,' brahman; bhr is assimilated, as in sobbha = çvabhra 'cave; mr only in the beginning of a word, as miyyati = mriyate; in the middle a b is developed out of the m after which the r disappears: amba = âmra, 'mango;' tamba = tâmra, 'copper.' Vr is assimilated to v in the beginning, and to bb in the middle of a word: vajati=vrajati, 'to go,' but giribbaja; abbuta=avrata or avrita, 'undisciplined,' Dh. 47.

R, after a sibilant, is generally assimilated, as in såvaka = çrâvaka, 'a pupil;' massu=çmaçru, 'beard;' epenthesis takes place in siri = çrî, 'glory;' daddha and uddha are=dasra and usrâ according to Kacc. 333, but Weber Indische Streifen iii. 370, identifies them with damshtrâ and ushtra.

Hr is assimilated in hesa = hresha, 'neighing;' sateratâ = çatahradâ, 'hail;' rassa = hrasva, 'short;' separated in hiri = hri, 'shame;' but hilita = hrita and hileti, Jât. ii. 258, rahada = hrada, 'pond.'

L is on the whole treated very much like r; before gutturals and labials it is assimilated; vagguli=valgulî, 'bat,' C. vi. 2, 2, Jât. i. 493; kinjakkha=kinjalka, 'a filament;' kappa=kalpa, 'time;' pagabbha=pragalbha, 'bold;' jamma=jâlma, 'reckless.' Exceptions are 'sunka = çulka, 'tribute;' sunkaghâta, 'smuggling,' Suttavibh. i. 47; gumba = gulma, 'thicket;' simbalî = çâlmalî, 'the silk-cotton tree.' Lv is assimilated to bb in kibbisa=kilvisha, 'fault;' to ll in khallâta=khalvâta, 'bald;' billa and bella, Jât. iii. 76,=vilva, 'the Vilva tree,' but beluva=vailva L after gutturals and labials is generally separated by *i*, as in kilissati=kliçyati (but parikissati, Fausb. S. N. xi.); kilomaka= kloman, 'the pleura,' Mil. 26; klesa, without epenthesis, occurs Dh. v. 88; pilavati=plavati, Dh. 59, Dîp. 56; vipalâvita, Jât. i. 326; piluvati, Mah. 230; pilakkha=plaksha, 'ficus infectoria,' Suttavibh. ii. 35, Jât. iii. 24; pilotikâ=plota, 'a cloth ;' pihaka = plîhan, 'the spleen;' ambila = amla, 'sour;' milakkha = mleccha, 'a barbarian,' originally mlaska.

Rl gives ll, as in dullabha=durlabha, 'difficult to obtain.'

L after sibilants and h is generally separated by i, as in silághá = clagha, 'praise;' silesuma and semha = cleshman, 'phlegm;' hiládati = hlad, 'to be glad.'

V after gutturals, palatals and cerebals, is assimilated, as in pakka=pakva, 'ripe;' kathati=kvath, 'to boil;' (also written kuth, Vinaya texts, ii. 57, and koddh, Dh. 155), jalati=jvalati, 'to blaze;' kinna=kinva, 'yeast.'

After dentals it is also generally assimilated, as in *cattâro* = catvâras, 'four;' *taco*=tvac, 'bark, skin,' comp., however, *sanhavâka*=çlakshņatvak, Dh. 412; it remains unchanged in the suffix tvâ or tvâņa, in *iritvija*=ritvij, 'the officiating priest;' and in the pronoun of the second person *tvam*, which is also found as *tuvam* and *tam*. *Tv* is changed into *cc* in *caccara*= catvara, 'court;' *anuvicca*=anuviditvâ (comm. jânitvâ), Dh. 41, Jât. i. 459, Fausb. S. N. xi. 91. *Dv* is assimilated in *dîpa* = dvîpa, 'island;' *uddâpa* = udvâpa, 'foundation of a wall' Mahâparin. 11; *ubbâsiyati* = udvas, 'to chase;' which is the correct reading at Mah. 45 for *ubbâhiyati*; it remains unchanged in *dve*, 'two' (also *duve*, but *bâ* = dvâ in *bârasa*, 'twelve'); *dvâra*, 'door;' *advejjha* = advaidhya, 'sincere,' Bv. ii. 110. *Dhv* is assimilated to *ddh*, as in *addhâ*=adhvan, 'road;' to *jjh* in *majjhâru*, M. v. 13, 6, probably = madhvâlu, 'yam.'

No is changed to mm in dhammantari=dhanvantari, Mil. 272; dalhadhamma = dridhadhanva, Trenckner, P. M. 60 (but gandivadhanvá, Kacc. 182), comp. Prâk. dhamma, 'bow, Pâiyal. 37.

After a sibilant v is generally assimilated, as in assa = açva, 'a horse;' sami=svamin, 'lord,' but also suvami, Fausb. S. N. xi., suvamini, Jat. iii. 288; it remains unchanged in svana (or sana, suvana), = çva, 'a dog;' sve (and suve), = çvas, 'tomorrow;' *ehisvagata*, 'come and be welcome,' C. i. 13, 3, Suttavibh. i. 181. Epenthesis in suvatthi = svasti, 'welfare.'

Hv undergoes metathesis like hy, as in jivhâ = jihvâ, 'tongue; sometimes it becomes bbh, as in gabbhara=gahvara, 'a cavern.'

A sibilant preceding or following an explosive is assimilated by the same and generally produces aspiration of the group.

Ksh is mostly changed to kkh or cch, as in cakkhu = cakshus, 'eye;' gavakkha, 'bull's eye,' but gavacchita, Jât. i. 60; rukkhaand vaccha = vriksha, 'a tree,' Mil. 209, Suttavibh. i. 179; khudda = kshudra, 'small' (chudda, 'mean,' is not the same word, but participle to the root chubh = kshiv, Trenckner, Mil. 130), khama = kshama, 'patience' and 'earth;' in the latter signification also chama, comp. Hem. ii. 18; akkocchi = akr u $kshît \sqrt{kruç}$, Kacc. 13. Sometimes the aspiration is dropped, as in Takkasila = Takshaçila, 'a city in the Punjab;' ikka =riksha, 'a bear' (also written *isa* and *issa* in Abhidhânapp.), Okkaka = Ikshvâku. Patissá, 'obedience,' is = pratîkshâ according to Senart Mahâvastu 516; appatissavâsa occurs Jât. ii. 352.

Ts and ps generally become cch, as in jighacchá = jighatsâ, 'hunger;' châta, 'hungry, desirous,' and its opposite nicchâta, Fausb. S. N. 143, from psâ, samvacchara (and vacchara, Saddhammop. v. 239)=samvatsara, 'year;' bîbhacca=bîbhatsa, 'loathsome;' and from the same root *nibbhaccheti*, 'to rebuke,' Jât. ii. 338. Exceptions are most of the roots beginning with s when composed with the preposition *ut*, which gives the group ss, as *ussada*=utsada, 'desire,' Fausb. S. N. 149, generally used in the compound *ussadaniraya*, where Burnouf translates it 'protuberance,' comp. Mahâvastu 372; and the verb *ussâdiyati*, ' to be spoiled,' C. vi. 11, 3, Suttavibh. ii. 99. We find, however, also the regular form *ucchadeti*, Mil. 241; *ucchâdana*, 'rubbing the body with perfumes,' Gr. 10, Mil. 315; *ucchanga* = utsanga, ' the hip.'

Çc becomes *cch*, as in *niccharati*=niccar, 'to proceed.' An exception is *niccitta* (for *niccita*, corr.), 'thoughtless,' Dh. 173, Jât, ii. 298.

Shk and sk generally become kkh, as nikkha or nekkha = nishka, 'golden ornament.' Exceptions are most of the roots beginning with k when composed with the preposition nis, which in Samskrit must result in shk, but in Pâli only gives kk, e. g., nikkaddhati, 'to expel,'=nishkrish ; we have, however, the group kkh in nekkhamma = naishkâmya, 'abandonment of desires,' Vinaya texts, i. 104; and in nikkhamati = nishkram, 'to depart' (nikkam only Mil. 245, Kh. 8); takkara=taskara, 'a thief;' avakkâra = avaskâra in avakkârapâtî, 'slop-basin,' M. iv. 1, 2.

Sht and shth become *tth* in *bhattha*=bhrashta, 'fallen' and =bhrishta, 'fried;' *pattha* = prashtha, 'clever' (Buddhagh. *cheka, samattha*) Suttavibh. i. 210, ii. 60, 254, *mattha* and *matta* = mrishta, 'polished;' *vatta* = vrishta, from *vassati*, 'to rain' (*vuttha*, Jât. iii. 484); *attaka*=ashtaka (Buddh. *addhaka*), Suttavibh. i. 81; *leddu*=leshtu, 'a clod of earth.'

St and sth generally become tth, as in adhivattha=adhivasta, 'living on' (adhivuttha, Mahâparin. 23), parivattha, and parivuttha; apattha=apâsta, 'thrown away,' Dh. 27; pdttha= prastha, 'a measure of capacity;' atthi=asthi, 'bone.' Tt in niratta=nirasta, 'rejected,' Fausb. S. N. 150; hiyattana= hyastana, 'yesterday's;' bhaddamutta=bhadramusta, 'Cyperus rotundus,' M. vi. 3, 1; nettimsa=nistrimça, 'merciless,' Jât. ii. 77; urattâlim=urastâdam, 'beating the breast,' Mil. 11. St remains in viddhasta=vidhvasta, 'broken;' it becomes ss in vassa=basta, 'goat,' but also bhasta, Jât. iii. 278.

Shp and sp generally become pph, as in puppha=pushpa, 'a flower;' nipphala=nishphala, 'fruitless;' pp in bappa or vappa=bâshpa, 'a tear,' M. x. 2, 13; vanappati = vanaspati, 'a tree,' duppûra = dushpûra, 'difficult to fill,' Dh. 392; nippâpa = nishpâpa, 'sinless,' Dh. 37; poțihabba for phoithabba, 'contact,' Jât. ii. 81; appoțheti = âsphoțayati, 'to snap the fingers.'

Groups of nasals with sibilants can either be assimilated or remain unchanged, or insert a vowel between the nasal and the sibilant, or change the sibilant to h with metathesis.

. Çn and sn: pañha = praçna, 'question,' and paripañhati, 'to consider,' sinána and nahána=snâna, 'bathing;' for sináni, 'powder' Assalâyanasutta 13 comp. snániya = cûrṇa, Pânini 3, 3, 113 schol.

Shņ: uņha = ushņa, 'hot,' but sîtunnaka for sītuņhaka, M. viii. 10, 2; taņhā and tasiņā = trishņâ, 'thirst;' osaņhati, C. v. 2, 3, is a derivative from saņha = çlakshņa, 'smooth.'

Çm, shm, sm: sita, mihita = smita, 'smile;' massu = çmaçru, 'beard;' gimha = grîshma, 'summer;' asman=açman, 'stone,' but amhaná, Fausb. S. N. 71; amhe = asme, 'us,' but asme, Jât. iii. 359; usmá = ushman, 'heat,' Mil. 153; bhasma and bhesma = bhîsma, C. vii. 4, 8, Ab. 167; ramsi and rasmi = raçmi, 'beam;' pamussati, 'to forget,' is derived by S. Gold-

schmidt, K.Z. xxv. 437, from a root smrish, to which also belongs Prâk. pamhusaï, pamhuțtha, Hem. iv. 75, 184, 258; and this derivation seems to be confirmed by the spelling *pammuțtha* and *pammussitvâ*, Dh. 247, 248, Jât. iii. 511.

The groups hn, hm, generally show metathesis, as ganhâti = grihnâti, 'to take;' jimha = jihma, 'crooked,' spelt jima, Jât. i. 290; hn becomes nt in majjhantika for majjhahnika, 'midday.'

The rules of the changes of three or more consonants are, on the whole, the same as those concerning two consonants which have just been laid down. When assimilation takes place an explosive prevails over the other consonants; sattha = çastra, 'a weapon,' but fem. satti = çastrî, 'a knife ;' uddha and ubbha = ûrdhva, 'high ;' tikkhina, tikka and tinha=tîkshna, 'sharp ;' kasina = kritsna, 'entire,' but subhakinha or °kinna = çubha-kritsna; dosina and junhā = jyotsna, jyotsnâ, 'a moonlit night;' anupakhajja=anupraskandja, 'having occupied;' uplāvita = utplâvita, 'floated,' Mah. 230; bhastā = bhastrâ, ' bellows,' is only known from Abhidhânapp.

Rdr is changed to ll in $alla = \hat{a}rdra$, 'wet,' Prâk. alla, olla or ulla, Hem. i. 82, but we find also adda, Jât. i. 244, and $add\hat{a} = \hat{a}rdr\hat{a}$, 'name of a Nakshatra,' Ab. 58, $addaka = \hat{a}rdraka$, 'green ginger,' Ab. 459; rdhr becomes ddh in vaddha = vardhra, 'leather,' Jât. ii. 154, Ang. p. 110.

Tty and ttr, where they are not assimilated, are simplified into ty and tr or tt, as in ratyâ instr. of ratti = râtri, 'night;' vimuttâyatana = vimukti + âyatana, 'point of emancipation;' utrâsa and utrasta, or uttâsa and uttasta = uttrâsa, uttrasta, satra = sattra, 'sacrifice;' udriyati, M. iii. 8, 1, Suttavibh. i. 254, stands for uddriyati, 'to split open,' and the substantive udrâyanam occurs Jât. i. 72.

§ 13. Rules on Sandhi.

The rules on sandhi in Pâli may be divided into rules on vowel-sandhi, and rules on mixed sandhi where a vowel and a consonant are concerned. Consonantal sandhi does not occur in Pâli. All the rules we are about to give only deal with the so-called external sandhi, as the rules on internal sandi form a part of the phonetics we have given above. We only speak here about the sandhi of words, the sandhi of compounds belonging to the chapter on the formation of the stem.

Word-sandhi is not imperative in Pâli as in Samskrit; it only takes place in certain cases, and the MSS. vary greatly as to its use or neglect. In prose it is almost confined to indeclinables and pronouns, in juxta-position or in connection with a verb or a noun, as e.g., my ayam=me ayam, yan nûna= yad nûna, tasseva = tassa eva, tatth Ánanda, etc. The particles that are almost regularly found in sandhi are ca, iti (ti), api (pi), eva, as kathañ ca = katham ca, kiñcid eva = kiñci eva, tathápi = tathâ api, etc. The negative na, followed by a vowel, generally loses its a, as n'atthi, n'eva, náhosi, which Trenckner, Pâli Misc. 81, prefers writing na tthi, as though the root as had lost its initial a. So he also writes tâva 'ham, eva 'ham, Mil. 219; tattha 'ham and nâma 'ham, and the same with ayam, although nâmâham and nâmâyam are equally frequent.

The other cases of word-sandhi in prose, without any indeclinable or pronoun, are divided by Childers into three categories: (1) a vocative beginning with a vowel is preceded by a word ending in a vowel, as gacch' avuso, pañcah' Upâli, âyâm' Ânanda; (2) a verb is preceded or followed by a noun in grammatical relation with it, as utthâyâsanâ, ásanâ vuțțhâya, upajjhâyass' ârocesum; (3) two nouns are in grammatical relation, as dukkhass' antam; dvîh' âkârehi.

In verse word-sandhi is much more frequent than in prose, under the influence of metrical exigency; in later texts, like Dîpavamsa, Mahâvamsa, Buddhavamsa, Cariyâpitaka, and especially Khuddasikkhâ, it is not uncommon that whole syllables disappear in a sandhi where it is required by the metre, as e.g. changula = chadangula, Mah. 211; dasahassî = dasasahassî, Bv. xiii. 21; ticattârîsahassâni, Bv. xvi. 15.

I. Vowel Sandhi.

 $A+a, \dot{a}$ followed by a single consonant gives \dot{a} , as $n\dot{a}hosi = na + ahosi$, $n\dot{a}sakkhi = na + asakkhi$; if a double consonant follows the *a* remains short, and an apostrophe is put generally after the terminating consonant of the first word, to show that a vowel has been dropped, as in *n' atthi = na atthi, pan' aññam = pana aññam*. In a few instances we find a long \dot{a} before a double consonant, as $n\dot{a}ssa = na assa$, Dh. 23, comp. above the chapter on the quantity of vowels, p. 13. A short *a* before a single consonant occurs also in a few instances, as *c' aham*, Jat i. 3; *n' ahosi = na ahosi*, Dh. 155.

A or a + i or i gives e, as in Skt., e.g. kokil a yeva = kokil a ya + iva, neresi = na iresi. An exception is *iti*, which always gives a *iti* with a preceding a, e.g. Tissati = Tissati; i is elided by a preceding a in yena 'me = yena ime, pana 'me = pana ime; a + i sometimes gives i, as seyyath a = seyyath a idam.

A or a + u or u gives o, as in nopeti = na upeti, pakkhanditodadhim = pakkhandita udadhim, Mah. 117./ Seldom we find uinstead, as cúbhayam = ca ubhayam.

A is frequently elided by i or u whether followed by a

conjunct consonant or not, as in passath' imam = passatha imam, yass' indriyâni = yassa indriyâni.

A is generally elided before e, o: ganhath' etam = ganhathaetam, iv' otatam = iva otatam.

 \hat{A} sometimes elides a following *i*, *u* or *e* in *eva*: *disvâ* panissayam=disvâ upanissayam, sutvâ' va = sutvâ eva, Das. 4. Generally â is elided before a long vowel or before a short vowel followed by a conjunct consonant: *tath' eva* = *tathâ eva*, *tay' ajja* = *tayâ ajja*, seldom before a short vowel followed by a single consonant ; *muñcitv' aham* = *muñcitvâ aham*; Jât. i. 13.

I is generally elided before short or long vowels, as gacchâm' aham = gachâmi aham, idân' ime = idâni ime, dasah' upâgata = dasahi upâgata, dvîh' âkârehî = dvîhi âkârehi, etc. Sometimes it remains and elides the following vowel : phalanti 'saniyo = phalanti asaniyo, idâni 'ssa = idani assa ; i+a occasionally gives â : kiñcâpi = kiñci api, pâham = pi aham.

 \hat{I} is seldom elided: tunh' assa= $tunh\hat{i}$ assa; at Jât. iii. 414, we have $dass\hat{a}ham = d\hat{a}s\hat{i} + aham$.

I+i gives i: palujjiti=palujji iti, Par. 40. I preceded by t (tt) and followed by another vowel may become y: jivanty elaka = jivanti elaka, guty atha = gutti atha. Generally, however, the group ty is changed to cc, especially when the first word is *iti: iccevam* = *ity evam*. The corresponding change of dy to jj is not attested by any good authority. Api followed by a vowel may become app through an intermediate apy: app eva = api eva; itv, tv for *iti*, *ti* is most probably only a corrupt spelling.

U is elided before a vowel: samet' dyasma = sametu dyasma, tas' eva = tasu eva. Rarely it elides a following vowel: nu' ttha=nu attha, kinnu' ma = kinnu ima. U+i sometimes gives \hat{u} : $s\hat{a}dh\hat{u}ti = s\hat{a}dhu + iti$. Before a or e it can be changed to v: vatthv ettha = vatthu ettha, seess ayam = seess ayam.

E may be elided before a long vowel or before a short vowel followed by a conjunct consonant: m' asi = me asi, sae' assa = sace assa; sometimes it elides a following vowel: te' me = te*ime, sace' jja* = sace ajja, re' yya = re ayya, Mil. 124; occasionally e + a gives a, as sacayam = sace + ayam, Dh. 140, 165; but the e can also be turned into y, as if it were i, and an a following lengthened by compensation when a single consonant follows: tyaham = te aham, myayam = me ayam, ty ajja = teajja; exception, tyasa = te assa.

O is elided before a long vowel or a short vowel followed by a double consonant : kut' ettha = kuto ettha, tay' assu = tayoassu, tat' uddham = tato uddham. It elides a following vowel in so'ham = so aham, cattâro' me=cattâro ime, etc. O + a gives $\hat{a}: dukkhâyam = dukkho ayam$, Jât. i. 168. O can also be turned into v (as e into y) and an initial a lengthened if followed by a single consonant : $yv\hat{a}ham = yo aham$, khvassa=kho assa, yveva=yo eva : exceptions, $sv\hat{a}ssu=so$ assu, Jât. i. 196 ; $khv\hat{a}ssa = kho$ assa, Payoga Siddhi.

Euphonic consonants are often inserted when two vowels meet, to avoid a hiatus; especially the semi-vowels y and v are used for this purpose.

Y is inserted, between a word terminating in a or a, when followed by idam or any of the oblique cases of this pronoun which begins with i: na yidam = na idam, mâ yime = mâ ime, yathayidam = yathâ idam with shortening of the a. The same process takes place with eva and iva, which latter, however, is changed to viya by metathesis. When a, a is followed by u, u, v may be inserted for euphony: bhantâ vudikkhati = bhantâ udikkhati. Sometimes a euphonic *m* is inserted between two vowels: *idha-m-âhu* = *idha âhu*, *parigaņiya-m-asesam* = *parigaņiya asesam*, Girimânandasutta in Paritta, *kapi-m-âgantvâ*, Cariy. ii. 5, 4; or *r* if the following word is *iva*: *âragge-r-iva* = *âragge iva*, *sâsapo-r-iva* = *sâsapo iva*, *sikhâ-r-iva* = *sikhâ iva*, Mahâsamayas. 21. Final *â* is shortened before this *r* in *yatha-r-iva*, *tatha-r-iva* = *yathâ eva*, *tathâ eva*, Kacc. 19.

In a great many cases a lost consonant is revived to avoid the hiatus, as in yasmâd apeti = yasmâd apeti, kocid eva = kaçcid eva, tunhîm âsina = tûshnîm âsîna, vuttir esâ = vrittir eshâ, chalabhiññâ = shadabhijîâ, puthag eva = prithag eva, pag eva = prâg eva, with shortening of the â, sammadaññâ = samyag âjîâ, with change of g to d, and anvad = anvak in a passage of the Maggasamyutta quoted by Morris, 'Report on Pâli literature,' p. 5. Dhir atthu, Jât. i. 59, stands for dhig atthu, vijjur eva for vijjud eva. Jât. iii. 464 we have jîvar eva for jîvann eva; attadatha stands for attanattha = âtman + artha, satthud anvaya for satthur anvaya, punad eva for punar eva.

II. Mixed Sandhi.

Original double consonants simplified by assimilation at the beginning of a word, can again be doubled after a word terminating in a vowel : yatra thitam = yatra thitam for yatra sthitam. This is often done in verse when a long syllable is required.

In a few cases a lost final consonant is revived before a consonant, as yâvañ c' idam = yâva ca idam, suhanus sahâ, Jât. ii. 31, tayas su = trayas svid, Kh. 9.

As we have seen above, p. 45, sometimes anusvâra stands for an original consonant, and in this case before a vowel it is liable to be replaced by the original consonant. Sakrit becomes sakim in Pâli, but before a vowel we have sakid; in the same way we have tad for tam, yad for yam, etc.

In verse when a short syllable is required, anusvâra can be elided before a consonant: no ce muñceyya' candimam for muñceyyam Candaparitta, âkańkha virâgam for âkańkham, Dh. v. 343. Or else the whole syllable may be dropped, as in rajovajall' ukkuţikappamâṇam as the metre requires, Dh. v. 141; piyân' adassanam for piyânam, Dh. v. 210; pâpân' akaraṇam, for pâpânam, v. 333; nipajj' aham for nipajjim, Jât. i. 13. When the anusvâra is dropped the remaining a can be contracted with a following a to â, as in saccâham=satyam aham, Suttavibh. i. 190; labheyyâham=labheyyam aham, Parin. 59; idâham=idam+aham in the phrase ekam idâham samayam, comp. Oldenberg, K.Z. xxv. 325.

Only in late texts an anusvâra can elide a following vowel, as cîrassam' dhunâ for adhunâ, vassantam 'malakam in two passages from Pâli Burmese books quoted by Oldenberg, 'India Office Catalogue, p. 121,' sovannamayam 'nuñnâtam for anuñnâtam, Khuddasikkhâ, xxxvi. 15.

§ 14. Declension.

We distinguish in Pâli, as in Samskrit, stems ending in vowels and stems ending in consonants, and according to this division the whole declension of substantives and adjectives is arranged. It must however be remarked, that the vowel stems have largely encroached upon the consonantal stems, and that only fragments of a consonantal inflexion have remained. Especially consonantal stems identical with roots, which are frequent enough in Samskrit, have almost totally disappeared from Pâli, and have been replaced by dissyllabic stems increased by the addition of a vowel. A careful investigation of the old

texts has only yielded the following instances of consonantal root-stems: taco, pl. of tvac, 'skin,' Dh. 111, Kh. 3; pådå, instr. of pad, 'foot,' Dh. 164; våcå, instr. of våc, 'speech,' Kh. 9; pamudi, loc. of pramud, 'joy,' Gr. 139; parisati and parisatim, Suttavibh. ii. 285, loc. of parishad, 'assembly.'

There are two possibilities of turning these consonantal stems into vowel-stems: (1) The terminating consonant is dropped, and the word passes into the declension of that vowel which now stands at the end, e.g. $upanis\hat{a} = upanishad$; $\hat{a}p\hat{a} =$ âpad, Jât. ii. 317, which are inflected like feminine a-stems; $\hat{asi} = \hat{acis}$, 'blessing,' inflected like an *i*-stem; maru = marut, name of a 'deva,' inflected like an u-stem. (2) The stem is increased by the addition of an a (which may represent originally the termination of the acc. sing., comp. however Pischel, Beitr. iii. 262), and the word is now inflected like an a-stem. masculine, feminine or neuter, according to the gender of the original noun. Such instances are kita = krit, and visagata for visakata=vishakrit, Suttavibh. i. 80; tivuta=trivrit, name of a 'plant;' barihisa=barhis, 'sacrificial grass.' Sometimes the gender is changed, as in sarado m. 'year' = carad f. comp. Pischel gramm. Prâc. 5; Beitr. iii. 240. Change of gender is very frequent in Pâli, as for instance in vacîbheda, Khuddasikkhâ xl. 1, we have instead of \hat{a} the thematic vowel \hat{i} , and as this is also found in some other compounds, I do not believe that vaciis a locative like tvaci in tvacisâra, Pân. vi. 3, 9; comp. Jainaprâk. vatîjoa Beitr. 5. Âp is generally used in the nom. pl. apo, we find however a gen. apassa, Mil. 363.

Only very few vestiges of the dual occur in the texts known to us at present: to idh' ágato, 'these two having come,' Dîp. 56; ubho = ubhau, Dh. v. 74, 306; mâtâpitu, 'father and mother,' Cariy. ii. 9, 7, if this does not stand for the acc.

F

^opitrîn. Generally the plural replaces the dual even in such cases as *jayampatî* and *tudampatî*, 'man and wife,' where the meaning clearly points to a duality.

I. Vowel Bases.

Masculine and Neuter in a.

Dhamma, 'The Law.'

Singular.

Plural.

Nom.	dhammo.	dhammâ, dhammâse.
Voc.	dhamma, dhammâ.	dhammâ.
Acc.	dhammam.	dhamme.
Instr.	dhammena.	dhammebhi, dhammehi.
Dat.	dhammassa (dhammâya).	dhammânam.
Abl.	dhammâ, dhammasmâ,	dhammebhi, dhammehi.
	dhammamhâ.	
Gen.	dhammassa.	dhammânam.
Loc.	dhamme, dhammasmim,	dhammesu.
	dhammamhi.	

Rúpa, 'The Image.'

	Singular.	Plural.
Nom.)	
Voc.	}rúpam.	rûpâni, rûpâ.
Acc.)	rûpâni, rûpe.
Instr.	rûpena.	rûpebhi, rûpehi.
Dat	rûpassa (rûpâya).	rûpânam.
Abl.	rúpá, rúpasmá, rúpamhá.	rûpebhi, rûpehi.
Gen.	rûpassa.	rûpânam.
Loc.	rûpe, rûpasmim, rûpamhî.	rûpesu.

The form given in the table as *dative* is, properly speaking, the genitive = Skt. dharmasya, rûpasya, which has taken up the functions of dative in Pâli. The old dative in âya, which I have given in paranthesis, is only used to denote the intention, and is almost synonymous with an infinitive; only few instances occur where the dative has a terminative meaning as Dh. v. 174, saggâya gacchati, 'goes to heaven,' and Dh. v. 311, nirayâya upakaddhati, 'brings to hell,' comp. Pischels remarks, Beitr. zur kunde d. indog. Spr. i. 111, 119; lokânukampâya = lokam anukampitum, 'through compassion for the world;' na patthaye nirayam dassanâya, 'I do not wish to see the hell.' Especially the dative atthâya is used frequently with the meaning 'for the good of, for the sake of,' as in Buddhassa atthâya jîvitam pariccajâmi, ' for Buddha's sake I will lay down my life,' comp. Childers, s. v. We have also an abridged form atthâ used in the same sense, e.g. in bhojanatthâ, 'for the sake of food,' Jât iii. 425. Other instances of this abridged dative are esanâ = esanâya, 'in search of,' Ten Jât. 48, 81; anápucchá = anápuccháya, 'without asking leave,' comp. paripucchâya, Mil. 93; lâbhâ in such sentences as lâbhâ vata no, 'this is for our advantage,' which Childers explained as a dative, is in reality a nom. fem. identical with the masc. labha, comp. Senart Mahâvastu 550.

The ablative stands for the instrumental in *javâ*, 'speedily,' Dîp. 23; and *ahimsâ*, 'through pity,' Dh. v. 270. The suffix sâ is very often also used to denote an instr., as in vâhasâ, 'by dint of,' Mil. 379; Suttavibh. ii. 158 (comp. the v. l.); talasâ, 'by the sole of the foot' (com. pâdatalena), Jât. ii. 223; rasasâ, 'by taste,' Jât. iii. 328; bilasâ, padasâ, Kacc. 91; balasâ, 'by force,' Cariy. ii. 4, 7.

In the ablative the terminations in dhammasmâ, dham-

mamhá, and in the loc., dhammasmim, dhammamhi, are taken from the pronominal inflection. Besides, we have two other terminations for the ablative, to = skt. tas, and so = ças, which occur mostly in later texts, but also in a few instances in the Jâtaka and Dhp. Instances are gananâto, 'by number,' Jât. i. 29; câpâto, 'from the bow,' Dh. v. 320; devato, 'from a deva,' Bv. xvi. 7; orato pâram gacchati, pârato oram âgacchati 'goes from this end of the field to the further end and back again from the far end to this,' Jât. i. 57; mettâto, 'from friendship,' Saddhammop. v. 487, 489. With so we have bhâgaso, 'by portion,' Mil. 330; parivattaso, 'by turns,' Mahâparin. 60; tîni yojanaso, 'three yojanas wide,' Bv. xxi. 24.

In the locative the forms in *e* and in *smim* or *mhi* are almost equally frequent already in earlier texts, see Torp, Die Flexion des Pâli, p. 18. The forms *bilasi* and *padasi* given by Kacc. 91 do not occur anywhere else. The locative is used instead of a dative in *brâhmane*, Cariy. i. 9, 47.

In the nom. pl. of the masculine we have a form in *ase* which corresponds to the vedic nom. pl. in *asas*, as *panditase*, 'the learned,' Fausb. S. N. xi. 167; *rukkhase*, 'the trees,' Jât. iii. 399, comp. Oldenberg, KZ. xxv. 315.

The acc. pl. of the masculines in e is somewhat difficult to explain: Kuhn compares it to the vedic pronominal forms *asme*, *yushme*, which are used likewise for the nominative and accusative, and refers to the explanation offered by Schleicher, Compendium p. 611 for these forms; comp. Torp p. 19, S. Goldschmidt, KZ. xxv. 438.

The instr. pl. in *ebhi* or *ehi* quite corresponds to the vedic form in *ebhis* (or to the ablative in *ebhyas*, as the forms are the same in Pâli). Instances for the form in *bhi* are given by Oldenberg, KZ. xxv. 316, 317. In old texts we find besides a

form in e corresponding to the instr. of the classical Samskrit in ais, for inst. vanipake, used as a dative, 'to the beggars,' Cariy. i. 4, 9; yácake, ib. i. 8, 12; adhane áture jinne yácake patthike jane samanabrahmane khîne deti dânam akiñcane, ib. i. 1, 9; gune dasah' upágatam, instr., Jât. i. 6.

In the plural of the neuter we have the regular form *cittâni* for nom. and acc., and besides râpâ for the nom., and râpefor the acc., which are both taken from the masculine declension. Thus we have satte dukkhâ pamocayi, 'he released the beings from pain,' Mah. 2; pâne vihimsati, v. 1. for pânâni himsati, 'he hurts living creatures,' Vasala sutta v. 2. The same confusion of gender occurs in pabbatâni, Dh. v. 188 (probably through attraction from vanâni), in dukkhâ, 'sorrow,' which may be used as neuter and masc., and (according to Fausböll), even as fem.

In the locative pl. Childers gives a form *milakkhusu* from *milakkha*, 'a barbarian,' but without any reference.

Feminine in â.

Kaññâ, 'The Girl.'

	Singular.	Plural.
Nom.	kaññâ.	kaññâ, kaññâyo.
Voc.	kaññe.	kaññâ, kaññâyo.
Acc.	kaññam.	 kaññā, kaññâyu.
Instr.	kaññâya.	kaññâbhi, kaññâhi.
Dat.	kaññâya.	kaññânam.
Abl.	kaññâya.	kaññâbhi, kaññâhi.
Gen.	kaññâya.	kaññânam.
Loc.	kaññâyaṃ, kaññâya.	kaññâsu.

In the vocative we have the following exceptions: ammâ,

annâ, ambâ, tâtâ, all signifying 'mother,' form the voc. like the nom., Kacc. p. 64; of ammâ, we have besides a voc. amma, frequent in Dh. The loc. kaññâya is taken from the genitive. For the nom. pl. in â and âyo, comp. Oldenberg, Kz. xxv. 317.

Masculine and Neuter in i.

Aggi, 'The Fire.'

Singular.

Plural.

N. & V.	aggi.	aggayo, aggî.
Acc.	aggim.	aggî, aggayo.
Instr.	agginâ.	aggîbhi, aggîhi.
Dat.	aggino, aggissa.	aggînam.
Abl.	agginâ, aggismâ, aggimhâ.	aggîbhi, aggîhi.
Gen.	aggino, aggissa.	aggînam.
Loc.	aggismim, aggimhi.	aggîsu.

Akkhi, 'The Eye.'

	Singular.	Plural.
N. & V.	akkhi, akkim.	akkhîni, akkhî.
Acc.	akkim.	akkhîni, akkhî.
Instr.	akkhinâ.	akkhîbhi, akkhîhi.
Dat.	akkhino, akkhissa.	akkhînam.
Abl.	akkhinâ, akkhismâ, ak-	akkhîbhi, akkhîhi.
	khimhâ.	
Gen.	akkhino, akkhissa.	akkhînam.
Loc.	akkhismim, akkhimhi.	akkhîsu.

A voc. *ise*, corresponding to the Skt. rishe, occurs in Rûpasiddhi, and Jât. xix. 1, 2. A gen. *mune*, is given by Oldenberg, KZ. xxv. 318. The ancient loc. in o, is only formed from the stem *âdi*, according to Kacc. 41, *âdo* and *âdu*, Dh. 96;

70

a loc. gire, after the analogy of the *a*-stems, occurs Jât. iii. 157. An instr. after the same analogy is *buddharamsena*, Bv. x. 28. Besides, we very often, especially in Dîp., find the simple stem used for almost any case of the sing., see Oldenberg, KZ. xxv. 318.

A nom. pl. aggino, is found Saddhammop. v. 586, together with the regular form aggayo. In the oblique cases of the plural we only find the short *i* occasionally in verses, as $\tilde{n} \hat{a} t i h i$, pațisanthâravuttinam, Dh. 146.

Instances of the nominative accusative of neuters in *m*, formed after the analogy of the *a*-stems are not very frequent, but numerous enough to show that the form really exists : *akkhim*, Dh. 140; *atthim*, Das. J. 5, 12. The nominative plural *akkhi*, occurs Dh. 82.

> Feminine in \tilde{i} . Ratti, 'The Night.'

	Singular.	Plural.
N. Voc.	ratti.	rattiyo, rattî.
Acc.	rattim.	rattî, rattiyo.
Ins. Abl.	rattiyâ.	rattîbhi, rattîhi.
D. Gen.	rattiyâ.	rattînam.
Loc.	rattiyam, rattiyâ.	rattîsu.

The nominative plural *rattî*, is formed exactly like the corresponding form of the masculine stems aggi, most probably after the analogy of the *a*-stems (Torp. 41). In the genitive sing, we have a form *kasino* like *aggino* in Kasibhâradvâjasutta v. 1, and in the locative *ratto* = $\hat{a}do$, Dh. v. 299. The locative singular in \hat{a} , is properly speaking a genitive, as we have noticed also in $kañn\hat{a}$ confusion between these two cases. Instead of the group *iy* in the oblique cases of the singular, and in the nominative accusative of the plural, we also find simple y, and this may be contracted with a preceding dental according to the rules given above, p. 49. In this way we obtain forms like nikatyâ, from nikriti, 'frand,' Jât. ii. 183, nikacca with shortened â, Suttavibh. i. 90; jaccâ for jâtiyâ; sammuccâ for sammutiyâ, etc., comp. Fausb., introd. to the Suttanipâta transl. p. xi. Instead of rattiyâ we have ratyâ, Dh. 178.

The declension of the stems in i is very much the same as of those in i:

Nadi, 'A River.'

Singular.

Plural.

N. Voc.	nadî.	nadiyo, najjo, nadî.
Acc.	nadim.	nadî, nadiyo, najje
Ins. Abl.	nadiyâ, nadyâ, najjâ.	nadîbhi, nadîhi.
D. Gen.	nadiyâ, nadyâ, najjâ.	nadînam.
Loc.	nadiyam, najjam, nadiyâ.	nadisu.

In the ablative singular we have a contracted form *pesi* for *pesiyâ*, Mil. 421, an ablative in *to* is *sirito* from *sirî* = çrî, Samanta Pâs. 304. From *dabbî*, 'spoon,' we have the genitive *davyâ*, Jât. iii. 218. The nominative plural *najjo* occurs only Kacc. 56. An enlarged form of the genitive plural in *iyânam*, is met with in a few examples : *bhaginîyânam*, Mah. 4 ; *tevîsatiyânam*, Dh. 117; *caturasîtiyânam*, Dh. 350; it supposes a nominative singular in *iyâ*, like çriyâ for çrî in the Samskrit of the Northern Bhuddhists.

The declension of *itthi* or thi = stri, 'a woman,' follows *nadi* in general; in the acc. singular we have an additional form *itthiyam* = striyam, in the genitive *thiyam* = stryam, in the locative *itthiya*.

72

Masculines and Neuters in w.

Bhikkhu, 'A Mendicant Friar.'		
	Singular.	Plural.
Nom.	bhikkhu.	bhikkhavo, bhikkhû.
Voc.	bhikkhu.	bhikkhavo, bhikkhave, bhik-
		khû.
Acc.	bhikkhum.	bhikkhû, bhikkhavo.
Instr.	bhikkhunâ.	bhikkhûbhi, bhikkhûhi.
D. G.	bhikkhuno, bhikkhussa.	bhikkhûnam.
Abl.	bhikkhunâ, bhikkhusmâ,	bhikkhûbhi, bhikkhûhi.
	bhikkhumhâ.	
Loc.	bhikkhusmim, bhikkhum-	bhikkhûsu.
	hi.	

In the voc. sing. we find Sutano, Jât. iii. 329. A rest of the old gen. in os, survives in hetu = hetos, Dh. v. 84. In the oblique cases of the plural again we find the short u (like the short i) occasionally in verses, as *jantuhi*, Anecd. 33; *bhikkhusu*, Dh. v. 73; *jantunam*, Ten. Jât. 91. A form *bahunnam* with double n instead of u occurs Dh. 81. Irregular forms of the nom. pl. are *jantuno* and *mittaduno* from *mittadu*=mitradruh, Mah. 10, *jantuyo* and *hetuyo*.

Masculines terminating in i keep it in the nom. sing., as abhibhú, Dh. 255, but shorten it in the other cases. The plural is abhibhú or abhibhuvo, from sabbaññú = sarvajñâ: sabbaññú or sabbaññuno, from sahabhú : sahabhú, sahabhuvo, sahabhuno.

The neuters in u form the nom. voc. acc. pl. either in \hat{u} or $\hat{u}ni$, as madh \hat{u} or madh $\hat{u}ni$. The nom. and acc. sing. can take m like the corresponding forms of the *i*-stems, as cakkhum $udap\hat{a}d\hat{d}$, Kacc. 27.

Feminines in \tilde{u} .

Dhenu, 'A Cow.'

Singular.

Plural.

N. V.	dhenu.	dhenuvo, dhenuyo, dhenû.
Acc.	dhenum.	dhenû, dhenuyo.
I. A.	dhenuyâ.	dhenûbhi, dhenûhi.
D. G.	dhenuyâ.	dhenûnam.
Loc.	dhenuyam, dhenuyâ.	dhenűsu.

The nom. pl. dhenuvo occurs Dh. 237, where Fausböll has altered it to dhenuyo. $Bh\hat{u}$, 'the earth,' makes in the loc. sing. bhuvi, Kacc. 45; massu, though being a neuter, forms its gen. according to the fem. fashion massuy \hat{a} , Jât. iii. 315. An abl. with the termination to occurs in natthuto, 'into the nose,' M. viii. 1, 11, jambuto, Bv. xvii. 9, the loc. dhâtuy \hat{a} , C. ix. 1, 4.

The feminines terminating in \hat{u} follow the declension of *dhenu* with the only exception of the nom. sing., which may adopt the form in \hat{u} as $vadh\hat{u}$, 'a wife,' Ab. 230 (but vadhu, Suttavibh i. 18); $sarabh\hat{u} = sarayu$, 'name of a river;' $cam\hat{u} = cam\hat{u}$, 'an army;' $p\hat{u}d\hat{u} = p\hat{a}d\hat{u}$, 'a shoe;' $sass\hat{u} = cvacr\hat{u}$, 'mother-in-law.'

Stems ending in a diphthong.

Go, ' A Cow.'

Singular.

Plural.

N. V.	<i>go.</i>
Acc.	gavam, gåvam, gåvum.
Instr.	gavena, gávena.
D. G.	gavassa, gâvassa.

gavo, gâvo. gavo, gâvo. gobhi, gohi. gavam, gonam, gunnam.

Singular.

Plural. gobhi, gohi.

Abl.

gavâ, gâvâ, gavasmâ, gâvasmâ, gavamhâ, gâvamhâ.

gosu, gavesu, 1 avesu.

Loc.

gave, gâve, gavasmim, gâvasmim, gavamhi, gâvamhi.

We find throughout the declension a new stem, gava or $g\hat{a}va$, which is inflected like a masculine *a*-stem; we meet even with a nom. pl. $gav\hat{a}$, Jât. i. 336, together with the nom. pl. $g\hat{a}viyo$, of the fem. $g\hat{a}v\hat{i}$.

All other diphthongic stems have disappeared in Pâli : nau has become $n\hat{a}v\hat{a}$ following the declension of the feminine \hat{a} stems, dyu has become *divo* with the only exception of the instr. sing. *divâ*, which is used like an adverb in Pâli.

CONSONANTAL STEMS.

Stems in nasals.

These are considered by the native grammarians as belonging to the vowel-stems.

(1) in an.

Attan = âtman, 'Self.'

Plural.

0	
attâ.	
atta, attâ.	
attânam, attam.	3
attanâ, [attena].	
attano.	
attanâ.	•
attani.	
	atta, attâ. attânam, attam. attanâ, [attena]. attano. attanâ.

Singular.

attâno. attâno. attâno. attanebhi, attanehi. attânam. attanebhi, attanehi. attanesu.

A parallel form is *âtumâ* with the same inflexion, and besides, *tumo*, Fausb. S. N. 170. The instr. *attena*, the abl. *attasmâ*, *attamhâ*, and the loc. *attasmim*, *attamhi*, given by Clough, have not yet been found in any old text.

Brahman, 'Brahma.'

	· Singular.	Plural.
Nom.	brahmâ.	brahmâno.
Voc.	brahme.	brahmâno.
Acc.	brahmânam, brahmam.	brahmâno.
Instr.	brahmanâ, brahmunâ.	brahmebhi, brahmehi.
D. G.	bruhmuno, [brahmassa].	brahmânam, brahmunam.
Abl.	brahmanâ, brahmunâ.	brahmebhi, brahmehi.
Loc.	brahmani.	brahmesu.

The voc. sing. *brahme*, Kacc. 96, is formed after the analogy of the i-stems.

Rájan, ' A King.'

Singular.

Plural.

Nom.	râjâ.	râjâno.
Voc.	râja, râjâ.	râjâno.
Acc.	râjânam, râjam.	râjâno.
Instr.	raññâ, rájena.	râjûbhi, râjûhi, râjebhi, râ-
		jehi. ·
D. G.	rañño, râjino, [râjassa].	raññam, rájûnam, rájânam.
Abl.	raññâ.	rájúbhi, rájúhi, rájebhi, rá-
		jehi.
Loc.	raññe, râjini.	râjûsu, râjesu.
Loc.	raññe, rájini.	v

We find an instr. muddhaná from muddhá, 'the head,' Mah. 117, and a loc. muddhani, ib. 108; an instr. rájaná, which

I think cannot be correct, has been given by Fausböll, Jât. iii. 180, and a gen. raññassa, Jât. iii. 70. The forms rájam, rájena suppose a stem rája, rájino and rájini are simply formed by epenthesis; in the plural we have to adopt a stem ráju, from which all the cases can be derived. The legend PAONANO PAO on the Indobactrian coins does not represent a Pâli form rájunánam rájá with double suffix, as Kuhn believed, but is a Skythian title formed on the model of rájádirájâ, comp. Oldenberg, Ind. Ant. x. 215 note.

Some substantives belonging to this declension in Samskrit follow the *a*-declension in Pâli, as *Vissakammo*=Viçvakarman, 'name of a celestial architect,' spelt *Vissukamma*, Cariy i. 9, 41; *vivattachaddo*=vivrittachadman, 'one by whom the veil is rolled away;' *puthulomo*=prithuloman, 'a fish;' *athabbana* = atharvan, *yakana*=yakan, 'the liver;' *chaka*, *chakana*=çakan, 'dung.'

Yuvan, 'Young.'

Singular.

Plural.

Nom.	yuvâ.	yuvâno, yuvânâ.
Voc.	yuva, yuvâ, yuvâna, yuvânâ.	yuvâno, yuvânâ.
Acc.	yuvânam, yuvam.	yuvâne, yuve.
Instr.	yuvânâ, yuvânena, yuvena.	yuvânebhi, yuvânehi, yu-
The start		vebhi, yuvehi.
D. G.	yuvânassa, yuvassa.	yuvânânam, yuvânam.
Abl.	yuvânâ, yuvânasmâ, yuvâ-	yuvânebhi, yuvânehi, yu-
	namhá.	vebhi, yuvehi.
Loc.	yuvâne, yuvânasmim, yuvâ-	yuvânesu, yuvâsu, yuvesu.
	namhi, yuve, yuvasmim,	
	yuvamhi.	

Most of these forms suppose a new stem yuvâna, formed from the acc. sing. Besides we have a stem yûna, from which the nom. sing. yûno, f. yûnî, is formed, according to Kacc. 328.

$S\hat{a} = cvan$, 'A Dog.'

	Singular.	Plural.
Nom.	sâ.	sá, [sáno].
Voc.	sa.	sâ.
Acc.	sam, [sânam].	se.
Instr.	sena.	sâbhi, sâhi.
Dat.	sâya, sassa.	sânam.
Abl.	sâ, sasmâ, samhâ.	sâbhi, sâhi.
Gen.	sassa.	sânam.
Loc.	se, sasmim, samhi.	sásu.

Besides we have for the nom. sing. the forms sáno, sváno, suvâno, soņo and súņo. Other words following the same inflection are paccakkhadhammá = pratyakshadharman, 'whose virtues are evident,' and gaṇḍîvadhanvá, 'using the bow Gâṇḍîva,' Kacc. 182.

A few substantives form only some cases according to the nasal inflection, while the other cases follow another declension, as kammam=karman, 'action,' which forms the instr. sing. kammunâ, kammanâ and kammena, the gen. kammuno and kammassa, Pât. 11; abl. kammâ, Dh. v. 127, loc. kammani. Thâmo=sthâmas, 'strength,' forms part of its cases after the nasal inflection as the instr. thâmunâ, Kacc. 81, but generally thâmasâ, Suttavibh. ii. 134, Mab. 143 (Turnour thâmavâ), gen. thâmuno. In the same way addhâ=adhvan, 'a road,' forms addhano and addhuno; bhasmam = bhasman, 'ashes,' loc. bhasmani.

78

Pumá=pums, 'a man.'

Singular.	Plural.
Nom. pumâ.	pumâno.
Voc. pumam.	pumâno.
Acc. pumam.	pumâno.
Instr. pumânâ, pumi	unâ, pumena. pumânebhi, pumânehi.
D. G. pumuno, pumo	ussa. pumánam.
Abl. pumunâ.	pumânebhi, pumânehi.
Loc. pumâne, pume	e, pumasmim, pumásu, pumesu.
pumamhi.	

A nom. sing. pumo occurs Cariy. iii. 6, 2, similar to tumo= âtmâ, Fausb. S. N. 170.

(2). Adjectives terminating in mant and vant.

Gunavant, ' virtuous.'

Singular.

, Plural.

Nom. guṇavâ, guṇavanto. Voc. guṇavaṃ, guṇava, guṇavâ. Acc. guṇavantaṃ, guṇavaṃ. Instr. guṇavatâ, guṇavantena. D. G. guṇavato, guṇavantassa, guṇavassa.

Abl. gunavatá.

Loc. guņavati, guņavante, guņavantasmim, guņavantamhi. guņavanto, guņavantā. guņavanto, guņavantā. guņavante. guņavantebhi, guņavantehi. guņavatam, guņavantānam.

guņavantebhi, guņavantehi. guņavantesu.

The neuter has in the nom. voc. acc. sing. guņavam, pl. guņavanti, guņavantāni. The fem. is made by adding i to the strong or the weak form, guņavanti or guņavati; it follows the declension of the i-stems. The participles in *ant* follow this declension with the only exception of the nom. sing. which they form in *am* or *anto*, as *gaccham*, *gacchanto*, 'going.'

A nom. from the weak form *jîvato* for *jîvanto* occurs in a verse, Jât. iii. 539; an acc. vajatam, Vasala Sutta, v. 6; asatam, Dh. v. 73, Vasala Sutta v. 16. From the root kar we have the part. nom. pl. masc. karontâ, Dh. v. 66; nom. sing. fem. karontî, Dh. 246; gen. sing. masc. karoto, Dh. v. 116; instr. samkhârontena, in a passage of Petavatthuvaṇṇanâ quoted I. O. C. p. 79; all these forms follow the 3rd pers. pl. karonti. Besides we have the gen. anukubbassa, Jât. iii. 108, rendered in the Mahâvastu by krityânukâryasya.

Arahant, 'an Arhat,' forms the nom. sing. araham and arahâ, the former being the regular one, the latter following the analogy of mahâ. In the nom. pl. we have arahanto and arahâ, Dîp. 30, Anecd. 7. A similar nom. pl. mahâ occurs Ab. 413. Kacc. 94 gives a nom. sing. maham which does not occur anywhere else; the nom. sing. mahâ occurs separately, Dh. 298, Mah. 132, and besides very often in compounds.

In the pl. we have one instance of an old form sabbhi = sadbhis, Dh. v. 151.

In the neuter nom. sing. we have the forms brahâ, Ab. 700, madhuvâ, Dh. v. 69; asam=asat, Jât. ii. 32.

Of participles of the perfect in vams we have *bhayadassivâ* = °darçivams; vidvams forms nom. sing. *aviddasu*, Dh. 47; nom. pl. *aviddasů*, C. xii. 1, 3; besides we have *sabbavidů*, Dh. v. 353; *lokavidů* = lokavid of the Northern Buddhists, Lotus 860.

Bhavam, 'Sir.'

Singular.

Plural.

bhavanto, bhonto, bhavantá. bhavanto, bhonto, bhante. bhavante, bhonte.

G

Nom. bhavam. Voc. bho, bhonta. Acc. bhavantam, bhotam. Instr. bhavatå, bhotå, bhavantena. D. G. bhavato, bhoto, bhavantassa. Abl. bhavatå, bhotå.

The fem. shows the forms bhavanti, bhavati, bhoti, Pl. bhotiyo.

(3). Stems in in.

Dandin, 'a mendicant.'

	Singu	lar.		Plural.
Nom.	daņdî.			dandino, dandî.
Voc.	dandi.			dandino, dandî.
Acc.	dandinar	n, dandim.		dandino, dandî.
Instr.	dandinâ.			dandîbhi, dandîhi.
D. G.	dandino,	dandissa.		dandînam.
Abl.	dandina,	daņģismâ,	dan-	daņdibhi, daņdihi.
	din	nhâ.		
Loc	dandini	dandismim	dan-	dandisu

Loc. dandini, dandismim, dan- dandis dimhi.

At M. vi. 28, 11, we have an acc. pl. brahmacariye, of brahmacârin, 'holy;' and at Mahâparinibb. 16, we have the same passage with the v. l. brahmacârayo; the nom. pl. sabrahmacârî occurs Mahâparin. 5. Dipi=dvipin, 'a leopard,' forms the nom. pl. dipiyo, Jât. xiv. 1, 27. The oblique cases of the plural have a short *i* only in verses: pâṇinam, Dh. 135, anuyoginam, Dh. v. 209. An instance of a nom. sing. with *i* is setthi =çreshţin, 'a treasurer, merchant,' Jât. i. 120, 122, where all MSS. agree in the spelling.

Examples of an enlarged stem are såramatino nom. sing. = såramati, Mil. 420; verinesu from verin, 'hostile,' Dh. v. 197.

(4). Stems in r.

Satthâ=çâstri, 'the teacher.'

Singular.

Plural.

Nom.	satthâ.	satthâro.
Voc.	sattha, satthâ.	satthâro.
Acc.	satthâram, sattharam.	satthâro, satthâre.
Instr.	sattharâ, satthârâ, satthunâ.	satthârebhi, satthârehi.
D. G.	satthu, satthussa.	satthânam, satthârânam
Abl.	sattharâ, satthârâ.	satthârebhi, satthârehi.
Loc.	satthari.	satthâresu.

Here also some stems have adopted the *a*-declension, as sallakatta=çalyakartri, 'a physician,' Mil. 110, Att. 208, to which Childers compares nåhapita=snâpitri, 'a barber;' kattara =kartri, 'a weak man,' in kattaradanda, M. v. 6, 2; kattarasuppa, M. vii. 1, 4; and theta=sthâtri, 'firm,' Gr. 5. In composition the base generally terminates in u, as sotu=çrotri, 'hearer,' Dath, vi. 6 (the gen. pl. sotúnam occurs in a passage of the Mahâvagga of the Dîghanikâya, quoted I. O. C. 69); bhattu=bhartri, 'husband,' Jât. ii. 348; mandhâtu=mandhâtri, Jât. ii. 310. The voc. sing. sattha occurs Kacc. 116; the acc. sattharam, Bv. xxii. 14; an instr. satthâya, Dh. 87; the gen. satthussa, Mah. 240.

D'14			
Pitâ=	nirri	9 THE	hor '
1. ouu -	DI0114	47 THO	1101.

Singular.

Nom.	pitâ.
Voc.	pita, pitâ.
Acc.	pitaram, pitum.
Instr.	pitarâ, pitunâ, petyâ.

D. G. pitu, pituno, pitussa.

Abl. pitarâ.

Loc. pitari.

pitaro. pitaro. pitaro, pitare. pitarebhi, pitarehi, pitübhi, pitühi. pitaranam, pitänam, pitünam, pitunnam. pitarebhi, pitarehi, pitübhi, pitühi. pitaresu, pitüsu.

Mâtâ=mâtri, 'a mother.'

	Singular.	Plural.
Nom.	mâtâ.	mâtaro.
Voc.	mâta, mâtâ.	mâtaro.
Acc.	mâtaram.	mâtaro, mâtare.
Instr. }	mâtarâ, mâtuyâ, mâtyâ.	mâtarebhi, mâtarehi, mâtû- bhi, mâtûhi.
D. G.	mâtu, mâtuyâ, mâtyâ.	mâtarânam, mâtânam, mâtû-
		nam, mâtunnam.
Loc.	måtari, måtuvam, måtvam.	mâtaresu, mâtûsu.

Loc. mâtari, mâtuyam, mâtyam, mâtuyâ, mâtyâ.

The acc. sing. *pitum* occurs Cariy. ii. 9, 3; the instr. *mâtyâ* and *petyâ*, Jât. 527, v. 3, 5; the gen. *mâtussa*, given by Kacc. 98, is not found anywhere else, and belongs most probably to a bâhuvrîhî (Torp. 33). An abl. *pitito* and *mâtito*, 'on father's and on mother's side,' occurs Kacc. 102, and in a passage from a commentary quoted by Alwis, Introd. xlv.

The nom. pl. mâtârapitaro, where both stems are inflected, occurs Ang. p. 121; the gen. mâtâpitunnam, Ten Jât. 92. An acc. pl. bhâte occurs Dîp. 6, 21, 22.

The declension of $dh\hat{\imath}t\hat{a}$, 'daughter,' is on the whole the same as that of $m\hat{a}t\hat{a}$; we find, however, a voc. $dh\hat{\imath}te$, Dh. 364, Jât. iii. 21; and an acc. pl. $dh\hat{\imath}t\hat{a}$, Jât. i. 240. In composition we have $dh\hat{\imath}titth\hat{a}na$, Mah. 222; $dh\hat{\imath}tuhetu$, Mil. 117.

Sakhi, 'a friend.'

	Singular.	Plural.
Nom.	sakhâ.	sakhâyo, sakhâno, sakhino.
Voc.	sakha, sakhâ, sakhi, sakhî, sakhe.	sakhâyo, sakhâno, sakhino.
Acc.	sakhânaṃ, sakhaṃ, sakhâ- raṃ.	sakhî, sakhâyo, sakhâno, sakhino.
Instr. Abl.	} sakhinå.	sakhârebhi, sakhârehi, sakhe- bhi, sakhehi.
D. G.	sakhino, sakhissa.	sakhârânam, sakhînam.
Loc.	sakhe.	sakhâresu, sakhesu.
m	77 74. **	

The acc. sakham occurs Jât. ii. 348; an abl. sakhârasmâ is found Jât. iii. 534; sakhīto, Att. 216. Acc. pl. sakhî, Att. 203.

> (5). Stems in s. Manas, 'the mind.' Singular.

N. V. A.	mano, manam.
Instr.	manasâ, manena.
D. G.	manaso, manassa.
Abl.	manasâ, manasmâ, manamhâ.
Loc.	manasi, mane, manasmim, manamhi.

84

The plural of manas not in use. The others form it after the a-declension. The nom. acc. manam occurs Dh. v. 96, Cariy. i. 8, 5; rajam, 'dust,' Dh. v. 313, but rajo (with the adj. in the masc.), Dh. v. 125; sumedham, Dh. v. 208, but sumedhaso, Dh. v. 29; voc. dummedha, Dh. v. 394; a gen. tapassa occurs Jât. i. 293; nom. pl. sumanâ, Kh. 6.

Candramas, 'the moon,' becomes *candimâ*; jaras, 'old age,' *jarâ*; and apsaras, 'a celestial nymph,' *aceharâ*; all these follow the *â*-declension.

The comparatives in yo, iyyo, follow the declension of mano; seyyo=creyas, 'better;' gariyo=gariyas, from guru, 'heavy.'

Âyus, 'life.'

Singular.	Plural.
N. V. A. áyu, âyum.	âyûni, âyû.
Instr. âyusâ, âyunâ.	âyûbhi, âyûhi.
D. G. âyussa, âyuno.	âyûnam.
Loc. âyusi, âyuni.	ây ûsu .

The instr. âyusá occurs Kh. 16; âyunâ, Dh. 288; the gen. âyussa, Mah. 220; âyuno, Dh. 128.

§ 15. Comparison of Adjectives.

Adjectives with vowel bases form their comparison in two ways :---

(1) By adding *tara* for the comparative and *tama* for the superlative.

(2) By adding iyo, yo for the comparative and *ittha* for the superlative.

Thus, from pâpa, 'bad,' we can form pâpatara, pâpatama

and $p \hat{a} p i y o$, $p \hat{a} p i t h a$, Kacc. 196. The comparative of no. 1 may be combined with the superlative of no. 2; thus we obtain $p \hat{a} p i t h a t a r a$, C. i. 6, 2. Besides, the comparative of no. 2 may be increased by the addition of the suffix ika, which gives us $p \hat{a} p i y a s i k a$ in $tassap \hat{a} p i y y a s i k \hat{a} k a mma$, M. ix. 6, 2; and with contraction $p \hat{a} p i s s i k a$.

Adjectives terminating in mant, vant and vin, drop these suffixes before the comparative and superlative suffixes, as for inst. gunavá comp. guniyo, sup. gunițtha; medháví comp. medhiyo, sup. medhițtha.

Some adjectives form their comp. and sup. from entirely different bases :

antika, 'near.'	Comp.	nediyo.	Sup.	nedițțha.
bâlha, 'strong.'	,,	sâdhiyo.	>>	sâdhițțha.
vuddha, 'old.'		jeyyo.	"	jețțha.
appa, 'small.' yuvâ, 'young.' }	"	kaniyo.		kanițțha.
pasattha, 'excellent.'	"	seyyo.	,,	sețțha.

§ 16. Pronominal Inflexion.

(1) Personal Pronouns of the First and Second Persons.

First Person.

Sin	gular.	Plural.
Nom.	aham.	vayam, mayam, amhe.
Acc.	mam, mamam.	asme, amhe, amhâkam.
Instr. Abl.	mayâ.	amhebhi, amhehi.
Dat. Gen.	mama, mamam.	amhâkam, amham.
	mayham, amham.	
Loc.	maui.	amhesu

PRONOMINAL INFLEXION.

Second Person.

	Singular.	Plural.
Nom.	tvam, tuvam.	tumhe.
Acc.	tvam, tuvam.	tumhe, tumhâkam.
	tam, tavam.	Service and and
Instr. Abl.	tvayâ, tayâ.	tumhebhi, tumhehi.
Dat. Gen.	tava, tavam.	tumhâkam, tumham.
	tuyham, tumham.	
Loc.	tvayi, tayi.	tumhesu.

Besides, we have the enclitic forms: me, te for instr. dat. and gen. sing.; no, vo for acc. dat. and gen. pl.

The old form of the nom. pl. vayam occurs Dh. 105, the acc. pl. asme, Jât. iii. 359. The acc. pl. amhákam and tumhákam are borrowed from the gen. The nom. pl. amhe and the gen. amham and tumham, amhánam and tumhánam, are only found in Kacc. 83, 84.

The enclitic forms no and vo may also be used for the nom., according to Kacc. 78.

(2) The Demonstrative Pronoun.

(a) Stem ta, 'this.'

Singular.

Maga and Monton

Feminine.

	masc. and Neuter.	reminine.
Nom.	so, sa, tam (tad).	så.
Acc.	tam, tam (tad).	tam.
Instr.	tena.	tâya.
Dat. Gen.	tassa.	tassâ, tassâya, tissâ, tissâya, tâya.
Abl.	tasmâ, tamhâ.	tâya.
Loc.	tasmim, tamhi.	tassam, tâsam, tissam, tâyam.

Plural.

Masc. and Neuter.Feminine.Nom. Acc. te, tâni.tâ, tâyo.Instr. Abl. tebhi, tehi.tâbhi, tâhi.Dat. Gen. tesam, tesânam.tâsam, tâsânam.Loc.tesu.tâsu.

For all the forms beginning with t we may substitute the corresponding forms of the stem na. At Kacc. 89, the following forms are given: naya, nam, ne, nesu, namhi, nahi. Besides we have the stems *eta* and *ena*, which are inflected like *ta* and *na* respectively.

In the nom. sing. we generally have so, the form of the substantives, sa occurs Dh. v. 142, 267, 268. A gen. sing. masc. tasmassa is found Anecd. 15, and at Mil. 136 all MSS. give tasam for the loc. sing. fem., which is no doubt a correct form, comp. nesam, ib. 179.

(b) Stem ima, 'this.'

Singular.

Masc. and Neuter. Nom. ayam, idam, imam. Acc. imam, idam, imam. Instr. iminâ, anena. D. G. imassa, assa.

Abl. imasmâ, imamhâ, asmâ. Loc. imasmim, imamhi, asmim. Feminine.

ayam. imam. imâya. imissâ, imissâya, imâya, assâ, assâya. imâya. imissam, imâsam, imâyam, assam.

PRONOMINAL INFLEXION.

Plural.

Masc. and Neuter.

Feminine.

N. A.	ime, imâni.	imâ, imâyo.
In. Ab.	imebhi, imehi, ebhi, ehi.	imábhi, imáhi.
D. G.	imesam, imesânam,	imásam, imásánam.
	esam, esânam.	
Loc.	imesu.	imâsu.

In tadamina for tadimina, Vasala Sutta, v. 22, i is changed to a by dissimilation.

(c) Stem amu, 'that.'

Singular.

Masc. and Neuter.

Feminine.

Nom.	asu, adum.	asu.
Acc.	amum, adum.	amum.
Instr. 🔪	amunâ.	amuyâ.
Dat. Gen	1. amussa.	amussâ, amuyâ.
Abl.	amusmâ, amumhâ.	amuyâ.
Loc.	amusmim, amumhi.	amussam, amuyam.

Plural.

Masc. and Fem.

Neuter.

amû, amûni.

Nom. Acc. amú, amuyo. Instr. Abl. amúbhi, amúhi. Dat. Gen. amúsam, amúsánam. Loc. amúsu. 89

(3) Relative Pronoun.Stem ya, 'which.'

Singular.

1	Masc. and Neuter.	Feminine.
Nom. y	o, yaṃ (yad).	yâ.
Acc. y	am, yam (yad).	yam.
Instr. y	ena.	yâya.
Dat. Gen. y	assa.	yassâ, yâya.
Abl. y	amhâ.	yâya.
Loc. y	asmim, yamhi.	yassam, yâyam.

Plural.

Masc. and Neuter.

Nom.ye, yâni.Acc.ye, yâni.Instr.yebhi, yehi.Dat. Gen.yesam.Abl.yebhi, yehi.Loc.yesu.

Feminine. yâ, yâyo. yâ, yâyo. yâbhi, yâhi. yâsam. yâbhi, yâhi. yâsu.

(4) Interrogative Pronouns.

Stem ka, 'which.'

The inflexion of this stem is like that of ya with the following exceptions: The nom. sing. neut. is kim; in the dat. and gen. masc. and neut. sing. we have kassa and kissa, in the loc. kasmim, kamhi, kismim and kimhi.

The indefinite pronouns are formed by adding the particles ci, api and cana to the forms of the interrogative. Besides, we have a number of words which although not being pronouns in the true sense of the word, still follow the pronominal inflexion: First of all, possessives like madiya, mámaka, 'mine,' amhadiya, 'our,' would belong to this class, but of these we only find nominatives in our texts. Next come the adjectives composed with driç, as mâdisa, 'like me;' etâdisa or etârisa, and îdisa, 'like this;' kîdisa, 'like what;' cirassam for cirassa, 'long since,' seems to be a pronominal form.

By adding the suffixes *tara*, *tama* (already found in comparison of adjectives) to the interrogative stems, we obtain the pronominal adjectives *katara* and *katama*, which do not differ in their signification much from the single pronoun.

The other adjectives inflected according to the pronominal inflexion, are sabba and vissa = sarva and viçva, 'all;' añña = anya, 'other,' with its derivatives aññatara, aññatama; itara, 'other;' uttara, uttama, 'higher;' adhara, 'inferior;' apara, para, 'other;' dakkhina, 'right;' pubba, 'former;' amuka and asuka, 'this.' The numeral for one, eka, also follow the same declension.

The grammarian Moggallâna (Alwis Catal., 184), asserts that these adjectives can also follow the regular declension of the *a*stems, and gives some passages from unknown texts.

§ 17. Numerals.

(1) Cardinals.

1	eka.	5	pañca.
2	dvi.	6	cha.
3	ti.	7	satta.
4	catu.	8	attha.

9	nava.	19 ekûnavîsam, ekûnavîsati.
10	dasa.	20 visam, visati.
11	ekâdasa, ekârasa.	30 timsam, timsati.
12	dvâdasa, bârasa.	40 cattarisam, cattalisam, talisam.
13	terasa.	50 paññásam, paññása.
14	catuddasa, coddasa,	60 sațthi, sațthim.
	cuddasa.	70 sațtati, sattari.
15	pañcadasa.	80 asiti.
16	solasa.	90 navuti.
17	sattadasa, sattarasa.	100 satam.
18	ațțhâdasa, ațțhârasa.	1000 sahassam.

The forms visam, timsam, etc., show that the termination ti of the Samskrit, can be replaced in Pâli by the anusvâra. We find the anusvâra occasionally also where it has no right to be, as in dvådasam, Mah. 8; satthim = shashti, Dh. 211. When the nasal is dropped the remaining a may be lengthened.

The intermediate numerals between visam and timsam, etc., are regular, with the only exception that instead of dvi we generally find dva, ba (or dva, ba before a double consonant), as in dvavisati, bavisati, dvattimsa, battimsa, dvenavuti, and instead of ti, te as in tevisati. For caturaçiti we have cullásíti, for pañcavimçati pannuvisam, Jât. iii. 138.

From *cha* we have a plural *chalâni*, Dîp. 108, and for twelve dviccha = dvishash, Ab. 195.

About the declension of eka, see the Pronouns.

Dvi and the synonymous ubho have the following inflexion :N. A. dve, duve.ubho, ubhe.I. A. dvibhi, dvihi.ubhobhi, ubhohi, ubhebhi, ubhehi.D. G. dvinnam, duvinnam.ubhinnam.Loc. dvisu.ubhosu, ubhesu.

NUMERALS.

Ubho = Skt. ubhau is one of the few rests of the Dual remaining in Pâli (see above, p. 65).

In the numerals ti and catu we have separate forms for the fem., very much in the same way as in Skt. :

Masc. and Neuter.

Nom. Acc.	tayo, tîni.	cattáro, caturo, cattári.
Instr. Abl.	tîbhi, tîhi.	catubbhi, catúbhi, catúhi.
Dat. Gen.	tinnam, tinnannam.	catunnam.
Loc.	tîsu.	catúsu.

Feminine.

Nom. Acc. tisso.	catasso.
Instr. Abl. tibhi, tihi.	catubbhi, catúbhi, catúhi.
Dat. Gen. tissannam.	catassannam.
Loc. tisu.	catúsu.

Pañca forms the instr. abl. pañcahi, Gen. Dat. pañcannam, Loc. pañcasu, and this is the declension all numerals in a follow,

The numerals in *i* are declined like the fem. *i*-stems, satam and sahassam like neuters in am.

Satam and sahassam, in conjunction with a noun, can be joined to nouns in the following ways :

(1) With a noun in the gen. pl., as itthinam pañca satâni, 'five hundred women.'

(2) With a noun in the nom. pl. (satam being either in the sing. or in the pl.), as pañcasatam yati, '500 yatis,' or pañcasatâ bhikkhû, '500 mendicants.'

(3) With a noun in the sing., as chacattalisam vassam atikamma, 'after the lapse of 146 years.'

(4) As a compound, the numeral being the last part, as gåthåsatam, '100 stanzas.'

(5) As a compound, the numeral being the first part, as sahassajațilâ, 'a thousand jațilas.'

Another form of sahassa is sahassi, which is used promiscuously as a masc. and fem. in connection with cakkavála or vasudhá, &c., as dasasahassi-cakkavále, 'in ten thousand worlds,' Dh. 94. Sometimes the subst. is omitted, and dasasahassi is treated like a fem. noun, as dasasahassi pakampati, 'ten thousand worlds quake,' comp. Senart, Mahâvastu 373.

The Ordinals.

The Ordinals for five, and from seven upwards, are formed by adding the suffix ma to the cardinal, as pañcama, 'the fifth,' sattama, 'the seventh;' the fem. terminates in i, the neuter in am, and they are declined like the corresponding substantives.

The Ordinal forms of the first numerals are: one, pathama; two, dutiya; three, tatiya; four, catuttha; six, chattha; sattha (only known from Kacc. 200) and chatthama, Jât. i. 22, Bv. ii. 142.

From twenty upwards we have two forms, one by adding ma to the cardinal in *ti*, as *vîsatima*, 'the twentieth;' and one by dropping the termination *ti*, as *vîsa*, *timsa*, &c.

From satam, sahassam, we have the ordinals satama, sahassama.

Besides, we have fem. ordinals in *i* to designate the day of the month; as *pañcamî*, 'the fifth day;' *ekâdasî*, 'the eleventh day,' &c.

§ 18. Conjugation.

The division of the Pâli Verb, as established by the native grammarians, is on the whole the same as that of the Skt. They admit of seven classes, of which the first again is divided into four conjugations; these correspond to the classes i., vi., ii., iii. of the Samskrit grammarians, and the other six classes to the remaining Samskrit classes in the following order, vii., iv., v., ix., viii., x. . Thus we obtain the following divisions of the Pâli Verb:—

First class: - (a) Verbs terminating in \tilde{i} , \tilde{u} or a consonant, which take guna and the vowel $a : \sqrt{bh\hat{u}}$, bhavâmi, 'to be.'

(b) Verbs ending in consonants which take the vowel a, but no guna: \sqrt{tud} , $tud\hat{a}mi$, 'to pierce.'

(c) Verbs ending in vowels which take guns, but add the personal endings without an intervening vowel: \sqrt{i} , emi 'to go.'

(d) Verbs forming their bases by reduplication: $\sqrt{h\hat{u}}$ juhomi, 'to sacrifice.'

The third division (c) is given in the Dhâtumañjûsâ as huvadayo, where $h\hat{u}$ is another form of the root $bh\hat{u}$, 'to be,' forming its present homi.

Second class:—Verbs taking the *a*-vowel and inserting a nasal before the final consonant of the root: \sqrt{rudh} , rundhâmi, 'to restrain.'

Third class:—Verbs adding the suffix ya, $y\hat{a}$ to the root: \sqrt{div} , $dibb\hat{a}mi$, 'to play.'

Fourth class:—Verbs adding the suffixes $n\hat{a}$, nu (which becomes no by guna) or $un\hat{a}$ to the root: \sqrt{cru} , sunami or sunomi, 'to hear;' \sqrt{ap} , papunami, 'to attain.'

Fifth class: -Verbs ending in a vowel, which add the suffix $n\hat{a}$ to the root: $\sqrt{kr\hat{i}, kin\hat{a}mi}$, 'to buy.'

Sixth class:—Verbs ending in a consonant, which add u (or o by guna) to the root: \sqrt{tan} , tanomi, 'to stretch.'

Seventh class:—Verbs adding the suffix aya (or e by contraction) to the root: \sqrt{cur} , corayâmi or coremi, 'to steal.'

Verbs have two voices, the *Parassapada* or Transitive, and the *Attanopada* or Intransitive; the use of the latter is much more restricted than in Samskrit, most of the Attanopada verbs having adopted the Parassapada terminations.

We distinguish in Pâli, as in Samskrit, special and general tenses. It must, however, be observed that the special and general bases very often take the place of one another, as will be shown hereafter.

Special tenses :--

- (1) Present Indicative, Subjunctive, Optative and Imperative.
- (2) Imperfect.

General tenses :---

- (1) Perfect.
- (2) Aorist.
- (3) Future.
- (4) Conditional.

Terminations of the Present Indicative.

Parassapada.		A	Attanopada.	
Sing.	. Pl.	Sing.	Pl.	
mi	ma	e	mhe (mahe, mha)	
8i	tha	<i>se</i>	vhe	
ti	nti	te ·	nte, re	

These terminations are very similar to the corresponding ones in Samskrit. In the first pers. pl. of the Attan. we sometimes find the fuller form in make, as bhasmibhavámake, Mah. 6; the termination mha-shortened from mhe occurs in dadamha, Dh. 188, maññamha, Dh. 205 (the long d is crasis for the *i* of the following *iti*, see above, p. 60). Instead of ante in the third pers. pl. we frequently meet with the termination are, especially in old texts, metrical as well as prosaïcal, as miyyare = mriyante, 'they die,' Das. Jât. 34; udiceare from udîksh, 'they looked,' M. I. 15, 6; abhikirare, 'they overwhelm,' Jât. iii. 57. This are is most probably the vedic termination re of the third pers. pl. âtmanep. as in çrinvire; it also exists in Prâk. Hem. iii. 142.

We have to consider first the verbs that add the terminations immediately to the root (which form the second class in Samskrit, in Pâli division (c) of the first class). The paradigm adopted by the native grammarians is $hi = bh\hat{u}$, 'to be.' It forms its present as follows:—

homi	homa
hosi	hotha
hoti	honti

Other roots belonging to this class are those terminating in \hat{a} , like $y\hat{a}$, 'to go,' $v\hat{a}$, 'to blow,' which have entirely the same inflexion as in Skt., only that they shorten the \hat{a} in the third pers. pl., yanti=Skt. yânti. Besides, the root $y\hat{a}$ may follow the third class, as in $y\hat{a}yanti$, M. v. 9, 4. $Th\hat{a}=sth\hat{a}$, 'to stand,' forms its present thâti and titthati, e.g., thâta, Dh. 123, samthâti, Dh. 429; from $d\hat{a}$ we have a present, $d\hat{a}ti$, Kacc. 264, imper. first pers. pl. nipadâmase, Jât. iii. 120 (explained by the commentary nikârapakârâ upasaggâ dâmase ti attho). Pajjhâti, Jât. iii. 534, is most probably derived from $jh\hat{a} = ksh\hat{a}$, 'to decay,' comp. pajjhâyi, pajjhâyasi, Suttavibh. i. 19, ii. 5.

H

From dhya we have pajjhayanto, 'groaning,' Mil.5, if Trenckner's translation is correct, and according to Senart, Mahâvastu 377, also the present avajjati and avajjeti, 'to consider,' which would have dropped the aspiration. From sna, 'to bathe,' we have an imper. nahahi belonging to this class, Jât. ii. 325. From thati and dhati = dadhati we come to the forms thahati and dahati which are in very frequent use in Pâli.

Of verbs terminating in i we have to mention here besides i and $c\hat{i}$, which belong to this class also in Skt., nî, 'to lead,' çri, 'to lean,' ji, 'to conquer,' dî and lî, 'to fly.' I seems to form its present very much as in Skt., for the first and second pers. pl. of course we get *ema*, *etha*, instead of imas, ita; for the third pl. Childers adduces a form *samudayanti* from Brahmajâlas. Atth. which is formed from *samudenti* by false analogy. In the present *vyapanenti* quoted by Minayeff, p. xxxii. from Udânagâthâ and in *vassûpanâyika*, M. iii. 2, 2, we have derivations from i with the prepositions *apan* and *upan* respectively, which make them look as though they were derived from $n\hat{i}$, comp. Vinaya Texts, i. xxxvii. A present *ayati* belonging to the *bhû*-class is given in Dhm., but has not yet been found in any text.

Çî forms its present *semi*, Cariy. ii. 2, 3, third pl. *senti*, Dh. 28; in the part. we have *semâna*, Jât. i. 180, Mah. 49; *saya-mâna*, Att. 218.

Nî forms *neti* and *nayati* according to Kacc. 261; part. *upanento*, Dh. 154; gerund *apanetvâ* instead of $^{\circ}nitva$ by false analogy.

Çri forms a present apasseti, C. vi. 20, 2, comp. apassena for apaçrayana.

Ji has the present jayati, jeti and jinâti, Kacc. 261; opt. jeyya for jayeyya, Dh. v. 103. Di (and li) forms its present deti, Gr. 136. There are two compounds of this root, oddeti and uddeti, the explanation of which causes considerable difficulty. Oddeti occurs in the signification, 'to place, to lay nets,' Jât. i. 274, ii. 443, 5, 52, 153, 183, 238, Suttavibh. i. 22 (v. l. otti, Buddh. oddhî ti abhimukham thapesi), uddeti, 'to cast a net,' Ang. i. 24, 4. Morris, in a note to this last passage, identifies the two forms, and he is no doubt right, but I believe uddeti to be the original one, and oddeti a later change. Instead of omâna, Jât. ii. 443, vs. 1, we ought to read demâna. A causative of the same root is uttepeti, 'to frighten away,' M. i. 51, comp. uddâpita, Çatr. 10, 91, and perhaps niddâyati, Jât. i. 215, niddâpeti, C. vii. 1, 2; but these two might also belong to dâ, dyati. In Prâk. we have uddihiyam, Pâiyal. 182.

The root brû, which is generally given as paradigm of this class in Skt., shows the following conjugation in Pâli:---

Parassap	ada.	Attan	iopada.
brûmi	brûma '	brave	brûmhe
brûsi	brûtha	brûse	brûvhe
brûti, bravîti	bravanti	brûte	bravante

The root han has *hanti* in the third pers. sing., but *hanati*, Mil. 220, *hananti* in the third pl., Dh. 64, for Skt. ghnanti.

Vac forms vatti and vacati, according to Saddaniti, but these forms have not yet been found in any text.

The root as, 'to be,' has the following inflexion :---

asmi, amhi	asma, amha
asi	attha
atthi	santi

At Jât. iii. 309 we have a curious first pers. pl., *amhase*, which looks like an imperf. attanop. but is used like a present. The synonymous root *acchati* is now proved beyond doubt to belong to âs, from which it proceeds through the aorist *acchi*, see Trenckner, Pâli Misc. 61, Pischel, Gött. Anz. 1865, p. 627, Torp 88. We find the compound *samacchati*, in the original signification, 'to sit down,' Jât. ii. 67. The aorist *acchi* occurs Dh. 158, Suttavibh. i. 35.

The present *påheti*, 'to send,' also belongs to this class, although it is given by the grammarians among the *svådayo* and *tanådayo*. The å in the first syllable shows that it is only deduced by false analogy from the aorist *påhesi* = Skt. pråhaishît, but it is considered as a genuine present in Pâli.

As a paradigm of division (d) of the first class, I give here the conjugation of the root hu, 'to sacrifice.'

juhomi.	juhoma.
juhosi.	juhotha.
juhoti, juvhati.	juhonti, juvhanti.

Besides, there seems to be a new root, juh taken from the special base, and inflected with the vowel *a*, as in juhamâna, Jât. ii. 399; and from this is also derived the subst. juhana, 'sacrifice,' Jât. i. 493, wrongly spelt jûhana, Gr. 16.

Other roots belonging to this class are those ending in \hat{a} , some of which I have already mentioned; $h\hat{a}$ forms the present *jahâti*, but we find also *vijahati*, Dh. 99, 261, from a new root, *jah*.

Dâ and dhâ can also have the regular forms dad ati and dadh ati, besides the new ones mentioned above, and from dad ad ati is also derived the contracted form dammi = dadmi, pl. damma, Dh. 123, 129; Jât. i. 127, etc. Besides we have a present aemi, which shows exactly the same inflexion as emi, 'I go;' Childers derives it either from the Skt. dayate, or by

false analogy from the imper. *dehi detu*, but I confess that none of these explanations seems to me quite satisfactory.

From dhâ we have nidheti, Kh. 12; nidhetum, Khuddasikkhâ, xxxi. 2; and besides a distracted form daheti (analogous to dahati from dhâti) in the aorist pidahesi, Mah. 4, and the future paridahessati, Dh. v. 9. Pass. antaradhâyati.

From sthâ we have the imp. utthehi, Rev. v. 3; Dîp. 60; nitthâyati, C. v. 26, generally nitthâti. From hnu, Kacc. 135 gives the present hanute, but the Dhm. omits this root altogether.

The division (a) of the first class has considerably encroached on most of the other classes. Nearly all the roots terminating in u or a consonant, and belonging to the second class of the Skt. have migrated into this class in Pâli : lih forms lehati, Jât. i. 19; lehentâ, Jât. ii. 31; Suttavibh, i. 46; duh: dohati, Kacc. 144; but duhanti, ib. 141; rud: rodati and rudati, Jât. iii. 214 ; rodâmi, Das. Jât. 33. Vetti, from vid, 'to know,' is entirely lost in Pâli, and generally replaced by jânâti. We find, however, a present vindati formed according to the 6th class of the Skt., and vijjati = vidyate; besides vedeti and vediyati, Mil. 60; Suttavibh. ii. 167; Part. vedayita, Mil. 60. From jâgar, 'to watch,' we have the present jágarati, Dh. 8, 11, 41, and jaggati, Dh. 201; Jât. iii. 403; comp. the Prâk. forms jâgaraï and jaggaï, Hem. iv. 80; from daridrâ, 'to be poor,' the Dhm. gives daliddati; but this form has not yet been found in any text. In some cases the e is only due to false analogy, as in the fut. gahessati, and aorist aggahesi, from grih, see Childer's ' Corrigenda,' s. v.

Daç, 'to bide,' forms dasanto, dasitvâ and damsento, damsetvâ, dasâpetvâ, damsâpetvâ, Ten. Jât. 42, 43, 44, 54.

Dhmâ, 'to blow,' forms dhamati and dhameti; besides we

have a reduplicated form *dhamådhamayati*, Mil. 117; *niddhamana*, 'a water-course,' is also derived from this root.

The root vi or ve, 'to weave,' is given in the Dhm. among those that follow the first conjugation, and indeed we find an infinitive vetum, C. vi. 2, 6; a present abbeti occurs, Jât. iii. 34, where Fausböll has altered it into appeti, comp. Trenckner, P. M. 64. A new present vinâti, formed according to the fifth class, occurs Jât. ii. 302; and besides we have the regular passive viyati or viyyati, Pât. 11.

Vad, 'to speak,' supplying the lost special tenses of vac forms its present vadati and vadeti. The Dhm. only gives a root vad with the signification 'to praise' following corayâmi. Besides, vajj may be substituted throughout all the tenses, according to Kacc. 254 (derived, no doubt, from the opt. vajju, Jât. ii. 322), e.g. vajjâsi, Jât. iii. 443, comp. vivâdyanti, Mahâvastu, p. 378.

Tas = tras, 'to tremble,' forms its present regularly tasati, Dh. 24; we find, however, an aorist vitthåsi, Kamm. 4, a present vitthåyati, M. i. 76, 3; C. x. 17, 3, and a participle vitthata Mil. 36; for vitthata comp. Pråk. hittha, Hem. ii. 136, P. Goldschmidt's remarks 'Setubandha,' ii. 42; vitthåsi reminds one of a form tråhi, Lalitavistara, p. 286, which I have corrected into tråsi (Der Dialekt der Gåthås des Lal. p. 284), and vitthåyanti seems to be formed after the false analogy of this aorist in the same way as påheti from påhesi.

Tud forms vitúdati with lengthening nittúdana, Mahâparin. 54, besides vitudam (?) Dh. 146; from khan, 'to dig,' we have an irregular inf. nikhâtum, Cariy. iii. 6, 16.

Ruh forms abhirohati, abhirûhati with lengthening, and even abhiruhati.

Bhî, 'to fear,' forms bhâyati, comp. Hem. iv. 53. The redu-

plicated form bibheti is entirely lost in Pâli. The Imper. bhátha, Jât. i. 26, is contracted from bhâyatha.

Svap, 'to sleep,' forms supati ; Part. sumanta, Mil. 368.

Vyath, 'to tremble,' is also given under this class in Dhm., but I have only found it under the form *vedhati*. At C. vii. 4, 6, Oldenberg has suggested to read *vyathati* for the senseless *vyâdhati*. The causative is *vedheti*, Trenckner, P. M. 76.

The second class of the Pâli, corresponding originally to the seventh of the Skt., forms its present after the fashion of those verbs of the sixth class which adopt n: so we obtain from *rudh* a present *rundhâmi*, just as we have from *vid*, *vindâmi*. Kacc. 238 gives besides the forms *rundhîti*, *rundhîti*, *rundhêti*, of which the last occurs also in the imper. *rundhehi*, Cariy. iii. 10, 7 (where, however, the corresponding passage of the Jât. i. 332, reads *randhehi*). About the passive *rumh*, see above, p. 39.

The other roots belonging to this class, as muc, 'to release,' chid, 'to cut,' lip, 'to smear,' bhuj, 'to eat,' are regular.

The third class comprises the verbs that take the suffix ya (with assimilation of y to the consonant terminating the root). Some of the verbs belonging to this class are real passives, as vijjati, 'to be found, to exist,' pass. of vidati; udriyati, 'to go to ruin,' from dar, drinâti, M. iii. 8, 1; Suttavibh. ii. 254. Others have adopted the meaning of actives, as *bujjhati* from budh, 'to know, to understand,' *sibbati* from *siv*, 'to sew,' *dajjati* is most probably not the Skt. dadyate only given by grammarians, but a derivation from the opt. *dajjâ*, just as vajjati from vajjâ (see above, p. 102).

Mar forms the present marati and miyati or miyyati. At Saddhammop. vs. 139, we find mariyati, which certainly is not classical.

Jar, 'to decay,' forms *jîyati* or *jiyyati* and *jîrati*; besides we have *jûrasi* in a passage quoted by Childers, J. R. A. S. xi. 110, from an unknown author. Comp. Prâk. jûraï, Hem. iv. 132.

Çar, 'to throw down,' forms seyyasi = çîryasi, Jât. i. 174. Part. visinna = viçîrna.

 $L\hat{u}$, 'to reap,' forms *lâyati*, Das. 31, Jât. i. 215; *lâyeti*, Suttavibh. i. 64; *lâveti*, with change of y to v, Kacc. 262; *lâpayati*, Mah. 61, and the regular *lunâti*, Kacc. 238.

Gâ, 'to sing,' forms gâyati, Dh. 85; imper. gâhi, Jât. iii. 507.

The fourth class corresponds to the fifth of the Skt.; but most of the verbs belonging to it can also form their present according to the ninth, by adding the suffix nâ to the root. From çru, 'to hear,' we have the present sunoti and sunâti, imper. sunohi and sunâhi, inf. sunitum, Mil. 91. From ci, 'to collect,' we have cinâti, Dh. 209; vinicchinati, Dh. 377; ocinâyatu, Cariy. iii. 6, 7; samcinoti, Att. 200; part. samcayanto, according to the first class, Mah. 127. Roots ending in a consonant can assimilate the *n* to this consonant, or insert *u* before the Suff. nu or nâ, e.g. pappoti, pâpunoti and pâpunâti, from $\sqrt{a}p$, 'to attain,' sakkoti and sakkunâti (where the second *k* is due to the false analogy of sakkoti), from \sqrt{cak} , 'to be able;' sakkâti occurs Saddhammop. v. 385, and a shortened form sakkati is induced by Childers from Nâvâ S. and Saddanîti.

Gar, 'to sound,' forms anuginâti = anugrinâti, 'he answers,' Kacc. 139. Besides we have uggirati, 'to rattle,' Jât. i. 150; Pât. 18.

Abhisambhunoti, 'to obtain,' Lotus, 313, Pât. vii., is referred by Childers to the root bhrî of the Dhâtupâțha, and this explanation is adopted with some hesitation by Senart Mahâvastu 406. The Dhm. gives an especial root sambhu. Sumbhoti, Kacc. 238, is perhaps identical with Skt. çubh, çubhnâti, 'to kill,' comp. Mahâvastu, 381. The Dhm. gives a root sumbh, 'to beat,' following the first class, and Jât. iii. 185, we have sumhâmi, v. l. sumbhâmi explained by paharâmi.

From var, 'to cover,' we have several forms according to this class; Trenckner, P. M. 63, gives the following: vanimhase, Jât. ii. 137; apâpunanti, It. 84, v. 2; vanomi, Jât. 513, v. 14; ávunitvâ, 'having pierced,' Cariy. iii. 12, 2; samvunoti and samvunâti, Kace. 238. But it can also follow the first class as vivarati (vivunâti seems not to exist), samvarati, Mil. 152; pâpurati and pârupati, 'to dress;' avapurati, F. J. 29; avâpuriyati, Jât. i. 63 (comp. avâpurana, 'a key,' Ab. 222).

The fifth class corresponds to the ninth of the Skt., but includes also some verbs belonging originally to other classes. The Pâli grammarians reckon among this class several verbs which originally belong to the fifth class of the Skt., like *cinâti*, 'to collect,' *dhunâti*, 'to shake,' Skt. cinoti, dhunoti. About *jinâti* see above, p. 98. From $p\hat{u}$, 'to purify,' we have *opunâti*, Dh. v. 252; Jât. i. 467; Mahâparin. 49. From *kinâti*, 'to buy,' we have an irregular inf. *ketum*, Jât. iii. 282.

Mush, 'to steal,' forms its present musati, Ras. 32; pamussati derives most probably not from mush but from smrish, see above, p. 58.

Aç, 'to eat,' forms asnâti, Mettânisamsâ, vs. 8; imper. asnâtha, Mahâparin. 59.

Mâ, 'to measure,' forms minâti, caus. minâpeti, Jât. ii. 378; nimimhase, Jât. ii. 369, Dh. 417.

Badh forms bandhati instead of badhnáti with a metathesis similar to that of rundhati = runaddhi; lag, 'to stick,' forms laggati = lagnâti, besides lagati after the first. From ma h, 'to grind,' we have abhimatthati = abhimathnâti.

 $J\tilde{n}\tilde{a}$ forms jânâti regularly; from grih we have gaṇhâti and gaṇhati, Dh. 160.

Other verbs following this class are mun = man, 'to think,' in *munâti*, comp. Hem. iv. 7; Fausb. S. N. 169; and *thun* = stan, 'to thunder' in *thunanti* (meaning 'to proclaim,' which points really to a confusion of the roots stan and stu, as one would think from Dhm.), Rev. 3; anutthunâti, Db. 28, 323. From the same root we have *thanayam*, Mahâsamayas. vs. 23; *thanita*, Att. 210; Jât. i. 64; *nitthananta*, Jât. ii. 362; *nitthanamâna*, Jât. i. 463.

The sixth class corresponds to the eighth of the Skt. In Pâli, however, in this case the root *kar*, 'to do,' can form its present quite regularly in the following way:

karomi.	karoma.
karosi.	karotha.
karoti.	karonti.

Besides, we have a form *kummi* for the first pers. sing., Jât. ii. 435, to which we may compare kurumi, Lalitavistara, 270. In the attanopada we have *kurute*, Dh. 9, 39, Mah. 219; and, besides, *kubbate*, *kubbati*, Kacc. 261; *vikubbati*, Jât. iii. 114; *tan* has *tanomi* regularly.

The Dhm. reckons several more roots to this class, of which some have been dealt with before, and others do not occur in . any text, so that we need not mention them here.

The seventh class comprises the denominative verbs, the causatives, and a few primitive verbs, which have migrated into it from other classes. The inflexion of these is the same as of the verbs terminating in i or i which belong to the first class, as ji, c_i , n_i , etc.; aya can always be contracted into e, and also ayi of the past and future undergoes very often the

CONJUGATION.

same change. Even verbs in *âyati* can be contracted, as *paleti* for *palâyati*, Dh. v. 49.

Among this class I also reckon verbs like *ågilåyati*, 'to be weary, to pain,' C. vii. 4, 2, which is given by the Dhm. as belonging to the third. A doubtful word is *samkåyati*, C. x. 18, with the v. l. *sahåyati*.

Primitive verbs that occasionally take the suffix of this class are vac in *vacehi*, Dh. 159, vad in *vademi*, *vadehi*, Ras. 21, *dajj* in *dajjehi*, M. vi. 23, 3; Suttavibh. i. 217, tud in *vitudeti*, Suttavibh i. 105. About *vediyati* and *vedayita* see above, p. 101.

Imperative.

Parassapada.		Attanopada.	
mi	ma	е	mase
hi or °	tha	ssu	vho
tu	nti	tam	ntam

Mi is most probably transferred from the present by false analogy. In the second person the short form without suffix is not so frequent as in Skt. We find hi also in such cases where we are not accustomed to see it in Skt., as in ganháhi for ganha=grihna. From gacch we have gacchahi, Kacc. 248, besides gaccháhi. Pațimáse, Dh. v. 379, is contracted from pațimásaya. The termination tha of the second pers. pl. is evidently taken from the present, e.g., etha, passatha, Dh. v. 171, brátha, Ját. iii. 520. From aç, 'to eat,' we have asnátha Mahâparin. 59.

The termination ssu of the second pers. sing. attanop., derived from Skt. sva, is very frequent even in verbs which follow the parassapada inflexion, e.g., *bhavassu*, Dh. v. 371, *pilandhassu*, Mil. 337, *åsassu*, 'relate,' Gr. 118 for *åsasassu*, comp. Kacc. 288; third pers. *labhatam*, Mahâpar. 62. The

termination mase of the first pers. pl. is either very old or very modern (comp. for the first eventuality Kuhn, p. 101, for the second, Torp, p. 47); besides we have one instance of a form terminating in maham, gacchâmaham, Dh. 86. For the curious form in vho of the second pers. pl. (we would expect vham= Skt. dhvam) I can only adduce one example, nivattavho, Jât. ii. 358.

The form of the root is the same in the imperative as in the indicative. Thus we have from çru, second pers. sing., sunohi, Att. 134; from kar, second pers. sing., karohi, Dh. 42; besides kuru, Mah. 18, 61, second pl. karotha, first pers. pl. attan. karomase, Jât. ii. 258. From dâ we have the Skt. form dehi, besides dadâhi, Jât iii. 109; dajja and even dajjehi, M. vi. 23, 3.

From as a second pers. sing. *åhi* is given by Childers and Minayeff, but has not yet been found in any text. The form is always expressed by *bhava*, *bhavassu*, or *hohi*, Dh. 187.

About the existence of the attanop. forms of kar and dâ given by Minayeff, § 178, 179, I feel very doubtful.

Subjunctive.

The subjunctive in Pâli has been discovered by Pischel, K.Z. xxiii. 424, who adduces a few examples from Dh. and Jât. It differs from the indicative only by the lengthening of the vowel *a*. Farther instances are *pațibhanâti*, Jât. iii. 404, *hanâsi*, Jât. iii. 199, and perhaps *dahâsi*, *dahâti*, Fausb. S. N. 161, 169.

Optative.

Parassapada. eyyâmi, e, eyya eyyâma, ema eyyâsi, e, eyya eyyâtha, etha

eyya, e

eyyum .

Attanopada

recention	u ce
eyyam	eyyâmh e

etho	eyyavho
etha	eram

This form of the optative originated from contraction of the optative suffix iya with the *a* of the first class, but it is in use with the other classes as well. When stems end in a vowel, this vowel is dropped before the *e* of the termination, as, e.g., dadeyya, and even deyya, from $dad \hat{a}ti$.

Roots terminating in a, and following division (c) of the first class form their optative by inserting y, as ydyeyya, from yâ, Pât. 110, nhdyeyya from nahd=snâ, nibbdyeyya from nirvâ, 'to be extinguished;' from the last we have besides an abbreviated form parinibbaye, Das. 6.

The forms of the sing, in *e* are frequent enough in older texts, as *ânaye* (first pers.), Jât. i. 308; *labhe*, Cariyâp. i. 1, 9; *rode*, Jât. iii. 165; *nivase* (first and second pers.), Jât. iii. 259, 262; *pâpune* (third pers.), C. vii. 4, 8; *dade*, Cariy. i. 3, 8. In Khuddasikkhâ we find even a third sing. *de*.

The termination eyya of the first pers. originated from eyyam after the nasal had been dropped; it is a form of the parassap. identical with the Skt. eyam, as we can see from instances like deseyyam, Dhp. 119, puccheyyam, Pât. 1, etc.

The first sing. in eyyâmi, as far as I know, is only given by grammarians as heyyâmi, bhaveyyâmi, huveyyâmi, from Rûpasiddhi, at Alwis Introd. 48, in the second we have e and eyyâsi, as sikkheyyâsi, Jât. i. 162, âhareyyâsi, Dh. 248, once eyya in yâjeyya, Jât. iii. 515; in the third e and eyya. One instance of the fuller form eyyâti occurs: jâneyyâti, C. vii. 3, 4. In the first pers. pl. we have emasi, emu, and ema, as vidhamemasi, Jât. iii. 261, passemu, Jât. iii. 495, jânemu, Kasîbhâradvâjas. vs. 1, Dh. 96, and dakkhema, Mahâsamayas. vs. 25; generally eyyâma.

In the second pl. we have only one instance of the shorter form samåsetha in the phrase sabbhir eva samåsetha; besides we have eyyâtha in âgameyyâtha, Cariy. i. 8, 5, samvatteyyâtha, Dh. 129, pahineyyâtha, Dh. 215. In the third pl. we have always eyyum=Skt. eyus.

The second sing. attanop. in *etho*, and the third in *etha*, are formed after the old fashion = Skt. ethâs, eta; the third is very frequent also in such verbs which otherwise follow the parassap. inflexion, as *rakkhetha*, Dh. v. 36, *abhittharetha*, v. 116, and in passives, as *jâyetha*, Dh. v. 58, from \sqrt{jan} . Besides, we have *âgaccheyyâtho*, *manasikareyyâtho* given by Alwis, Cat. 184, from Moggallâna's grammar. The first and second pers. pl. do not occur in any text, but the third is frequent, as *bhaveram*, *gaccheram*, &c.

Shortened forms of the regular opt. occur of some roots in \hat{a} , as sthâ and dhâ: adhittheyya for adhitthâyeyya, Khudd. 16, apanidheyya, Pât. 16, and so we ought to read parinibbeyam instead of parinibbâyi, Dîp. i. 24. From roots ending in *i* we have niccheyya, Dh. v. 256, for nicchayeyya, from nis+ci, anabhineyya, Pât. 4, vineyya, Khudd. 31, from nî; jeyya from ji, Dh. v. 103; from *i* we have abbheyya, Pât. 6, second eyyâsi, Jât. iii. 535. From $h\hat{a}$ =bhû: huveyya and hupeyya according to the Burmese writing, M. i. 6, 9; Trenckner, Pâli Misc. 62; besides, we have a contracted form heyya, only known from Rûpasiddhi ap. Alwis Introd. 48, but not yet found in any text.

The optatives of the seventh class can be shortened in two different ways; from corayeyya we get coraye on one side and coreyya on the other; from bhâvayâmi we have a contracted third sing. attanop. bhâvetha, Dh. v. 87 for bhâvayetha.

Besides this regular form of the optative, which corresponds to the optative of the Skt. first principal conjugation (comprising the first, fourth, sixth, and tenth classes), we have a few rests of the optative of the second principal conjugation. Some of the roots ending in \hat{a} can form, besides the regular optatives of the type dadeyya and deyya given above, the old $dajj\hat{a}$ =Skt. dadyât, Dh. v. 224; first pers. dajjam, Mah. 63, $dajj\hat{a}ham$, M. iii. 8, 1, and dajjâmi, Mah. 8. From this optative dajj \hat{a} was formed the verbal base dajjati (see above, p. 103) and this can again take the terminations of the optative, as in dajjeyya, Kacc. 256, anuppadajjeyya, Pât. 11; first pl. anuppadajjeyyama, Pât. 11.

From jñå we have *jåniyå*, corresponding to Skt. jånîyât with shortening of the *i*, and contracted from this *jaññå*; besides a form after the analogy of the verbs with vowel *a*, as *jåneyya*.

From as, 'to be,' we have an old optative which preserves throughout the a of the root dropped in Skt. :—

assam	assâma	
assa	assatha	
assa, siyâ	assu, siyum	

The first pers. assam occurs Dh. 186, the second assa, Jât. iii. 515, in the third both forms are equally frequent; assâma is found in Saccavibhanga, assu, Dh. v. 74, Jât. ii. 425.

From vad, 'to speak,' we have a second sing. vajjäsi, Jåt. ii. 443; third pl. vajju, Jåt. ii. 322, explained by the regular forms vadeyyäsi and vadeyyum. By false analogy of this optative we have a present vajjämi (just like dajjämi, from dajjam), vajjemi and a secondary optative vajjeyya given by Kacc. vi. 4, 19.

Kar forms its opt. in the parassap. third pers. sing. kare and kareyya, Dh. v. 43, Kacc. 263, pl. kareyyåtha, Dh. 147, kareyyum, Dh. 187; attanop. kubbetha, C. vii. 4, 8. Besides, we have an old opt. kayirå or kayira from karyât instead of kuryât, attan. kayiråtha or kayiratha.

 $\tilde{A}p$ forms the old opt. pappuyya = prapnuyat, Das. 37, C. vi. 4, 4.

Imperfect and Aorist.

First formation.

Parassapada.		Attanopada.	
am a	amha		amhase
a o	attha, û	ase	avham
â a	um	attha	atthum

Second formation.

Para	issapada.	Attan	opada.
im	imha		imhe
i	ittha	ise, ittho	ivham
i	imsu, isum	ittha	

The first form belongs to the imperfect and simple or strong aorist, which cannot be distinguished in Pâli, the second to the weak aorist, which is formed by adding the root *as*, 'to be,' as in Greek.

A third formation is only distinguished from the second by the plus of an s, so that we have sim instead of im, &c. It is used mostly in verbs ending in vowels, and in causatives.

Examples of the first sing. in am :—avacam, Dh. 242, addam and addasam, 'I saw,' Jât. iii. 380, Anecd. 35, once with the present termination addasâmi, Oldenberg, K. Z. xxv. 320, addasa, M. ix. 1, 5, where the reading of the MSS. ought not to be changed; from dâ we have adam, Jât. iii. 411, Cariy. i. 9, 30; from bhû ahum, Jât. iii. 411; from çru, assum, Jât. iii. 542.

Second pers. in o = as : pamådo, Dh. v. 371; åsado, Jât. i. 414, iii. 207, C. vii. 3, 12; in a: avaca, Pât. 99; and from a reduplicated aorist identical in its formation to the Skt. avocam : avoca, Dh. 185, voca, Dh. v. 133. In the third pers. we have d and a = at: abhavå, ahuvå, Buddha 443, addasa, udacchidå, Anecd. 77, and with a curious doubling of the <math>d, unexplained as yet, acchidda, Dh. v. 351; amarå, Jât. iii. 389 (v. l. amarî), 'he died.' Ajjhagamå, Ras. 78, papato, C. v. 20, 5, is the only instance known of o in the third.

In the first pers. pl. we have amha or mha in adamha, Jât. ii. 71; assumha, Jât. ii. 400; vutthamha, Dîp. 79; ahumha, Dh. 105; besides a form corresponding to the Skt. addasâma, Dh. 96.

Second pers.: ahuvattha, Dh. 105; avacuttha, Pât. 5; dattha, Jât. ii. 181.

In the third pers. we have \dot{u} , u and um, all representing the Skt. us. Examples in um are very numerous; \dot{u} we have in ajjhag \dot{u} from adhigacchati, Jât. i. 256, anvag \dot{u} , Das. 36; and u in dgu, passim in Mahâsamayasutta. The following instances deserve notice because they form their aorist in Skt. with s: aggahum, Mah. 253, upațțhahum, Mah. 132, 256, randhayum Dh. v. 248, abhikkámum, Mahâsamayasutta vi. 4; adakkhum, ib. vs. 3 corresponds to adrâkshus.

The second and third sing. of the attan. in ase, attha, are influenced by the corresponding forms of the s aorist in ise ittha (see later on). Examples are suyattha, Dh. 86, adattha, Jât. ii. 166. Besides, we have the regular form in tha=Skt. ta for inst. avocatha, Mah. 132, adassatha, Mah. 199, khiyatha Cariy. iii. 10, 1, passive ajáyatha, Mah. 24.

Mhase is also influenced by the s aorist, and besides it is a present termination; instances are ahuvamhase, akaramhase, F. Jât. 13, 38; vaņimhase, Jât. ii. 137; nimimhase, Dh. 417; Jât. ii. 369; the form of the imperfect mhasa occurs in akaramhasa, Dh. 147. The second pl. in vham corresponds to the Skt. dhvam, the third in atthum is formed by false analogy

from the sing. attha. Of these I have not found any instance in texts.

Brû forms abravi and abruvi, pl. abravum and abruvum.

From gâ we have a second pers. sing. ágá, Fausb. S. N. 161, corresponding to Skt. agâs, a third accagá, upaccagá and ajjhagá, Dh., corresponding to agât. From sthâ a third person atthá, Mah. 78.

From kar we have the regular forms, and besides an abridged aorist $ak\hat{a}$, Mah. 23, 37, corresponding to the vedic akar. Other forms of the same root will be given later on.

Labh forms an aorist *alattham*, Jât. i. 141; second pers. *alattha* or *lattha*, Dh. 240; third *alattha* = alabdha (attan). The first and second pers. are formed after the analogy of the third.

The first sing. of the second formation is contracted from the Skt. isham, as in vedic îm ; examples are *abhânim*, Jât. iii. 394, from *bhan*, 'to speak,' *adassim*, Cariy. i. 2, from darç, 'to see,' *udâtarim* from tar, Jât. ii. 317; *upâgamim*, Jât. iii. 373; *ovâdim*, Bv. xxvi. 4; we also have a form in *i* without the nasal *aggahi*, Jât. iii. 373; *upâgami*, Cariy. i. 195; *nimmini*, Cariy. ii. 6, 11; passive *ajâyi*, Cariy. iii. 5, 1. Sometimes we find *issam* with a double instead of a single *s*, as in *sandhavissam*, Dh. v. 153 (comp. Childers' Notes on Dhamm. 4, Trenckner, P. M. 56); *nandissam*, Jât. 432, vs. 9, and most probably *titikkhissam*, Dh. v. 320; some forms with a single *s* are given by Oldenberg, K. Z. xxv. 320; with change of *i* to *a* (Trenckner, p. 75), we have *icchasam*, S. N. vii. 14, vs. 1, 6; *pamâdassam*, M. N. 130; Ang. iii. 4, 6.

In the second pers. we have *i* or *i* in poetry when a long syllable is required, as in *âdiyi*, Suttavibh. i. 44; *kandî*, *gilî*,

114

Dh. v. 371; agamî, Mah. 6. In the third person we have the same termination in *âviñji*, Suttavibh. i. 127; vedî, Dh. v. 423; abhinimmi from abhinimmâti, Dh. 315; akari from kar, F. Jât. 13; or a new form in *isi*, as agacchisi, Mah. 206; antaradhâyisi, Mah. 112; ajâyisi, Mah. 18, 20.

In the first pers. pl. we have imha = ishma, as in sarimha, Dh. 188; labhima, Dh. 236; apåyimha, Jât. i. 360; in the second *ittha* = ishta, as in saddhayittha, Dh. 123; dadittha, Dh. 238; and in the third *imsu* or *isum* = ishus.

In the attanopada the second pers. *ise* as given by the grammarians, is not found in any text (just like *ase* of the first formation); we find instead *ittho* = ishthâs in *atimañ*- \tilde{n} *ittho*, Ten. Jât. 40; *asajjittho*, Jât. i. 297; *akkamittho*, Bv. ii. 53 (always spelt with the dental group).

In the third pers. we have ittha = ishta, as in pasårayittha, Jat. i. 135; *åsankittha*, Jåt. i. 151, and several passive forms given by Kacc. 289—293; comp. similar forms in the Mahâvastu, Senart's ed. p. 378.

In the first pers. pl. we have *imhe*; second, *ivham*; but these forms have not yet been found in any text. The third pl. terminates in *imsu*, *isum*, or in *um*, as *upagacchum*, Mahâparin. 21 (see above, p. 113).

The first sing. of the third formation terminates in the sim, as aññâsim, Pât. 95; cintesim, Dh. 206; or si, as cintesi, Cariy. i. 8, 1; adási, Cariy. i. 9, 47; paccaññâsi, M. I. 6, 27, 28, where the reading of the MSS. should be followed.

Second pers. si, as akási, Suttavibh. i. 44, with assimilation paţivekkhi, M. vi. 23, 8, aud third the same as adhosi, Fausb. S. N. 150; nimâsi, Mah. 27; avatthâsi, Suttavibh. i. 79, from avattharati, padhûpâsi, M. I. 15, 4, Suttavibh. ii. 109, 132. Udânesi, Jât. i. 141; with assimilation sakkhi, Jât. iii. 424; akkocchi, Dh. v. 4; acchecchi, Buddha, 441 (spelt wrongly acchejji, ib. 434); from kar, akâsi = akârshît; from har, vihâsi.

First pl. simha = sishma in adåsimha, Jat. iii. 120; second sittha = sishta.

The third pl. in simsu is not found, but is replaced by a form in sum or msu, corresponding to Skt. sus, as in adamsu, påhesum, årocesum; from sthå we have atthamsu, Dh. 233, and utthimsu, Mah. 166; from jñå, aññimsu, Jåt. iii. 303; from khyâ, akkhamsu, Jât. iii. 481; from vâ, parinibbimsu, Dîp. 51; from dhâ, samâdahamsu, Mahâsamayasutta vs. 2; from kar, akamsu.

After the false analogy of the aorists in asi we find also some aorists of verbs ending in a consonant, as *agamási*, pl. *ayamamsu* (not *agamamsum*, which is a mistake of the Burnese MSS.); *addasásum*, Jât. ii. 256, and *adassamsu*, Papañca Sûdanî, ap. Alwis Introd. 73. Even the perfect *âha*, 'he spoke,' follows this inflexion, as we have *ahamsu*, Jât. i. 121, comp. âhamsus of the Mahâvastu ap. Minayeff, Pât. xliii. Another *âhamsu* is found in *payirudâhamsu*, 'they uttered,' from \checkmark har, comp. Weber, Hâla, 184; Ind. Streifen iii. 396.

The imperfect of the root *as*, 'to be,' is entirely formed after the analogy of these acrists :

âsim âsi.	âsimha.
âsi.	âsittha.
âsi.	âsimsu.

The first pers. *åsi* occurs Cariy. i. 4, 1. For the third we find a form *ehi*, Bv. xvi. 7, which looks like an abbreviation of the fut. of *i*, *ehiti*, but perhaps the reading is incorrect.

CONJUGATION.

Perfect.

Parassapada.		Attanopada.	
a.	mha.	i.	mhe.
е.	ttha.	ttho.	vho.
a.	u.	ttha.	re.

Verbs ending in consonants insert *i* between the root and the consonatal terminations. Examples are not very frequent: $k\hat{a}$, 'to leave,' forms *jahâra*, with a euphonic *r*, Kacc. 243; *chid*, *ciccheda*, ib. 242; *budh*, *bubodha*, Att. 203; *suc*, *susoca*, Att. 212; *ah*, *âha*, third pl. *âhu*; *vid*, *vidu*, Mah. 141.

		r uture.	
Paras	sapada.	At	tanopada.
ssâmi.	ssâma.	ssam.	ssamhe.
ssasi.	ssatha.	ssase.	ssavhe.
ssati.	ssanti.	sate.	ssante (ssare).

Tatana

The termination am of the first sing. attan. is only an abbreviation of *ami* in parassap. and occurs frequently in old texts as dassam, bhokkham, Das. 7, 29; hessam, pårayissam, Ten Jât. 91. This form is identical with the first sing. aorist according to the second formation in issam, as sandhâvissam, and this is the reason why they have often been mistaken one for the other.

The future may be formed from the root or from the special base. If it is formed from the root the terminations may be added directly, or by the auxiliary vowel i.

(a) Futures formed from the root directly : pacessati, Dh. 9; vicessati, Kacc. 27, both from ci; vijessati, from ji, Dh. 9; dakkhati=drâkshyati, \sqrt{darc} , sakkhiti from çak; lacchati from labh Dh. 96=latsyati for lapsyati (comp. the aorist alattha for

alabdha), sambhossâma from bhû, Mah. 28 ; vacchâmi from vac Khuddasikkhâ 17 ; pavekkhati from viç, Mah. 153 ; checcham from chid, Jât. iii. 500 (samucchissatha, Gr. 254, is formed after the false analogy of the other futures in issati) ; from i we have esam, Jât. iii. 535, and upessam, Dhaniya S. Childers, s. v. upeti; from han, first pers. pl., hañchema, Jât. ii. 418, with an e, instead of â, that I cannot explain. Trenckner takes this and dakkhema, Mahâsamay, v. 25, as optatives of the fut., but this is without any analogy. Áhañchi, M. i. 6, 8, Trenckner, P. M. 74; bhejjati, Ang. i. 5, 7, is most probably a mistake for bhecchati (like acchejji for acchecchi, above, p. 116).

The future is sometimes used in the sense of an imperfect, as dassâmi, Cariy. i. 3, 4; pariyesissâmi, Cariy. i. 6, 5; pavissâmi for pavisissâmi, from viç, Cariy. i. 9, 56 (pavissâmi as future occurs Jât. ii. 68). Perhaps these are only aorists with primary terminations like addasâmi (above, p. 112).

(b) Futures formed from the root by the auxiliary vowel i: âgamissam, Jât. ii. 284 (and âgamicchati, Dh. ix. 12, formed after the false analogy of dicchati, if it is not merely a blunder); niggahissati, Dh. 96; samvasissare, in a passage of the Apadâna, quoted in Oldenberg's Buddha, 419; labhissati, Dh. 121; nahâyissati from snâ; parinibbâyissati, Dh. 333, from parinirvâ and parinibbissam, Bv. xxvi. 23, with loss of the root-vowel.

(c) Futures formed from the special base, mostly by the auxiliary vowel *i*: *jinissati* from *ji*, and *cinissati* from *ci*, Dh. 209; *âgacchissati*, Dh. 84; *passissati*, Dh. 88, 89; *pajahissati* Dh. 311; *pahinissati*, Dh. 84; *pâpunissati*, Dh. 101; *sunissâmi* from çru, Jât. i. 129; *paridadhassati*, Dh. 115.

With e in paridahessati, Dh. v. 9; niggahessámi, Dh. v. 326 (see above, p. 101).

In the 2nd pers. sing., 3rd pers. sing. and pl. we find some-

times *i*, instead of *a*, most probably from the *y* assimilated in the consonantal group, as *sakkhiti* for *sakkhati*, Sadda Niti *sakkhinti*, Dhaniya S.; *dakkhisi*, F. J. 23; *dakkhinti*, Mah. 83; M. i. 7, 10.

In some futures the sibilant has migrated into h, as k dh amifor karshyâmi, from kar, Cariy. i. 5, 9, Jât. i. 214; k dhati, Jât. ii. 443 (besides kassâma, Mah. 12; kassam in a modern text, I. O. C. 121); comp. kâhîti of the Mahâvastu Minayeff, 109; vihâhisi from vihar, Dh. 68 (besides vihassati, Aruṇavatisutta, v. 2); hâhasi, from hâ, Jât. iii. 172; paññâyihinti, Jât. xvi. 1, 5, from prajñâ, ehiti from i. From h d = bhû we have hohiti= bhoshyati and hehiti=bhavishyati which may be further contracted into heti.

A peculiarity of the Pâli is the double future formed from bases like dakkh by the ordinary termination issati. The base dakkh came to be used exactly like a present base as we see from the imperf. dakkim, Jât. i. 25 (which cannot be identified directly with the Skt. aorist adrâksham); from the present dakkhati, frequent in later texts, from the inf. dakkhitum, M. v. 1, 2; dakkhitâye (not dakkhitâya), Mahâsamayas, vs. 1, and from the causative dakkhâpita, Mil. 119. So we get a secondary future dakkhissati, sakkhissati, Dh. 84; sukkhissati, from çush, 'to dry,' Dh. 234; pavakkhissam from vac, Cariy. i. 1, 2, hehissati, Kacc. 249.

A curious form is dicchati, Jât. 450, vs. 7 (dicchati, 'to see,' Alwis, Introd. 42, evidently derives from driç). Trenckner, P. M. 61, following Vanaratana derives it from adikshat, but the comm. explains it by dadanti. I think it is the desiderative of $d\hat{a}$ used as a new root with the meaning of the primitive verb, and this would speak in favour of Weber's explanation of dakkhati and dekkhati as desideratives (see Kuhn's Beitr. vii, 485 ff., Indische Streifen xiv. 69 ff.). Childers and Pischel (Beitr. vii. 450 ff.) explain them as futures, P. and S. Goldschmidt derive them from the part. drishta with a change of sounds similar to that in *dukkha*=duhstha (see above, p. 39). The secondary base *sukkh* from çush (see the Causatives) speaks in favour of Goldschmidt's theory. As for *pavecchati*, Jåt. i. 28, Mil. 375, I am unable to decide whether it is really the future of viç or, as Trenckner suggests, identical with *payacchati*.

Conditional.

Parassapada.

1			- <u>r</u>
ssam,	ssamhâ.	ssam,	ssamhase
sse, ssa, ssasi,	ssatha.	ssase,	ssavhe.
ssâ, ssa, ssati,	ssamsu.	ssatha,	ssimsu.

Attanonada

With regard to the base the same rules apply to the conditional as to the future. Instances are, 1st pers. apapessam, Jât. ii. 11 (v. l. pâpeyyum); 2nd pers., bhavissa ib., agghâpessasi, Jât. ii. 31, v. l., for agghâpeyyâsi; 3rd pers., agamissâ, Kacc. 263; alabhissa, asakkhissa, Dh. 292; paññâpessa, and abhavissati in a passage of Samyuttaka Nikâya Buddha, 443, where Oldenberg wants to change it into abhavissa. For the pl. I can adduce no instances from texts.

Passive.

The passive is formed by adding the syllable ya, already mentioned as characteristic of the third class. This syllable may be added to the root or to the present base, as gacchiyati, Kacc. 236; and gamiyati, Dîp. 70, from gam, 'to go; vussati and vasiyati from vas, 'to dwell;' hâyati, Dh. v. 364, and hiyati, Kacc. 257, from hâ, 'to forsake;' gayhati and gheppati from

120

grah, 'to take;' tâyati from tan, 'to stretch,' Jât. iii. 283; Rûp. 37. About vuddhate from vah, Kacc. 237 (see above, p. 51).

The rules about the assimilation of y, which is optional, are given above, p. 48 ff.

The terminations of the passive are those of the attanopada and parassapada without any fixed rule.

An anomalous form of the passive is sussute, from çru, 'to hear,' Indische Streifen, iii. 398.

Causative.

Just as ya is the characteristic of the passive, aya is the characteristic of the causative (being the seventh class). The root is generally strengthened before this termination, as *lâveti* from $l\hat{u}$, 'to reap,' *nâyeti* from $n\hat{i}$, to lead,' *gûhayati* from *guh*, 'to hide,' but we have also exceptions to this rule, as *cudita* instead of *codita*, M. iv. 16; *bhaneti* = bhânayati, *gameti* = gâmayati.

The second form of the causative with p is much more frequent in Pâli than in Skt. It may be formed almost from every root. Thus we have *jirâpeti* from jar, Jât. i. 238; *bhim*sápeti (v. l. himsápeti), from *bhî*, Pât. 15; *pimsápeti* from pish, Mah. 175, besides *pimseti*, Jât. ii. 363; *jinâpeti* from *ji* (present base *jin*), Kaccâyanabhedatîkâ, I. O. C., 91; *sukkhâpeti*, Dh. 188, from çush (secondary base *sukkh*, derived from the Part. çushka, in *sukkhamâna*, Jat. i. 304); *upalâpeti* from *upalî*, M. v. 2, 21; Jât. ii. 266, comp. Rhys David's Buddhist Suttas, p. 5; *sunâpeti*, Dh. 166, from çru (present base *sun*); *cetâpeti* from *ci* (through confusion with *cit*); *chejjapeti* from *chid*, Mil. 90; *ânâpeti* from *ánî*. On the difference in the signification of the two forms of the causative comp. Oldenberg KZ. xxv. 323. A causative with double p is vinnapapeti, from vijna, 'to cause to be asked for,' Pat. 105.

Pivati forms its caus. pâyati and pâyeti, gah: gâheti and gâhâpeti; han: haneti and ghâteti; sampiyâyamâna, Jat. i. 297, 361, ought to be corrected into sampiyamâna, according to Senart Mahâvastu, 556.

Desiderative.

The desiderative is formed from the reduplicated root, by adding an s: jighacchati from ghas, 'to eat,' sometimes written jigacchati (Grünwedel das sechste Kapitel d. Rûpasiddhi, p. 70); jigucchati from gup; titikkhati from tij; cikicchati and tikicchati from kit; pipåsati and pivåsati from på; bubhukkhati from bhuj; sussusati from çru; dicchati from då (see above); jigimsati from har. Han has a desiderative without reduplication, pahamsati, Jat. ii. 104; Pass. pahamsiyati, Mil. 326; vimamsati from man, is only a phonetical change for mimamsati.

Intensive.

Intensives are also formed from the reduplicated root, and sometimes take ya, as $daddallati = j\hat{a}jvalyate$; $l\hat{a}lapatti$ from lap; $k\hat{a}kucchati$ from kath, J $\hat{a}t$. i. 61, 160, 318, Mil. 85; without ya, but with a nasal in the reduplication syllable, we have caikamati from kram; jangamati from gam, cañcalati from cal.

Såkacchati, 'to talk,' Pât. xv. seems to be formed after the false analogy of kåkacchati without reduplication.

Denominative.

Denominatives may be formed with and without reduplication. The terminations are the following :

(1) Ayati in pabbatáyati, samuddáyati, ciccitáyati and citicitá-

PARTICIPLES.

yati, 'to splash,' M. vi. 27, 7, Mil. 258; dolâyati, Jat. ii. 385; tintinâyati, Jat. i. 243, 244; gaggarâyati, Mil. 3; verâyati, Dîp. 83; galagalâyati, Mahâparin, 48; pariyâyati, Samanta Pàsâd. 332; pattiyâyati, 'to believe,' Jât. i. 426, where Fausb. wrongly has adopted the reading saddhim yâyasi, comp. Trenckner, P. M. 79; harâyati, M. i. 63, 1; Suttavibh. i. 68.

(2) Iyati, iyati in the examples given by Kacc. 233, which I have not found in any text, and besides in *pațiseniyati*, Fausb.
S. N. 64; ganiyati, Mil. 114; ațțiyati, 'to be hurt,' M. i. 63, 1.

(3) Ayati, eti, in the examples given by Kacc. 235, which are not found in any text, and besides in bâheti from bahis, 'to remove,' Senart Mahâvastu, 431; yanteti, Jât. i. 418; vijațeti and vijațâpeti, 'to disentangle;' samodhâneti, 'to join,' part. samodhânita, Jât. iii. 272; theneti, 'to steal,' Dh. 114, Jat. iii. 18.

For sammanneti, Ras. 69, we ought most probably to read sammanteti (Dh. 333), which is a denominative from mantra.

(4) ati in pariyosânati, 'to cease,' Dh. 331; sârajjati, 'to be ashamed,' Pât. xliv.; osanhati, 'to smooth,' C. v. 2, 3.

§ 19. Participles.

The present participle terminates in <u>ant</u> or <u>auta</u>, which is added to the present stem, e.g., *labham* or *labhanto*. About the declension of these participles and some other peculiarities, comp. p. 80. The same termination <u>ant</u> or <u>anta</u> is also used for the participle of the future, which, however, does not occur very frequently, e.g., *karissam*, Dâth. iii. 80.

In the attanopada we have the terminations <u>mana</u> and <u>ana</u> used almost without any difference from verbs of all classes,

the latter being more or less restricted to the ancient language. From kar we have the regular form kubbåna=kurvâṇa, Dh. v. 217, but also karâṇa in purekkharâṇa, Fausb. S. N. 173; kurumâna, Sam. Pâs., 323, and karamâna; from çî, 'to lie down,' we have sayamâna, Kh. 16; from çush, 'to dry,' sukkhamâna, Jât. i. 304; from vas, 'to dwell,' vussamâna, Mah. 121; from as, 'to be,' samâna, Kacc. 258. A contraction takes place in sampajâno for sampajânâno from jĩâ, 'to know,' Dh. v. 293.

The old perfect participle in vams has almost totally disappeared; a few remaining traces have been given above, p. 80.

The past participle passive is formed by adding the terminations ta and na as in Samskrit. These may be added to the root or to the present stem with or without the vowel i. From vas we have, according to Kacc. 291, vusita and vuttha, e.g., upavuttha, Cariy. ii. 3, 2; parivuttha, Pât. 6; pavuttha, Mil. 205; vusitam brahmacariyam, 'the religious duties have been fulfilled,' a locution very frequent in canonical texts, e. g., M. v. 1, 18; besides vasita, Mah. 123, where we ought to read pabbajjavasitatthane and adhivattha, Dh. 165, 341, 392 (adhivuttha, Mahâparin. 23). From jhash, 'to hurt,' we have jhatta, Mah. 146, Dh. 325, where the correct reading is châtakajjhattâ. From pat, 'to fall,' we have patita but also patta in pattakkhandha, 'crestfallen,' Mil. 5, Ass. S. 17. From icchati, 'to wish,' we have ittha (or yittha after a word ending with a vowel) and icchita, which is wrongly given as a separate article by Childers. Dhâ forms the regular participle hita; dhâta, Mil. 238, Gr. 301, M. vi. 25, 1, S. ii. 51, is most probably from dhrâ (see M. 384). Somewhat irregular is khata for khâta from hhan, 'to dig,' Kacc. 296, and the participles with n, where the Skt. drops it as bandha=baddha, Kacc. 130; pilandha, Mil. 337,

124

PARTICIPLES.

from *pi+nah*; *randha*=raddha, Mil. 107; *parikanta*=parikritta, Suttavibh. i. 89 (but *parikatta*, Mil. 188).

Participles in na are somewhat more frequent in Pâli than in Skt. and in a few instances we find both forms from the same root, e. g., from $d\hat{a}$ we generally have dinna, but also datta in atta=âdatta, Fausb. S. N. 150, 153, Dh. v. 406; from rud, 'to weep,' we have rodita, Ab. 165 and runna or ronna, Kh. 12, Das. 36, Jât. iii. 166, which is not an equivalent of rudana as Childers thought. From $l\hat{i}$ we have sallina, 'depressed,' but also sallita, Cariy. iii. 11, 10. Jyâ forms jina, Suttavibhanga, i. 220, comp. Pân. viii. 2, 44, schol.; çâ, sina in samsînapatta, S. N. 7. At v. 30 of the same Khaggavisânasutta we have samchinna, for which Senart Mahâvastu, 629, 630, gives the better reading samchanna from chard.

From this past participle passive is formed a secondary derivative by adding the suffixes vat or vin (the latter with lengthening of the a). This derivative has succeeded in its use to the lost past participle active in vams. Examples are vusitavanto, Mil. 104; hutavâ, hutâvî, bhuttavâ, bhuttâvî, Kacc. 281.

The participle of necessity is formed by adding the terminations tabba, tayya=tavya, aniya, ya. These terminations can be joined with or without the vowel i. Examples with tabba are frequent enough: jinitabba, Dh. 101; metabba, Kamm. 8; parijânitabba, Dh. 151; pativijjhitabba, Dh. 259; pariyâpuņitabba, Alw. N. 23; tuțihabba, Jât. i. 476 - tayya is, as far as I know, only given by grammarians. Aniya we have in karaniya; ya in sakkuneyya, Mab. 141, and in asamhira for asamharya, Dîp. 31.

Infinitive.

The infinitive generally terminates in tum, as gantum, 'to go;" sunitum, 'to hear,' from the present stem, Mil. 91; satthum, Ten Jât. 104; thutum, from stu, 'to praise,'S. N. 38; putthum = prashtum, 'to ask,' Parâbhavasutta, v. 1; parimetum from mâ, Mil. 192; jinitum from ji, Kacc. 319; nikhâtum, from khan, Cariy. iii. 6, 16; from budh we have patisambuddhum and suboddhum, Kacc. 8. Besides we have also the ancient vedic terminations tave, tuye, and tâye, e. g., pahâtave, Dh. v. 34; niketave, Jât. iii. 274; nidhetave, Jât. iii. 17; netave, Dh. v. 180; with tuye, ganetuye, Bv. iv. 28; marituye, Therîgâthâ, 165; with tâye, dakkhitâye, Mahâsamayasutta v. 1; jagghitâye, Jât. iii. 226.

A curious form of the infinitive is *etase* from *i*, Therîgâthâ, 151.

Gerund.

The gerund is formed by adding the suffixes $tv\hat{a}$ ($tv\hat{a}na$ and $t\hat{a}na$) and ya. In Dhp. the use of ya is restricted to compound verbs as in Skt., but later on it is also used for the single verb. Before these terminations the root generally appears in the same shape as in the infinitive. Examples are very frequent: $tv\hat{a}$ in $netv\hat{a}=n\hat{t}v\hat{a}$ (inf. netum); $chetv\hat{a}=chittv\hat{a}$ (inf. chettum); $bhutv\hat{a}=bhuktv\hat{a}$, Jât. iii. 53; $gantv\hat{a}=gatv\hat{a}$ (inf. gantum); $petv\hat{a}=jitv\hat{a}$ (inf. jetum). From dric we have the anomalous gerund $disv\hat{a}$, where the t is entirely lost; $dassitv\hat{a}$, Suttavibhanga, ii. 64, should be changed into passitv\hat{a}. From $h\hat{a}$, 'to forsake,' we have the reduplicated form $jahetv\hat{a}$, Dhp. 85, 333; from sth\hat{a}, uttit/hitv\hat{a}, Dh. 335; upatit

thitvâ, Mil. 231. A contracted form is anuvicca=anuviditvâ (comm. jânitvâ), Jât. i. 459, Ang. ii. 2, 7, Fausb. S. N. xi.

Tvána in passitvána, Mah. 165; jahitvána, Dh. 215; suņitvána, Das. Ját. 33; jinitvána, Dh. 286; chetvána, Dîp. 96; vatvána, Dh. 193; daditvána, Cariy. i. 9, 26; pavakkhitvána, Mahàsamayasutta, 3. From the Skt. we can compare pîtvânam, Pân. vii. 1, 48.

Túna in kátúna or kattúna, Kacc. 310; Suttavibhanga, i. 96; ápucchitúna, Therîgâthâ, 165; chaddúna, ib. 169; nikkhamitúna, Theragâthâ, 11; sotúnam, at the beginning of the Mahâvagga of the Dîghanikâya I. O. C. 69.

Ya in dhacca=âhritya (Skt. âhârya), in dhaccapâda, 'a sort of bed,' frequent in the Vinaya; dhacca=âhatya from han, Mah. 45, Kacc. 302; upahacca=upahatya, ib., uhacca, Mahâsamayasutta, v. 3; abbuyha from â+brih, Dh. 255; nikacca= nikritya, Suttavibhanga, i. 90; and most probably also patigacca = pratikritya, with softening of the k, comp. Trenckner, Mil. 421; paticca=pratîtya, but adhicca I prefer to derive with Childers from adhritya, answering to Skt. adhârya. Cicca, Khuddasikkhâ and sañcicca, Pât. 3, 66, Suttavibhanga, i. 73, most probably stand for cintya=cintayitvâ (comm. jânanto). From i we have anvâya, frequent in Dh. formed after the false analogy of mâya from mi; from grah, samuggahâya, 'having embraced,' Fausb. S. N. 152.

Sometimes the termination ya of the gerund is dropped and the root alone remains, e. g., *abhiñinâ* for *abhiñinâya*, 'having known;' pațisankhâ for pațisankhâya, 'having reflected,' anupâdâ for anupâdâya, Dîp. 15.

In a few cases we find a gerund with double suffix combined from ya and två, e. g., abhiruyhitvå for abhiruyha, Kacc. 129: ogayhitvå for ogayha, Mah. 261; sajjhitvå from sad, Bålåvatåra, s. 58.

The suffix tum of the inf. can be used also for the gerund, but this use seems to be limited to a few verbs. In the Pâțimokkha we have a gerund, abhihatthum from har, which agrees exactly with the corresponding Jaina forms puraükâum and gantum (see my Beiträge zur Gramm. d. Jaina Prâkrit, p. 61). From Rhys David's and Oldenberg's note, Vinaya Texts, ii. 400, it appears as if they wanted to identify this form with those in tvâna aud tûna like nikkhamitûna; we learn, however, from Hem. ii. 146, that in abhihatthum and the corresponding Prâkrit forms, the suffix of the inf. is used instead of the gerund. A similar form, distinguished only by the loss of the anusvâra is datthu=drashtum, 'having seen,' parallel with disvá, S. N. 73, Theragatha, 48. The corresponding Prak. form is given as datthum by Hem. l. l.; but we have also in Jaina Prâk. forms without anusvâra, as kattu and hattu from kar and har

As an exercise for the student, I give the text of a Jâtaka, with a literal translation, and complete analysis of the words:-

Translation.

In former times there was in the island of Lankâ a Yakkha city called Sirîsavatthu. Thereiu dwelt Yakkhinîs. These, whenever a shipwreck took place, in splendid clothing, taking soft and hard food, surrounded by female slaves, carrying children on their hips, went to meet the merchants. That they might think "We have come to an abode of men," they would show here and there men ploughing and tending cattle and so forth, herds of cattle, dogs, etc., and approaching the merchants they would say, "Drink this rice gruel, partake of this rice, eat this food." The merchants, unawares, enjoy what is given by them. Thus having eaten and enjoyed, while resting, they exchange friendly greetings. They ask : "Where do you

EXERCISE.

live ? whence do you come ? whither are you going ? on what business have you come hither?" They answer: "We have come hither, having been shipwrecked." [Then the Yakkhhinis say]: "Well, sirs, three years have passed since our husbands went on board ship and went away; they must be dead; you are also merchants, we will be your servants." Thus they enticed those merchants with female blandishments, and leading them to the Yakkha city, the first men being captured, having bound them as it were with supernatural chains, they hurry them into the abode of destruction. If they do not obtain shipwrecked men near their own place of abode, they wander along the sea-shore as far as Kalyâni on the other side, and Nagadipa on this side, and this is their custom. On a certain day, 500 merchants came to their city. The females approaching them, enticed them, and bringing them to the Yakkha city, binding the men whom they first captured as with supernatural chains, they hurried them into the abode of destruction. The first Yakkhinî took the chief merchant, the others the remainder, and so the 500 Yakkhinis made the 500 merchants their husbands. Then the chief Yakkhinî in the night time, when the merchants had gone to sleep, rising, goes to the abode of destruction, and, killing men, eats their flesh, and returns. The others do likewise. When the chief Yakkhinî returned, after having eaten the human flesh, her body was cold. The chief merchant, having embraced her. knew that she was a Yakkhinî, and thought : "These must be 500 Yakkhinîs; we must escape." On the morrow, in the early morning, on going to wash his mouth, he told the other merchants: "These are Yakkhinîs, not human beings; when other shipwrecked men come, they will make them their husbands, and devour us. Shall we not flee? But 250

said: "We are unable to leave them; you go; we shall not flee." The chief merchant, having persuaded the 250 by his edvice, fled, terrified at the females. Now at that very time the Bodhisattva was born from the womb of a mare; he was pure white, black-headed, munja-haired, possessed of supernatural power, being able to go through the air. Rising through the air from the Himavanta, he went to the isle of Tambapanni, and having eaten paddy, produced spontaneously in the lakes and pouds of Tambapanni, he went on, and thus proceeding, said compassionately three times in a well modulated human voice: "Does any person wish to go? Does any person wish to go? They, hearing the speech, came near with folded hands, and said: "Sir, we folk wish to go." "Then get upon my back," said he. Then some got on his back, some seized his tail, but some stood with folded hands. Bodhisatta, by his own supernatural power, conveying all the 250 merchants, even those standing with folded hands, placing each in his own place, returned to his own abode. But the Yakkhinis, when the time of the others had come, killed the remaining 250, and ate them.

This story is another version of the well-known myth of the Sirens, as was pointed out for the first time by Dr. Morris, in the "Academy" of Aug. 27, 1881 (reprinted in the "Indian Antiquary" for October, 1881, pp. 292-3).

Atite, 'in former times,' loc. sing. of the past part. of i, 'to go,' with ati.

Tambapannidipe, 'in the island of Ceylon,'=Tâmraparnidvîpe, loc. sing., tâmraparni literally means 'copper leaf,' most probably from the colour of the soil in the island. Ceylon was called the 'Island of the Demons,' as can be seen from Senart "La Légende du Bouddha," p. 272, et seq. Allusion is made to this myth also in the Lalitavistara, p. 196, ed. Calc.:

Laghu gagane vrajase kripajâto râkhasadvîpam

Vyasanaçata manujân tada grhya kshame sthapesi.

Sirisavatthun (v. l. \circ vatthu) nom. sing. of a neuter u-stem About the locality of this fabulous town nothing is known to me.

Náma, nom. sing. of a neuter n-stem.

Yakkhanagaram, nom. sing. of a neuter a-stem.

Ahosi, 3rd. pers. sing. Aorist of bhû or hû, 'to be.'

Tattha=tatra, 'there,' adverb of place.

Yakkhiniyo, nom. pl. of yakkhini, 'a female yakkha.'

Vasimsu, 3rd. pl., aorist of vas, 'to dwell.'

Tâ, nom. pl. fem. of the demonstr. pronoun.

Bhinnanåvånam, gen. pl. of a bahuvrîhi compound from bhinna and nâvâ, 'ship.' Bhinna is the past part. pass. of bhid, 'to break,' and the whole compound means 'shipwrecked.'

Âgatakâle. Âgata is past part. pass. from a + gam, 'to go,' and kâle, loc. of kâla, 'time.'

Alamkatapatiyattâ, a compound of two past participies. Alamkata=Skt. alamkrita, 'adorned, embellished,' from alam+ kar. Patiyatta from prati+yat, 'to prepare, to dress.' The whole compound stands in the nom. pl. f.

Khâdaniyam, acc. sing. n. of the part. of necessity of $\sqrt{khâd}$, 'to eat.' It means literally, 'that can be chewed,' i.e., 'solid food.'

Bhojaniyam, acc. sing. n. of the part. of necessity of \checkmark bhuj, 'to eat,' means, in opposition to khâdaniyam, 'soft, or wet food,' as boiled rice, etc. Gåhåpetvå, gerund of the causative of \sqrt{gah} , 'to take,' lit. 'to cause to be taken.'

Dâsigaṇaparivuțâ, nom. pl. f., parallel to alamkatapațiyattâ. Dâsigaṇa, 'a troop of female slaves,' parivuța, past part. pass. of pari+var, 'to surround.'

Dârake, acc. pl. of dâraka, 'child.'

Amkenádáya. Amkena, instr. sing. of amka, 'hip,' ádáya, gerund of a + da, 'to take.' The whole means 'having taken on the hip.'

Vânije, acc. pl. of vânija, 'merchant.'

Upasamkamanti, iii. pl. pres. of upa+sam+kram, 'to approach.'

(Tesam, gen. pl. m. of the demonstr. pronoun.

Manussavásam, acc. sing. of manussa, 'man,' and vása, 'dwelling.'

Âgat' stands in sandhi for âgatâ, nom. pl. of the past part. of $\hat{a} + gam$ (see above, âgatakale).

Amha ti stands in sandhi for amha iti. Amha is 1st pers. pl. pres. of the verb subst. as. Iti is generally used after a quotation.

Sañjânanattham, composed from sañjânana, 'perceiving,' and the acc. of attha, 'purpose.' It means 'for the purpose of perceiving.'

Tattha, tattha, see above. The repetition is distributive, 'here and there.'

Kasigorakkhâdini, kasi=krishi, 'ploughing,' gorakkhâ, 'cowkeeping;' âdini is the neuter pl. of âdi, 'etc.' The whole compound is an acc. dependent from the following karonte.

Karonte, acc. pl. m. pres. part. of kar, 'to make.' This belongs to manusse and depends from dassenti.

Manusse, acc. pl. of manussa, 'man.'

PARTICIPLES.

Gogane, acc. pl. 'herds of cattle.'

Sunakhe, acc. pl. of sunakha, 'dog.'

Ti=iti, see above.

Evam, particle, 'thus.'

Âdîni, acc. pl. n. of âdi, 'etc.'

Dassenti, 3rd pers. pl. pres. caus. of darç, 'to see.'

Vâņijânam, gen. pl. of vâņija, 'merchant,' dependent from santikam.

Santikam, acc. of sa+antika, 'near'

Imam, acc. sing. f. of the demonst. pronoun.

Yâgum, acc. sing. of yâgu = yavâgu, 'rice-gruel,' a fem. u-stem.

Pivatha, 2nd pers. pl. imp. of pibati, 'to drink.'

Bhattam, acc. sing. of bhatta=bhakta, 'boiled rice.'

Bhuñjatha, 2nd pers. pl. imp. of bhunjati, 'to eat.' Khâdaniyam, see above.

Khâdatha, 2nd pers. pl. imp. of khâdati, 'to eat.' The long ā is the crasis, as in amhâ, above.

Vâņijâ, nom. pl. of vâņija.

Ajánantá, nom. pl. of the pres. part. of jñâ, 'to know,' with a privativum, 'not knowing.'

Tahi, instr. pl. f. of the demonstr. pronoun.

Dinnam, acc. sing. past part. of $d\hat{a}$, 'to give.' The substantive is understood.

Atha, particle, 'then.'

Khâditvâ, gerund from khâd.

Bhunjitvâ, gerund from bhuj.

Vissamitukâle, similar to âgatakâle, above. Vissamita, past part. from vi+çram, 'to rest.'

Pațisanthâram, acc. sing. of a masc. a-stem. Karonti, 3rd pers. pl. pres. of kar.

Tumhe, nom. pl. pers. pronoun, 2nd pers.

Katthavâsikâ, nom. pl. of compound from kattha=kutra, 'where,' and vâsika, 'living.'

Kuto=kutas, 'whence.'

Âgatâ, nom. pl. of âgata, see above.

Kaham, interrog. particle, 'where, whither.'

Gacchissatha, 2nd pers. pl. fut. of gacch, the present stem of gam, 'to go.'

Kena kammena, instr. sing. of the interrog. pronoun and kamma=karman, 'business.'

Idhâgat' = idha + âgatâ.

Attha, 2nd pers. pl. pres. of as, 'to be.'

Pucchanti, 3rd pers. pl. pres. of pucch, 'to ask.'

Bhinnanává, nom. pl., see above.

Hutvá, gerund of bhû or hû, 'to be.'

Vutte, locative absolute of the past part. of *vac*, 'to speak.'

Ca, 'and,' copulative particle.

Sådhu, neuter adjective, 'well.'

Ayyá, voc. pl. of ârya, 'sir.'

Amhåkam, gen. pl. personal pronoun, 1st pers.

Pi=api, 'also.'

Sâmikânam, gen. pl. of sâmika, 'husband.'

Návam, acc. sing. of nává, 'ship.'

Abhirúhitvá, gerund of abhiruh, 'to mount.'

Gatânam, gen. pl. of gata. This belongs to sâmikânam and depends from tini samvaccharâni atikkantâni.

Tini, nom. pl. n. of the numeral stem ti, 'three.'

Samvaccharâni, nom. pl. of a neuter a-stem.

Atikkantâni, nom. pl. n. past part. of ati+kram, 'to go beyond, to pass.'

ANALYSIS OF TEXT.

Te, nom. pl. m. demonstr. pronoun.

Matâ, nom. pl. past part. of mar, 'to die.'

Bhavissanti, 3rd pers. pl. fut. of bhú, 'to be.'

Tumhe, see above.

Yeva in Sandhi for eva.

Mayam, nom. pl. pers. pronoun, 1st pers.

Tumhákam, gen. pl. pers. pronoun, 2ud pers., see above, amhákam.

Pådaparicáriká, nom. pl. f. from páda, 'foot,' and paricárika, 'servant.'

Bhavissâma, 1st pers. pl. fut. of bhû.

Vatvá, gerund from vac, 'to say.'

Itthikuttabhåvavilåsehi, compound from itthi = strî, 'woman,' kutta of unknown etymology, most probably synonymous with the following vilåsa, 'charm, beauty.' The whole stands in the instr. pl.

Palobhetvå, gerund of the caus. of pra+lubh, 'to seduce.'

Yakkhanagaram, the acc. to denote the direction, 'to the Yakkha city.'

Netvå, gerund of nî, 'to lead.'

Sace, conjunction. 'if.'

Pathamagahitâ, from pathama, 'first,' and gahita=grihîta, past part. of grah, 'to take.' The whole stands in the nom. pl. Atthi, 3rd pers. sing., instead of the plural.

Devasamkhalikáya, from deva, 'god,' and samkhaliká=çrinkhala, 'a chain.' The whole is a tappurisa compound, and stands in the instr. case.

Bandhitvå, gerund from bandh, 'to bind.'

Kâranaghare, loc. of kârana, ' destruction,' and ghara=griha, ' house.'

Pakkhipanti, 3rd pers. pl. pres. of pra+kship, 'to throw.'

Attano, gen. sing. of atta=atman, 'self.'

Vasanatthâna, loc. of vasana, 'dwelling,' and sthâna, 'place.'

Alabhantiyo, nom. pl. f. of the pres. part. of labh, 'to obtain,' with a privativum.

Pana=punar, 'again.'

Parato and orato, abl. sing. of para, 'further,' and ora, 'hither.'

Kalyánim and Nágadípam, acc. of direction. Kalyáni must be the modern Kaelani on the Kaelani Gangâ, about six miles from Colombo, where there is a celebrated Buddhist temple. Nágadípa is most probably identical with the Naggadípa of the Mahâvamsa (p. 46), which island Vijaya is said to have touched on his way from Bengal to Ceylon, but nothing can be made out about the situation of this island.

Samuddatiram acc. from samudda, 'the sea,' and tira, 'the shore.'

Anuvicaranti, 3rd pers. pl. pres. of anu+vi+car, 'to wander along.'

Ayam, nom. sing. f. of the demonstr. pronoun.

Tåsam, gen. pl. f. of the demonstr. pronoun ta.

Dhammatâ, 'occupation,' f. â-stem.

Ekadivasam, from eka, 'one,' and divasa, 'day.' Acc. to denote time.

Pañcasatá, nom. pl. of pañca, 'five,' and satam, 'hundred.'

Nagarasamipe, loc. of nagara, 'town,' and samipa, 'neighbourhood.'

Uttarimsu, 3rd pers. pl. aorist from ut + tar, 'to cross over.' Gantvå, gerund from gam, 'to go.'

Ánetvá, see netvá, above.

Pakkhipitvå, geruud from pra+kship.

Jetthakayakkhinî, ' the chief or first Yakkhinî.'

ANALYSIS OF TEXT.

Sesá, nom. pl. f. and sese, acc. pl. m. of sesa, 'other.' Vânije and sâmike, acc. pl. Akamsu, 3rd pers. pl. aorist from kar. Rattibhage, loc. to denote time. Niddam, acc. of nidda, 'sleep,' to denote the direction, dependent from gate. Gate, acc. pl. belongs to vânije. Utthâya, gerund from ut+sthâ, 'to get up.' Maretva, gerund of the caus. of mar, means 'to kill.' Âgacchati, 3rd pers. sing. pres. of $\hat{a} + gacch$. Jetthakayakkhiniya, gen. sing. dependent from sariram. Manussamamsam, acc. 'human flesh.' Sitalam, neuter adjective. Sarîram, nom. of a neuter a-stem. Hoti, 3rd pers. sing. pres. of bhû or hû. Pariganhanto, nom. sing. of a pres. participle, from pari+ grah, 'to embrace.' Tassá, gen. sing. f. demonstr. pronoun. Yakkhinibhavam, acc. 'quality of a Yakkhinî.' Natvá, gerund from jñå, ' to know.' Imá, nom. pl. f. demonstr. pronoun. Bhavissanti, 3rd pers. pl. fut. of bhû.
