## PREFACE.

I offer no apology for adding one more to the list of Urdū Grammars, for, if the book itself does not justify its publication, no excuse will avail me.

Urdū or Hindūstānī Grammar has been developed and reduced to a system by Englishmen, or under their supervision. From Gilchrist to Shakespear, and from Shakespear to Yates, Arnot, and Forbes, each new Grammar has thrown new light upon the language, and has lightened the labour of learning it. Excellent as is the Grammar of Forbes, both teachers and learners have long since discovered its deficiencies. The Grammar of Professor Monier Williams made a great step in advance; and the author of this book fully admits his obligations to it, for the help it has given him as a teacher, and for the assistance it has afforded in the preparation of this work. But Professor Williams's Grammar is printed entirely in the Roman character, and so is unfitted for the use of young officials who have to read and write the language in the character which the natives themselves employ.

In this work I have availed myself of the labours of my predecessors, and I fully recognize my obligations; but with their rules I have embodied the results of my own study and observation. In a few instances I have ventured to differ from those who have gone before me, but more has been done in the way of addition and classification, and in the drawing of distinctions. Many things have been noticed which hitherto have been passed over unperceived, or as being, perhaps, as Forbes says, "plain and self-evident." I have not allowed this last consideration to weigh with me; what is "plain and self-evident" to one student may not be so to another; and it is hardly competent for one who knows the language to determine what points are so clear and manifest that no student will ever require to be told them. It may be impossible to produce a perfect Grammar; but the smallest matters should be included in it, as well as the greatest.

In dealing with the alphabet, Forbes's plan of showing every letter in its separate, initial, medial, and final forms has been set aside, and the old plan has been reverted to of giving only the separate letters. Forbes's plan had its advantages, but it is really unnecessary, and it gives the alphabet a very formidable appearance, which has often exercised a very discouraging influence upon beginners, "There are thirty-five letters, and each letter has four distinct forms. Four times thirty-five are a hundred and forty! what work!" etc., etc. I have often had to combat this view, and to show that the difficulty was far less than it seemed. Still it has damped the ardour of many a willing youth. I have endeavoured to obviate this by a brief explanation of the ways in which letters are contracted and modified for combination. A careful study of the alphabet and of the observations in paragraph 6, followed by a diligent and repeated perusal of the "Reading Exercise" in paragraph 22, ought to give the learner an adequate knowledge of the character.

The Accidence differs but little from that of former grammars; still it contains some additions and changes which have recommended themselves for adoption. It is in the Syntax that the greatest differences will be found. This part of the subject has been dealt with more systematically, and has been reduced to short distinct rules fully illustrated by various examples. It may be thought

that the examples are more numerous than necessary; and to some minds they may be so. But the perusal of these different illustrations will help to fix the rule upon the memory, and it will probably happen that now one, and now another, will address itself to the apprehension, and lay hold of the memory.

The work being intended for practical purposes, I have endeavoured to make the rules applicable to each part of speech complete in themselves, so that the student may readily find whatever he may seek. This has involved some repetition. For instance, the suffixes of the Genitive case are in reality Adjectives, and have the same concord as Adjectives: the rules applicable to the Genitive of the Noun apply also in the main to the Genitive of the Pronouns; they might therefore have been dealt with together. But instead of generalizing and proceeding upon a theory acceptable to a philologian, but unintelligible to a learner, I have preferred the more simple course, and have constantly kept in view the wants of the learner. The cross-references from one Rule to another will enable the intelligent student to make his own comparisons, and he will profit by the labour.

In laying down the rules of Syntax it has been

the primary object to ascertain and follow the general practice of the best writers. But Urdu is a new language; its grammatical canons cannot be said to have been definitively laid down or generally understood. Writers have been guided by the usage of the language rather than by rule, and even now a native will test the accuracy of a passage by his ear rather than by any recognized law. Such being the case, novelties are continually creeping in, and solecisms are of constant occurrence. The many alternative methods which are noticed in the Syntax show how unsettled have been the laws of composition, and it is not too much to say that breaches of the simplest and clearest principles of grammar may be found in all writers. Therefore, without insisting upon the strict accuracy of every axiom laid down in the Syntax, the student must not infer that any given rule is not generally correct because he has met with one or even several passages with which it is inconsistent. In page 113 I have taken the opportunity of citing some transgressions of the most important and peculiar rule of the language, that of the use of the Agent instead of the Nominative Case. This construction has been inherited from the Sanskrit, which evinces a decided partiality for the Instrumental case and the Passive voice, but it has become and continues the most remarkable characteristic of the Urdū.

A short chapter on the Deva-nāgarī alphabet gives all that is necessary for enabling a student to master it, and to read such books as the *Baitāl Pachīsī* and *Singhāsan Battīsī*, which, so far at least as relates to grammar and construction, are Urdū rather than Hindī.

Urdū abounds with Arabic derivatives which have brought with them the grammatical powers of their original language. To fully comprehend the meanings of such words, and to understand how their various forms are developed, some little insight into Arabic Grammar is necessary. The brief chapter on this subject will, it is hoped, afford the requisite assistance to the learner, and enable him to acquire an intelligent

I speak only of the true Urdū, not of the Dakhnī or Hindūstānī of the South. This, which can hardly be considered a real vernacular, has been exposed to a variety of influences not affecting the Urdū. It is the language of isolated Musulmāns, so it has adopted some Persian terminations, which the Urdū does not recognize; and, on the other hand, it has been affected by the idioms and phrascology of those vernacular languages in the midst of which it is used. This dialect does not admit the peculiar construction of the Agent with the Verb. In one or two points perhaps this dialect has improved upon Urdū, though it must be acknowledged that it is generally inferior. Still, those who know it best are generally ready to do battle in its favour, and to show cause for their partiality.

apprehension of the relations and powers of a large and important class of words.

In another chapter an endeavour has been made to smooth the way to an acquaintance with the Shikasta or "broken hand" used in ordinary correspondence. This free running hand differs no more from the printed characters than our English running hand differs from its exemplar. But, as in England, so in India, there are writers whose negligent and crabbed scrawls tax the patience and often baffle the ingenuity of the ill-used beings who have to read them. It is obvious that little can be done to remove such difficulties; but the leading peculiarities of the "broken hand" have been pointed out, and the various examples and transcriptions will aid the advanced student in understanding its intricacies so far as to become master of any tolerably written document.

Some few errors have crept into the print, partly from oversight, partly from accidents in printing. They have been noticed in the Errata, and the student is requested to correct them. Other trivial errors, such as the dropping out of a vowel point, may be met with, but these are unavoidable, and ought not to cause any embarrassment.

prince of the believe when the control of the contr

# HINDŪSTĀNĪ GRAMMAR.

- 1. The Urdū language, commonly called Hindūstānī, is a language formed by an admixture of the Arabic and Persian of the Muhammadan conquerors with the Hindū or vernacular language of the conquered Hindus. It is everywhere the language of the Musulmāns, and in Dehli, Lucknow, and other places, where the Muhammadan power has made the deepest impression, it is the common language of the people. This language is written in the Arabic alphabet. But vast numbers of Hindus are more or less ignorant of the Arabic and Persian of the Urdū, and employ native Hindī and Sanskrit words instead; these people use the Deva-nāgarī alphabet. The Arabic being the alphabet of the Urdū is the one used in this Grammar, but the Deva-nāgarī alphabet is given and explained in an Appendix.
- 2. The Arabic alphabet consists of twenty-eight letters; to these the Persians added four, to satisfy the requirements of their language; and three more have been added in India to represent sounds unknown to Arabic or Persian. So the alphabet of the Urdū consists of thirty-five letters. It is read from right to left.

3. THE ALPHABET.

- 4. In transcribing the above letters in Roman characters some discritical marks are required to distinguish the various forms of the z, t, s, etc. Those employed in the foregoing table are those used in Shakespear's Dictionary. They are not perhaps the best that could be devised, but for a learner they are preferable to any system which would establish a difference between Grammar and Dictionary.
- 5. The letters introduced into the alphabet by the Persians are  $\psi$  p,  $\psi$  ch,  $\psi$  ch, and  $\psi$  g. These are modifications of the Arabic  $\psi$  h,  $\psi$  h,  $\psi$  h,  $\psi$  h, and they are called respectively  $h\bar{a}$ ,  $h\bar{a}$ ,  $h\bar{a}$ ,  $h\bar{a}$ . The Hindi letters are those bearing four dots,  $h\bar{a}$ ,  $h\bar$
- 6. The forms used in the above table are those which the letters have in their separate state. When they are used in combination, many of them are liable to considerable modification. As finals, there is no difficulty in recognizing them; for, with two exceptions (\(\xi\)\(\xi\)), they then appear in their full form, with the addition only of a ligature connecting them with the preceding letter. Modifications of form are occasioned by the necessity of joining letters together. When they are joined, they retain their distinctive dots, but are deprived of their final flourishes. The letters \(\xi\)\(\xi\).

; ; and , never join the following letter, so they remain unaltered; ڬ ڬ do join, but in such a way as to make no change in their shape. The five letters of the shape and the letters .. , and sare all written as initials and as medials; thus, بن في من الله غير ban, نت nit, bipat. In combination with letters of the - form they are written as initials followed by m they may be written as tum. Letters of the - form are contracted into -, as جاں fajar, ¿ chakh. In writing and in lithographs assumes a shape resembling wāo, thus ). س becomes and ص becomes مر, as سُت sat, مُسِر sabr. In writing and in some printed books the forms and , contracted to \_\_\_\_ and \_: in combination, are very commonly used instead of س and من as initials are written عد , as medials عبد , and as finals عن , thus عقل akl, بعد bad, and as initials are written و and as تيخ as گے and کے safar. شفر kaf, تف and علی as initials and medials are reduced to \$ \$, as گل , kab, گُل gul, Le chakr. U becomes I and is distinguishable from alif by always joining the next letter. Mim as an initial is or o, as a medial or . The letter h as an initial is s, but in MS. more commonly 2; as a medial it is for ; as a final it is a when it is joined and s when it is separate. The letter , when it is final and has the sound of e, is commonly written \_ .

#### 7. Pronunciation.

 $\phi$  and  $\phi$  and  $\phi$  are pronounced as in English.

by placing the tongue between the teeth, and are softer than in English; t is an intermediate sound between the English t and th. t and t are the same as the English t and t, and these letters are used as the representatives of the English t and t when it is necessary to write an English word containing those letters in Hindustānī; thus t thus t are the same as the English t and t when it is necessary to write an English word containing those letters in Hindustānī; thus t are the same as the t and t when it is necessary to write an English word containing those letters in Hindustānī; thus t are the same as the t and t when it is necessary to write an English word containing those letters in

ي , من s, and من s, though differing in sound in Arabic, are all alike pronounced s in Hindūstānī.

 $\overline{\epsilon}$  and  $\overline{\epsilon}$  j and ch have the English sounds as in jar and church; they are never pronounced like the French j and ch.

; h is a very strong aspirate.

 $\dot{\tau}$   $\underline{kh}$  is the ch of the German nacht or Scotch loch.

ظ ض ز ق  $\underline{z}$ , z, z, have distinct sounds in Arabic, but only one, that of a simple z, in Hindustānī.

, is r pronounced very distinctly.

" r is a stronger sound of this letter obtained by placing the tongue far back on the roof of the mouth. There is no word that begins with this letter.

; zh is the French j as in jour.

 $\dot{z}$  gh is pronounced like the Northumbrian r, a sound

similar to that which is in some parts given to the r by the French and to the g by the Germans.

ن k is the ordinary sound; ق k is more guttural, coming from the throat rather than the mouth.

ع is always hard as in gift.

نون صاف nān-i ṣāf or pure n has the ordinary sound of n; but when followed by a b or p it is pronounced as m, thus لَنَّبَا  $lamb\bar{a}$ , سُونَّتِنا  $saumpn\bar{a}$ . At the end of a native Hindī word it frequently has the nasal sound of the French n as in bon. This is called the مَعْنُونَ  $n\bar{u}n$ -i ghunna or مَعْنُونَ  $maghn\bar{u}na$ . It is often written without the dot, and is rendered by n.

, w as a consonant is w, but in some parts it is pronounced v. See further, Rule 15.

as h is the simple aspirate. When it comes at the end of a word and is preceded by the vowel zabar (a) it has no perceptible sound; this silent a is called it has no perceptible sound; this silent a is called have  $h\bar{a}-e$  mukhtafi, the obscure or imperceptible h. The forms and are medial varieties of the h, which are used indiscriminately by natives; but the following distinction made by Dr. Gilchrist is generally used in printed books, and is so useful as to merit universal acceptance. In Nägarī every consonant that is capable of being aspirated has a distinct aspirated form; thus h and hh are represented by distinct letters. These

<sup>&</sup>lt;sup>1</sup> So in English we write and say consign but combine, intact but impact, the con and in having been converted into com and im.

aspirated letters are represented in the Persian character by the addition of the 4 or "butterfly form" to the simple consonant; thus & is ph and is is th. This is called the مَرَكُّ hā-e murakkab or compounded h. This k must be pronounced as a distinct aspirate, and should not be allowed to merge into a modified sound; thus ph should be pronounced as in up-hill, though it is often heard pronounced as in phase: th sounds as in the words at home, never as in then. According to this rule the & can never be preceded by a vowel. When the letter h is preceded by a vowel sound or by a consonant incapable of aspiration (as n) the , is employed. كَها is bhā'ī, but بَهن is bahin, كها is khā, but كها is kahā, and munh is written . This h is called ها خال مل الله kā-e khālis, the pure h. After letters (such as ), which never join the following letter the initial form s must be used, so that dhan and dahan are alike written مدن. A final s with two dots over it is found in Arabic words and is pronounced t, but in Persian and Hindustānī it is frequently converted into - t. Sometimes the dots are omitted, and then the letter is sounded as h.

#### 8. Vowel Points and Diacritical Points.

أَخُهُ fatha or زَبَر zabar written above has the sound of a as in servant.

ير kasra or زير er written beneath is sounded like i in pin.

أَنْ عُمَّهُ zamma or پيش pesh written above is sounded like u in put.

show that it is what the grammarians call عالى sākin, 'stationary,' meaning that it is not followed by a vowel sound. In other words, jazm (which means amputation) cuts away the vowel sound, and the consonant combines with the one following it; thus مَن mard and يَ أَدُمي mard and as in the word جَزَم jazm itself. Final consonants being always sākin do not require jazm.

تَشْدِيد tashdid. This word signifies corroboration, and the sign strengthens or corroborates a consonant by doubling it. It is written above the letter. Thus فَمَدُ is zamma. and حَق is hakk.

سَد madd or مَد madda means prolongation, and placed over an initial alif gives it a long sound; thus,  $\bar{a}b$ .

maşla or وَصَلَى naşla, conjunction. This mark, though of frequent occurrence, is found only in Arabic phrases consisting of two words with the article ال between them. When the first of the two words ends with a vowel, that yowel excludes the initial a of the al, and this con-

<sup>&</sup>lt;sup>1</sup> The learner is requested to understand this technical term  $s\bar{a}kin$ , as it will be used in preference to any English word. It has been rendered into English by the word quiescent, but Forbes has shown that this term is not an exact equivalent. He uses the word inert as a better though insufficient representative. The word stationary is a literal rendering of the original word. But no one of these words conveys a precise idea of the term. So the word  $s\bar{a}kin$  will be employed whenever it is necessary.

placed over the alif, thus, أَصَرُ اللّٰ الْمَرُ amīru-l umarā. In other words, maṣl is an apostrophe marking the elision of the initial of the article when it is preceded by a vowel, as the apostrophe in French marks the elision of the e of le when followed by a vowel. The words in such phrases stand in grammatical relation to each other; thus, phrases stand in grammatical relation to each other; thus, amīru-l mūminīn, 'Commander of the Faithful;' في الواقع fi'l mākī, 'in fact;' لَا لُونِي الواقع bi'l kull, 'entirely' (bi, in; al, the; kull, whole).

In these phrases another change frequently occurs. by which the l of the article al is converted into another letter. The l is what the Arabs call a lunar or weak letter, and when al is followed by a solar or strong letter the l assumes the sound of that strong letter. ش س ز , ذ د ث ت The solar or strong letters are بى ظ ط ض ص. Followed by one of these the l of al assumes its sound, and this change is noted by marking the l with jazm and the initial strong letter with tashdīd, thus, ركن الدوله, Ruknu-d Daulah, 'Pillar of the State;' ارشيد Hārūnu-r Rashīd (the celebrated khalif).] " تَنُوين tannin. This is another Arabic contrivance. It means the addition of ..., n and has been called 'nunation' or n-ing. This is effected by doubling a vowel point at the end of a word, thus an, in, un. These mark the cases of the noun in Arabic.

tanwīn of the first vowel is the only one used in Hindūstānī, and this, excepting in words ending with hamza or s, has an alif \ written under it, but that alif is not pronounced; thus, בَكُمُةُ ittifākan, المَانَا التَّفَاقَا hikmatan. This n is represented by n.

أهمزه hamza is the sign of an initial vowel, and is either written or understood when a word or syllable begins with a vowel. It is found used in Hindūstānī in three ways. When two vowels are in contact it is written over the latter, as فائده  $j\bar{a}'\bar{u}n$ , عائي  $j\bar{a}'\bar{u}n$ , فائده  $j\bar{a}'ida$ . Secondly, when an apparently medial alif is to be treated as initial and to be pronounced short as in sa'ar, عرائي jur'at. Thirdly, it is used to form the Persian  $iz\bar{u}fat$  with words ending in a or  $\underline{z}$  (see Rule 60).

#### 9. Vowels and Diphthongs.

The letters 1, 9, and ي are liable to modifications of sound, they are therefore called مُرِفُ عِلَّت harf-i illat, defective or changeable letters, as distinguished from the مُرِفُ صَحِيم harf-i ṣaḥīḥ, the integral letters or consonants.

The short vowel a is represented by zabar as is sat.

,,	i	,,	zer ِ as سِت sit.
,,	u	,,	pesh' as sut.
The long	vowel ā	,,	alif ا as سات sāt.
,,	ī	"	ه سیت ۵۶ ي

The vowel e is represented by  $\underline{c}$  as  $\underline{c}$  as  $\underline{sct}$ . The diphthong ai ,,  $\underline{c}$  as  $\underline{sait}$ . The long vowel  $\bar{u}$  ,,  $\underline{s}$  as  $\underline{sat}$ . The vowel o ,,  $\underline{s}$  as  $\underline{c}$  as  $\underline{sot}$ . The diphthong  $\underline{au}$  ,,  $\underline{s}$  as  $\underline{c}$  as  $\underline{saut}$ .

The letter ye, as a final, undergoes some changes in writing so as to mark its different sounds without using the vowel points. The e sound is generally written and  $\bar{\imath}$  as  $\underline{\varepsilon}$ ; ai is often represented by a modified form, but in this work  $\underline{\varepsilon}$  is used. The  $\underline{\varepsilon}$  is called the  $\underline{\varepsilon}$  is a called the  $\underline{\varepsilon}$  is or reverted  $\underline{ye}$ .

The zabar (') or short a is pronounced like the a in adore and America;  $\bar{a}$  is the long sound of the same vowel as in the word last and sometimes as in all. Zer (.) is the short i of the word pin;  $\bar{\imath}$  is the long sound as in machine; the first is the i of fit, the second is like the ce of feet. Pesh (') is pronounced as in put;  $\bar{u}$  as in rule, or as oo in rood; e has the French sound as in fête, or the English sound of a in fate; ai is sounded as in aisle; o as in note, and au like ou in house.

#### 10. Initial Vowels.

All words beginning with a vowel must commence with either alif or a ain, accompanied by the hamza, but practically the hamza is suppressed. Both these letters are considered consonants, and in fact they are

mere breathings without sound. Alif is a slight aspiration or movement of the breath effected by the muscles of the throat;  $\tilde{a}in$  is a deeper or more guttural aspiration. These letters being consonants, the vowel sound is communicated to them by the vowel point or long vowel appended to them, as is bit, and is bot, so is it, and if it is it, and in the one case and the in the other are the letters which give the motion while the and the impart the sound.

11. In MSS, and in lithographed works the vowel points are very sparingly used, the reader being supposed to be acquainted with the proper sounds of the words. But in printed books, especially in such as are intended for the use of students, the necessary points are supplied; zer and pesh are invariably inserted, and jazm is given whenever its absence would mislead the reader. Zabar, the most common of the vowels, is generally omitted, but this need not embarrass the learner, for as the zer, pesh, and jazm are supplied wherever they are required, the vowel zabar (a) must be added to every consonant unmarked by one of those points. Thus, is mulk, and is milk, because

each consonant bears either a vowel point or the jazm; but is malik, and is malak, because the  $m\bar{\imath}m$  in malik and both the  $m\bar{\imath}m$  and the  $l\bar{a}m$  in malak being without points have the zabar understood.

## 12. Of the Letters, and ...

The letters  $n\bar{u}o$  and ye are used both as vowels and consonants. They have vowel sounds when they are followed by a consonant, but they are consonants when they are followed by a vowel; thus, عَنُونَ is  $s\bar{u}d$ , but is  $sav\bar{u}d$ ; is sair, but سَوْلًا is siyar. As initial letters they are consonants, and so at the beginning of words they invariably have the consonantal sounds.

#### 13. Technical Grammatical Terms.

Several Oriental grammatical terms have incidentally appeared in the foregoing pages, but there are some others relating to the alphabet which it will be well to notice before passing to another subject.

14. When the letter alif bears the mark madd it is ealled الق مَعْدُودُ alif-i mamdūda, the prolonged alif. Alif is found at the end of some Arabic words written in the letter ye, thus في or ي. This is ealled the الق مَعْصُورُ alif-i maksūra, the abbreviated alif; it is sometimes pronounced ā as in عَالَىٰ taðlā, sometimes a as in عَالَىٰ عُلُمَا. In Roman letters it is written ā or a.

- after the letter خ kh, is slurred or passed over in pronunciation; such a nāo is called وَاوِ مَعَدُولَ nāo-i mādūla, 'passed over nāo.' Thus خُوث and خُوث are pronounced khud and khush; خواب khṇāb and خويش khṇesh are pronounced with a slurred and very indistinct sound of the não. Such a não is represented in Roman characters by u or n.
- 16. The word  $s\bar{a}kin$  has been explained as applied to a consonant which is 'stationary,' not being followed by a vowel. Consonants which are followed by a vowel are said to be important in the word in the wo
- 18. The letter من أن is called حلى المنظم المنافقة المنطقة ال

is also called حَامُ مُرَّمُ الله hā-e muhmala, 'the undotted' حامُ مُعْجَمَعُهُ to distinguish it from خ, which is called أَمُ مُعْجَمَعُهُ hā-e mūjama or 'dotted' hā. The final a being silent is called the مَا مُحْتَفِي hā-e mukhtafī, the 'concealed' or 'obscure' hā, and ها مَكْتُربي hā-e maktūbī, the 'written' hā. The s which is pronounced, as in sl, rāh and بادشاه bādshāh, is called مَلْفُوظي malfūzī, 'pronounced'; ظاهِر ; jalī, 'apparent.'

## 20. Different Kinds of Writing.

There are several different modes or styles of hand-writing employed by Orientals in producing their manuscripts. The plainest and most simple is the Naskhī, in which the Kurān and Arabic MSS. in general are written. It is the character which type-founders have endeavoured to imitate, and so it is the one almost ex-

clusively used for printed books. It stands in much the same relation to the other styles as our printed characters do to our written ones. The Talīk or 'hanging' style is an elegant hand employed by the Persians for ornamental purposes and for choice copies of the works of their most favourite authors. It is very graceful in appearance, and the art of writing it is frequently practised with the greatest assiduity. Choice specimens are highly prized, and a khushnavīs or fine writer obtains liberal rewards for specimens of his skill. The Naskhtalīk or Nastalīk is a medium between the Naskh and the Talīk, in which the bold slopes and graceful curves of the latter are restrained and assimilated to the more rigid forms of the Naskhi. This character is commonly used in good MSS. The Shikasta or 'broken' hand might with equal or greater propriety be called the 'connected' or running hand, for although the forms of its letters often vary from the normal forms, and may thus be said to be broken, the leading characteristic is the running of one letter into another, so as to avoid the necessity of raising the pen from the paper. The dots distinguishing the letters are neglected more or less, and several of the characters are made to vary in shape according to the exigencies of those to which they are joined. Many of these varieties are general in all Shikasta writing; but it often happens, as in our own language, that a writer has peculiarities of his own.

The leading characteristics and varieties of this writing may soon be learned, but a full and familiar knowledge of the language is necessary to read it with anything like facility. Another kind of writing is called Shikasta-āmez, 'mixed with Shikasta,' in which some of the more convenient modifications of the Shikasta are adopted for the sake of facility in writing. A chapter in the Appendix is devoted to the peculiarities of Shikasta, and to that the student is referred for explanations and specimens.

## 21. Alphabetical Notation or Abjad.

The Arabs make use of their letters as numerals: but this use of them is almost exclusively confined to chronograms, in which the dates of important events are expressed by the letters of a pithy sentence or a line of verse. Each letter has an unvarying numerical value. The letters are arranged according to their values in a sentence of eight meaningless words, which sentence, or *Memoria technica*, is called *Abjad*, from the first of the eight words. It runs as follows, the numerical value of each letter being placed over it.

Alif has the value of 1, ye of 10, ke of 100, and so on. The values of the various letters in a chronogram

being added together the sum gives the date, as in the following:

The title of a well-known work, which represents the date of its composition, 1217 A.H. or 1802 A.D.

## 22. Exercise in Reading.

Having learned the letters in their separate forms, and carefully read all that has been said about the alphabet, the learner should exercise himself in spelling out carefully the following passage, of which an exact transliteration is given below.

ایک عُلام آپنے مالک کے یہاں سے بھاگا۔ اِتِّفاقا کَیْد روز کی بعد اُس کا صاحب کِسی دُوسْرے شَہْر میں گیا۔ وَهاں آپنے غُلام کو دیکھا اُور اُسے پَکَرِّکے کَہا تُو کِس واسطے بھاگا؟ عُلام نے صاحب کا دامَن پَکرِّکر کَہا تُو میرا غُلام هَی تُونے بَہُت سا میرا پیسا چُرایا اُور بھاگٹ آیا۔ آخِر وے دونوں قانی کے پاس گئے اور اَپنا اَحوال بَیان کِیا اُور اِنْصاف چاها۔ قانی نے اُں دونوں کو ایک کِپُرِکی کے پاس کَپُرا کَرِکے فَرَمایا قانی نے اُں دونوں کو ایک کِپُرکی کے باهر رکھو۔ اُنہوں نے تُم دونوں اَپنے سِر ایک بارگی کِپُرْکی کے باهر رکھو۔ اُنہوں نے تُم دونوں اَپنے سِر ایک بارگی کِپُرْکی کے باهر رکھو۔ اُنہوں نے

حُكْم كے مؤافِق كِيا ـ تَب قاضي نے جَلَاد كو فَرْمايا ـ غُلام كا سِر تَلْوار سے كات ڈال ـ غُلام نے بِيه بات سُنْتے هي اپّنا سِر اَنْدَر رَكَه لِيا ليكن اُس كا مالِك وَيسے هِي كَهَرًا رَها ـ قاضي نے فَرْمایا كِه غُلام كو سَزا دو \*

Ek ghulām apne mālik ke yahān se bhāgā. Ittifākan chand roz ke bād us kā ṣāḥib kisī dūsre shahr men gayā. Wahān apne ghulām ko dekhā aur use pakarkar kahā tū kis wāsṭe bhāgā? Ghulām ne ṣāḥib kā dāman pakar-kar kahā, tu merā ghulām hai, tū ne bahut sā merā paisā churāyā aur bhāg-āyā. Ākhir we donon kāzī ke pās ga'e, aur apnā aḥwāl bayān kiyā, aur inṣāf chāhā. Kāzī ne un donon ko ek khirkī ke pās kharā kar-ke farmāyā, tum donon apne sir ek-bārgī khirkī ke bāhir rakho. Unhon ne hukm ke mu'āfik kiyā. Tab kāzī jallād ko farmāyā, Ghulām kā sir talwār se kāṭ-ḍāl. Ghulām ne yih bāt sunte hī apnā sir andar rakh-liyā; lekin us kā mālik waise hi kharā rahā. Ķāzī ne farmāyā ki, ghulām ko sazā do.

# 23. Parts of Speech.

The Arabs, and Hindūstānī grammarians in imitation of the Arab system, classify all words under three parts of speech. 1. إِنَّهُ أَنْهُ أَنّا أَنْهُ أَنّا أَنْهُ أَنْهُ أَنْهُ أَنْهُ أَنْهُ أَنْهُ أَنْهُ أَنّا أَنّا أَنْهُ أَنّا أَنّا أَنْ

## 24. The Article.

Hindūstānī has no regular article corresponding to our a and the. The article is inherent in the noun, and the context determines whether it is indefinite or definite. But in default of articles the numeral المناه المناه ولا المنا

# 25. The Noun [.].

Under the term Ism or Noun the grammarians include:

- 1. The Noun or Substantive [ Ism-i mausuf.
- 2. The Adjective اِسم صِفَت Ism-i șifat.
- 3. Pronoun اسم ضمير Ism-i zamīr.
- 4. The Infinitive or Verbal Noun مُعَدّر Masdar.
- 5. The Participle Present all Ism-i haliya.
- 6. The Participle Past إِسْمِ مَفْعُولِ Ism-i maf'ul.
- 7. The Participle Conjunctive إِنَّمَ مَاضِي معطوفي Ism-i māzī mātāfī,

# Gender of Nouns - Jins.

- 26. In Hindustānī there are only two genders: the masculine (تَذْكِيرُ tazkīr), and the feminine (تأنِيث tanīs). Some few rules can be given for ascertaining the gender of a noun, but they are very inadequate, and the subject will require the learner's constant attention. There is a considerable number of nouns of which the gender is unsettled, being by some deemed masculine and by others feminine, and besides this the natives themselves frequently make mistakes of gender, even in respect of words whose gender is settled.
- 27. Where the name of an animate being indicates its sex the gender follows the sex; or, in short, names of males are masculine, and of females feminine. The only exception to this is, when men, out of delicacy in speaking of their wives, use a covert term, such as kabīla, tribe, or خينك kabīla, tribe, or قبيلك
- 28. Nouns of common gender like [admī, 'a person,' are treated as masculine, excepting only when they are distinctly used for females.
- 29. In compound words the gender generally follows that of the last word; thus, شكارگاه shikār-gāh, 'a hunting ground,' is feminine, because gāh is feminine. The expression قبلدگاه kibla-gāh, 'father,' is masculine and an exception.
  - 30. The gender of many nouns may be known by

their terminations; the leading principle being that final  $\sqrt{a}$  is distinctive of the masculine gender, and  $\sqrt{a}$  of the feminine. But this must not be considered decisive, for under Rule 27 burhiyā, 'an old woman,' is feminine, and carry dhobī, 'a washerman,' is masculine.

31. Sanskrit and Arabic scholars should bear in mind that words borrowed from those languages retain their original gender; masculines and neuters being masculine, and feminines remain feminine in Hindūstānī.

## Masculine Nouns.

- - 33. Nouns ending in s ah (a), as هُ bacha; بَنْدَه banda, 'slave,' are masculine.

34. Arabic nouns of three syllables of the same measure as تَوْجُّهُ taṣarruf, 'possession' (except تَوْجُهُ tarajjuh, 'favour'), and تَفَاوُت tafārut, 'difference;' and words of two syllables like إِنْصَافَ inṣāf, 'justice;' and اِنْصَافَ ilhlāṣ, 'sincerity;' are generally masculine.

## Feminine Nouns.

- 35. Nouns ending with the letter  $\underline{z}$   $\bar{z}$  are feminine. There are but few exceptions to this rule; the most common exceptions are  $p\bar{a}n\bar{\imath}$ , 'water;' water;' a pearl;'  $p\bar{z}$ , 'life;'  $p\bar{z}$ , 'clarified butter;' and  $p\bar{z}$   $p\bar{z}$ , 'curds.'
- 37. The Arabic infinitive or verbal noun which enters largely into Hindūstānī is feminine. It is a word of two syllables, the first beginning with i ta and the second having the vowel ī for its middle letter, as تَعْصِير takṣīr, 'fault;' تَعْرِيد tadbīr, 'counsel;' تَعْرِيد takṣīm, 'division.' There is one word of this measure which is masculine, تَعْرِيدُ tāwīz, 'a charm.'
- 38. Other rules have been given, but they are burdened with so many exceptions as to be practically

useless. In conclusion, when the means of ascertaining the gender of a noun are not at hand, it is better to use the masculine: for nouns of the masculine gender are far more numerous than those of the feminine.

39. The masculine gender is called تذكر tazkīr, and the feminine تأنيث ta'nīs. The adjectives of these words are, مُؤنَّث muzakkar, masculine; and mu'annas, feminine.

# Declension (... | gardan).1

40. Nouns have two numbers عدد adad; the singular احد, nāhid, and the plural بمن jamā.

41. The various cases (ساله hālat) are made by particles corresponding to the English prepositions; but as they follow the noun they qualify, they are more properly postpositions.

#### Nominative

Either the nominative or the dative. Accusative

کا کے کی  $k\bar{a}$ , ke,  $k\bar{\imath}$ , of. کو ko, to. Genitive

Dative

se, from, with, than. Ablative

men, in ; ير par, on ; تک tak, up to. Locative

i ne, by. Agent

ai, placed before the noun. Vocative

<sup>1</sup> The vowel point zabar will hereafter be only occasionally used. Rule 11.

In native grammars the nominative and the agent, the accusative and the dative, and the ablative and the locative, are considered to be the same and bear the same names. The nominative and the agent are called same names. The nominative and dative  $f\bar{a}il$ ; the accusative and dative  $f\bar{a}il$ ; and the ablative and locative fail. The genitive is called fail; fail; fail; and the vocative fail.

- 42. There is no distinct form for the accusative; its place being supplied eather by the nominative or the dative. Which of these two forms should be used is a question of Syntax; but we may here briefly anticipate, and state that when the accusative is required to be definite or specific the dative form should be used.
- 43. Genitive.—The particle  $k\bar{a}$ , ke,  $k\bar{\imath}$  partakes of the nature of an adjective. The connexion of the genitive case with the adjective may be seen in such phrases as 'a chain of iron,' and 'an iron chain;' 'a crown of gold,' and 'a golden crown;' 'the king's palace,' and 'the royal palace.' This particle  $k\bar{a}$ , ke,  $k\bar{\imath}$ , being identical with or similar to an adjective, it agrees with its object, *i.e.* with the noun which it possesses.

 $K\bar{a}$  and ke are masculine, and  $k\bar{\imath}$  is feminine. When the object of the genitive is masculine and in the nominative case singular number,  $k\bar{a}$  must be used. When the object of the genitive is masculine and not in the

nominative singular, ke must be used. When the object is feminine,  $k\bar{\imath}$  is invariably used. Examples:

Obs.—When the object of the genitive case is a nominative used as an accusative,  $k\bar{a}$  must be used, as میں آڈمی کا ھاتیہ دیکھنا ھُوں main ādmī  $k\bar{a}$  hāth dekhtā hūn, 'I see a man's hand.' See Rule 42.

- 44. Dative.—Instead of کو ko, کو ke ta'īn is sometimes used.
- 45. Ablative.—سیس sen, سوں son, and ستي sitī, are sometimes used instead of سيد.
- 46. Locative.— په pa is used for بنا. نير tak, تلک ,talak, and کا lag, all meaning 'till,' 'up to,' 'as far as,' are other particles of the locative.
- 47. Vocative.—غي hai and ي ya are used instead of أي ai. There are other vocative particles, some of which have a derisive or contemptuous signification. These may be learned from the Dictionary.
- 48. Inflection. Besides the addition of the particles distinguishing the cases, all nouns undergo a slight modification in the plural, and some few in the singular

<sup>1</sup> Compare the possessive pronouns in Latin and French.

also; the modified form is called the oblique form or the inflection.

Nouns consisting of two short syllables, the latter of which encloses the zabar or short vowel a, reject that vowel when on is added; thus, برسول baras makes برسول jagah, makes جگه jaghon.

- 49. This addition in the oblique form plural is the only one to which masculine nouns are subject, with the exception of those ending in اله م من م مر ما م الله في ا
- 50. Feminine nouns never alter in the singular. Those ending with a vowel make the nominative plural in an; those ending with a consonant make it in en.

<sup>1</sup> So in English, us and them are the oblique forms of we and they.

- 51. So the declension of nouns may be divided into four classes, for the differences between them are not sufficient to make them distinct declensions.
  - 52. Class I. Regular Masculine Nouns.

N. مری mard, a man.
G. مرد کاکے کی mard kā, ke, kī, of a man.

mard ko, to a man. D.

سرك سے mard se, from a man. Ab.

mard men, in a man. Loc.

mard ne, by a man. Ag.

اي مرد ai mard, O man. Voc.

mard, men. N.

mardon kā, ke, kī, of men.

mardon ko, to men. D.

سے مردوں سے mardon se, from men. Ab.

mardon men, in men. Loc.

mardon ne, by men. Ag.

ai mardo, O men. Voc.

53. Having thus fully given one noun, it will be unnecessary to do more for the other classes than to show the nominative and oblique forms. The various cases may then be made by adding the appropriate particles to the oblique forms, remembering always to drop the it of on in the vocative plural.

54. Class II. Masculine Nouns ending in  $\setminus \bar{a}$ ,  $\leq a$ , and  $\setminus \setminus \bar{a}n$ .

N. ایست betā, a son. ایست bete, sons. ایست betoù.

A few masculine nouns ending in \ \bar{a}, derived from Arabic, Persian, and Sanskrit, not having become as it were naturalized, do not allow the final to be changed; as كَٰذُ اللهُ الل

SINGULAR.

N. الله dānā.

Ob. الله dānā.

Db. الأول dānā.

The word پانو pānw, 'a foot,' sometimes makes the oblique singular پانوی pānon, and the nominative and oblique plural پانوی pā'on. گانو gānw, 'a village,' and nānw, 'a name,' are similarly declined. But there is some uncertainty in the use of these forms.

55. Class III. Feminine Nouns ending in ي ء .

بيٿي beṭī, a daughter.

SINGULAR. PLURAL.

N. يقيأ beṭī, a daughter. إلى المواقع المو

Feminine HindI nouns in 1 a make the nominative

plural by adding مرياه, as چريا chiriyā, 'a bird,' چرياه chiriyān, 'birds;' تيليا thiliyā, 'a water pot,' plural thiliyān; but those that are of foreign origin قيلاً, make the plural in يي en, as بلا balā, 'an evil,' plural , Ib balāen.

gā'e, 'a cow,' makes گائي gā'en in the nominative plural, and Jaion in the oblique form.

jorū, 'a wife,' makes جوروأل jorū'ān, 'wives.'

56. Class IV. Feminine Nouns ending in Consonants.

# ات, rāt, night.

SINGULAR.

PLURAT.

N. ات, rāt, night.

راتيس rāten, nights. راتيس rāton.

Ob. el, rat.

## Arabic and Persian Forms.

57. The Arabic form of the dual is occasionally used in Hindustani, as والدين nālidain, 'parents,' from والدين mālid, 'a father.'

58. The regular Arabic plural of the masculine in ..., ān, as سارقون sāriķ, 'a thief,' plural سارق sāriķūn, is rarely met with. The feminine plural in in āt is common, as طِلِسَمات tilismāt, 'charms;' واردات wāridāt, 'events.' The Arabic 'broken plurals' are of very frequent occurrence. These appear in a great variety of forms, as قِسَم kism, 'a sort;' اقسام 'aķsām,

'sorts;' حال إلى المُوال 'state;' المُوال aḥnāl, 'states,' circumstances;' عِلْم 'ilm, 'science;' عُلُوم 'ilūm, 'sciences.'
These are given more in detail in the Appendix.

- 59. The Persian plural is frequently employed. It is made by adding الله قم to the names of animate beings, and له له to the names of inanimate objects; as مردان mardān, 'men,' from مردان bār, 'a man;' bārhā, 'times,' 'occasions,' from بارها bār, 'a time,' and بارها sālhā, 'years,' from بارها sāl, 'a year.' The distinction is sometimes disregarded, as we find السبها asphā, 'horses,' and جرافان chirāghān, 'lamps.' Nouns ending in s make the animate plural in بارها وقم، and the inanimate in بندگان bandagān, 'a slave,' بندگان bandagān, 'slaves;' موبعات sābajāt, 'provinces.' Nouns ending with lā generally insert به y for euphony before ما قم، thus, gadā, 'a beggar,' makes گدایان gadāyān, 'beggars.'

دِيده و دِل dīda-i dil, The eye of the heart. يبيني ۽ سِيم sīnī-i sīm, A salver of silver; a silver waiter.

The  $iz\bar{a}fat$  is also used for connecting a substantive with its adjective. See Rule 71.

# The Adjective (المنم صِفْت Ism-i Ṣifat).

61. The adjective precedes its noun. It is generally unchangeable, being subject to no alteration whether for gender, number, or comparison. The exceptions are Hindi words ending with  $1 \bar{a}$ . These are declinable, and, as already observed, they resemble the particle  $k\bar{a}$ , ke,  $k\bar{i}$  of the genitive case. The final  $1 \bar{a}$  is the masculine nominative singular, but in every other case, singular and plural, of the masculine, the termination is changed to  $\underline{e}$ , and throughout the feminine to  $\underline{e}$ ,  $\bar{i}$ . Thus, 1,2  $gor\bar{a}$ , white.

gorā. گورا gorā. پر پر gorā. پرورا ,, Every other case گورد Feminine Singular and Plural گوري gorī.

62. Adjectives from the Persian in  $\bar{a}$  are unchangeable, as غرف judā, 'separate;' دان dānā, 'wise;' پيدا

paidā, 'born.' A few ending in á a are declined like gorā, such as انّده rānda, 'rejected;' عاده sāda, 'plain;' عمده تُشطه, 'exalted;' عائده ganda, 'fetid;' عمده mānda, 'tired;' مُرنّده khuranda, 'gluttonous;' مُرنّده sharmanda, 'ashamed;' مينه kamīna, 'mean;' الديدُه he-chāra, 'helpless;' الكريدُه nā-kāra, 'useless;' عرامزاده harām-zāda, 'bastard;' يك ساله harām-zāda, 'bastard;' عرامزاده do sāla, 'biennial.'

- 63. Adjectives when they are used as substantives are declined as substantives. Thus, نیک مرد nek, 'good,' as an adjective is indeclinable, نیک مرد nek mard, 'a good man,' نیکو نید nek aurat, 'a good woman;' but when used for 'the good,' it is declined; as نیکو نید nekon ne, 'by the good.'
- 64. Sometimes, especially in poetry, the a light is placed after its noun, and the feminine may then take a plural termination; as راتيس بهاريان rāten bhārīān, 'tedious nights.'
- 65. The comparison of the adjective is made in a very simple manner, by merely placing the word with which the comparison is made in the ablative case; and instead of saying 'the girl is better than the boy,' saying 'the girl is good than the boy;' thus,

الزَّكِي لزَّكَ سے اَجْبِي هَي laṛkī laṛke se achchhī hai. ghar darakht se ūnchā hai, the گبر درخّت سے اُونچا هي house is higher than the tree. The Superlative is expressed by using the word sab, 'all,' or some equivalent word; thus,

- نه ماتهی سب سے بڑا هی nuh hāthī sab se barā hai, that is the largest elephant; or, that elephant is larger than all.
- 66. The words زياده ziyāda, and أور aur, in the sense of 'more,' are sometimes used to form the comparative; as زياده خُوب ziyāda khub, 'more fair,' or 'fairer;' aur dānā, 'more wise,' or 'wiser.' This form has been fostered by English influence.
- 67. The Persian degrees of comparison are occasionally used: خُوبُ مَا لَهُ اللهُ ا
- 68. The power of the adjective is increased or intensified by doubling it, as الله له barā barā, 'very large;' الله الله thandā thandā, 'very cold.' So in English we have 'the deep deep sea,' 'the red red rose,' etc. The same effect is produced by putting the word عبر bahut, 'much,' before the adjective; as عبر bahut sāf, 'very clean.' The word الله barā, 'great,' is used in a similar sense; as باله barā kharāb, 'very wicked.' So also ناية nihāyat, 'exceeding.'

- 70. This particle له sā, combined with pronouns, forms a useful series of adjectives of similarity. المناه aisā. (for yih sā), 'such,' 'like this;' يساه maisā (wuh-sā), 'such,' 'like that.' Another particle, لا nā, combined in like manner with the pronouns, forms adjectives of quantity or number; as الناه إلى المناه إلى المناه إلى المناه إلى المناه المناه
  - 71. The Persian construction of the adjective is fre-

quently used, in which the adjective follows the substantive and is connected with it by the izāfat; مرد دانا bādshāh-i ādil, 'a just king.' The izāfat for the adjective is formed according to Rule 60; in fact, the adjective is treated like a noun in the genitive case.

# Pronouns (إسم ضمير Ism-i zamīr).

- 72. Pronouns admit of no distinction of gender; the same words being used for he, she, and it.
- 73. Pronouns are for the most part declined like nouns, but there are some special differences.

The first and second personal pronouns make the genitive case in l,  $r\bar{a}$ , l, re, l,  $r\bar{i}$ , instead of l l, l, l, and they form the agent case by adding the particle l, l, l, and they nominative case and not as usual to the oblique.

All pronouns have two forms of the dative; one takes the particle  $\geq ko$  like nouns, the other, instead of  $\geq ko$ , adds = e in the singular, and  $= e\hat{n}$  in the plural to the short oblique form.

All pronouns may reject the on of the oblique form plural; this shortened form we may call the short oblique. In setting out the declensions, we shall,

for the sake of brevity and clearness, use only this form, but the learner must remember that the longer form may be used.

## 74. First Person.

#### SINGULAR.

#### PLURAL.

75. Second Person.

. tain, thon تَين tu or تُو

Nom. S. تُو tū. Pl. تُو tum.

Obl. تُمنون tumh تُمه tumh تُمه tumh تُمه tumhon.

INGULAR.

N. tū, thou.

G. تیرے تیری terā, tere, terī, thine.

D.  $\begin{cases} \cancel{\cancel{\text{c}}} \text{ tujh ko,} \\ \cancel{\cancel{\text{c}}} \text{ tujhe,} \end{cases}$  to thee.

Ab. \_ \_ tujh se, from thee.

L. جن مبن tujh men, in thee.

Ag. تَيس نے tū ne, tain ne, by theo.

V. أى تُو ai tū, O thou.

PLURAL.

N. stum, you.

G. تُمهارا رے ري tumhārā, -re, -rī, your.

D. تُم کو tum ko, to you.

Ab. tum se, from you.

L. تُم ميں tum men, in you.

Ag. itum ne, by you.

V. . أي تُم ai tum, O ye.

or تُمَهُون كو tumhon ko, etc., etc.

When a noun or adjective intervenes between these

pronouns and the sign of the case, the genitive case and the agent are formed regularly; thus,

76. The Pronoun for the Third Person is supplied by the following:

Demonstrative Pronouns.

It will be well to observe that in these words and in their derivatives the letters i or y denote the proximate, u or w the remote. Wuh is the word commonly used for the personal pronoun he, she, and it; but yih is sometimes employed. The distinction between them may be understood by noting that wuh, signifies 'that person,' and yih, 'this person.' When both are used in one sentence, wuh denotes 'the former,' and yih, 'the latter.'

77. يب yih, 'this;' he, she, it. SINGULAR. PLURAL. wyih. \_\_ ye. Ob. ( wi is. in, inh, inhon. N. wyih. \_\_\_ ye. G. کے کی is ka, ke, ki. ن کا کے کی in kā, ke, kī. in ko, inhen. is ko, ise. D. in se. Ab. \_ ul is se. is men. in men. L. in ne. is ne. Ag.

78. s, wuh, 'that; he, she, it.'

SINGULAR.

PLURAL.

N. s, wah.

Declined exactly like vih

Following the analogy of the relative and other pronouns of the third person, yih and wuh in the singular are frequently used instead of the plurals ye and ne. The older and regular oblique forms wis and win, are occasionally met with.

79. The pronoun  $s_j$  wuh is sometimes written more exactly as it is pronounced p, wo, and in the inflection  $\tilde{v}_j$   $\tilde{u}_s$ ; this usage seems to be gaining ground.

80. The pronouns for the three persons are rendered emphatic by adding to them the particles  $\bar{\iota}$ ,  $k\bar{\iota}$ , and in the plural  $k\bar{\iota}$ ,  $k\bar{\iota}$ ,  $k\bar{\iota}$ ,  $k\bar{\iota}$ ,  $k\bar{\iota}$ , 'I verily,' I only.'  $k\bar{\iota}$   $k\bar{\iota}$ , 'to that same person,'  $k\bar{\iota}$  unlik  $k\bar{\iota}$ , 'to those same persons.' See Syntax.

# 81. Respectful Pronoun. نِ قَهِ, 'your honour.'

This is declined regularly by adding the particles to the word as Gen.  $\sqrt[3]{ap} k\bar{a}$ , Dat.  $\sqrt[3]{ap} ko$ , etc.

82. Reflexive Pronoun.

آپ āp, 'self.'

Nom.  $\sqrt{\bar{a}p}$ .

Gen. اینا اینے اینی apnā, apne, apni.

Dat. and Acc. آپ کو اپنے کو āp ko, apne ko. اینے تئیں apne ta'īn.

The plural is the same as the singular, excepting the locative آيس مين āpas men, 'among themselves.'

The word آپ  $\bar{a}p$  is used alone for 'self,' but it is more commonly joined to a personal pronoun, as مَسِ اَب main  $\bar{a}p$ , 'I myself;'  $\bar{a}p$ , 'a pne ta'in is generally used for the accusative.

## 83. Possessive Pronouns.

The genitive cases of the personal pronouns are used for possessives; أس كا 'terā, 'thy;' تيرا 'terā, 'thy;' نيرا 'tumhārā, 'your,' etc.

The genitive of the reflexive pronoun  $\bigcup apn\bar{a}$  is common to all three persons and both numbers. It is used to represent the same person as the nominative or agent of the sentence: thus,

main apnī kitāb parhtā thā, I مَين ارْبَني كِتاب پرَّمْتا تبا was reading my book.

سلم كرتا تها wuh apnā kām kartā thā, He was doing his business.

This will be explained more fully in the Syntax.

84. Relative.

Nom. Sing. and Pl. جون, jo, jaun, who.

Obl. Sing. جن جنه بانه. Pl. جن جنه jin, jinh, jinhon.

85. Correlative.

so, 'that same.'

Nom. Sing. and Pl. تون , so سو taun, that same, those same. Obl. Sing. تون , tis. Pl. تربية تنهور tin, tinh, tinhon.

Jaun and taun are the old forms; jo and so have been imported from Sanskrit. The oblique form of the correlative is formed from ترون.

Interrogative.

86. Personal or Individual.

kaun, 'who?'

Nom. Sing. and Pl. کون kaun, who? which?
Obl. Sing. کس kis. Pl. کی کنه کنهوی kin, kinh, kinhon.

87. Impersonal and Partitive.

kyā, 'what?'

Nom. کاه kyā, what? Obl. کاه kāhe.

88. Indefinite. نُوى ko'ī, 'a certain.'

Nom.Sing. گئی ko'ī, a certain (one); somebody; any one.

Obl. كِسُوُ ; kisī كِسَى kisū.

Nom. Pl. کُوی ko'ī, some, کئی ka'ī, several.

fulāna, "so and so.'

Nom. قالنه fulāna, so and so, such and such

Obl. فلانے fulane.

کوئی Ko'ī is used for any person or thing intended to be left vague; غلامه  $ful\bar{a}na$  implies a person or thing which could be specified.

89. Partitive.

This has no inflection and no plural.

90. There are many compound pronouns and adjective pronouns.

رجس تِس) به so, (jis tis,) جو سو jo kuchh, whatever. ko'ī aur, some one else. يْ د كُرِي د كري الم ko'ī nahīn, nobody. لئي ايك kai ek, several. kitne ek, several. يك ka'i ek, several, a few. بخ جِخْ kuchh kuchh, some little, some-other.

```
kuchh kā kuchh, something else.
 kuchh nahīn, nothing, nothing at all.
  اک اولا aur.
   ek aur, ایک اور aur ek, اور
 another. أور كوي another.
ريم dūsrā ko'ī,
  ek ko'ī, some one.
ek na ek, one or other, some one or other.
   ... aur sab, the rest, all the rest.
   رُور baze aūr, some others.
  لَّ عَضْدِ كُونِ baze ko'ī, several, some.
 bahut ek, many a one.
  bahut kuchh, much, a good deal.
   bahut aur, many more.
  ( sab ko'ī, ) سے کؤی
    هر کؤي har ko'ī,
 sab ek, every one.
  har ek, ایک مرایک
  مر کس har kas, ا
```

سب sab, 'all,' when used alone without a noun, is treated as a pronominal, and makes the oblique plural sabhon.

sab kuchh, every thing.

91. There are many adjectives which are used with a pronominal force, such as

مَّن aur, other. چُند chand, some, several. چُند bāze,certain, several. غَير bāhut, many, much. اَتُنا bahut, many, much. اَتُنا tinā, this much, har, every, each.

Also numerals, as ایک ek, one.

dusra, another, the next. دوسرا donon, both.—See the Numerals.

# Verb فعل Fil.

- 92. The Hindustani verb is exceedingly simple and regular. There is but one conjugation, and only one simple tense which has distinct personal terminations.
- 93. Many parts of the verb end in  $\sqrt{a}$ , and these are all declinable, being made to agree in gender and number with their substantive, just as in the compound tenses of the Latin passive the participle agrees with the nominative case.
- 94 Before proceeding to conjugate a verb it is necessary to learn the following two tenses, which spring from the verb by honā, 'to be,' though they form no part of its regular conjugation. They have a simple substantive meaning, as 'I am,' 'I was,' etc. They are also used as auxiliaries.

95. Substantive and Auxiliary Verb " mu'anin.

## Present.

SINGULAR.

هم هَيي دُون main hūn, I am. هم هَيي دُون ham hain, we are. ثم هو tū hai, thou art. ثم هو tum ho, you are. ثم هو nuh hai, he is.

hainge for کیں hain, and کیل hainge for کیل hain, are found in verse.

## Imperfect.

'I was,' 'thou wast,' etc.

and are the masculine singular and plural; are the feminine. تهيي and

- 96. The Infinitive (مصدر masdar) of the verb is the part which is given in the Dictionaries. From this are derived the Root, the Present Participle, and the Past Participle. These are the principal parts of the verb. Three tenses are formed from each of these, making in all nine principal tenses of the verb.
- 97. The Root is the second person singular of the Imperative, and is derived from the Infinitive by cutting off the termination لا أي bolnā; as from بولّا bolnā, بول bol. The Present Participle (المرحالية ism-i hāliya) is made

makes السم مفعول boltā. The Past Participle السم مفعول ism-i maf'al) is formed by leaving out the n of the Infinitive; so بولنا bolnā makes بولنا bolā. When the root of a verb ends with a vowel, the letter y is inserted in the past participle singular masculine for euphony; as المنا القامة القامة

98. The Participles are declined thus:

In the compound tenses the feminine singular is generally used with the plural auxiliary بولتي تهيس not boltin thin; the plurality being sufficiently shown by the auxiliary. The plural form is only occasionally met with.

99. The Aorist is formed from the root by adding the personal terminations

If the root ends with a vowel, as  $\sqrt{pa}$ , the root of  $p\bar{a}n\bar{a}$ , 'to get,' and  $p\bar{a}n\bar{a}$ , 'to get,' and  $p\bar{a}n\bar{a}$ , 'to

'sleep,', w may be prefixed to the terminations beginning with e, thus:

SINGULAR.	PLURAL.
1. 0, ūn.	nen. ویں
2, ne.	, 0.
3 ne.	ven.

The Imperative is identical with the Aorist, excepting only that the second person singular is the mere root. The Respectful form is made by adding  $\underline{\hspace{0.2cm}}$  iye or  $\underline{\hspace{0.2cm}}$  iyo to the root, and when the root ends with  $\underline{\hspace{0.2cm}}$   $\bar{\imath}$  or  $\underline{\hspace{0.2cm}}$   $\bar{\imath}$ ,  $\bar{\imath}$ ,  $\bar{\imath}$  (j) is inserted for euphony.  $\underline{\hspace{0.2cm}}$   $\underline{\hspace{0.2cm}}$   $p\bar{\imath}n\bar{a}$ , 'to drink,' root  $\underline{\hspace{0.2cm}}$   $p\bar{\imath}$ , makes  $\underline{\hspace{0.2cm}}$   $\underline{\hspace{0.2cm}}$   $p\bar{\imath}$   $p\bar{\imath}$ , and sometimes this is contracted, as  $\underline{\hspace{0.2cm}}$   $\underline{\hspace{0.2cm}}$ 

The Future adds the termination  $Ug\bar{a}$  to the Aorist.

Masculine. Singular  $U g \bar{a}$ .

Plural \_\$ gc.

Feminine.

Singular گيي Plural گيي gin.

Tenses of the Present Participle.

The INDEFINITE is the Present Participle declined.

The PRESENT is the Present Participle with the Present Auxiliary.

The IMPERFECT is the Present Participle with the Past Auxiliary.

# Tenses of the Past Participle.

The PAST TENSE is the Past Participle.

The Perfect is the Past Participle with the Present Auxiliary.

The PLUPERFECT is the Past Participle with the Past Auxiliary.

The Tenses of the Present and Past Participle differ only as regards the Participle.

Respectful Forms.

Imperative or Precative بوليو, boliye, بوليو boliye. Future . ابولنيگا boliyega.

Verbal Noun or Gerund.

The Infinitive declined

bolnē. بولني bolne, بولنے bolnā, بولا

An anomalous third person singular is occasionally found both of neuter and active verbs pakre hai, jale hai, kare hai.—See Syntax.

Noun of Agency.

bolne wālā, ) 'a speaker.' وَلَنْهُ وَالَّا مُولِنَّهُ عَارِا

Adverbial Participle (indeclinable).  $bolte \ k\bar{\imath}$ , 'on speaking.'

Adjective Participles, declinable as adjectives.

Present بولتا هُوا boltā, بولتا هُوا boltā hū'ā, 'speaking.'

Past بولا هُوا bolā, بولا هُوا bolā hū'ā, 'spoken.'

Conjunctive Participle (indeclinable).

بولگر کے bolk, بولگر bolke, بولگر bolkar, بولگر bolkarke, بولگر bolkarkar, 'having spoken.'

The form in که kar is the one most commonly used.

101. Example of a verbal root ending with a long vowel, admitting y in the root tenses, and requiring a euphonical y in the past participle masculine singular.

עט lānā, 'to bring.'

Aorist.

Singular.

1. هم لاویں \_ لائیں main lā'ūn.

2. میں الموں سے لائیں tum lā'o.

3. میں سے لائیں wuh lāme or lā'e.

So also in the Imperative and Future.

#### Past Tense.

PLTIRAT.

الله المعمني تُووُد الله main, tū, wuh مَين تُووُد الله ham, tum, we lāyā. lā'ē.

Feminine الدُّن lā'īi. Feminine الدُّن المَّن المُّن المُن المُن

Feminine لئ lā'ī.

Feminine لأير lā'īn.

So also in the Perfect and Pluperfect.

102. Verbs of three syllables, inclosing a short a in the second syllable, drop that vowel in the tenses of the root and past participle; as نكلنا nikalnā, 'to issue;' لَوْنَا pakaṛnā, 'to seize,' etc.

Aor. نكلون niklūn. Pres. Part. نكلون nikaltā. P.p. الله niklā. بكر pakrān. " " بكري pakartā. " إكري pakrā

103. The following useful verbs which are active in English are neuter in Hindūstānī.

الى، bolnā, 'to speak.' Ul lānā, 'to bring.' لَا عَنِي bhūlnā, 'to forget.' الما le-jānā, 'to take away.' chuknā, 'to finish.' لَّانًا laṛnā, 'to fight.' تَّ darnā, 'to fear.'

104. Active or Transitive Verbs ... muta'addī.

These differ in conjugation from the neuter verb in the tenses of the past participle, which take the case of the agent instead of the nominative.

# U, l. mārnā, 'to beat.'

Root J. mār. Pres. Part. I J. mārtā. Past Part. I, l. mārā.

Aorist main mārūn, etc. Imperative ,, مار ور main mārūn, etc. Future Li, L. main mārūngā, etc. Indefinite مير مارتا main marta, etc. Present مين مارتا هون main marta hūn, etc. Imperfect مرتا تها main marta tha, etc.

### Past.

# 'I did beat, etc.

SINGULAR.

PLURAL.

1. هم نے مارا ham ne mārā. هم نے مارا tum ne mārā. أم نے مارا tum ne mārā. أم نے مارا 3. أن نه مارا us ne mārā. أن نه مارا un ne mārā.

Literally, 'By me beaten,' etc.

### Perfect.

- 1. هم نے مارا هي main ne ميں نے مارا هي ham ne mārā mārā hai.
- mārā hai.
- 2. تُونے مارا هي tum ne mārā
  mārā hai. hai.
  اُن نے مارا هي us ne أن نے مارا هي un ne mārā

# Pluperfect.

singular.

1. هم نے مارا تھا main ne میں نے مارا تھا ham ne mārā thā.

2. الله tum ne mārā thā.

2. الله tum ne mārā thā.

3. الله نے مارا تھا us ne الله نے مارا تھا us ne أس نے مارا تھا thā.

105. The proper use of the past tenses of transitive verbs is properly a matter of syntax, but we must here anticipate.

It must be remembered that there is no distinct accusative in Hindūstānī, and that the object is represented sometimes by the nominative, sometimes by the dative. So, when the agent is used, the verb will agree with the object if it be represented by the nominative, but there will be no concord if the dative form is used; thus,

us ne ga'ī mārī, He struck a cow. أس نه گئي ماري us ne ga'ī mārī, He struck a cow. أس نه گئي كو مارا us ne laṛke māre, He beat boys.

الس نه الرّه ماري us ne laṛke māre, He beat boys.

الس نه كِتابيس پرّهِيس us ne kitāben paṛhīn, He read books.

الس نه كِتابيس پرّهِيس us ne chiṭhiyoi ko likhā, He wrote

Or to lay down an arbitrary rule, when the object of the verb has ko after it the verb is impersonal and has no concord; but when the object is without ko, the verb agrees with it in gender and number. 106. There are six verbs which present a few anomalies. These form their past participles irregularly.

Infinitive. Singular. Plural.

MASC. FEM. MASC. FEM.

1. کِنْ karnā, to do. کِنْ kiyā کِنْ kā. کِنْ kā'e کِنْ kīn.

2. کِنْ denā, to give. کِنْ diyā دِیْكِ dā'e دِیْكُ denā, to take. لِنا lenā, to take. لِنا lenā, to take. لِنا الله lenā, to take.

hū'ā، هُوِيْن hū'e هُوئِے ، hū'ā هُوئِ hū'ā هُوئِ hū'ā، هُوا . 4. honā, to be. هُونا . 4 مُويِّن marnā, to die. مُويِّن mū'ā مُويِّن mū'ā مُويِّن mū'ā.

6.انا. ga'ē گِئِي ga'ē گُئِي ga'ē گئي ga'ē گِئِي ga'ē.

They also make an irregular form of the conjunctive participle by adding \_ e, to the past participle feminine; thus \_\_\_\_\_\_\_\_\_ ki'e, 'having done,' \_\_\_\_\_\_\_\_ li'e, 'having taken,' etc.

The Respectful Imperative of the first five is also irregular, being formed from the past participle feminine instead of the root, by adding \_\_\_\_\_ jiye or jiyo.

يَّتُ kَنَّiye, Please to do.
مَنْ مُنْ لَكُوبُ Please to give.
مَنْ الْمُنْ لَكُوبُ الْمُنْ الْمُنْم

These forms are sometimes contracted into کیجے  $k\bar{\imath}je$ ,  $d\bar{\imath}jo$ , etc. The regular forms کریے kariye and kariyo are also occasionally met with.

أوجيے hūjiye, Please to become.

mūjiye, Oh that he might die.

And from these are formed the Respectful Future.

جائیے  $j\bar{a}n\bar{a}$  makes the respectful regularly جائیے  $j\bar{a}'iye$  or جائیو  $j\bar{a}'iye$  or جائیو

107. The verbs لينا denā لينا lenā and هون honā have some optional variations in the root tenses. Denā and lenā may be contracted so that the root is represented simply by d and l instead of de and le; thus

#### Aorist.

So also in the Imperative and Future.

108. هون honā, 'To be or become.'

This being a most useful verb, the whole of the Aorist, and the 3rd person singular of every other tense is given.

#### Aorist.

The root may optionally prefix, w to those terminations which begin with e; or it may reject all the vowels of the terminations, leaving only the letter

 $\hat{n}$  in the first person singular and in the first and third plural.

singular.

plural.

Imperative.

wuh home, ho'e, ho.

Future.

wuh howegā, ho'egā, hogā. وُه هوويگا \_ هويًا \_ هوگا

Indefinite.

wuh hotā.

Present.

رِيْ اللهِ عَنْ wuh hotā hai.

Imperfect.

الله ولا موتا تها wuh hotā thā.

Past.

I's s, wuh hā'ā.

Perfect.

wuh hu'a hai. وَلا هُوا هُي

Pluperfect.

ره هوا تها nuh hū'ā thā.

1 A form Go honwen is also found.

Respectful.

أه رُجيد hūjiye, هُوَجيد hūjiyo.

Adjective Past Participle.

أه مُوا هُوتا hu'a, عُوا هُوتا hū'ā hotā.

### 109. Additional Tenses.

Six additional tenses are formed by placing the Present and Past Participles of any verb before the Aorist, the Future and the Present Participle of honā.

### Aorist Present.

Formed by placing the present participle before the aorist of  $hon\bar{\alpha}$ . This is given in full as a pattern, but the first person will be sufficient for the other tenses.

'I may be speaking.'

ham bolte هم بولت هوويس الله main boltā ho'ān. مَي بولتا هووًل howen.

tu boltā howe.

tum bolte ho'o.

re bolte

homen.

### Future Present.

Formed by placing the present participle before the future of  $hon\bar{a}$ .

' I shall be speaking,' etc. main boltā ho'ūngā.

ال مُتَشَكِّي Native grammarians call both these tenses حال مُتَشَكِّي المِهُ المُعَادُ المُعَادُّةِ المُعَادِّةِ المُعَادِّةِ المُعَادِّةِ المُعَادِّةِ المُعَادِّةِ المُعَادِّةِ الم are formed with different tenses of  $hon\bar{a}$ , the difference of signification is not distinctly observed.

### Aorist Past.

A past participle before the aorist of honā.

main bolā ho'ūn, I may have spoken.

### Future Past.

A past participle before the future of honā.

A past participle before the future of honā.

main bolā ho'ūngā, I shall have spoken,

I must have spoken.

These two are called ماضي مُتشكي māzī-mutashakkī or ماضي مشكوُك mashkūk, 'Past dubious.'

# Imperfect Conditional.

A present participle before the present participle of honā. agar main boltā hotā, Had I been speaking, etc.

### Perfect Conditional.

agar main bolā hotā, Had I spoken. اگر مَين بولا هوتا

These are called ماضي شرطيه māzī shartiya, 'Conditional past,' or ماضي مُتَمَنِّي māzī mutamannī, 'Optative past.'

When the verb is transitive and the past participle is used, the agent must be substituted for the nominative as explained in respect of the principal tenses.

us ne sunā hogā, He will have heard, He must have heard.

un ne dekhā hotā, Had they seen.

# 110. Passive Voice فعل مجبول fil-i majhūl.

The passive verb is of rare occurrence in Hindūstānī, and its existence has been entirely denied. The necessity for it is obviated in a great degree by the great prevalence of intransitive verbs, for when, for instance, it is possible by the use of the intransitive verb banna, to say a thing 'is making,' or in old parlance 'a-making,' a passive form to say it 'is being made' is not required. The passive is however found in all writers, and owing perhaps to English influence it seems to be gaining ground. It is formed upon the same principle as the English passive, by means of the past participle and an auxiliary verb. In Hindūstānī the verb is jānā, 'to go,' is used as the auxiliary, and the participle is made to agree in gender and number with the nominative.

سَّمَّرَةُ سَمَّرَةُ سَمَّرًا جَانا مَارا جَانا مَارا جَانا مَارا جَانا 'Aorist.

ارا جاوِّس مارا جاوِّس مَعْنَ مارا جاوِّس مَعْنَ مارا جاوِّس بَعْنَ مارا جاوِّس بَعْنَ مَارا جاوِي بَعْنَ اللهُ مَعْنَ مَارِي جاوِل بَعْنَ اللهُ مَارِي جاوِل بَعْنَ اللهُ مَارِي جاوِي بِعْنَ اللهُ مَارِي جاوِي بِعْنَ اللهُ مَارِي بَعْنَ مَارِي اللهُ مَارِي بَعْنَ مَارِي اللهُ مَارِي بَعْنَ مَارِي اللهُ مِنْ مَارِي اللهُ مِنْ مَارِي اللهُ مَارِي مِنْ مَارِي مَارِي مِنْ مَارِي مَارِي مَارِي مَارِي مَارِي مَارِي مَارِي مَارِي مِنْ مَارِي مِنْ مَارِي مَارِي مَارِي مَارِي مَارِي مَارِي مَارَا مِلْمَالِ م

Imperative.

2nd pers. sing. عارا جا mārā jā, 'Be thou beaten.'
The rest as the Aorist.

### Future.

ham mare هم مارے جاوینگے | main māra میں مارا جاؤنگا jā'ūngā. tum mare تُم مارے جاؤگے .tūmārājānegā تو مارا جاويگا

F. ماري جاكر mārī jākar, etc., etc.

Adverbial Participle.

M. مارا جاتے هي mārā jāte hī. F ماري جاتے هي marī jāte hī.

### Formation of Active and Causal Verbs.

- 111. The primitive verb in Hindustānī is generally neuter, but there are many verbs which are primarily active, as الله karnā 'to make,' الله likhnā, 'to write,' etc.
- 112. The normal method of converting the neuter verb into the active is by adding  $\sqrt{a}$  to the root; the causal is formed by adding  $\sqrt{n}$  to the root thus,

to rise. to raise. to cause to raise. to cause to raise. يكونا paknā, يكونا paknā, يكانا paknānā, يكنا paknānā, يكونا paknānā, يكانا paknānā, to be cooked. to cook. to cause to cook.

The letter, o is sometimes optionally used instead of \(\bar{a}\).

113. There are neuter verbs which can have no active signification, and so have no active form, like varphi sonā, 'to sleep;' varphi, 'to weep.' There are also active verbs which have no neuter form, like varphi to read;' varphi likhnā, 'to write,' etc. Such neuter verbs form the causal with varphi and sometimes with varphi varphi. The actives make their causals in both ways with varphi or varphi. Examples of neuter verbs will be found under Rule 116. The following are examples of active verbs:

114. Monosyllabic roots having a medial vowel hetween two consonants generally substitute a short yowel:

a is substituted for  $\bar{a}$ . i ,, ,, for  $\bar{i}$ , e. u ,, ,, for  $\bar{u}$ , o.

Active. Neuter. Causal. jaganā, جگرانا jagānā, جگرانا jagnānā, to be awake. to awaken. to cause to awaken. بهِگُوانا bhigānā, (بهِگانا bhigānā,) بهِگُوانا bhignānā, to be wet. لهِگونا bhigonā, to cause to wet to cause to wet. to wet. leṭnā, لِقَانَا leṭnā, لِقَانَا litnana, الله انا to lie down. to lay: to cause to lay. dubnānā, (أَبْوانا dubānā, أُبْوانا dubnānā, أُبْنا to drown (n.). ( b. . dubonā, ) to cause to drown. to drown (active). שלוט bulnana, لانا bulānā, الي bolnā, to call. to speak. to cause to call.

The diphthongs ai and au undergo no change.

پَرْنا pairnā, to swim. پَرِنا pairānā, to cause to swim. پَرْنا daurnā. to run. كَورَّانا daurnā, to cause to run.

. 115. Roots having a medial short vowel in their only

or final syllable generally lengthen that vowel in the Active; as

Neuter. Active. Causal. بالنا pālnā, المنا palnā, palnānā, دانا to be nourished. to nourish. to cause to nourish. انظ katnā, كاتنا kātnā, لنا کندانا katnānā, to be cut. to cut. to cause to cut. khulnā, khulnana, کیالدانا khulnana, to open (neut.). to open (act.). to cause to open. اللا nikalnānā, الكلنا nikalnä. اللان nikālnā, to come out. to take out. to cause to take out.

116. Roots ending in vowels shorten the vowel and add to it the letter J l. These are generally verbs of only two forms as explained in Rule 113. The Neuters make their Causals by adding l  $\bar{a}$ ; the Actives by both l  $\bar{a}$  and l,  $v\bar{a}$ .

نيانا nahānā, نيانا nahlānā, نيانا nahalnānā, to to bathe. to cause to bathe. cause to be bathed.

Active. Causal Neuter. دلانا dilānā, ) to cause دينا denā, to give. لَالًا عَلَيْهِ dilnānā, to give. يلانا pilānā, ) to cause pīnā, to drink. برانا pilnānā, ) to drink. لانا خولانا khilānā, ) feed. Ttake. Ul linana, to cause to السا lenā, to take. So also some ending in consonants; as bithānā, ) to cause baithna, ستينا لَا لَيْ bithlānā,¹) to sit. to sit. ديكينا dekhnā, وكهان dikhānā, to show. sikhānā, سِکيانا sikhānā, سِيکهْنا to teach. نسکهْنا sikhlānā, do teach. مُسکهْلانا kahnā, do cause to to say. UKS kahlānā, say or call2

1 This is a multiform verb. It makes also بَيتَهُال baithānā, أَيتَهُال baithānā, الله baithānā, المتهال baithānā.

This is frequently read and translated as a passive; thus وَ لَا كَا اللّٰهُ عَلَى اللّٰهُ اللّٰهِ اللّٰهِ اللهُ اللهُو

117. There are a few words which form their Actives and Causals quite irregularly.

Active. Causal. Neuter. يكنا biknā, بكنا bechnā, بكنا biknānā, to to be sold. to sell. cause to be sold. to be torn. پهڙنا phāṇnā, to to tear. to be torn. پهڙنا phaṇānā, پهوٽنا phaṇānā, to be anlit to be split. to split. turmānā, to تُرَّوانا tornā, تُرَّنَا turmānā, to to be broken. to break. cause to break. chhorna, چُهُڙُوانا chhorna, چهُوڙنا chhuṭnā, to to let go. to go off. cause to let go. rakhnā, كهنا rakhnānā, to المنا, rahnā, to remain. to place. cause to keep or place. inibāṛnā, نِبازِنا nibāṛnā, ) to make an end, finish nibernā, ) (see Rule 115). to end.

### Compound Verbs.

118. There is a great variety of Compound Verbs in Hindūstānī, and although some of them which have been so classified are phrases rather than compounds, it will be convenient to give them all together.

### I .- Nominals.

119. These are very common. They are formed by adding a verb to an uninflected noun or adjective. The

verb كُونا honā is used to make neuter verbs, and كُونا karnā to make actives, as بعد إلى jamā honā, 'to meet together,' كُونا jamā karnā, 'to bring together.' But although honā and karnā are the verbs most commonly used, other verbs are idiomatically employed; as ānā, rahnā, denā, lagnā, lenā, mārnā, rahnā, etc.:

mol-lenā, to purchase.

گالي دينا gālī-denā, to abuse.

ghoṭa-mārnā, to dive.

ياد ركهنا yād-rakhnā, to remember.

paida-karnā, to create, to produce.

II .- Compounds formed with the Root.

These are Intensives, Potentials, and Completives.

120. Intensive.—A root with some other verb idiomatically joined to it. The root expresses the idea, the second or servile verb generally merges its own meaning in that of the root, giving force and emphasis to it. The root never alters, but the servile verb is conjugated, and hence the compound follows the construction of the servile. If that is neuter the compound is neuter, if it is active the compound is active. There is no rule as to the proper servile verb to be used, idiom alone determines this. Some roots have two or three intensive forms.

بن آنا ban-ānā, to be effected, to succeed; from بن bannā, to be made, and الآنا ānā, to come.

ان آ <u>le-ānā</u> (by contraction لنا lānā), to bring, لنا le-jānā, to take away, to take.

له الله الله khā-jānā, to eat up, from کها جانا khānā, to eat.

sonā, to sleep. سو جانا so-jānā, to go to sleep, from سو جانا

The above are all neuter because  $\bigcup \bar{a}n\bar{a}$  and  $j\bar{a}n\bar{a}$  are neuter.

رکه دینا rakh-denā, to put down, from که دینا رخها برندا به المبارت برندا به المبارت برندا برندا به المبارت برندا برندا برندا برندا سقر برندا سقر سقر المبارت سقر المبارت سقر المبارت سقر المبارت سقر المبارت سقر المبارت برندا برندا برندا برندا برند المبارت المبار

These are all active.

Active roots may take neuter serviles and so become neuter; but neuter roots do not take active serviles, so they remain neuter.

There are a few Intensives formed with the Past Participle instead of the Root. See Rule 139. 121. Potentials.—These are formed by adding the neuter verb  $\omega sakn\bar{a}$ , 'to be able,' to the root.

کرسکنا kar-saknā, to be able to do. کرسکنا jā-saknā, to be able to go.

In the Present and Past Tense the defective verb can, could, is the equivalent of سكنا saknā; and the construction of this verb in English is identical with that of سكنا saknā, in Hindūstānī.

میں دے سکتا هُوں main de saktā hūn, I can give. میں دے سکتا هُوں wuh dekh sakā, he could see.

122. Completives.—These are made by adding the neuter verb  $\stackrel{\checkmark}{\sim}$  chuknā, 'to finish,' to the root of a verb.

likh-chuknā, to finish writing.

کها چُکنا khā-chuknā, to have done eating.

وَ مُو رُو جُكُتا هَي wuh ro-chuktā hai, he leaves off weeping. وَ عُلَا جُكِيا هَي wuh gā-chukī, she finished singing.

III .- From the Present Participle.

123. Continuatives.—Formed by placing a Present Participle before the verbs  $j\bar{a}n\bar{a}$  or  $j\bar{a}n\bar{a}$  or express a continuous action. The participle and the verb must both agree with the nominative.

ي بكّتا جاتا هَي nuh baktā jātā hai, he keeps talking. وَهُ بِكُتا جاتا هَي nuh rotī rahtī hai, she goes on crying. وَهُ رُوتِي رَهْتِي هَي nuh jātā rahā, he continued going, he went right away, departed, died.

124. Statisticals.—These are formed with the inflected present participle followed by a verb of motion.

wuh gāte ātī hai, she comes singing. وَهُ كَاتِهَ آتِي هَي wuh gāte ātī hai, she comes singing. main rote jātā thā, I was going along weeping.

125. Neither of these can be considered true compounds. In the first the participle is used as an adjective; in the second it is used adverbially, the participle having men understood after it: 'She comes (in the state of) singing.'

# IV .- From the Past Participle.

126. Desideratives or Optatives.—Formed by adding چاهنا chāhnā, 'to wish,' to an uninflected past participle as آيا چاهنا āyā-chāhnā, 'to wish to come.'

Chāhnā, like the equivalent verb in other languages, often implies the immediate intention of doing something, so that بولا چاگئا bolā chāhnā may mean 'to wish to speak,' or 'to be about to speak.'

ي الكها چاهّتا كلي الكها چاهّتا كلي الكها عن wuh likhā chāhtā hai, 'he wishes to write,' or 'he is about to write.'

يَّ بولا چاهْتي هَي wuh bolā chāhtī hai, 'she wishes to speak,' or 'she is about to speak.'

برا چامّتے تھے ne marā chāhte the, 'they were about to die.'

chāhiye, the respectful imperative of chāhnā is also similarly used with the past participle; as

عباد چاهیسی sīkhā-chāhvye, 'one ought to learn,' or literally 'one should wish to learn.' See Syntax.

# Frequentatives.

127. These are formed in the same way by adding karnā, to an uninflected past participle; thus

وه جایا کرتا هی wuhjāyā kartā hai, he goes frequently.

ne parhā karte hain, they read constantly.

- 128. Observe.—1. In these two compounds the participle always remains in the masc. sing. although the nominative be feminine or plural. 2. בּוֹבּׁה chāhnā and צֹינ karnā, being active verbs, require the case of the agent when their past participles are used: the agreement of the verb then accords with the rule given in Rule 105.
- 129. أجايا jāyā and مرا marā, the regular past participles of جايا jānā and مرنا marnā, are used in these compounds, not the irregular forms مرنا gayā and مرنا marnā, however, can never be required as a Frequentative.
- 130. There are some Intensive verbs formed with the past participle instead of the root, as نجلا جادا chalā jānā, 'to go along;' كَارِهُنا 'lagā rahnā, 'to be engaged.'

The Participle generally agrees with the nominative in gender and number; as

باتے تھے باتے تھے ne chale jāte the, they were going along.

لومْرِي پِيرْتي تهي lomṛī paṛī-phirtī thī, the fox بيرْتي تهي was prowling about.

ي موا جاتا هي <u>khijālat se mū'ā-jātā hai,</u> he is dying with shame.

But sometimes the participle is used in the inflected form: as وَهُ چَلَّتَ هُي wuh chale-chaltā hai, 'it is moving along.'

# V .- From the Inflected Infinitive.

- 131. There are three common kinds of combinations with the Inflected Infinitive, but they are phrases rather than compounds, the infinitive being governed by the annexed verb.
- 132. Inceptives.—Formed with the Inflected Infinitive and the verb យ lagnā, when the verb lagnā signifies 'to begin,' a sense which it rarely or never bears when used alone.

wuh bolne lagā, he began to speak. وُهُ بُولُنِهِ لِنَّا سُلُمُ سُولُةٍ لِلَّا سُولُةِ لِنَّا اللَّهِ اللَّهُ اللَّهِ اللَّهُ اللَّ

133. Permissives.—The Inflected Infinitive with the verb دينا denā, 'to give,' as

اس نے بولنے ریا (usne bolne diyā, he allowed (him) to speak.

عنا saknā and چاهنا chāknā are found exceptionally combined with the Inflected Infinitive; as

انے سکنا بے jāne saknā, to be able to go. عائنے چامّنا dekhne chāhnā, to wish to see.

134. Acquisitives.—These are the opposites of the last; they are formed with the Inflected Infinitive and the verb پانا  $p\bar{a}n\bar{a}$ , 'to get;' جانے پانا  $j\bar{a}ne~p\bar{a}n\bar{a}$ , 'to get (leave) to go.'

### VI.-Reiteratives.

135. The Reiterative is a compound of two verbs of similar sense or sound, partly for emphasis of expression, partly for euphony or mere jingle. The parts of the verb so joined are the present and the conjunctive participles.

رے بولتے چلتے میں ne bolte chalte hain, they are conversing. وَهُ اَيْنَا حِسَابِ دِيكَهُمَّا بِرَهْمًا هَي nuh apnā hisāb dekhtā paṛhtā hai, he is examining his accounts.

jān būjh kar, having known, wilfully, maliciously.

In the above examples the second verb has a distinct meaning and its effect is apparent. But in phrases like the following the second verb has lost its separate meaning, if it ever had any.

ديكهِّتا بهالّتا ميكهّتا بهالّتا ميكهّتا بهالّتا sī-sā-kar, having sewed up.

دهو دهاکر dho-dhā kar, having washed. دهو دهاکر a meaning, but it is incongruous.

#### ADVERBS.

- under the classification of harf, indeclinable words or particles. These words are most useful and play a very important part in the language.
- 137. Adjectives are frequently used as adverbs, but when so employed they are undeclined and remain in their primary form, *i.e.* the masculine singular.
- رُهُ بِهُتِ اجِّهَا لِكَهَا هَي wuh bahut achchhā likhtā hai, he writes very well.
- 138. There is a quintuple series of adverbs and adjectives all formed upon the same principle from the Pronouns of the third person. These words are formed so similarly and harmoniously that the adjectives have been reserved to this place in order that the whole may be exhibited together in a tabular form. Dr. Gilchrist used to call this series, somewhat fancifully, the 'philological harp.' These words, which are six in number, have five different forms, viz., Demonstrative proximate, Demonstrative remote, Interrogative, Relative, and Correlative. The first four words in the following table are adverbs and are indeclinable, the last two are adjectives and are declinable like other adjectives in \ \bar{a}.

CORRELATIVE.	taun, that same. ترن	is tab, then.	tahān, there. تهار	بالنائد بنظامة, tidhar, thither.	ئيرن tyūn, so.	[same, so.	Liž titnā, ( so	Listeta, much.
RELATIVE.	ېخ نو، مدان مېږي. الله الله الله الله الله الله الله الل	idb. when.	2. الله الله الله الله الله الله الله الل	3. 3 jidhar, hither. 2 Judhar, thither. 2 sas kidhar, whither? 2 jidhar, whither. 2 jidhar, thither.	as. أنه jyūn, as.	this way.  5. Lun's aisa, like this. Lun's waisa, like that. Lun's kaisa, what like? Lun's jaisa, like as, as. Lun's taisa, like the	Lif itnā, this Lif utnā, that Liz kitnā, (how Lizz jitnā, as Liz titnā, so	اتْج jittā, much.
INTERROGATIVE.	kaun, who?	S kab, when?	ر پار په المار په المار کېار	Ja Skidhar, whither?	ج how کیوں	Lung kaisā, what like?	Les kitnā, (how	الْجُ kittā, السادة الله
DEMONSTRATIVE REMOTE.	s, wuh, that.	The place of this is supplied by the correlative is tab.	us, wahan, there.	Ja J'udhar, thither.	win, thus, in	that way.	Ui utnā, that	U, lata, much.
DEMCNSTRATIVE PROXIMATE.	Pronoun Ly yih, this.	1. بن مه, now.	2. J. yahān, here.	3. Jost idhar, hither.	4. بان بان بان بان بان بان بون ا ان بان بان بان بان بان بان بون . 4	this way.	Lif itnā, this	6. Ul ittā, much.

must be substituted for 'much:' i'me, 'this many;' kitne, 'how many.' Forbes and others have made a distinction between itwa and itita, etc., making one to mean 'this nuch,' and the other 'this many,' etc., but it is difficult to Another form of these words is made by writing e for i, thus etna, eta; ketna, ketā, etc. In the plural 'many' understand how a singular can signify 'many:' the words are synonymous.

- 139. Some of the above are rendered more emphatic by the introduction of the particles  $\bar{\imath}$ ,  $h\bar{\imath}$ ,  $h\bar{\imath}n$ , meaning 'very,' 'indeed,' etc. By adding  $h\bar{\imath}$  to the first class we get  $abh\bar{\imath}$ , 'just now,' 'at this very time;'  $\lambda abh\bar{\imath}$  (or  $\lambda abh\bar{\imath}$ ), 'ever;'  $\lambda abh\bar{\imath}$ , 'at that very time.'
- 140. By changing the final های  $h\bar{a}n$  of the second class to هِيں  $h\bar{v}n$ , the following are formed.

يهيس yahīn, just here, in this place, in this way. أهِيس wuhīn, just there, in that place, in that way. أهِيس kahīn, anywhere, somewhere (with a negative 'nowhere.')

141. From the fourth the following are formed by adding هيں  $\hbar i \dot{n}$ .

يونّېيى yūnhīn, in this very way, time or place.

رُونْہِیں wūnhīn (or nonhīn), in that very way, time or place, thereupon.

jonhīn, as soon as.

142. The fifth add the particle هي hī, separately.

هي أ aisā hī, just like this.

جَيسا هي jaisā hī, just such as.

يسا هي kaisā hī, how very (large, small, etc.), ever so.

143. Some of the sixth may add the particle men, 'in.'

itne men, in this much, meanwhile. اِتَّنْتُ مِين jitne men, in as much.

144. The addition of the word تك tak or تك talak, 'to,' 'till,' makes another series.

اب تك ab tak, till now.

کب تک kab tak, till when? how long?

jab tak, as long as, whilst.

تى تك tab tak, till then.

يهان تک yahān tak, to this degree, to such an extent.

145. Repetition of the adverbs or the coupling of them forms some more useful expressions:

kabhī kabhī, sometimes.

kabhī na kabhī, some time or other. کیهی ند کیهی

ي jab kabhī, whenever.

kabhī nahīn, never. کبھی نہیں

کہیں نہ کہیں نہ کہیں نہ کہیں نہ کہیں نہ کہیں۔

ال كهار خال ج jahān kahān, here and there.

جِهاں كبيس jahān kahīn, wherever.

aur kahīn, somewhere else, anywhere else.

ا تيسا الم jaise kā taisā, such as before, self same.

أيسا أيسا jaisā taisā, so so, as well as.

المناك jaisā ki, as though, just as if.

146. There are three negative particles or adverbs in a, نبين nahin, and mat. The first is the

simple negative 'not,' used with any of the tenses. نبین nahīn is more emphatic, and may be used with any part of the verb with the exception of the Imperative. It is often used as if it included in itself the substantive verb خبر نبیس mat is the prohibitive particle 'don't,' and is used with the second person of the Imperative and with the Respectful. المنافع ال

147. The following adverbs of time are peculiar: عَلَى مَعْنَا مُعْنَا مَعْنَا مُعْنَا مُعْنَا مَعْنَا مُعْنَا مُعْنَامُ مُعْنَا مُعْنَا مُعْنَامُ مُعْنَامُ مُعْنَاعُمُ مُعْنَا مُعْنَا مُعْنَا مُعْنَا مُعْنَا مُعْنَاعِمُ مُعْنَاعُمُ مُعْمُعُمْ مُعْنَاعُمُ مُعْنَاعُ مُعْمُعُمْ مُعْ

148. There are many other adverbs, of which the following are some of the most useful:

بو jo, if, when, and its correlative تو to or تو tau, then. آس پاس ās pās, around, on all sides. آس پاس aur bhī, still more.

بهی bhī, also, even.

is men, herenpon. اِسَ مين

is liye, اس ليے is liye, on this account, therefore. kis naste, on what account, wherefore, why? nahīn to, otherwise.

phir, again.

pare, over, beyond, on that side.

, ware, on this side.

نت nit, always.

149. The Conjunctive Participle is also used adverbially.

chup-ke, silently. soch-kar, deliberately. المنسك hans-kar, laughingly.

150. Many are borrowed from Persian and Arabic.

ے bāre, at last. ل المن bārhā, (times) often. يس pas, therefore. chunānchi, so, thus, accordingly.

ميشم hamesha, always. القصة al-kişşa, in short.

ash, at last.

الته albatta, certainly. al- الغرض gharaz, غرض gharaz, in short. fakat, only merely, finis.

يعني yanī, that is to say, viz.

Also some Arabic phrases, as

ألحال fi-l hal, at present. في النَّور fi-l faur, immediately.

# في آلحقيقت fi-l ḥakīḥat, in truth. بالكلّ bi-l hull, entirely. bi-l f il, in fact.

151. The Arabic accusative case, marked by the  $tann\bar{\imath}n$  of  $fath\bar{\imath}$  ( $a\underline{n}$ ), is used adverbially.

ittifāķan, by chance, it happened.

<u>khuṣūṣan</u>, especially.

احیانا ahyānan, sometimes, from time to time.

jabran, perforce.

mislan, for example.

Many other adverbs might be added, but their place is the Dictionary rather than the Grammar.

#### PREPOSITIONS.

- 152. In Hindustānī there are no Prepositions properly so called, the only words approaching them are the Postpositions used in the declension of the noun. The want of such words has been supplied by a number of nouns used clliptically with the genitive case. The nouns so employed are all in an oblique case, the particles men, something se, etc., being understood; so, such as them as are of the masculine gender require the genitive in something ke, and such as are feminine take something something something something are feminine take something some
- sabab is a noun meaning 'cause,' 'reason,' and the phrase نسب is kā

sabab, means 'the cause of this;' but the words في الله is ke sabab, have the particle في se (from) implied, and so they signify 'because of this.' So also pīchhā, means 'the rear,' but في بالمالة pīchhe is equivalent to بالمالة pīchhe men, and means 'in the rear.'

154. The following are masculine and take  $\leq ke$ , but some of the more common occasionally reject the  $\leq ke$ , as الس پاس is pās, 'near this;' من اسطے kis wāste, 'on what account;' الس ليے is liye, 'on this account,' 'therefore.' ج

اراد المتعادد المتعا

Age sometimes takes the ablative, thus, is so age, previous to this.

بدون bidun, without.

برابر barābar, equal to.

= 12 barā'e, for the sake, for.

ي خلاف bar-khilaf, in opposition, contrary.

ba-taur, in the way, like.

عد bad. after (as to time).

بغي baghair, without, except.

ba-mujarrad, at the instant.

ba-manzila, in the position.

ابن bin, without بنا binā,

بنابر binābar, on account of, because.

في bharose, in reliance.

ين bīch, in, among. بين be hukm, without orders.

ل pār, over, on the other side.

رسل pās, near.

pīchhe, behind.

تابع tābī, obedient, submissive.

لل tale, under.

juz, except. جُزِ hasbu-l hukm, according to the order.

huzūr, in the presence.

بالے hanāle, in charge.

خار بن <u>kh</u>ārij, without, excluded.

خلاف khilāf, contrary, opposed.

در يكي dar-pai, in pursuit. ر ميان dar miyān, between, among. غريعي zari'e, by means, through. zimme, in trust. بُر., rū-ba-rū, in presence. عاتي sāth, with, along with. sāmhne, before, in front. sabab, because. supurd, in charge. sinā, مبواء sinā'e, except, besides, instead. شاما shāmil, along with, inclusive. taur, in the way, like. مر عرص arse, for the period. s. Le alana, moreover, besides. غوض inaz, instead. قىل kabl, before. ين karīb, near. قابل kābil, capable. كنار \_ kanāre, on the bank or margin. kane, near. کنے Sgird, around. liye, for, on account. لائة الأنا القالم المناسبة ال

\_ , l. mare, by reason of, through. muttasil, near. muta'allik, dependent, connected. mutābik, conformable, corresponding. . سقاط mukābil, facing, encountering. munāfik, fit, suitable, according. سَوجِب مُوجِب ba mūjib, نزدرك nazdīk, near. \_\_\_\_i nīche, beneath. اسطے, waste, for, on account. , l, nār-pār, right through on both sides. wasile, by means. . wakt, at the time. ماتيد hāth, by the hand, by means. si ham-rah, along with. yahān, at the abode.

156 The following are feminine and take  $k\bar{i}$ :

لات bābat, concerning. ندَ. لت ba-daulat, by means. جانب jānib, on the side, towards. jagah, in the place. = jihat, on account. الله غاطر hisbat, relative, نسبت nisbat, relative,

بانى; zabānī, from the report. simt, towards. tarah, like, after the manner. . marifat, through معرفت

ba-nisbat, in reference بنسبت

157. There are a few words which take their proper genitive form in  $k\bar{\imath}$ , when they follow the noun, but take  $k\bar{\imath}$  when they precede it; thus detailed towards, 'towards,' is feminine, and the phrase runs shahr  $k\bar{\imath}$  taraf, but  $k\bar{\imath}$  detailed the city.' See Syntax.

بمدد ba-madad, with the aid.
بنسبت ba-nisbat, with respect to.
بنسبت be-marzī, without the consent.
مرضي taraf, towards.
مانند mānind, like.
مانند miṣl, like, such as.

158. Persian and Arabic Prepositions are occasionally used. These do not require the genitive

Persian. Arabic. Il illā, except, besides. ; az, from, by.  $b\bar{a}$ , with, possessed of. L bilā, without. پن bah, or when connected, with, الله قارة, upon ية an, from. , ba-, bi-, ) in. عند and, near, with. بر bar, on, at. في fī, in, per. بیش pesh, before. يشاز peshaz, la, li, for. with, along with. ى, dar, in. z; zer, under. ... min, from.

#### Masculine.

arth, for the sake.

bhītar, within.

jog, fit.

kāran, because.

nikaṭ, near.

nimitt, because.

samān, like, equal to.

samai, at the time.

samāp, near.

sammukh, in presence,
sonhīn, before.

Feminine.

bhānti, in the manner. biriyān, at the time. or, towards.

#### 160. CONJUNCTIONS.

اگر agar, گر agar, if. اگرچه agarchī, although.

ز بس كِه az bas ki, since, inasmuch as.

La ammā, but, moreover, nevertheless,

, aur, and, also, other.

لكة balki, but, rather.

بهي bhī, also, indeed.

par, but, still.

س pas, therefore, thence.

మ్ర tā-ki, in order that.

to, then.

,> jo, if, when.

ار آنکه hal-ān ki, whereas, notwithstanding.

shi khwāh, either, whether.

& ki, that, because, saying.

لانك kyūnki, because.

چيا چيا چيا چيا چيا

چ الله go-ki, although.

lekin, but, yet.

L. magur, except, unless.

inahīn to, otherwise, if not.

نيز nīz, also.

o or wa, and.

,, mar and S, ma-gar (for ma-agar), and if.

ورنه nar-na (for na agar na), and if not. هم ham, also, likewise, con. هرچند har-chand, although. هنوز hanoz, yet. پ yā, or, either.

### 161. Interjections.

ين kyā khub, how good, افسوس ( afsos, ) alas! excellent! Jo, see! lo! آفرین āfrīn, bravo! ai, Oh! وائے وائے  $n\bar{a}'e$   $n\bar{a}'e$ , alas, alas!  $n\bar{a}'e$   $nail\bar{a}$ , oh s ai, Oh! a la la hae hae, dear! \_, are, ho! holla! bāp-re (father) my sl, sl, nah nah, good! bravo! goodness! زِنْهار zinhār, ) beware! المردار <u>khabar-dār</u>, beware, take care. shābāsh, capital!

لڑکے رے re, rī, oh! agrees in gender, as رے ري laṛke re, you boy! لڑکي ري laṛkī rī, you girl.

# NUMERALS.\_ـنْک ānk

162. The Numerals are properly adjectives, but the Hindūstānī numerals present such peculiarities and require so much explanation, that the usual practice of dealing with them separately has been followed. The numerals up to one hundred are seemingly irregular, the

tens and units being apparently joined upon no certain principle. The explanation of this is easy. Most nations having settled a series of units and tens connect them according to the principles of their own language; but the speakers of Hindūstānī borrowed the whole hundred ready formed from the Sanskrit, shortening and corrupting each word to suit their vernacular pronunciation. So that although each compound is plainly traceable to its appropriate ten and unit, the actual forms of the words vary considerably. This fact presents a curious philological problem: Were the original speakers of Hindūstānī ignorant of numbers, or did they discard a defective arrangement for the more scientific system of the Sauskrit?

	٠٠٠٠ ١٠٠٠		

All the ones may be optionally written ایک ek instead of ik as ایکیس  $ek\bar{\imath}s$ , 21; ایکاسی  $ek\bar{a}s\bar{\imath}$ , 81.

164. Expedients are resorted to in the South and by the illiterate in other parts to obviate the use of this somewhat complex series. After twenty, par is placed after the decimal and the unit is added; thus

بيس پر پانچ bīs par pānch, 25, or 'five over twenty.' بيس پر پانچ chālīs par sāt, 47, or 'seven over forty.'

The score کوڙي koṝ, is also used as with us; so do koṝ pānch, 'two score and five.' دو کوڙي پانچ tīn koṝ das, 'three score and ten.'

These modes of counting should be known, but they do not obviate the necessity of learning the century of numbers.

165. The numerical figures are the Arabic, from which our own are derived, and they are combined in the same way.

1	٢	~	10	٥	٦	٧	٨	9	•
1	2	3	4	5	6	7	8	9	0
1.621	11	٢	v	6.		1.1	11	٧٢	
	21		37	50		101	18	372	

166. The word Alek added to any aggregate number has the sense of about, as کاس الک pachās ek, 'about fifty;' دس الک 'about ten.' The words دوگنا gunā and چند chand, have the sense of fold; as كنا do gunā, حُوگنا '; do chand, 'two-fold و چند chau gunā, chand چار چند ': chār chand, 'four-fold, quadruple حيند ' is more commonly joined to the Persian forms of the numerals as بار bār دفت چند haft chand, 'sevenfold.' بار bār means 'times,' as تيرن بار tīn bār, 'three times;' the word دفعه dafa is also used in the same way. Numerals are coupled together without any conjunction, as يائي سات pānch sāt, دس يائي das pānch, meaning indefinitely 'five or seven,' 'from five to ten.' چاس ساته pachās sāth, 'fifty or sixty.' Distributives are formed by doubling the numbers, as دو دو do do, 'two apiece;' ياني أنه pānch pānch, 'five apiece,' 'by fives.'

167. Ordinals are formed from the cardinals by the addition of , , , vān. But a few of the earlier numbers are formed like ordinary adjectives.

أرسرا dusrā, second. tīsrā, third. chauthā, fourth. pānchwān, fifth.

پهلا pahlā or pahilā, first. چپقواں chhaṭnān, sixth. sixth. ساتمار sātwān, seventh. اَتْهُوا، āthnān, eighth. nanān,naunān,ninth. دسواں dāsnān, tenth.

And so on regularly. ikīsnān, twenty-first; battīswān, thirty-second.

The terminations  $|\bar{a}|$  and  $|v\bar{a}|$  are changeable to  $v\bar{a}$  and  $v\bar{a}$  and  $v\bar{a}$  we and  $v\bar{a}$  for the inflection masculine, and to  $v\bar{a}$  and  $v\bar{a}$  and  $v\bar{a}$  with for the feminine gender

## 168. Aggregate Numbers.

يَندُّا gandā, a quater- سَيكڙا saikṛā, a hundred. ! nion, a four. هزار hazār, a thousand. إلاكه jāhī, a five, هزار koṛī, a score. گڙوڙ kaṛoṛ, one hundred خڙوڙ chālīsa, a forty.

These aggregate terms take the termination on for the plural when they are used indefinitely as الانجوس أريد saikron shahr, 'lacs of rupees;' سيكتوس شهر saikron shahr, 'hundreds of cities:' the full construction seems to be 'rupees by lacs,' 'cities by hundreds.' This same termination on, added to ordinary numerals, makes them specific, as بارهوس 'donon, 'the two, both;' بارهوس bārahon, 'the twelve.' The use of this termination on in connexion with numerals is explained more fully in the Syntax.

### 169. Fractional Numbers.

 $p\bar{a}'o$ , paun, paun, paun, paun,  $paun\bar{a}$ ,  $paun\bar{a}$ 

The word رَوِن paune added to a number signifies  $\frac{1}{4}$  minus, أَوْنَ  $\sin a$ ,  $\frac{1}{4}$  plus, and  $\sin a$ ,  $\sin a$ 

رَوْنَے سُو paune sau,  $(100 - \frac{1}{4} \text{ of } 100)$  75.

بونے مَسُو sawā sau,  $(100 + \frac{1}{4} \text{ of } 100)$  125.

پُونے قبی بَّ derh sau,  $(1\frac{1}{2} \text{ of } 100)$  150.

پُونے دو سَو paune do sau,  $(200 - \frac{1}{4} \text{ of } 100)$  175.

پُونے دو سَو sanā do sau,  $(200 + \frac{1}{4} \text{ of } 100)$  225.

پُونے شوا دو سَو sanā hazār,  $(2\frac{1}{2} \text{ of } 100)$  250.

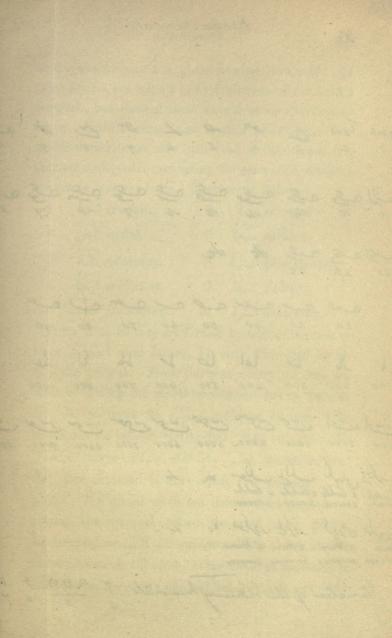

پُونے دو هزار derh hazār,  $(1\frac{1}{2} \text{ of } 1000)$  1500.

پُونے دو هزار paune do hazār,  $(2000 - \frac{1}{4} \text{ of } 1000)$  1750.

پُونے دو هزار sanā do hazār,  $(2000 + \frac{1}{4} \text{ of } 1000)$  2250.

پُونے هزار arhāī hazār,  $(2\frac{1}{2} \text{ of } 1000)$  2500.

170. Besides the ordinary series of numerals there is another called رقم, Rakam, used in commercial and monetary transactions (see Plate 1). The figure used for 1 is an abridgment of the word عدد adad, 'a unit;' that

Varieties of the ordinary humerals of no 9 4 1

for 2 is an abridgment of accidentally accid

1	مُحَدِّ aḥadun.	. 6	sittatun.
2	اِثْنَانِ iṣṇāni.	7	ae sabatun.
3	6	8	يَّمَانِيَةٌ samāniyatun.
4	arbā'atun.	9	tisātun.
5	ين <u>kh</u> amsatun.	10	āsharatun.

From 10 to 19 they are formed by adding the unit to 10 as اَحَدَّ عَشَرُونَ ahad āshara, 11, etc. The word for 20 is عَشَرُونَ ishrāna. From thirty to ninety the tens are made by adding the plural termination āna to the unit as الْمُعْنَى عِمَاهُ عِمْلَةُ عِمْلَةُ عَلَى الْمُعْنَى الْمُعْنِى الْمُعْنَى الْمُعْنِى الْمُعْنَى الْ

In compound numbers the smaller numbers are generally placed first, and so on in regular succession to the highest, as اِثْنَانِ و سَبَعُونَ و ثُمَانِي مِأْنَّهُ و أَلْفَ 1872; but the order is sometimes reversed.

171. The Persian numerals are not much used in Hindūstānī, but they are occasionally found in various phrases and expressions. They are very simple, so they are subjoined:

يک yak.	17	هُنْکُ hafdah.
رُ dū.	18	ر مَشْدَه hashdah.
- A Company of the Co	10	( sɔ̈́s hazhdah.
پار chahār	19	نۇزدە nūzdah.

دُوازدُه dwāzdah.	80	مَشَتَاد hashtād.
sīzdah. بييزد	90	nuwad.
خمارد د chahārdah.	100	مند şad.
عانزدَه pānzdah.	200	غر صد dū şad.
shānzdah.	1000	hazār.
	غ dū.  ه ني sih.  پ خ chahār.  پ panj.  ش shash.  ش haft.  ش hasht.  ه ن nuh.  ه خ dah.  ه ن yāzdah.	الله الله الله الله الله الله الله الله

### Derivation of Words.

172. The subject of derivation is a very wide one, for Hindūstānī is a very composite language, and borrows from its tributary languages not words alone but many of their methods of forming derivative words. It has a few rules peculiar to itself, then it has Sanskrit forms, Arabic forms and Persian forms, and these as a general rule should be used only with words found in the language from which they are respectively derived. Thus a Sanskrit affix should not be attached to an Arabic word nor vice versâ. Sanskrit affixes are joined to Hindūstānī words, and Persian affixes are found so applied to Hindūstānī words, but this latter is inelegant and should not be imitated. The following explanations are given to enable the learner to acquire and more readily understand some of the common derivative forms: he must be content so to know them and not attempt to make compounds for himself. When he has acquired the amount of knowledge necessary for the proper formation of derivatives and compounds he will not require to consult the rules here given.

## Nouns of Agency.

173. The formation of the verbal agent by the addition of the native words  $var{a}la$  and  $var{a}la$  to the inflected infinitive has been already shown in Rule 100, page 53. Thus we get  $var{a}la$   $var{a}la$ , a 'spectator,'

and الكيف هار likhne-hārā, 'a writer.' But these affixes are not confined to verbs, they may be joined to nouns, and are continually met with, nāla especially; thus هر الا ghar-nālā, 'house-man,' 'the master of the house;' الكيف المقام lakar-hārā, 'wood-man.' Wālā is universally used, and a tyro may freely employ it to help himself out of a difficulty. If he does not know the proper forms for such words as villager, horseman, etc., nālā added to the word for village and horse will answer the purpose. It has been pressed into Anglo-Indian use, and we have box-nālā for a pedler, and many other such forms: competition-nālā has now almost become English.

174. The following suffixes with the exceptions noted are Persian.

بان bān. باغبان bāgh-bān, a gardener. باغبان dar-bān, a door-keeper. مربان bāz (player). آتشباز ātash-bāz, a firework man. عُقّه بردار bardār (bearer). مُقّه بردار bardār (bearer). مُقّه بردار

تونچي mashāl-chī, torch-bearer. تونچي topchī, gunner. تونچي topchī, gunner. يادار dār (holder). زميندار khidmat-gār, servant. خدمتگار gār (doer). خدمتگار gar (worker). پندار sitam-gar, tyrant.

عُذار (passer). الگُذار "māl-guzār, payer of revenue. راه گِير rāh-gīr, traveller. گِير gīr (taker). گِير mūsh-gīr, sparrow-hawk.

ار (like). شاه وار shāh-nār, like a king, royally.  $n\bar{a}r$  (possessing). أحيدوار  $nmed-n\bar{a}r$ , an expectant.

وان vān (possessing; a Sanskrit particle). دهنوان dhan-nān, wealthy. Also used like بان bān. dar-nān, a door-keeper.

ي آ. سپاهي sipāhī, a soldier. سپاهي fārsī, a Persian.

175. Nouns of Locality, Similarity, etc.

P. عَدراباد Haidar-ābād, the city of Haidar, or 'the lion.'

اري bārī, (a garden). See باڙي nārī.

8. pur pur

P گازار gul-zār, a garden. گازار sabza-zār, a meadow.

P. عنا; zāda (son). شاءزاده shāh-zāda, prince.

s. الله  $s\bar{a}l$  (house). المواقع gau- $s\bar{a}l\bar{a}$ , a cow-house.

P. ستان stān or istān (place). بوستان bo-stān ; گلِستان gul-istān, a rose garden.

P. shikār-gāh, hunting ground. شکارگاه shikār-gāh, hunting ground. چراگاه

H. عليكُّرة Partāb-garh, عليكُّرة 'Atī-garh'

<sup>1</sup> These words combine freely with Musulman names.

- s. بيجا نگر nagar (city). بيجا نگر Bījā-nagar, city of victory.1
- H. پهلواڙي nāṇī (inclosure). پهلواڙي phul-nāṇī, a flower garden.

#### 176. Abstract Nouns.

المانية (msanigat, numanity) التكويت (msanigat, numanity) التكوين المانية (pan بي pan التكوين pan بي

larkā, child.

پرست parastish, worship, from پرستش parast, worshipping.

P. ي . This common Persian affix forms abstract nouns from nouns and adjectives دوستي dost, a friend; موست shādī, pleasure, from دوست shādī, pleased.

Words ending in ه h change that letter into \$g\$ before this affix, as from بنده bandah, a servant, comes بندگي bandagī, service.

#### 177. Diminutives.

P. ک ak. توپک mardak, a manikin; توپک topak, a musket, from توپ top, a cannon.

<sup>1</sup> These words combine freely with Musulman names.

### 178. Feminine Nouns.

little box.

The usual Hindūstānī feminine termination is ي ī which is occasionally changed to ي nī or ي in. Thus which is occasionally changed to ي in. Thus التكا larkā, a boy, يراهمني larkā, a girl; براهمني brāhmanī, a female brahman; شير ني sher-nī, tigress; سنارين sunārnī or سنارين sunarin, a goldsmith's wife; سنارين sunarin, a washerwoman, from دهوبي dhobī.

### 179. Adjectives.

The most common and useful termination is ي ، as ي قرنگي , bāzārī بازاري , Firangi هِندوُستاني

н. ا قَ الْهُ فَيْ bhūkhā, hungry, from وَهُوكُ bhūkh.

P. منا ana (like, -ly). مردانه mardāna, manly.

H. کوس بهر bhar (full). کوس بهر kos-bhar, a full kos; کوس بهر imr-bhar, all one's life.

P. وفادار (possessing). وفادار nafā-dār, faithful.

P. سار sār (like, full). شاخسار shāh-sār, king-like; كودسار koh-sār, mountainous.

P. مند mand (possessing). دانِشمند danish-mand, wise.

P. مان mān (possessing). شادمان shād-mān, joyful.

## 180. Negative Prefixes.

- 8. I a Same as the English prefix un. I  $a-j\bar{a}n$ , a-chal, immovable,  $an-j\bar{a}n$ , unknowing.
- e. بيوفا be, (without). بيوفا be-mafā, faithless; the reverse of باوفا bā-mafā, faithful.
- P. بد مسلوک bad (bad) بد سلوک bad-sulūk, ill-mannered. بن جانے bin (without). بن bin-jāne, without knowing.
- A. غَير حاضِر <u>gh</u>air (other). غَير حاضِر <u>gh</u>air-ḥāzir, not present, absent.
- P. م kam (little, -less). کم زور kam-zor, weak, powerless.
- A. الآجار (without). الآجار lā-chār, helpless.
- ما نامق nā (not, un-). نامق nā-ḥaḥḥ, unjust; سَاخُوش nā-<u>kh</u>ush, unpleasant.
- s. يز ni (without, -less). نچينت ni-chint, thoughtless ; ندهڙک ni-dharak, fearless ; nir-ās, hopeless.

#### SYNTAX.

# Order of Words.

181. The Subject, i.e. the Nominative or the Agent case, generally comes first; then follows the Object or Accusative; after this come the subordinate members of the sentence, such as the Dative or Ablative cases; lastly comes the Verb, preceded by its Adverb. Such is the natural order, both for affirmative and interrogative sentences; but it is varied, according to necessity or taste, to bring particular members of a sentence into prominence. In verse, all order gives way to the exigencies of metre and rhyme.

the hare took him to a خَرْگُوش أُس كو ايك كوئے پر well.'

wen.

'where have you brought it

from?'

thou those images hast 'أَن بُتوں كو تُو چُرا لايا 'thou those images hast

'the fool seeks for wealth.' جاهل طَلَب كرتًا هَي مال كو 'whatever has been related بيان كِيا تُونِ سُنا مَين by thee has been heard by me.'

182. Two or more words coming together may stand in apposition, and a particle placed after the last

will govern the whole, just as if they were connected by conjunctions.

'without eating and drinking.' بغیر کھانے پینے کے 'mines of diamonds, rubies, 'gold, silver, copper, iron, lead, etc.'

So also, if the nouns are in an oblique case plural, it is necessary only to add the oblique sign on to the last.

how can one give a ' گُوزُن آور هِرْنوں کي کيا دِيجِئْے شرّح "description of the elks and the deer?"

# The Article.

183. As already explained, there is no article in Hindūstānī, but there are certain words which are used as substitutes for it. The noun itself usually has the force of the article inherent, and the context determines whether it is indefinite or definite. Thus the words whether it is indefinite or definite. Thus the words iman speaks, or 'a man speaks,' or 'a man speaks.' The words الكن 'a certain,' are used for the indefinite article, especially at the beginning of a narrative or tale. خي 'some,' is used as a partitive article with a noun in the singular number, as يَانِي لاَوْ 'bring some water.' The pronouns بناني لاؤ 'that' are occasionally employed for the definite article, with the power of 'the,' rather than of 'this' and 'that.'

'a king went on a journey.' ایک باذشاه سَیر کو گیا 'a fox was prowling about.' کوئی لو آی پیرتی تهی 'the old man was in no way وَهُ بُورَهَا کِسي طرح رَاضي نه هُوا satisfied.

'it is no failure of the science, عِلْم كَا نَقْص نَهِ مِن يِهِ عَقَّل كَي it is a want of understanding.'

### 184. Nominative Case.

The verb agrees with the Nominative Case in number and person. It also agrees in gender, excepting only in the Present of the Auxiliary, and the Aorist and Imperative of all verbs.

'I went into the bazar.' مَين بازار مين گيا 'that merchant proceeded' وُه تاجر دريا كي راه سے رَوانه by way of the sea.' 'strength remained not in (my) body.'

But a singular nominative may have out of respect a plural verh.

who was king of that ' جو پاڏشاه اُس مُلَکُ کے تھے country.'

if the king will show kind- اگر باذشاء اِلتِفات كريں ness.'

بر باذشاہ تخت پر 'when King Akbar sat on بَيتہے the throne.'

'the queen was seated.' ملِک بَیتَهِیں تَعِیں (the queen, my mother,) میري تلاش میں تَعِیں was in search of me.'

185. As the Nominative case of nouns is frequently the same in the plural as in the singular, the verb shows which is meant; it also determines the gender of the pronoun.

a horseman came.' سَوار آیا 'horsemen came.' سَوار آئے 'he said.' 'she said.' 'she said.' وَهُ بُولِي 'men should labour.' آدَمي صححِنَت کریں

186. The masculine gender is more worthy than the feminine: so when a verb has two or more nominatives it is generally put in the masculine. But it sometimes agrees with the nearest nominative.

three days and nights ' تِین دِن رات صاف گُذر گئے passed clean away.'

the male and female are ' سرآور ماده دونوں شریک نہیں not both partners.'

not both partners.' هوتے (my) nurse and tutor became aware.'

they had some rupees and ' أَن كِهَ بِاسٍ كَجُهُ رُوْبُهِ اشْرِفياں ' they had some rupees and عَبِينَ مَا مُعَالَى مُعَالَى السَّرِفيان مُعَالَى السَّرِفيان عَلَيْنَ مَعَالَى السَّرِفيان عَلَيْنَ مَا مُعَالَى السَّرِفيان عَلَيْنَ مَعَالَى السَّرِفيان عَلَيْنَ مَعَالَى السَّرِفيان عَلَيْنَ مَعَالَى السَّرِفيان عَلَيْنَ مَعَالَى السَّرِفيان عَلَيْنَ مَعْلَى السَّرِفيان عَلَيْنَ عَلَيْنَ عَلَيْنَ مَعْلَى السَّرِفيان عَلَيْنَ عَلَيْنِ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنِ عَلَيْنَ عَلَيْنِ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنِ عَلَيْنِ عَلَيْنَ عَلَيْنِ عَلَيْنِ عَلَيْنِ عَلَيْنِ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلْنَانِ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلْنَانِ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلِيْنَ عَلَيْنِ عَلَيْنِ عَلَيْنِ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنِ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنِ عَلَيْنَ عَلَيْنَ عَلَيْنِ عَلَيْنِ عَلَيْنَ عَلِيْنِ عَلَيْنِ عَلَيْنَ عَلَيْنَ عَلَيْنِ عَلَيْنِ عَلَيْنِ عَلَيْنِ عَلَيْنِ عَلَيْنِ عَلَيْنَانِ عَلَيْنَا عَلَيْنَا عَلَيْنَا عَلَيْنَا عَلَيْنَ عَلَيْنَانِ عَلَيْنَا عَلَيْنَا عَلَيْنَ عَلِيْنَ عَلَيْنِ عَلَيْنَا عَلَيْنَا عَلَيْنَا عَلَيْنَا عَلَيْنَا عَلَيْنَا عَلِيْنَا عَلَيْنَا عَلَيْنَا عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنَ عَلَيْنَا عَلَيْنَا عَلِيْنَا عَلَيْنَا عَلَيْنَا عَلَيْنَا عَلَيْنِ عَلِيْنَا عَلَيْنَ عَلَيْنِ عَلَيْنَا عَلَيْنَا عَلَيْنَا ع

ashrafis. تېيى 'he had no son or daughter.' اُس کو بيٿا بيٿي نہ تهي 'men and women (were) buying and selling together.' 'girls and boys were standing.'

[In the first three examples a decided preference is shown for the masculine gender, and in the next two for the nearest nominative. In the others the preference may be for the masculine *per se*, or on account of its being the gender of the nearest noun.] Compare the rules for the agreement of the Genitive and the Adjective.

187. The names of two or more things of similar nature or character are often taken as an aggregate and have a singular verb.

'a storm and typhoon came.' آندهي أور طوُفان آيا (companionship and con- نُحَبت و بات چيت مُيسَر verse have been obtained.' و بات چيت مُيسَر verse have been obtained (every moment there is lamentation and groaning.'

188. An Arabic plural is often, but not always, joined to a verb in the singular number: having no Hindūstānī mark of plurality about it, the sense conveyed by it is singular or of an aggregate character.

'your majesty's favours are آپ کا الطاف آیسا هي such.'

(many) kinds of good fortune will accrue to him.

189. A Nominative case is sometimes put independently at the beginning of a sentence without any verb; but it is followed by a relative connected with a verb. In this construction the words "this is" or "there is" (the French "voici, voilà"), seem to be understood.

This is) Malik-i Şādiķ ملک صابق جو بادشاه جُنُوں کا هَی تَمهارے باپ نے اُس کے ساتھ دوستی بیدا کی تھے،

who is King of the Jins: your father had formed a friendship with him.'

190. Articles of which any quantity, weight or measure is specified are put in the Nominative,1 the two words being in apposition.

'a bīghā of land.' ایک بیگها زمین 'a hundred maunds of iron.' 'five hundred ashrafis reward.' پان سَى اشْرفي اِنعام 'a hole one yard deep.' ایک گر ممیتی گڑھا

191. Sometimes a sentence serves as the Nominative case.

خیمے کی پناہ لینی بھی گرمی کو دفع نہیں کر سکتی ھی 'taking refuge in the tent even cannot dispel the heat.'

192. The Oblique plural is occasionally used instead of the Nominative to express the idea of "many" or "several."

<sup>1</sup> As in German, Ein Glas Wein,

' months and years passed.' مہینوں بڑسوں گذرے ' what the ears were hearing.' For the use of the Nominative as the Accusative, see 217.

### 193. The Agent Case.

The case of the Agent frequently supplants the Nominative case: it is therefore taken next in succession, and as it is a very remarkable and important feature in the language, every variety of illustration is supplied.

194. The Agent is used instead of the Nominative with all the tenses of the Active Verb in which the past participle is employed, viz., the Past, Perfect, Pluperfect, and Future Perfect.<sup>2</sup>

- <sup>1</sup> This case is sometimes called the Instrumental, but Agent is more correct; for it represents the worker by whom or which something is done, not the instrument with which it is effected.
- <sup>2</sup> There is perhaps no rule more definite and stringent than this, which requires the Agent with the past tenses of Active Verbs; still even this rule is infringed, and by the best writers, thus

rule is intringed, and of the seated silent as an 'she, seated silent as an image, kept listening.'—Bāgh-o-Bahār, 205.

who had put their heads out 'جو بانبهي کے اندر سے سِرنکالے تھے۔ of their holes.'—Khirad Afroz.

(Here the nikāle is probably a slip for nikālte).

ناس غم میں رویا کئے کہ ایک مُدت تاک اُس غم میں رویا کئے۔ kept weeping in that sorrow.'—Ikhwanus-Ṣafā.

There is an example of the improper use of ne in Forbes'  $B\bar{a}gh$ -o- $Bah\bar{a}r$ , page 101, line 1, where ne is used with the verb le-gae, and makes the whole sentence ungrammatical. It is not so in native editions. Forbes seems to have at one time been under an hallucination as to the verbs  $l\bar{a}n\bar{a}$  and le- $j\bar{a}n\bar{a}$ , for in his Manual he classifies them as Transitive verbs, which

195. When the Agent is used the Verb seeks for some word with which to agree. It is attracted to the Object or Accusative if there be one; and if the Accusative is in the Nominative form, the verb will agree with it in gender and number; but if the Accusative is in the Dative form, the verb cannot agree with that, so it remains in its normal form, viz., the masculine singular.

Here there is no object, and consequently the verb remains in its normal form.

Here the accusative, 'janāhir,' is in the nominative form of the accusative, so the verb agrees with it.

Here the accusative s',  $r\bar{a}h'$  is also in the nominative form, but as it is feminine the verb is made feminine to agree with it.

Here the verb is in the plural masculine to agree with ghore.

most certainly they are not. This little Manual has rendered, and will probably yet render, such good service, that the error deserves to be pointed out and corrected. Many a time the Manual has been appealed to when I have rejected ne as an error with  $l\bar{a}y\bar{a}$  and  $le-gay\bar{a}$ .

this man has brought for- ایاتِ قُرآنی . ward verses of the Kur'an.'

Here the verb agrees with the feminine plural  $\bar{a}y\bar{a}t$ .

In the following examples the Object is in the Dative form, so the verb remains in its normal state.

God Almighty created ' الله تَعالیٰ نے آدَم کو پَیدا کِیا Adam.

'God has made man for the

purpose of labour.' کِیْے بنایا هي 'I remembered the power ' مَیں نے خُدا کي قُدّرت کو of God.'

196. As according to rules 187 and 188, an aggregate nominative, or an Arabic plural nominative, may take a singular verb, so when they are the object of an active verb, the verb may be in the singular and may agree with the nearest.

'He confiscated all the goods سب اسباب گیزبار حاتِم کا and effects of Ḥātim.'

of Siva, a place of meeting, أور سَنْكَت أور باغ برّي بَهار and a garden of great beauty.'

(I) had garments and (مَين نے) لِباس و يوشاك بَنوا clothes made.'

197. When two past tenses occur in the same sentence,

one being neuter and the other active, the first verb will have its appropriate nominative or agent; and the second will not require its agent or nominative to be expressed.

she came back quickly and ' وُه جهَتْ بِهِر آئي أور كَهَا said.'

(us ne being understood before kahā).

he went for a stroll in the ' بازار میں سَیر کو گیا اور دیکیا

(us ne being understood).

they made their offerings ' نَدْرِين دِين أور بولي and said.'

(here both agent and nominative are understood).

198. Genitive.

The sign of this case کي کے is in the nature of an Adjective, and agrees with its object as already explained in paragraph 43.

ثاس گرُوه کا سرّدار 'chief of that band.' 'the travels of the darnesh.' درّویش کی سَیر 'jewels of various kinds.'

199. The close connexion of the Genitive case and the Adjective is apparent in such phrases as the following:

achain of gold,' or, 'a golden chain.' سونے کی زُنجیر 'achain of gold,' or, 'a golden chain.' هاتهي دانت کي 'tooth), or, 'an ivory chair.' دوز کا کام 'the work of the day, daily labour.'

'a house of comfort, a comfortable house.'

اب کا سال ('the year of now), the present year. 'a man of (with) a small head, a small-headed man.'

'a matter of wonder, a strange thing.'

screens of splendour, splendid چَلُونِيں تَكُلُّف كي screens.'

200. The *Izāfat* or Persian Genitive is much used in books instead of the Hindūstānī Genitive.

one should not touch the 'one should not touch the capital of one's property.'

And the two are often joined in the same sentence.

The showing of gratitude ' تَوَجُّه كا اللهُ شُكْر for kindness.'

(the  $k\bar{a}$  form of the genitive being required by the nominative  $ad\bar{a}$ , payment).

'all my life has passed in 'all my life has passed in 'عیری کے درّد سرمیں کتی 'this same headache of acquiring dominion.'

the sky is (but) a bubble of ' the ocean of His unity.'

In the last two examples ke is used because dard and daryā are oblique.

201. The کی کے کا of the genitive is both subjective and objective, it stands both for the English genitive in 's and for that in of; for noman's love, and love of noman.

'like the washerman's dog, neither of the house nor of the qhāt.'

(I) could not bring (find) ناب بهوُکه کی نه لاسکا endurance of hunger.'

'the friends of money are many' روپی کے دوست بہ ت کیں the satisfying one's father is رضامتندی پدر کی خوشنودی the gratification of God.'

See Rule 211: also the Rule for the Pronouns.

202. The Genitive generally precedes its object, but examples to the contrary are of constant occurrence.

the bath of convalescence.' غُسُل شِفَا كَا 'the bath of convalescence.' 'the history of the Urdū language;' or, literally, 'the history of the tongue of the camp (Urdū).'

203. The singular & may be used when the Genitive has for its object two or more nouns closely connected with each other, or taken together in an aggregate sense.

his poetry and eloquence.' شعر و سُخن أسكا 'name and trace of the princess.' پادشاه زادي كا نام و نِشان 'Hātim's country and possessions, and wealth and effects.' مال و اسباب Compare Rule 187. 204. خ may be used respectfully with a singular noun. خو پادّشاه اُس ملک کے تھے 'who was king of that country.' Compare Rule 184.

205. An Arabic masculine plural may take either ک or کے.

the particulars of the dream.' خواب کا احوال ' provisions for hospitality.'

' provisions for travel.' سَفْرِکِ اسْبَابِ مِهْمَانْداری کا ' persons of every tribe.'

Compare Rule 188.

206. Several nouns may be dependent upon each other in the Genitive case. Such complications, when they present any difficulty, may be unravelled by reading them backwards.

a daughter of a family of the وین زرد شت کے عُلماکے گھرانے learned men of the religion کی بیتی of Zoroaster.'

the desire of seeing [of] the ' فرّنگ کے دیکہنے کا country of Europe.'

'he is wasting with sorrow' اپنے خویش و اقربا کی دوری

he is wasting with sorrow انگنے خویش و اقربا کی دوری for the absence of his friends and relations.'

207. When the genitive has more than one object, it is elegant to have them all of the same gender; as 

'the life and prosperity and the dignity and majesty of the prince.'

But when the genitive has for its object nouns of different genders, it generally agrees with the nearest, though occasionally the masculine form is preferred.

on the result and effect of the science of medicine.'

the science of medicine.'

the tongue is deficient in his glory and praise.'

our talons and beak.'

a crown and robe of pearls.'

all his effects and cash and goods.'

Compare Rule 186.

208. The Genitive is used idiomatically, as in English, to express a superlative idea; as 'king of kings,' 'light of lights,' 'bravest of the brave.'

أسب كا سَب كا سَب الله 'all of all, i.e. one and all.' سب كا سَب كا سَب الله 'love of love, true affection.' بيت كى كهيت كا كهيت كا كهيت الله 'field of field, the whole field.' جَهُولُه كا جَهُولُه كا جَهُولُه كا جَهُولُه كا جَهُولُه كا جَهُولُه كا خَهُولُه كا خَهُولُه كا سُوكها 'driest of the dry.'

209. The Genitive is frequently used for other cases after the Infinitive (Verbal Noun) and Nominal Verbs.

he came to see those places.' أَن مكانوں كِه ديكھنے كو آيا ' he thou not afraid of him.' أس كا خَوف نَہِيں كرتا ' art thou not afraid of him.' See the Rules for the Infinitive and for Nominal Verbs.

210. The measurement of anything is expressed by the Genitive.

## a. Age or time of life.

'a boy of fourteen years.' چُوده برس کا لِژُکا 'the king's age reached forty بادّشاه کي عُمْر چالِيس برس years.' کي هو گئي 'at the age of fifteen years.'

b. Period of time.

three months' leave.' بین مہینے کی رِضا ' in the course of three days.'

#### c. Distance.

'at the distance of fifty kos.' پخاس کوس کے فاصلے پر 'a distance of fifteen parasangs.'

## d. Weight.

of seven miskāls in weight.' وزّن میں سات مِثْقال کا '(my) feet became hundreds of mans (in weight).'

#### e. Value.

'what is the price of this parrot?' ایک روپیئے کا چانول 'rice of one rupee, i.e. a rupee's worth of rice.'

211. The Genitive is used idiomatically for 'to,' for,' and sometimes even for 'on' or 'upon.' In oaths it takes the place of 'by.'

the road to the plain.' مَيدان كي راه 'the answer to the question.' نوال كا جَواب 'thanks to God.' 'thanks to God.' 'friendship for your father.' 'مهارے باپ كي دوستي 'friendship for your father.' أس كا كَچُه عِلاج نهيں 'there is no remedy for it.' 'separation from him.' 'separation from him.' كا زندگي كَچْه بهروسا نهيں 'there is no dependence on life.' 'غدا كي قسم كهاتا هؤں 'I swear by God.' نسم هي مُجهكواپني 'I have sworn by myself,' lit. 'there is an oath of mine own to me.'

212. With the verb 'to be' it expresses possession.

'he had two sons.' اُس کے دو بیٹی تھے the king of that' وہاں کے باڈشاہ کی ایک بیٹی تنبی '.country had a daughter

213. The word "word" used as a grammatical term takes the Genitive.

' words with tashdid.' تشدید کے لفظ ' words with madd.' مد کے لفظ ' the word fikr.'

214. A list of the words serving as Prepositions has been given in Rules 152 et seq., and their government of the Genitive either in کے or in کی has been sufficiently explained.

215. The sign of the Genitive is sometimes omitted with these words—so we find.

'nearthat.' أس پاس 'in this way'; إس طرح 'nearthat.' أس پاس 'no the river bank'; وربيا كنارے 'under the 'ير جنڙوكھے ;'

216. The sign of the Genitive is sometimes retained while the governing word is omitted.

'they had no child.' أن كے لتركا نہ تها ' between me and you a dear ' friendship has sprung up.'

In the first of these sentences  $p\bar{a}s$  or  $yah\bar{a}n$  seems to be understood, in the second  $b\bar{c}ch$  or  $darmiy\bar{a}n$ .

#### Accusative.

217. There is no distinct form for the Accusative case, but its place is supplied by the Nominative or Dative. Which of these two forms should be used is a nicety of the language which can be acquired only by practice, for no precise rule can be laid down; but the general principle is, that when the object of the verb is definite, specific, or emphatic, the Dative form is used; when otherwise, the Nominative.

he can gnaw iron with his وانتوں سے وُہ لوها چَبا سَكتا هَي teeth.'

(I) had placed your iron تیرے لوھے کو گھر کے کونے میں in a corner of the house.

In the first sentence there is nothing precise about the word  $loh\bar{a}$ , in the second it is specific.

218. The Dative form is generally used with proper names and titles.

call Mānik.' مانک کو بُلاو ' call Mānik.' ' the Sulṭān was holding Ayyāz as a great friend' (i.e. was very friendly to him).

219. Causal Verbs frequently govern two Accusatives; that of the person in the Dative form, and that of the thing in the Nominative.

' put this dress on him.' اُسے یہ کپّڑا پَهْناؤ ' he made the slaves eat the dog's leavings.'

#### 220. Dative.

The Dative case is equivalent to a noun with the prepositions "to," "for," and "at;" and may generally be so translated. (The learner when he meets a word with ko should always take the verb before translating that word, because the verb will show whether the word with ko is a Dative or a definite Accusative.)

(مَیں نے) سَوداگر کو بہُت سا (آ) (مَیں نے) سَوداگر کو بہُت سا '(I) gave to the merchant '(ایام ویا سدہ سندہ سلام سندہ کو گیا 'he went home (lit.to the house).'

'I will sell his jewelry for زیور اُس کا بڑے مول کو بیچؤں a great price.'

221. It is particularly used for 'at' or 'by,' with nouns of time.

ون کو 'by day'; رات کو 'at night'; مام کو 'at eve'; شام کو 'at last.'

'I ate not by day, I slept not by night.'

222. The & is often omitted.

أسي گهڙي ; 'on what day ' كِس دن ; 'on what day ' أس روز 'at that very hour.'

'to this extent'; آج کے دِن 'to day.' آب کے دِن 'i shall go home.' آج کے دِن 'I shall go home.' أس جگه آگيا '(he) came to that place.' بصرے چلکر 'having gone to Baṣra.'

'he wanders over the forests.' جنگلوں بھرتا ھي

Observe that although  $\geqslant$  is not expressed, the inflected Genitive is required. See Rules 152 and 153.

223. The word تَبِيَّل governing کے (-ke ta'in) is sometimes used instead of

the giving of permission إجازت دينا باز كيتبيَّس to the hawk.'

'they subdue a demon' ایک دیوکے تَعِین زیر کرّتے هیں

224. In the sense of 'to,' for,' or 'with the object of,' the Dative is especially used with the Infinitive or Verbal Noun.

'for eating' دیکھنے کو ; 'for eating' کھانے کو

These may be translated simply 'to eat' and 'to see,' for there is a close affinity between the Infinitive and the Dative cases.

In such sentences the & is frequently omitted.

he came to say his prayers.' See the Rules for the Infinitive.

225. The Dative is employed with words implying necessity, fitness.

'it is necessary for kings.' پاڏشاهون کو ضَرَور هَي 'it behoves the wise.'

226. The Dative case with the substantive verb, or with the verb رهنا, denotes possession; with the become,' and كآنا 'to come,' it denotes acquisition.

he had neither son nor 'اُس کو بیتا بیتی نہ تھی daughter.'

he had no other shelter أس كو كوئي آسرا أور سهارا نه تها or defence.

'I have a doubt upon this 'مُجهِے اِس بات میں شُبّه هي matter.'

أس ميں تذبير كو كيا دخّل what has foresight to do with it?'

<u>Kh</u>iradmand had no power ' خِردٌمنّد كو تاب نه رَهي left.'

some consolation arose to سُجِه کو کُچُه تَسَلَّي هوُيُ (some consolation arose to me; I received a little comfort.)

to me certainty has come; أُمُجَهُ كُو يَقِينَ هُوُا I am sure.'

to the king there was no پاکشاه کو باور نه هُوا belief (he did not believe).'

'I became certain.' مُجَه کو یقین آیا 'he felt pity for them.' اُس کو اُن پر رحم آیا 'it was no use to any one.'

227. When a verb governs both an Accusative and a Dative, the former is generally represented by the Nominative; but there are instances in which it is put in the Dative form, so that *ko* comes twice over, as an Accusative and as a Dative.

'consider me your foe.' مُجَهِم الْمِنا دُشَمن سَمْجهو 't sent the other to call him.' مَيں نے دوُسْرے کو اُس کے بُلانے کو رُخصَّت کِیا

they took the prince for a بادّشاه زادے کو باغ کي سَير کو stroll in the garden.'

#### Ablative.

228. This case is formed with the particle which has the meaning of 'from, 'with,' 'through,' and 'than;' but other prepositions occasionally render its meaning more exactly.

from this good fortune و أس دُوات سے نِه ایت خُوشي exceeding great joy was derived.

'when I ceased from praying.' جَبِ نماز سے فارغ دُوا اِس قَصَد سے در گذر 'refrain from this design.' لڑکے سے بَہُت آزُردَه هُوا 'he was very vexed with the boy.' 'look with your eyes.' 'he became enamoured with

heart and soul.' 'with (on) some pretence.' 'I, through my fault, having

مَين اپنی تقصیرسے خِجل هوکر

shamed of it).' کس چیز سے فغر کرتے هیں 'what thing do they boast about?'

کہنے سے اور کڑنے سے بڑا فرق . between saying and doing شي في في المحدث المحدد المحدد

'there is a great difference between saying and doing.'

insect class.'

become ashamed, (i.e. a-

همارے گروہ سے تُم نَہیں هو

'you do not belong to our party.'

229. The Ablative is frequently employed, instead of 'beyond,' باهر before,' and بيلے and أكل before,' and باهر 'outside :' بَعيد 'distant,' requires the Ablative.

اس سے بہلے 'before evening.' شام سے بہلے 'before evening.' he cannot go further ' يَينْتالِيس كوس سے آگے نہ چل سكے than forty-five kos.' beyond description.' بیان سے باہر 'beyond description.' قبلے سے باہر بگلے 'having gone out of the fort.' عقّل سے بعید

230. The Ablative is used for the period from which time is measured.

' since three days.' تین دِن سے ' since three days.' بُرُت مُدَّت سے ' for a long time past.' بَرْسُوں سے ' for years.' آج کی تاریخ سے ' from this day's date.'

231. It is used to denote 'by may of.'

' by way.' واف سے by the door.'

232. The sign of the Ablative is idiomatically omitted in many familiar phrases.

اتهوں هاته 'from hand to hand.' هاتهوں هاته ن پهاروں کي راه' پهاروں کي راه'

233. The case of the Agent is used with the Past tenses of Active verbs, when the person or actor is the leading idea. But it is sometimes required to bring the deed into prominence, by giving the sentence a neuter construction. This is done by putting the deed in the Nominative case, the doer in the Ablative, and finishing with a neuter verb, especially or موسكنا or موسكنا .

Active.

'the slave committed a great offence' غُلام نے بڑي تقّصِير كي

#### Neuter.

'a great offence was committed by the slave (lit. became from the slave).'

'at night no plan could be devised by me.'

'if that from him can come to pass, i.e. if that can be done by him.'

'this fault was committed by me.'

'it will not be possible for me to do this.'

234. The same construction is found with causal verbs. The prime agent is put in the Agent case, and the secondary agent, upon which the causal verb acts, is put in the Ablative.

'I caused the creed to be repeated by her.'

235. Verbs of saying or addressing, of asking, of fearing, quarreling, fighting, treating, or concealing, require an Ablative of the person.

a. Saying or addressing.

'I said to that slave.' مُسِ نِے أُس خُلام سے كہا 'I said to that slave.'

(he) began to talk with the fakir.' فقِير سے باتیں کرنے لگا having made representation to the ' باذشاہ سے عرض کرکے king.'

But the verb we takes the Dative. Still is exceptionally found with a Dative and with an Ablative of the person: thus

'he said to some one.' اُس نے کِسی کو کہا and he said to one of his ' أور اپنے دو باور چروں میں سے two cooks.'

(\( \) is here used because \( \) is otherwise required).

'do not speak to any one.' کِسوُ سے نہ بول 'the priest said to the king.'

b. Asking and seeking.

'one asked the other.' ایک نے دؤسرے سے بوجنا "what I was desiring from God.' خُدا سے جو میں جامتا تھا

c. Fearing.

", أ فَد ا سے در 'fear God.'

'do not be afraid of him.' أس سے دّر مت

he was so fearing his أس كے غُصے سے أيسا خوف anger.'

he is not even afraid of اتبی سے بھی خطّرہ نہیں کرتا the elephant.'

d. Quarreling.

each began to quarrel with ایک سے ایک قضیہ کڑنے لگا the other.'

## e. Fighting.

'I can fight a hundred men.' سُو آڏمي سے لڙسکتا هؤ، 'where has he such strength 'سُو اِتّني طاقت کہاں ک that he can contend with me.' مُجه سے لڙے 'and that girl's eye also فراس لڙکي کي آٽکھ بھي اُس فرهمَن کي آٽکھ سے لڙي encountered that brahman's eye.'

f. Treating or acting towards.

I showed no kindness to my ' نہ بَہِن سے کَچُه سُلُوک کِیا ''sister.'

'to whom has it been faithful ' (أس نے) كِسَم وفا كي

g. Concealing.

when they disappeared 'when this sight.'

it is not right to conceal ' دِل کا بھید دوستوں سے چھپانا the secret of (our) hearts from (our) friends.'

236. Verbs of *informing*, or *being informed*, take an Ablative of the thing, and a Nominative or Accusative of the person. A nominative when the verb is neuter, an accusative when it is active.

'no one was acquainted أس بات سے كوئي واقف نه تها with this matter.'

<sup>&</sup>lt;sup>1</sup> The literal meaning of sulūk is 'treatment,' but it generally means 'kind treatment' unless otherwise specified.

'make me acquainted with that.' أس سے مُجهَے اِلِّلاع كر 'inform me of your name.'

237. Verbs of *filling* take either an Ablative or a Locative.

he filled his belly with انَّبْت پیت کو گوشّت سے بَهر دِیا flesh.'

See Rule 249.

238. Words expressive of separation and union, of departure, of taking care, of comparison, and necessity, require an Ablative.

## a. Separation.

'you have separated (her) مُجَهُ سے جُدا کِیا هَي from me.'

'I continue debarred from اس سے میں مخروم رَهتا هوں this.'

### b. Union.

'I will have an interview أس سے مُلاقات كروُں with him.'

(he) had married her to a سوداگر بچے سے شادی کر دی young merchant.'

### c. Departure.

'I took leave from that young man.'

'I set forth from thence to کوروانہ کیا 'I set forth from the sea.'

having turned from cer- یقبن سے پھر کر شکٹ میں پڑنا tainty to fall into doubt.'

## d. Taking care and the reverse.

be attentive to your busi- اپنے کاروبار لیں دیں سے مُشیار ness and transactions.' رَهُو نُو do thou take care of that

place.'

he will become inattentive 'مُلَکُ کے کاروبار سے خافِل ہو to the affairs of the State.'

## e. Comparison.

what analogy is there be-

tween this and that.' نی لوگوں کو کِس سے تمّثیل 'with whom shall I compare دُوں کو کِس سے تمّثیل these people? (whereunto shall I liken this generation)?'

## f. Necessity.

'we have no need of them.' هم إنسے إحتياج نہيں ركھتے See Rule 256.

239. The Ablative particle \_ is added to and and the signs of the Locative; مين سے signifies 'from among,' or in our idiom 'of,' 'out of'; ير سے means ' from upon,' or, as we have it, 'off.'

'one of them.' أن مين سے ايك

having deducted the money ' رُپئے اُن کی تنخواہ میں سے out of their pay.'

'he fell off his horse.'

#### 240. Locative.

The signs of the Locative case are میں 'in,' 'into,' or with plurals, 'between,' 'among'; پر 'on,' and تلک or ناک 'up to.' These particles are used very similarly to their English equivalents.

'in the world' دُنْيا ميں 'in length.'

whatever there is in earth ' جو کنچ، زمین آسمان میں کمی or in heaven.'

'he came into his senses.'

'he went into a certain city.' کِسي شَهْر میں گیا 'don't interfere in my میرے کام میں دَخّل مت کر

he was engaged in business.' کام میں مَشْغُول هُوا 'he was engaged in business.' کِشْتي پر چڙهکر رَوانه هُوا ship he departed.'

'he rode on a horse.' گھوڑے پر سَوار هُوا

remembrance and worship 'خدا کي ياد و بَنْدگي جَنْگل of God is not dependent on woods and hills.'

and تلک are used for intervals of place and time. تلک as far as my shop, to my shop.'

'from the beginning to the end.' اِبْتِدا سے اِنْتِها تک 'for five years?' 'for how long?'

241. , when it governs two words, signifies 'between; when it governs a plural, it signifies 'among.'

between these two.' أدر دونول مين 'between right and wrong.' there is a difference of

only one dot between هي نُکتے کا فَرْق هي affection and affliction.'

there is opposition between عِشْق أور عقّل ميں ضِدّ هَي love and sense.'

the princess was مَلِكَه أَن ميں نہ تھی not among them.'

242. is used with words expressing an interval of time, , for measure of distance.

'in a few days.' تہوڑے دِنوں میں

at about a kos outside اُس شَهْر سے باهر کوس ایک پر that city.'

at the distance of an arrow ایک تیر کے فاصلے پر (bow-shot distance).'

243. ي is often used when in English 'to' or 'at' is employed.

'he was seated at the door.'

'a darwesh went to a ایک درویش کِسی بِنیے کی chandler's shop.'

244. پر is used with إثنا and similar words in the sense of 'in spite of,' 'for all.'

'for all this wisdom.' اِتْني دانائي پر

245. In the headings of chapters or other divisions of books and papers, is used in the sense of our 'upon,' 'on,' 'in.'

upon the consultation of انسانوں کے مشورے میں the men.'

'in eulogy of the horse.'

246. The Particle میں is frequently omitted. پر sometimes, but less often.

هُي مُعْتَ هُي 'he is (in) anger.' 'he is (in) a rage.'

(These phrases are equivalent to he is angry, he is violent.)

in the last watch.'

ریجانے پہر

in that year.'

in that place.'

at that place.'

for long periods.'

every month.'

زینوں

in these days.'

نیم فقّے همارے نام کمي 'this victory is to my name' (is to be ascribed to me).

(is to be ascribed to me) نام لکہا 'the punishment of this will be written against my name.'

247. Words expressive of any emotion, as of love, friendship, anger, etc., take the Locative with ...

he is in love with your 'تُمهاري بيٿي پر عاشِق هَي daughter.'

having placed my trust in 'خداکے تَوَکُّل پر بَھروسا کرکے reliance on God.'

'this is the reason of (my) ثَجَه پرغُصّے کا یہ باعث anger against thee.'

he is not contented with 'اپنني قِسَّمت پرراضي نِهيں رهّتا his lot.'

'I also in that greed of mine.' مَيس بهي اپّني أسي طمع پر for what offence did you کيس تقصير پر أن غريبوں کو مارا beat those poor people,

and for what fault did you break the heads of these poor wretches.'

248. Verbs of tying and fastening require ....

having fastened the bucket ' قول رسّي سي بانّدْهكر to the rope.'

(she) made another knot) ایک گرده اُس ڈورے میں اَور in the string.' jars fastened to golden خُمیں سونے کی زنجیروں میں chains.' جَكَرِّي هُوئ

249. Verbs of filling govern the Locative in ......

having filled a canteen وقبهائي پٽوان خاصدان ميں with sweetmeats.' بهركر (their) hearts are so filled) ول ميں بُغْض و كِين إِتَّنا بهرا

with malice and hatred.'

250. Vocative.

The Vocative particle is , but it is frequently omitted.

'0 son.' أي بيتے

'O servants of God.' أي خُدا كے بندو

'O friends.' یارو 'O friends.' ای رُسْتم وقّت کے 'O Rustam (hero) of the time.'

The Persian form is sometimes used.

الهالث 'O king.'

'O cupbearer.' ساقيا

251. Adjectives.

Declinable Adjectives agree with their substantives in gender and number.

M. F. 'elder daughter.' بڑی بیتی 'elder son.' بڑا بیتا 'elder sons.' بڑے بیتے 'elder daughters.'

a little mouth (but) big words.' 'he worships an invisible God.' اندیکہے خدا کو پُوجتا کی 252. But an Arabic plural noun is treated as a singular: see Rules 188 and 204.

'all the goods.'

253. If an Adjective qualifies two or more nouns of different genders, it generally agrees with the one nearest to it.

so much silver and ashrafis ' إِثَّنَا رُوبِيهِ اور اشْرَفِي أور كَيِّرًا and clothes.'

'great armies and forces.' بَهُت سا لَشَكر فَوج 'great armies and forces.' مَهُت سا لَشَكر فَوج 'as many lakes, tanks, reservoirs, wells of the environs of the city.'

[This last example is curious. The close connexion of the Genitive case and the Adjective has been shown, Rule 198. Here the adjective is feminine, in concord with the nearest substantive بحبيلي ; and the genitive خويلي is masculine, in concord with أور أور , which is its nearest noun.] Compare Rules 186 and 206.

254. Adjectives are frequently employed as Nouns, and are then declined as Nouns.

'like old (people).' بُوزَّهُوں کي طرح 'like old (people).'
'many said.' نبيّه خُوس خبّري شهّر کے 'communicate this joyful news to the small and great of the city.'

on account of the friend-ship of such as these.'
ship of such as these.'
'having held out to some
the invitation of Islām.

255. Adjectives are often combined with verbs; if the verb is neuter they agree with the nominative: but if active, they remain in the masculine singular.

'the land of that place is good.' زمین وهان کی اچھی هی 'a true statement comes bitter.' سچی بات کتروی لگتی هی 'he will make the wall black.' بیوار کو کالا کریگا 'he can cure this woman.' آس عَورت کو چنگا کرسکتا هی

256. Adjectives combined with verbs govern their appropriate cases. These are much the same as they are in English; some exceptions have been noted in treating of the various cases of the noun, and further examples are here added.

in want of wealth.' مال كا مُحَتَّاج 'this house is necessary to us.' به مكان همين دركار هَي 'thirsting for his blood.' أسك لَهُو كا بِياسا 'one should remain in hope of the divine mercy.' خُدا كَ فَضَّل سِمَ أُمِّيدوار هُول مُعَالِم اللهُ ال

نین دین مے هوشیار 'careful in business.'
ایّنے مُلکُ سے جُدا ' parted from my country.'

that he may not be deprived of the distinction of activity.'

of activity.'

'acquainted with these matters.' اِن باتوں سے واقِف 'acquainted with these matters.'

'acquainted with these matters.'

'unseemly in kings.'

'far from manliness.'

'satiated with (tired of) life.'

'excluded from the mercy of God.'

[It should be borne in mind that many Arabic words classed in Hindūstānī as Adjectives are in reality Participles, like *mākif*, *maḥrūm* and *muḥtāj*.]

257. The adjective بير 'full,' does not generally take any particle; but the participle بيرا 'filled,' takes either the Ablative سے or Locative

نیکر کُوّوا تیل 'full of pungent oil.' کُمْر بھر 'all one's life.' مُمْر بھر 'with all one's might.' (بھر مقدور بھر نیے مُلک بھر میں 'in all his dominion.' النّانے مُلکّ بھر میں 'a house filled with jewels.'

the world from beginning ' دُنْیا سربسر بلا و مِحنْت سے to end is filled with evil and trouble.'

'filled with rage.' تَیش میں بھرا هُوا (her) eyes filled with tears.' آنکھوں میں آنسو بھرے The same construction obtains with participles borrowed

from the Arabic. أَجُواهِر اشْرَفيوں سے معمور 'filled with jewels and ashrafis.'

258. The mode in which the degrees of comparison are expressed has been already explained (Rule 65). The following are examples:

'two (are) better than one.' ایک سے دو بھلا 'there is no other greater 'أس سے دُوسرا كوئي دُنّيا ميں fool in the world than he.' نادان نہيں fool in the world than he.' 'its joy is less than (its) sorrow, and its grief greater than (its) pleasure.'

'life is dearer than all.' جاں سب سے عزیز کھی 'in rank he is greater than all.' درجے میں سب سے بڑا کھی 'the sky, in consequence of 'آسمان سفر کے سبب سب سے its moving, is above all.'

259. The repetition of an Adjective gives force or emphasis to it, as in our expressions 'the deep deep sea,' 'the red red rose,' etc.

very large eyes.' بڙي بڙي آٽگهيں ' very little (or, just a little) water.'

260. The particle الله 'like,' is equivalent to the English terminations -ish and -ly. It converts Nouns into Adjectives, as سرد سا 'manly;' and it qualifies an Adjective to which it is joined, as 'highish.' It agrees with the noun it qualifies like other adjectives in !.

'bring just a little water.' تهوڙا سا پاني لاؤ 'a fairish looking stag.' خُوبَصُورت سا هِرن 'a fairy like girl.' بري سي لڙکي 'hair black as clouds.'

It is generally added to the Nominative case of the Noun, as in the above examples, but it is sometimes found with the Oblique. With pronouns the Oblique form is used.

'like thee.' تُجه سا غِريب ' poor like me.'

261. This particle is used for making a comparison direct with some object, or with some possession or attribute of that object. In the former it is added immediately to the Noun, as in the examples above; in the latter, to the Genitive case of the Noun.

'a form like a tiger's.' شیر کی سی صُورت 'my language was not like 'my language was not like that of the inhabitants of that city.'

'distress like mine.' ميرا سا دُكِيب

In the following passage from the Nagr-i Be-nazīr the particle is used in both ways.

then the position of a توحال تُجبي سے دِلدار کاگنهگار charmer like thee will be like that of a criminal.'

#### NUMERALS.

262. Numerals are generally and properly joined to plural nouns; but as the plurality is shown by the numeral, there is a tendency to omit the sign of plurality in the Noun and the Verb, as is the practice in Persian.

نالیس دَرُواز و 'forty doors.' الکه گهوڙ و 'a lac of horses.' ناکه گهوڙ 'torty ashrafis.' والیس اشرِفیاں 'a hundred horse. 'a hundred horse. 'fifteen hundred chain.' 'four or five handful.' 'nine hundred file.' 'nine hundred file.' 'the adventures of two darneshes.' 'the ten year.

'a thousand horses might find comfort under it.' 'fifty bags of ashrafis.' نجاس توڙ اشرفی کے 'there nas 250 ashrafis.'

<sup>&</sup>lt;sup>1</sup> The same tendency is observable in English. We all say five hundred and five thousand, six foot high, etc., and among the uneducated the practice extends much farther.

263. Collective numbers are often put in the Oblique plural, instead of the Nominative.

hundreds of battles.' سَيكَّرُوں لَّرَائِاں 'hundreds of slaves.' 'thousands of slaves.' 'hundreds, thousands, lacs 'hundreds, thousands, lacs وقضب من من وربست جاتے 'for thousands of cities and towns have been and are being built.'

264. When numerals are intended to be definite or collective they take the oblique form on with the Nominative plural; but the Nouns to which they are joined are placed in the Nominative plural, not in the Oblique.

those four persons.'
وے چاروں شخص
these seven daughters.'

'the eight watches (all day and night).'

'the five times (of prayer).'

'hundreds of thousands will مربنگے

oppression.'

265. In the oblique cases plural, when the numerals are specific, the numeral or the Noun, or both the numeral and the Noun, are put in the oblique form.

through the forty doors.' کے الیسوں دروازی سے )

'among the seven planets.' ساتوں کواکیب میں 'between the two tribes.' 'between the two persons.' 'he asked those two persons.' 'on the four sides,' i.e. all around.

266. But when the sense is not specific, the Noun is put in the Nominative plural.

'after five days.' پانچ دِں کے بعد 'for six months.'

267. So تین دِن کے عرصے means 'for the space of three days;' but تین دِن کے عرصے or تینوں دِن کے عرصے means 'for the space of the three days' (before mentioned or referred to).

#### PRONOUNS.

268. The Nominative cases of the personal pronouns are frequently suppressed, and are left to be inferred from the context.

thus they say, on dit.' يُوں كہتے هُيں 'thus they say, on dit.' جي ميں آيا اُسے گاڙ دُوں I must bury him.'

269. When two or more personal pronouns are used in succession, the first precedes the second, and the second the third; the verb also agrees with the first in

preference to the second, and with the second in preference to the third.

'I wiped her tears, she wiped mine.'

wiped mine.'

we (I) and you will go.'

in respect of me and thee.'

'the meeting together of me and you has come to pass.'

270. In English we politely use the second person plural, 'you' instead of 'thou;' they do the same in Hindūstānī, but they employ in addresses to the deity, to children and other objects of affection, and also in speaking to persons of very inferior grade.

In Hindūstānī, and particularly among English speakers of Hindūstānī, they not only concede the respectful plural to others, but assert it for themselves, and say من 'we' instead of 'i.' This, however, is a colloquial rather than a literary usage; good writers rarely employ it, except for persons of very high rank.

When the plurals are thus used for the singular, and a real plural is needed, the word لوگ 'people' is added to the pronoun, thus هم لوگ 'we.'

In addressing a person of great distinction the honorific pronoun پیر مرشد , خداوند , حضرت or the titles آپ and

the like are used with the third person plural of the verb and with the respectful imperative.

In speaking of a third person, the third person singular is generally employed; but for a person of eminence the third person plural is used, and if the agent is required, نہوں نے is deemed more respectful than اُنہوں نے. أ.

When an inferior addresses a superior by these respectful terms he uses some humble term for himself as your slave; ' فِذَّوى ' your slave; ' غُلم '; your bondsman ' بَنْده devoted servant; ' حقير 'vile one; ' مُخْلِص 'sincere friend; 'عاجز 'humble one.'

"what do you say about this. ' تُم اِس ميں کيا کہتے هو میرے تَبِیُن بھی سِکھاؤ آور کلِمه بڙهاؤ 'teach me also and make me [i.e. enable me to] repeat the creed.'

O God! thou of thy bounty ' آي الَّا مُجه عاجز کو تُونے اپّني عنایت سے سب کیے دیا

آي بابا جو کُچُھ ِتُو کُہْتا ھَي مين يه سب سمجهتا هُون شیر نے کہا تُوسیم کہتا ھی

having left me in همیں خُدا کی نِگہبانی میں

hast bestowed every thing on poor me.'

'O son! whatsoever thou sayest I understand it all.' 'the lion said, thou art

speaking the truth.'

charge of God.'

- 271. The following rules respecting the etiquette of the pronouns, laid down by Muhammad Ibrāhīm of Bombay, are here given as quoted by Forbes:
- "1. When the speaker and the person whom he addresses are of the same rank, each should speak of himself in the singular number, and address the other in the second person plural. 2. A person of superior rank may speak of himself in the plural number, but this is not considered to be polite; nor is it thought to be correct to address even the lowest rank in the singular number. 3. The pronouns of the third person may be used in the singular when speaking of any person in their presence, unless they be of superior rank, when they ought to be spoken of in the plural. 4. When one person of rank addresses another of the same or superior rank, or speaks of him in his presence, it is or the great man's title, or some respectful phrase, as your highness,' and the خُداوند like, with the third person plural (of the pronouns and verbs); and when an inferior addresses a superior, he ought at all times to use similar expressions of respect, suitable to the rank of the person addressed."
  - 272. The pronouns and and are both personal and demonstrative. When they are personal, the particles for the cases are added immediately to them; when

they are demonstrative, the noun intervenes between the pronoun and the particle.

'I saw his dog.' مَيں نے اُس کے کُتے کو دیکھا 'I saw that dog.'

As demonstratives they are used distinctively; for 'the latter,' s, for 'the former.'

because there is no apparent کیُونِکہ اِنکے اَور اُنکے کیجُہ connexion between these and those (or, the latter and the former).

he has bestowed a low intelligence, and upon the latter annut the former أوران كونفْسِ عاقِل عطا كِيا

273. The pronouns of the third person and a are often used in the nominative singular, though having a plural signification. This is ungrammatical; but as the plurality is sufficiently shown by the verb, no misunderstanding can arise, so the practice will probably prevail.

274. With Arabic plurals, the demonstrative pronouns are generally kept in the singular, even if the verb and other words are put in the plural to agree with the noun. See Rules 188 and 205.

'having heard these circumstances.' یہ اخوال سُنکر 'having heard these circumstances.' بجب یہ اطوار لڑکے 'when the king saw these ways کے راجانے دیکھے of the children.'

275. The Genitive of the personal pronouns is both subjective and objective; so بيرا signifies my and of me.

'my life and wealth.' ميرا جان و مال 'my denial, or denial of me.' ميرا إنكار 'separation from him'

' separation from him.' ' separation from him.' ' there may be derision of me there.'

no one (was) giving me my کوئي جَواب ميرا نه ديتا answer.'

'there is no cure for it.' إس كا كَچُه عِلاج نهيں 'of me there is one daughter.' ميري ايك بيتي هَيْ 'a place has been seen of me.' ايك مكان ميرا ديكها هوا هي 'there arose a certain power' كوئي دُشمن قوى أس كا پَيدا ful enemy against him'(lit.'of him.')

276. As in Rule 206 for Nouns, so also the Genitive of the Pronouns agrees with the nearest of two or more objects.

to keep in mind one's own 'یاد رکھنا اپنی پَیدائِش اور creation and death.' مرنے کو having seen my distress and lamentation and weeping.'

277. The Dative case of the first and second personal pronouns is always used for the Accusative.

'having left you alone.' تُمهیں اکیلا چپوڙ کر having attentively looked میرے تَرِیُن به غَور دیکھکر at me.'

278. The Nominatives  $\gamma_{i}$  and  $s_{j}$  are occasionally used for the personal accusative him and her, but the Dative is generally preferred. As demonstratives  $\gamma_{i}$  and  $s_{j}$  are frequently employed for the Accusative.

'God has made this.' یہ خُدا نے بَنایا هَي 'I will give it to thee.' 'I will give it to thee.' 'whoever does not heed these counsels.' 'from hearing this account.' 'are نصیحتیں نہ مانے 'from hearing this account.' 'having returned thanks to God I say this.' 'I passed that day in restlessness.'

279. The Pronouns have various forms in the oblique plural; of these the form in j is the most respectful.

'although she (the Queen) هرچند اُنهوں نے میرے غائب had kept the fact of my disappearance concealed.' نم اُنهوں کے احوال سے مُطَلِع 'you are acquainted with his (the King's) affairs.'

280. The Pronouns have two forms for the Dative, the usual & and the pronominal or it is the more decidedly Dative. Both are used as Accusatives; generally so, the other form more rarely. In sentences where both an Accusative and a Dative of a pronoun are required, the former generally has &, the latter or it.

a feeling of pride came to شجهے بھی غَیرت آئی me also.

'when I see thee.' جَب تَجْبِے دیکھتی هُوں 'when I see thee.' تُمهیں خُدا کو سَونْها 'I have entrusted you to God.' قاضی نے لڑکئے کو اُسے سُپُرُد کِیا child to her.'

281. When a personal pronoun is coupled with a noun or an adjective in an oblique case, the governing particle is sufficient for both, and the pronoun is put in its Oblique form, even though the case be the Genitive or the Agent.

of me the fakīr.' مُجِهِ فقير كا 'of unlucky me.' مُجِهِ بَدْبُخُت كا 'by me the fakīr.'

This is carried so far that, as in 215, the sign of the Genitive is sometimes omitted, and we find مُجَهُ پاس and تُجُهُ پاس.

282. The particle of similitude له is added to the inflected forms خين and خيز.

'a poor fellow like me.' مُجَه سا غريب 'sensible as thee.'

With the third person we makes and in and in, see Rules 70 and 138; but when the pronoun is demonstrative, and a noun intervenes between it and the particle, the inflected form of the pronoun is used.

'he is like that merchant.' أس سُود اگر ساهي

It may also be used with the Genitive, as explained in Rule 261.

"a book like mine. ميري سي كِتاب

283. The affixes هِين هي added to the personal pronouns make them emphatic, giving to them the sense of 'same,' 'very,' 'only;' thus يبيي 'this same;' وُهِي 'that same, that very, that only.'

'I verily am Ḥātim.' حاتِم مَسِ هي هُوں 'do you yourself tell (me).' تُمبِس بتاؤ 'from that very day.' نجُبي نے 'by thee indeed.'

(Observe that the form is not تُوهى نے. See Rule 281).

whoever desires any boon 'جو کوئي جو بر چاهے سُجهي let him take it from me.'

## 284. Respectful Pronoun.

The respectful personal pronoun آپ has been incidentally explained in Rule 81. The genitive of this pronoun is کی آ, and must not be confounded with the reflexive اینا.

by your highness's favour.' آپ کي تَوَجُّه

## 285. Reflexive Pronoun.

The word آپ 'self' is used alone, or it is added to the Nominative case of the personal pronouns, مَي آپ 'I myself,' 'he himself,' etc. The Persian خود is also used in the same way.

it was discovered that it was they their very selves.' was they their very selves.' حب تک وُد ما باهمنوں کی 'until that mother of the brahmins herself comes to you.'

'she herself will come to you.' وُه خُود تیر نزدیک آویگی 'she herself will come to you.' وقتی کُمهار کے یہاں خُود به into dishes at the potter's abode.'

'he himself came.' وُه آپ هي آپ آيا آن در ا

286. تَا is also used with a personal pronoun in the Accusative.

'to make myself like a judge.' آپ کو قاضی سا بنانا a darnesh having rescued ایک درویس آپ کو دُنیا کی himself from the troubles of the world.'

But this is rare, and the form in common use is the inflected genitive اپنے with the affix . تَبِيُّر

'he said to himself.'

'he killed himself' اپنے تَبِیْں هلاك كِیا 'he should adorn himself' اپنے تَبِیْں حِلْم و بُردَباري كے

with the jewels of mercy and forbearance.'

that I might throw my- ک اینے تیس گرا دُوں self down.'

that matter which pleases ' جو بات ایّنے پر نہ پسَنْد کر ہے

not one's self.'

#### Possessive Pronouns.

287. These are supplied by the Genitive cases of the personal pronouns, أسكا , تيرا , ميرا, etc. See Rule 275.

# The Possessive Lil.

288. This is a Possessive Pronoun which is used for all three persons and both numbers. It represents the subject in the objective part of the sentence, or, in other words, it is a pronoun used with the noun governed by the verb, as the representative of the Nominative or Agent; but it cannot be employed in conjunction with the Nominative or Agent as the subject of a verb: Thus, in such a sentence as the man saw his son, the his is ambiguous in English, it may mean the man's own son or another person's son; but no such doubt can exist in Hindūstānī, because if the man's own son is intended, will be used, if another person's son, is intended, will be used, if another person's son, is intended, if will be used, if another person's son, is intended, is used because the words 'his son' are the object of the sentence, and are governed by the verb; but in the sentence 'a man and his son saw a tiger,' نه سال must be used, and not انها المعادلة المعادلة

ن بہلا درویش اپنی سَیر کا قِصَّہ ' the first darnesh began to tell the story of his (own) adventures.

'I was seated (in) my house.' مَين اَپْنے گھر بَيٿها تها take the road to your اُپْنے گھر کي راہ لو house (go home).'

'a tiger and a man saw 'ایک شیر آور ایک مرد نے their picture.'

289. But though is cannot be used in conjunction with the Nominative, it is used at the beginning of a sentence with the Nominative for its object.

'my own mind also was اَپْنا بھي مِزاج بَهَکُ گيا perverted.'

'my own servants and com-نینے نَوکر و رفیقوں نے جب panions when they saw this negligence.'

one's honour is in one's ' اَپْنَا وَقُرِ اَپْنِے هَاتِهِ مِينَ هَي own hands.'

290. اپّنا is used substantively for 'one's friends.' See Rule 254.

'he came to his own.' اپنوں کے پاس آیا

291. The Persian pronoun خُون 'self' is sometimes used instead of ایّنا.

(I) saw this circumstance نيد ماجرا بَچَشَمِ خُود ديكها (with my own eyes.'

### Relative and Correlative.

292. The Relative Pronoun is جو, and the Correlative is سو. This Sanskrit word سو displaced the old Hind word برّون, and is itself disappearing before the growing use of the Demonstrative عروبة.

293. The Relative is very similar to the Relative in Latin. It may stand at the beginning of a sentence and be followed by a correlative, expressed or understood, as 'qui capit ille facit;' or it may be preceded by an antecedent with which it will agree. But the former

is by far the most common, and most in harmony with the spirit of the language.

'what has been has been.' he who has the pot has 'جسِکی دینے تِس کی تینے the sword' (or as the French express it negatively, 'Point d'argent point de Suisse').

whatever remedy may be جو علاج هو سکے بمقّدُور کرُون possible I will to the best of my power employ.'

what they say you must 'جو یے کہیں اُس کو سے know to be right.'

the ambassadors of the ambassadors of the کی ایلچی جو آئے تھے

kings of every country who had come.'

امِسِر أُمَرا جو حاضِر تھے

'the lords and nobles who were present.'

وے جو کینارے پر تھیں

'those (flies) which were on the edge.' .

294. The Relative Pronoun sometimes has for its correlative one of the words given in the 'Philological Harp.'

جس درخت کے نیچے تُو کھڑا هَى يهار ايك آفتابه گرّاهي

'the tree under which thou art standing, herea pitcher is buried.'

295. The Relative seems to have a strong attraction for words of its own character; and so, by assimilation, a relative is often repeated instead of introducing another pronoun. This idiom will be better learned by observation than by rule.

whatever fell into the hands of any one.'

'whoever asked for any 'جو کوئي جس چيز کا سَوال 'whoever asked for any کرتا درات (Rule 334.)

'whatever thing any one's heart is desiring.'

296. The Persian & 'that' often supersedes in Hindustānī, as the word 'that' often supersedes the relative in Euglish.

ایک حَویلي که پہلے مکاں سے بہتر تبي توکیسا فقیر هي که هرگز فقر کے تینوں حرفوں سے بھي واقِف نہيں

'a mansion that was better than the former house.'

'what sort of a fakīr art thou that art not ever even acquainted with the three letters (of the word) poverty (fakr). (Rule 309.)

This & is sometimes combined with ...

this much wealth that of اتنا مال که جِس کا حِساب 'this much there is no account.'

297. In imitation of the Persian idiom,  $\leq$ , at the beginning of a sentence with a personal pronoun coming in subsequently, represents the Relative.

the source of which is not ' کِ سَرچِشَمهُ اُس کا معلوم نَہِیں known.'

there is an idol temple in ایک بُتُخانه هَي که اُسِ میں 'there is an idol temple in کئي بُت سونے کے هیں which there are several golden idols.'

about a statement like this ' أيسي بات پر كِ جَهُوتِهِ أَس the falsity of which is not proved.'

کے تمام عالم اِنکي تلاش میں ' of mhich the whole world' فی is in search.'

# Interrogative Pronouns.

298. The Interrogatives are کیا and کرن roughly represented by 'who' and 'what;' but غزن is used in all its cases, with or without a noun, for any individual person or thing, while کیا, meaning 'what,' is only coupled with a noun in the Nominative. The other cases of کیا are partitive, and are used separately.

' who is it?' کُون هَي ' who is it?' کیا هَي ' what is it?' کیا هَي ' who is this man?' پيه کُون آڏمي هَي ' what is this thing?' ' what is the reason of this?'

'what is thy religion, and what ordinance is this?'

what ordinance is this?'

what ordinance is this?'

in what various ways have

things) gone on, and what

different things has each done (how have things

gene on, and what has each person done)?'

why do they go to them?'

why do they go and stay in

the woods and mountains?'

299. The sign of the case is sometimes omitted.

'(on) what day? when?' کِس دِنِ 'on what account?'

300. کیا often signifies 'what!'—when doubled, 'how many!'—and when repeated before different nouns, 'whether.'

what a rascal!' کیا حرام زاده 'what a business this is!' په کیا بات هي 'how many wonders!' کیا کیا شجائِب 'whether in the garden or in the field.'

301. The Interrogative is used instead of the Relative in certain phrases.

'I know who he is.' مَسِين جَانَتَا هُوں كَ وَٰه كَون هَي 'I know who he is.' کیا جَانُوں كُون هو 'how should I know who you are?'

# Indefinite Pronouns.

302. The Indefinite Pronouns are فلانه 'so and so.' 'some.' کُرِی ' a certain,' and

is an importation from the Arabic, and may فلانه be briefly dismissed. It signifies 'so and so,' or 'such and such,' and it is employed, with or without a noun, to designate a person or thing which the speaker is able to name or specify distinctly.

'I asked so and so.' مَسِي نِهِ فُلانِهِ سِهِ يُوجِهَا 'I was standing in such مين فلانے ميدان مين كبترا رهتا and such a field.'

304. کری 'a certain,' 'any one,' of which the inflection is کسی and کسی. This pronoun marks individuality, and may be employed with any word denoting a distinct person or thing. Its plural is ¿s 'some,' and 'several.'

كُوِي شِكاري كِسى جَنْگُل میں چلا جاتا تھا سِوائے خُشک چمّارے اُور سخّےت لکّٰۃی کے کوئی

نہ کسہ سے سُنا تھا

رم فرماؤ

'a certain hunter was passing through a certain wood.'

'(the fox) did not get anything besides dry leather and hard wood.'

'(I) had not heard from any one.

'in the possession of any king.' کسو یادشاہ کے هاتھ grace for a few days (this) کؤی دِن غِریب خانے میں humble house.'

'several days passed.' کَنِی دِن گُذرے 'he stayed there some months' كُتُمَى مهينے وهاں رها

305. some, 'something; 'any,' 'anything;' 'somewhat,' is partitive, and relates to quantity, not to severalty. It has no inflection and no plural, so that it corresponds only to the some or any which takes a singular noun.

'bring some water.' 'give me some bread.' مُجَهِي كَتِي دو he (is) gone there on some کی ضروری کام کے واسطے وهاں pressing business.'

أگركوّا كَيُّهُ احْبُي حِيز كَهَانِهُ 'if the crow found something good to eat.'

لا الله الله الله الله الله الله كُوْبِهُ الله الله كُوْبِهُ الله كُوبُهُ الله كُوبُ الله كُوبُ الله كُوبُهُ الله كُوبُهُ الله كُوبُ الله كُوبُهُ الله كُوبُهُ الله كُوبُ كُوبُ لِلهُ كُوبُ الله كُوبُ الله كُوبُ الله كُوبُ للله كُوبُ للله كُوبُ كُوبُ للله كُوبُ للله كُوبُ للله كُوبُ كُوبُ لللهُ كُوبُ لللهُ كُوبُ لِلْ لَاللّهُ لللهُ كُوبُ لِللّهُ كُوبُ لِللّهُ لللهُ كُوبُ لِلْلِهُ لِلْلِهُ لَاللّهُ لِلْلّهُ لَاللّهُ لَال inore than a gaz long. برتے slie is somewhat better نیہ کُتے سے کی بہتر کی

more than a gaz long.' than the dog.'

306. The word is sometimes found in connexion with a plural, but this use of it is rare and exceptional. In such phrases and be separated from the noun and translated by 'somewhat,' 'at all,' 'a little,' or similar expressions. In the Ikhnānu-s Sofā we have

'tell him to say something.' اِسّے کہو گئے، باتیں کرے

(Bāteh-karnā is preferred to bāt-karna as a compound verb, and is so used here.)

let him tell a little (of) his 'کُچھ اَپّنا احْوال بَیاں کرے his own affairs.'

In the Bagh-o-Bahar we read:

'purchase articles of jewelry کُچُه رقم جواهِر کے مول لے to some extent.'

having given several pieces کُنِّي تهاں اور کَچُه شَیْف دیکر of cloth and curiosities to some amount.

In the Akhlāk-i Hindī:

کھُھ کھانے پینے کي چِيزيں اِس اطراف میں نہیں ملِتیں

چوں کی کچھ ھڏيان درخت کے نيجے آورکچھ گِدھ کے کهُندھلے میں پائیں 'things for eating and drinking are not to be found at all in these parts.'

'the young one's bones were found, some under the tree, some in the vulture's hollow.'

In the Gul-i Bakānalī:

'the days passed for awhile.'

In these examples the idea conveyed is that of quantity, not number. Other examples might be given, but it may be doubted if sever really agrees with the plural. If such use of it is admissible, it is very uncommon and certainly inelegant.

307. is particularly used in negative sentences with the sense 'at all.'

in this there is no fault at' اِس میں میري تقْصِیر کُچُه نَهِیں 'all of mine.'

all of mine.' 'it is of no consequence.' کُچُه مُضَایقَدَ نَهِیں 'there is no doubt at all مِس مَیں کُچُه شَکّ نہِیں about this.'

### SUBSTANTIVE VERB.

308. The word 'was' is used more loosely in English than the equivalent \( \vec{\varphi} \) in Hindūstānī. When 'was' relates to something definitely past, \( \vec{\varphi} \) is the right word; when it refers to something which came to pass,

is its correct representative; and when it relates to something that continued or went on, هي is used. So whenever 'became' can be substituted for 'was,' هُوا 'must be used; when 'stayed' or 'remained' can be employed, هي is the word; but when 'was' expresses the meaning more accurately than either of them, اتباء is correct; thus

ایک آڈمی تھا جو میرا رفیق هُوا اور میرے ساتھ تِین مہینے رہا آ اُ اُ اُ

أيساً هُوا

جو قِسْمت میں تھا سو ھُوا

هوش جو تها وُه بھي گُم هوا

مال سے بھی حاضر تھا اُس کی خوشی یوں ھی ھُوئی

حَيران رها كه وقت ضايع هُوا

اِتّنے دِن جو تُو هم سے جُذا رها اِس میں تیرا هي نُقّصان هُوا

'there was a man who was my companion, and was with me three months.'

'it was so, it so happened.'
'what was in (your) fate has
come to pass.'

'the sense which there was, that also was lost.'

'I was ready also with my money, but such as this was her pleasure.'

'he was annoyed that the time was lost.'

'these days that thou hast been separated from me, during this (time) there

has been only thine own loss.'

'her going was deferred.' أس كا جانا مَوقُوف رها

<sup>1</sup> This is a made up sentence; the others are quotations.

The difference in the two languages in this respect comes out most conspicuously in the Past Tense, but the same difference is observable in the Present and Future tenses.

309. The substantive verb is often understood, especially with the negative نَبِين, which seems to have the verb inherent in it.

" what news is there to-day?' آج کیا خبر 'what news is there to-day?' 'a hundred wise heads (are of) one opinion.'

the washerman's dog is 'دُهوبي كَا كُتَّا نَهُ كُهُ كَا نَهُ كَهَاتُ 'neither of the house nor of the ghāt,' i.e. it belongs to neither.

there is none with me, 'i.e. آمير پاس کنچه نهيي 'there is none with me, 'i.e.

it is no fault of the science.' عِلْم كَا نُقْص نَهِينِ 'it is no fault of the science.' اگر آذمي مين رحم نَهِين تو he is not human.' نُهِين 'there is no fear (there is

nothing to mind).'

#### THE VERB.

310. Active verbs govern an accusative case; as
'he was reading the letter.'

Neuter verbs do not generally take an accusative;

but some are found with an accusative of kindred meaning; as

he said this word.' يبه بات بولا 'he said this word.' 'he speaks our language.' 'we also have fought 'word.'

# Infinitive.

311. The Infinitive is one of the most useful forms in the language. It is used in three ways, as an Infinitive, as a Verbal Noun, and as an Imperative: but it is often difficult to distinguish between its functions as the Infinitive and the Verbal Noun.

312. As an Infinitive.

'whatever was to be, the same has been.'

'but it was indeed to be so.'

'there are many things for میں بہات کام کرنے

thee to do.'

313. As an Infinitive it is frequently governed by another verb, and appears in its inflected form.

he began to speak.' وَهُ بُولِنِهِ لِكَا لِمُ اللَّهِ لِكَا اللَّهِ اللَّهُ اللَّا اللَّهُ اللَّهُ اللَّا اللَّهُ اللَّهُ اللَّهُ الل

'how! hast thou come to me کیوں اپننی جان دینے میرے to offer thy life?'

# Infinitive and Verbal Noun.

314. In phrases like the following, the Infinitive may be read either as an Infinitive or Verbal Noun.

it will be for you to go there, تُم کو بھاں جانا ھوگا or, the going there will be for you, i.e. you must go.' تُم كو جريمانه دينا يڙيگا 'you will have to pay a fine (the paying of a fine will fall upon you).'

'after all there is a day to 'آخِر ایک روز مرّنا هَي آور die and to leave everything,'

or, 'there is a day for dying and leaving everything.'

باڈشاهوں کي طرح سے جانا آور پهرنا مُناسِب نَهيں

'to go out and move about in the style of kings is not suitable,' or, 'going out and moving about, etc.' one will have to make the

سعر آخِرت کا بے سامان کڑنا

journey to the next world without provision.'

This has been likened to the Latin Gerund, but there seems no necessity for this refinement.

315. As the Verbal Noun, it is declinable like an Adjective in \; for it has a feminine form, but no plural. Thus Masculine Nominative بولنا: Inflection بولناي: Feminine بولناي. It has all the cases of the Noun, and is governed in the same way.

### Nominative.

أس سے مرّنا بھلا هي 'dying (or, to die) is better than this.'

may your departure be آپ کا جانا مُبارک هو auspicious!'

from what country has 'from coming been?' (i.e. have you come).

every action has its recomevery action has its recompense, which in its time will come to view.'

### Dative.

give me a morsel to eat ایک تُکْرًا کھانے کو دو (or, for eating).'

the king has forbidden باڈشاہ نے حُنُّور میں آنے کو (any one) to come into his presence.

The sign 3 is sometimes omitted.

he has come to represent 'کجُه عرَّض کرَّنے آیا something.' It is difficult to distinguish this from the simple Infinitive; in fact, the Dative form may always be rendered as an Infinitive.

## Genitive.

in me the strength of کہنے کی in me the strength of telling nor in thee the power of hearing.

for the purpose of break- نگریاں توڑنے کے واسطے ing sticks.'

The following are instances of a somewhat peculiar use of the Genitive, which has been likened to the Latin Participle in *turus*.

this cannot be (lit. this is not for being).'

'I will not heed, or, I am not for heeding.'

'I will not go to Persia (lit. اب مَيں شَجَم نَہِيں جانے کا I am not for going).'

'I will spare neither life کرنے کا nor wealth.'

It should be observed that this form of expression is always negative.

### Ablative.

'from the hearing of this.' اِس کِے سُنّے سے 'from meeting him.' اُس کے مِلنے سے 'from their coming and staying.' اُن کے آنے ورهنے سے

### Locative.

'in speaking of these matters.' إن باتوں كے كہنے ميں 'in speaking of these matters.' وُد مرّنے پر هَي point of) dying.' وَد مرّنے پر هَي بات نہ سُنّے on not listening to the ميں talk of slanderers.'

316. As a verbal noun the Infinitive is frequently used to form compounds, like 'fox-hunting,' 'speech-making.' It then agrees with the noun to which it is joined in gender and number.

317. Compounds are occasionally found in which the words do not agree. In these the Verb is a real Infinitive, not a verbal noun.

'to be idle at work-time.' کام کے وقت سُسْتی لانا 'to labour much for this کُنیا کے واسطے بَہائت مِحَنت world is to run after کُرْنا زِیادہ دَوَّزْنا هَي نا چِیز nothing.'

318. The Infinitive is used as an Imperative, and as such it generally takes the negative  $\lambda$ , but is sometimes found.

'remember.' یاد کرنا 'remember.' باد کرنا 'what they say, know thou that to be true?' میں مُلکٹ میں نہ رہنا 'don't stay in my country.'

319. This use of the Infinitive as an Imperative is especially found in recording a command or prohibition, much as it is in English.

### Aorist.

320. This tense is a Subjunctive or Conditional relating to present or future time; the same office for past time is discharged by the Indefinite tense, see Rule 333.

It is generally preceded by جو, اگر, or some similar word, and may be translated by 'may,' 'might,' 'would,' 'could,' 'should.'

> 'please God!' ine should know for certain, one should be sure.'

'if the judge should say.' 'if thou wilt be my companion.' جو تُو ميرا رفيق هو 'if thou wilt be my companion.' قَصَد كِياك أس راه سے چلوں

'(I) formed the resolution that

خُدا کرے باڈشاہ کی مرضی آوے جو رُوبرُو بُلاوے

I would go by that road.' 'God grant it may come (into) the king's pleasure that he should call (you) to his

presence.' 'if they would leave it to nature the patient would

اگر طبیعت پر چهور دیویں تو بیمار کو شفا هووے get well.' (Rule 226.)

321. The Aorist is often used in colloquial and proverbial expressions, as a vague sort of Present Tense.

> ن د کئیں 'I perceive.' "what does he see?" 'then he sees.' 'how should I know?' کیا جانوں 'God knows.' خدا حاند

one commits the crime, an- گناہ کوئی کرے سزاکڑی پاوے other gets the punishment." if one's head is cut off, then

if the blind woman grinds, the 'if the blind woman grinds, the dog will eat: the wealth of dog will eat: the wealth of the wicked goes for nought.'

322. The Aorist is sometimes found with the Present Auxiliary added to it.

> I am opening, or, I am going to open.' 'I am going to make manifest.'

it is cut off.'

323. The Aorist is also used as a substitute for the Future.

'speak then I will listen.' I will show such perfection ' مَسِي أَيِسا كَمَالِ ظَاهِر كُونِ كَ اِس بیجان کودُعاسے جائدار that by (my) prayers I will make this lifeless thing living.'

### Future.

324. This simple tense requires no explanation. It is used just as in English, even to being employed politely for the Imperative.

'in the end I shall die, then آخِر مرِ جازُنگا تب خُدا کو what answer shall I give to God?'

you will give me a book, sir!'

## Imperative.

325. The Imperative and the Aorist are distinguishable only in the second person singular; the context determines which is intended, and sometimes either is appropriate.

riate.

أ مير ياس أ come to me.'

أ د هر آؤ 'come hither.'

أ د الله الله الله أو الل

326. The Negative نبين is not used with the Imperative; is used with any person; 'don't,' which belongs especially to the second person singular, is often used with the second person plural, and even with the Respectful form.

أيسا نه كر 'don't do so.' أيسا مت كر 'do not hurry.' جلدي مت كر 'don't speak.' مت بولو 'don't forget.'

327. The Imperative and the Aorist are so intimately connected that where one clause of a sentence is Imperative, the other also may take the Imperative form instead of the Aorist.

whatever you may think جو مناسِب جان سو کر right so that do.' whilst thou formest some 'جب تَیں تو پار چلّنے کي plan for crossing over.'

# Respectful Forms.

328. The Respectful form of the Imperative is very commonly used; it serves the purpose of our 'please,'

'please to sit down.'

ریتیے

'pray forgive me.'

'pray do not forget.'

'pray do not forget.'

'never interfere in my business.'

'place no reliance on their کریٹے

friendship.'

329. The Respectful Future is not often used.

and if you will please to أور جو يُوں كَهِينْجِيبُيًّا pull so.'

will you then deliver these ' اِنكُو أَنْهِين كِي حُوالِي كِيجِيتُكَا over to them?

330. The Respectful Imperative is also used, like oportet or il faut, with a sense of obligation, and may be translated ought, should, or must, and in this sense it is not confined to the third person.

from this one ought to اس سے دریائت کیجیے learn.

اس جنگل میں رهِیے آور 'we must stay in this wood 'and keep watch.' منگهیں دروازے کی طرف لگ لگ

رهی تهیں کہ دیکھیے کیا ظاهِر هوتا هي

the door (and I said = ki) I must see what is going to be revealed.'

some such plan must be کُچُہ آیسی تَدْبِیر کِیا چاهِیے devised.'

331. It is also used as a Respectful Aorist, and in this sense it has a Plural , 2.

if you will please to make 'اگر اِس حقیقت سے مُطّلِع

(me) acquainted with this fact.'

'if one should ask a villager' اگرایک گنوار سے پُوچھیے whom one should send کے وہاں اُس کو بھیجیئے there.'

whatever praise one may ُ جِتَّني تَعرِيف كِيجِيب سوبجا

make (whatever praise we give it), it is appropriate,'

(it is unseemly that kings) کُمِّم قَتْل کا فرماییس اور تمام should give the order for execution, and should forget the service of a whole life.'

what are the qualities which کُون سي خصّلتيں هَيں کہ قاصِد " are required in an envoy?"

332. خاهنا 'one should wish,' the respectful form of جاهنا, is in very common use. When it is used in reference to any particular person, it comes at the beginning of the sentence, and is followed at the end by a verb in the Aorist, the construction being similar to that of the French il faut. Or it may be preceded by a Dative of the person, and be followed by the Aorist.

چاہئے کہ قاصِد فاضِل ہو چاہئے اِنسان بلائے ناگہانی میں صبر کرے

مڑد کو چاہِیْے جو کہے سو کرے ہرکسی کو چاہِیٔے اَپْنا کام کرے شرطیں جو چاہِییں

چه چیزیں مرد کو نہ چاهییں

جهُوتهي باتين كرني د چاهِيين

it is necessary that the messenger should be honest.'

'it behoves man that he should be patient under an unexpected calamity.'

'it behoves a man to do what he says.'

'it is right that every person should do his own work.'

'the conditions which are required.'

'six things do not behove a man.'

'telling lies is improper.'

333. When employed in a maxim or remark of general application, comes at the end of the sentence, and is preceded by a Past Participle uninflected. (See Rule 126.)

one ought to learn good ' ادب سِیکها چاهِیئے manners.'

one might call it a storm آنْدُهي کہا چاهِيئے (or, it might be called).'

one should hearken to the دوستوں کی بات مانا چاهیئے

'one ought not to despair.' نا أُمّيد نه مُوا چاهِيئے 'one ought to consider the 'جان کی مُعافظت هر ایک preservation of life (as) paramount to everything.'

The Infinitive is sometimes used instead of the Past Participle.

# Indefinite.

334. This consists of the Present Participle, but it is especially used in respect of time past. It is a Past Conditional, and as such is often preceded by جو اگر و الله و الله

<sup>1</sup> In this example, as in many similar ones, the speaker carries herself back to the time of which she is speaking, and so properly uses the Aorist for what was to follow. (See Rules 320 and 382.)

کاشکے تیرے بڈلے خُدا اندھا بیتا دیتا

اگر أس وقت زمين پهاٿے تو ميں سما جاؤں

جب کُتے کودیکہ ہے ایک کِرْدا اُس کے آگے پھینٹک دیتے

وُہ تاجِر دربار کے وقت حاضہ رہتا

رهتا كوئي پتهرسے مارّتا ليكِن يبِه أس جگه سے نہ سركّتا 'would that instead of thee God had given (me) a blind son.'

'if at that time the earth had opened I would have gone into it.'

'when they used to see the dog they used to throw down a loaf before him.'

'that merchantused to attend at the time of darbar.'

one would hit him with a stone, but still he would not move from that place.'

In the following passage we have both the Conditional and Habitual.

جب جُواري جيئتا تو آيسا غافِل هو جاتاك كوئي أسكے كَنْرِّے أتار ليتا تَو بهي أسے معلوم نہ هوتا when the gambler used to win, then he used to become so heedless that if anyonetookoffhis clothes,

even then it would not be known to him.'

335. The Indefinite must not be regarded as a Present tense; but still it is sometimes used for a vague sort of Present. When apparently used as a Present, the auxiliary may be regarded as understood.

'what is he doing?' وُه کیا کرّتا (what is he doing?' عِشْق ومُشْکُ نہِیں چھِپّتا (love and musk (are) not concealed).'

## Present Tense.

336. This answers to all the forms of the English Present: 'I speak,' 'I am speaking,' and 'I do speak.'

'what does he see?' کیا دیکپتا هَی 'showers and fruits are blooming and ripening.' جنڙياں لگت جاتيں هَيں 'showers keep falling.' 'cups all night long are clinking.' 'hundreds of fairy-faced هَينگر جهُولِتياں گئروں پريپَيکر جهُولِتياں (girls) are swinging.'

337. When two present tenses are connected by a Conjunction, it is unnecessary to repeat the auxiliary.

'from whence it comes and whither it goes.'

'sheneither moves nor stirs.' وُه نه هِلْتي هَي نه ذُلْتي

338. The Present Tense is used like the Historical Present in English to give point and life to a narrative and make it more vivid.

ن دیگها که سب کا لِباس سِیاه هَي (I) saw that all their garments are black, and that every moment there is lamentation.' 339. The Present Tense is also used for an Immediate Future like the English, 'I am going into the country,' he is coming to-morrow.'

'I am coming back soon.' جلّد پھر آتا ھُوں 'now I will so imprison him.' اب مَیں اِسے اَیسا قید کرّتا ھُوں 'if you will take me into the presence.' نہیں تو میں اَپْنے تَبِینَ اَبْعِی 'if not I will kill myself نہیں تو میں اَپْنے تَبِینَ اَبْعِی immediately.'

## Imperfect.

340. This corresponds exactly with the English Imperfect.

'they were not going out.' یے باہر نے نکلتے تھے

# Past, Perfect, and Pluperfect Tenses.

341. The use of the Agent case with Active Verbs has been explained (193). In other respects these tenses are used as in English, only that the Pluperfect is more consistently and regularly used for an anterior action than the same tense is in English.

the cat had come in, I had بلّي آئي تهي مَس نے اُس کو felt her, she was wet.'

Here the two 'hads' are superfluous in English.

342. The Past Tense is sometimes used with 181 instead of the Aorist.

'if the princess is displeased.' گر پاڈشاہزادی ناخوش کھوئی کہ فرقی 'if in the course of one year 'اگر ایک سال کے عرصے میں his statement becomes true.' اُس کا سُخن راست مُوا 'if I become a sacrifice for

him I am (sacrificed),'

343. A Perfect is occasionally met with formed thus: مُورَ عَلَى 'he has seized;' كُرْتُ هَي 'he has made.' This last example shows that it is not the Plural Past Participle that is used, but rather the Past Conjunctive, so that the full meaning of the above examples is 'having seized, he is,' and 'having done, he is.' This also explains why the Nominative is used with it, not the Agent.

'the snake has caught a frog: ایک مینّدک کو سانّپ پکڑے ھی

پکڙے هَي (my) heart is burnt with the آتشِ عِشْق سِے جلے هَي دِل (fire of love.'

the dragon who has opened 'ازدها جو مُنه پسارے هي his mouth.'

now it has made the leaf of گہہ کرنے کھی برگئے گُل مرکب the rose its chariot.'1

### The Additional Tenses.

344. The following examples of the 'Additional tenses' show how they are used.

where the snake may be جہاں سائٹ رمنتا ھو staying.'

although it may have an 'although an identity in (of) kind.'

رب سو 'what will he be saying in his 'وُه اَپْنے جي ميں کيا کہتا 'mind?'

thousands of such poor people ' أيسے غريب هزاروں تُمهارے will be coming and going in ملکوں میں آتے جاتے your dominions.'

what may have been written و لكنا هو in (one's) destiny.'

(if) any one may have seen کِسی نے اُسے دیکھا ھو him.

he must be seated somewhere ' یہاں کہیں بَیتِها هوگا here.

you must have heard this آپ نے یہ خبر سُنی هوگی news, sir.'

thou mightest have been ' تُو ناحقٌ مارا گيا هوتا wrongfully slain.'

'would that I had seen him.' کاشکے میں نے اس کو دیکھا

# Present and Past Participles.

345. The Present Participle is used as the Indefinite tense, and the Past Participle as the Preterite. also used as Participles connected with and qualifying the Nominative Case; in this capacity they are generally ف لكيتا هُوا 'as;' هُوا but not invariably followed by 'spoken.' بولا هُوا 'spoken.'

'he giving blessingswent away.' وُه دُعا ديتا هُوا حلا گيا the hawk was flying about ' بازشِكاركرْتا هُوا أَرْتا يهرَّتا تها hunting.

' before him grains were lying ' اُس کے سامہنے دانے پڑے

هوے هَيں sometimes laughing, some- کبھي هنستا کبھي روتا اپنے times weeping, he (was) passing away his days.'

'gazing at them and surveying أن كو ديكهتا بهالتا أور سير them I went onward.' آور بَیتھا دیکھا کر ہے

'and seated (sitting still) should keep looking on.'

346. Instead of agreeing with the Nominative, as in the examples of the last Rule, they may be used in the inflected form masculine, some particle being understood.

'he going along the road' وُه راه میں چلتے هُوئے 'he going approached' قرتے قرتے میں پاس گیا (he) saw (some one) coming اینے سامینے آتے دیکھا in front of him.'

(girls) wearing garments) رنّگ برنّگ کي پوشاکيس of various colours.'

This construction is used in many useful phrases.

وں دِیئے 'during the day.' دِن دِیئے 'onits becoming morning, at day break.' مُبْمَ هوتے وقت 'at the time of giving.'

'at the time of beginning.' شُرُوع کرتے وقّت 'pending my stay.' میرے رہتے 'limping (and) stumbling.' گرتے پڑتے 'there being means.'

'being (possessed) of hands and feet.'

347. The Present Participle governs the same case as its verb.

' seeing him.' أس كو ديكيَّتا ' seeing him.' ' cutting (through) the mountains.'

348. The Past Participle is used participially in a neuter or passive sense.

'and seated should look on' اور بَيتْهَا ديكها كرے 'I am come being commis' سانّپ كا بهيجا هُوا آيا هُوں sioned of the snake."

hung in a certain tree.' کِسی درخّت میں لقکا هُوا 'hung in a certain tree.' اگر ایک هاتهی زنجیر تُوائے broken should be coming.'

It is also used adjectively, as in Rule 350.

The Conjunctive Participle serves as the Active Past Participle.

349. When the participles are used with an accusative, they sometimes agree with it and sometimes are undeclined.

having seen (his) son dead. بیتے کو مُوا دیکھکر 'if not, consider me (as already) نہیں تو مُجھے پُہنچا متناوط' arrived.' اُسے هتھیار باندھے هُوئے 'having seen him armed and enter-

having seen him armed and entering the palace (entering the
palace armed).'

350. Both the Present and Past Participles are used adjectively; غُوا is then generally combined with them, but it is sometimes omitted.

'a talking mainā (bird).'
'of that sleeping young man.'
'of that sleeping young man.'
'a written paper.'
'the bones of a dead tiger.'
'aflowery and fruitful garden.'
'if they would reflect on those
'facts committed to memory.'

# Present and Past Participles.

351. Both the Present and Past Participles are used

occasionally as verbal nouns (but see Rules 311, 314, 315).

'i and the pen in moving.' أور قلم چلتے ميں 'to a drowning man the support of 'to a straw is a great deal.' a straw is a great deal.' 'he awoke me from sleeping.' 'he does not heed my word.' ايک دفع کے سمجھے 'one should not be deluded by an opinion (formed) upon one occasion.'

352. The inflected past participles کے , پُوچہے , پُوچہے , میں and some others have a passive signification when preceded by بن , بغیر , بے and negative prefixes, thus—

without being told.' بغیر پُرچهے 'without being asked.'
without being understood.'
without being stricken.'

without being stricken.'

without being called.

that thou shouldst go without کے تو بے بُلائے جاوے being called, and talk without being asked.'

who without my permission art 'کہ بے میرے کہے میرے ' who without my permission art ' کا بنا کہاتا کی ' eating food with me.'

# Conjunctive Participle.

353. This Participle obviates the necessity of employing a conjunction; for instead of saying, 'he came and said,' the Hindustani employs this Participle, and the construction is 'he having come, said.'

ن دانِشَمنْد شَرْمِنْده هو کے بھِر 'the learned man having become ashamed came back.'

مارت دِل میں تَهرا کر مِیر 'having settled this matter in فیمارت کو بُلُواکر حُکم کِیا his heart, having sent for

the architect, he gave the command.'

having taken the nurse with دائي ساتھ لِيئے ميرے her she came to my room.' مکان مبن آئي 'a watch of the night having gone.' (Rule 106.)

354. When the Conjunctive Participle of a Neuter Verb is used, the sentence is generally governed by the Verb, not by the Conjunctive Participle. But if the Participle belongs to an Active Verb, the Participle is the governing word.

### Neuter.

having gone, buy it from ' أور دُوكان سے جاكر خرِيد كر some other shop.' 'having sat down together,

let us engage in eating and drinking a little.'

'a person went to a wise ایک شخص کِسی دانا سے man and asked.'

## Active.

when thou didst come to ' تو جب أس سے قول قرار بھر me, having made promise of returning.'

if having taken a little 'if from hence, I sell it at the market.'1

having put on another ' دُوسْرِي پوشاک يهن كر آيا dress he came.'

355. The Conjunctive Participle and the Verb may each have its respective object.

having sold this, bring from ' شہر میں سے اس کو بینچ لاؤ the city.'

having sold the jewel, he أس گوهر كو بيني كر اس كي brought its price.'
نام deeming faithlessness in-

famous, he chose death.'

356. When the sentence is negative, the negative is generally prefixed to the Verb, not to the Participle.

having put out the house-lamp, I have not come, i.e. I have come without putting it out.'

<sup>1</sup> Though le-jana is neuter, it governs an Accusative.

having called out do not speak, (i.e. do کر و آواز سُنکر مت بول کر فره آواز سُنکر مدت بول مد اور سُنکر مدت بول مد اور سُنکر مدت اور سُنکر a voice, should come here.' خبردارغُلام کواپنی 'beware! do not take your slave along with you.' تاکوئي سُرنگت لگاکر and get there.'

# Adverbial Participle.

357. This is the Present Participle inflected, with the particle هي added, which gives to it the sense of 'upon,' immediately upon,' and sometimes 'whilst.' It answers the purpose of our phrase 'as soon as.'

on its becoming morning, as soon as it was day.'

' immediately on seeing him.' أسے ديكہتے هي 'directly on the hearing of this story.' إس قِصّے كے سُنتے هي See Rule 355.

'upon going, whilst he was going.'

# Noun of Agency.

358. This, in addition to being the verbal agent, as يَرْهن والا 'a reader,' is also used as a substitute for an active future participle, as آنے والا 'one who is about to come,' هونے هارا م هونے والا 'one who is about to be;' this latter is shortened into

### Passive Verbs.

359. The Passive voice is of rare occurrence, and it has been argued that there is no real Passive in the language. But passages in which it occurs are to be found in all writers, and some few forms, such as 'he was killed,' are of constant occurrence. Though the occasional use of it is undoubted, foreigners will do well to avoid it; and it is easy to do so by using neuter or nominal verbs. Official documents written under English influence resort to the Passive form much more freely than writings of pure native origin. 1

'they are not recognized.' پہچانے نہیں جاتے 'such a reason was found.'

like to see it).'

¹ The seven examples are taken, in order, from the Bāgh-o-Bahār, Totā Kahānī, Khirad Afroz, Ikhwānu-s, Ṣufā, Akhlāķ-i Hindī Ārā'ish-i Mahfil and Gul-i Bakāwalī.

### Causal Verbs.

360. All Causal verbs are necessarily Active, and require the case of the Agent. They govern two Accusatives: that of the person is represented by the Dative; that of the thing by the Nominative. See 219.

' أن كو ناشتا كروايا ' he made them take breakfast.'

## Compound Verbs.

361. In all compound verbs, the second, or conjugated verb, determines the syntactical construction; if that is neuter the whole compound is neuter; if active the whole is active. Thus کیا جانا 'to eat,' is active, but کیا جانا 'to take,' is active, but لینا 'to bring,' is neuter.

But there is one remarkable exception to this rule in the compound دِکِائِی دینا 'to appear.'

but a jogi appeared.' پرایک جوگی دِکهائی دِیا

### Nominals.

- 362. These Compounds may be either neuter or active, according as they are formed with verbs like دونا and المنا or كرنا or آنا .
- 363. The bond of union sits very lightly on Nominal Verbs. Sometimes the whole compound is treated as a

Verb; but as frequently the union is dissolved, and the noun and verb are dealt with as independent words.

364. Neuter Nominals are dealt with as simple verbs. They agree with the Nominative case, and when formed with a declinable Adjective the Adjective also agrees. See Rule 255.

'he took leave' وُهُ رُخْصت هُوا 'he took leave' اگریہ میرے رُوبرُو ترِّبیَت if he shall not be educated in نه هوگا iny presence.'

these words do not please.' نے باتیں پسند نہیں آتیں 'these words do not please.' 'I also remembered the mazīr's statement (lit. to me also the mazīr's statement came to remembrance).'

'when the edifice was approved.' جب عِمارت پسنْد پڙي 'these seven girls were standing.' يے ساتوں لڙکياں کهڙيں

365. But Nominals formed with the verbs الكَنَا, etc., frequently disintegrate, and the verb agrees with its own noun.

they remembered (to them memory came).'

'they were certain.' أُس كو يقِين آيا 'I am sorry for you.' مُجه كوتُجه پر افسوس آتا هي 'fire kindled in my stomach.' پیٹ میں آگ لگی so that on occasion it becomes

366. Active Nominals require the Agent with the Past Tenses like simple Active Verbs, and have the same regimen; but when they have no Accusative the compound disintegrates and the verb agrees with its own noun.

'he represented.' اُس نے عرض کی 'he did not observe the villany.' شرارت پر نظر نہ کی

367. Active Nominals may, like simple verbs, govern an Accusative case; but more frequently the compound is broken up, the verb takes its own noun for its object, and the latter governs the Genitive or other appropriate case.

'he dismissed the demon.' for this reason I have told the 'کُبُوتَرِ کَا قِصِّہ مَیں نے اِس story of the pigeon.'

I brought you up for this میں نے تُجھے اِس واسطے 'I brought you up for this purpose.'

'no one taught us these arts.' یے هُنر همکو کِسی نے

تعلِیم نہیں کئے
(I was) remembering the countenance of that moon-faced one.'

<sup>1</sup> This rule is reasonable, but كيا is frequently met with.

the king praised it' (lit. made ' باڈشاد نے اُس کی تعریف the eulogy of it).

the eulogy of it).

of whom art thou making " تُوكِس كَا فِكْر كُرِتَا هَي mention?"

(I) gave thanks to God.' شُكْر خُدا كا كِيا

'what (will be) gained by investigation of this matter?'

'never interfere in my business.' ہمارے کام میں ہڑگنر دَخُل نہ کِیجیئو

ایک بهاری خِلعت کو (I) gave the eunuch a valuable خوجے کو عِنایت کی (lit. heavy) robe.'

'I introduced him into (my) أس كو مُصاحبَت ميں society.'

368. Active Nominals formed with Adjectives remain intact: they generally govern the Dative form of the Accusative, and the Adjective is uninflected. See Rule 255.

(I have) accepted your statement.'

'God softened the heart of that 'خدا نے اُس سنگدِل stony-hearted one.'

if they should understand the 'أگر حَيوانات كے احوال facts and the uses of the animals.'

### Potentials and Completives.

(Formed of a Root with سكنا and چُكنا . Rules 121, 122.)

369. There is nothing peculiar in the use of these verbs; both and are neuter, so the compounds follow the neuter construction. The perfect of the completive verb differs but little from an ordinary perfect.

The Future of this compound serves also as a Future Perfect.

he will finish writing,' or 'he will have finished writing.'

### 370. Continuatives.

(Formed of a Present Participle, followed by جانا or Rule 123.)

'your wealth was entirely تُمهارے هاتیہ سے مال جاتا رها lost.'

care will depart from his ' فِكْردِل سِے أُس كے جاتي رهيگي heart.'

# 371. Frequentatives and Desideratives.

(Formed of a Past Participle with كرنا and چاڭنا and كرنا Rules 126, 127.)

The Desiderative expresses the wish to do a thing, and also the intention of doing something immediately.

"I am about to make a journey. مَسِ سفر كِيا چامَّتا مُوں

372. Inceptive, Permissive, and Acquisitive verbs formed from an inflected infinitive, followed by لئا and يانا . Rules 132, 133, 134.

if you will allow me to go for اگر تُو مُجہے اِس باغ میں a walk in this garden then (it will be) better.'

'no one could get to see me.' ن مجیے کرئی دیگہنے باتا تیا

is not unfrequently placed at the beginning of a sentence, and the Infinitive at the end.

and having looked again and ' أور لكا أس كا مُنْه ديكه ديكه again at his face, being disturbed (in mind) he began to weep.'

### PREPOSITIONS.

373. The words given in Rule 155, which are used as substitutes for prepositions, often dispense with the genitive sign, as:

إس پاس 'near this.' إس پاس واسطے 'for what reason, why?'

374. They generally follow the genitive they govern, but they are frequently placed before it without affecting

their meaning. There is one exception: ساتبه, when it precedes the Genitive, means 'for all,' 'besides;' and when it follows, signifies 'along with,' 'in company.'

فا مناه عَمْر مِحْنت كِهِ 'besides that, life will pass with labour.'

with labour.'

'for all that he himself is

375. It has been stated in Rule 157 that some of the words used with the power of prepositions take & when they precede the noun and & when they follow it. These words are all feminine, but throw off their proper gender when they are placed before the noun. Dr. Gilchrist attributed this to mistake. Forbes very properly rejects such a supposition, but makes no attempt to account for this grammatical anomaly, resting satisfied with saying that it is the usage of the language. It may perhaps be explained by the fact that the words which are commonly placed before the Genitive (viz. mu'āfik, sinā'e, sāth, baghair, etc.) are all masculine; and so being required by the great majority of the words in that position, it has arbitrarily or without consideration been extended to others. With the exceptions of and the words in the list are very rarely placed before the noun; one or two instances of each are all that have been met with, and these are not sufficient to warrant 'like the deer, and hare, and wild ass, etc.' حِمَارِ وحَشِي وغَيَره کے wild ass, etc.' (they) are like physicians and astrologers.'

### ADVERBS.

376. جب تك , جب تك, meaning 'until,' generally take the Aorist, which commonly has a negative with it, but sometimes not.

'until he becomes a young man.' جب تلك جوان نه هو

<sup>1</sup> I have noted only one exception.

نسبن نسبن 'until I give you intelligence.'

خبر نه دُوں

خبر نه دُوں

'until some loss happens to him

'until some loss happens to him

he will not know my value.'

میری قدر نه جانیگا

'until his breath departs (he dies)

خب تلک اُس کا دم

نبیں بِکلتا دم نبیں

breath.'

until you bring that young man 'جب تک تُواُس جَوان with you.' کو ساتھ لیکر آوے 'whilst thou art drawing.'

377. جو, which is a pronoun meaning 'who' or 'which,' is also an adverb signifying 'if,' 'when,' 'since,' and sometimes 'that.' When followed by the correlative من it must be a pronoun; but when وه it is the correlative, it is an adverb.

if you will be my companion then I will go.'

خون میرا رفیق هو تو میں panion then I will go.'

do thou bark a little that the master of the house may awake.'

378. اگر, 'if,' is generally followed by the correlative . It governs either the Aorist, the Indefinite, or one of the Past Conditionals, but it is occasionally found with the Past tense or Future tense.

'if you give the order.' اگر حُکم کرو' 'if this secret is disclosed.' اگر یه راز فاش هُوا 'if thou wilt not come now.' اگرتُو اِس وقّت نہیں آویگا

379. هي is an emphatic particle, meaning 'very,' 'even,' 'only,' etc.

'so very expert.' أيسا هي كار كرده 'so very expert.' 'ever so great.' أيسا هي بڙا 'this only wonder did (I) see.' أيمني عُجُوب ديكها 'in only one assault.'

### CONJUNCTIONS.

إنسان

381. The word  $\leq$  as a Conjunction signifies 'that.' It is also used for 'or,' 'than,' and 'for.'

it is probable that (your) health 'it is probable that (your) health will be restored.'

'until that one day she said.' یہاں تلک کِ ایک روز بولی 'it is incumbent on man that 'آڈمی کو چاھئے۔ کِ he fail not in justice.'

have you studied the science 'تُم نے کیجُھ عِلْم منظِق کا 'have you studied the science 'پی سیکھا ھی کِ نہیں 'thou mayest take either this or that.'

it is necessary that one should ' الزم هَي كِ بِرُّهنا چاهِيئَے learn to read, for this is better than every thing.'

it is better that one man should ایک آدمی مرے بہتر کے die than the whole city.'

# IDIOM. syle muhāwara.

382. The Hindustani, like other languages of the East, prefers the recta oratio to the obliqua, i.e. it employs the direct or dramatic form of narrative, such as we find in the Bible, not the indirect way in which Europeans report the words of others. Thus the phrase, 'He told me he had sent the letter,' would run in Hindustani. 'He told me thus, I have sent the letter.' The exact words of the speaker are always reported, and they are introduced by the conjunctions & or , which may be translated 'thus' or 'saying,' and are in fact equivalent to our inverted commas. The same mode of expression is used to express the thoughts passing through a person's mind. As the exact words or thoughts are expressed, it follows that the verb will be in the tense appropriate to the time when the words were used or the thoughts occurred.

باڈشاہ کے بھائی نے چاھا کہ میں شِکار کو جاؤں

آپ نے فرمایا تھا کہ کِل آؤُنگا میں نے بہت رستہ دیکیا یر آپ نہ آئے

'he saw that "except this there is no escape for me."'

take an oath, saying, "I تَسَم كَهَا كَدْ بِهِر أَيساً بُرا كَام will never do such a wicked act again."'

'the king's brother wished to go hunting' (lit. wished thus "I would go a hunting"). then one may know thus, تب معلوم کرے ک مجب پر "he has become kind to me."

> 'your honour said thus, "I will come to-morrow:" I waited a long time, but you did not come.

### Relative and Correlative.

383. The Relatives and Correlatives of Pronouns. Adjectives, and Adverbs are extensively used in Hindustānī, and are very congenial to the taste of the people and the character of the language. The use of them should be carefully studied. Some examples follow:

what is done is done, and what ' جو کیا سو کیا اور جو هوا has been has been.'

the farther he goes onwards the 'جِتْنَا آگے بِرِّهِیگا زِیاده, 'ه inore will he lose the way.'

does any one know how it ought ، مسا ک حامشے to be done.'

the prince exhibited just such شاہزائے نے جیسی ک courage as was necessary.'

while there is life there is hopé.' تلک آس

'where the rose, there the thorn.' حیاں گل تیاں خا 'as the country, so the custom.' Like joins like.' ('Every Jack will find his Gill.')

she is not so good as she should ' وُه جَيسى چاهِيئے ويسي اچهی نهیں be.

as long as a man takes no trouble, جسب تک ک کوئی so long will he fail to obtain تک دُولت دُنيا نہ worldly prosperity.'

پاوے 'take as much as may be necessary.' جِتَّنَا چَاهِيئَے أَتَّنَا لَے لَے

## The Negative.

384. The position of the Negative in Relative sentences, and in sentences comprising a Conjunctive Participle, has already been shown in Rules 376 and 354. Sentences like the following are of the same character.

there is an order not to open ' اِس وقت دروازه کهولنے the gate at this time.' کا حُکم نہیں نائن مُدّت مَی کہ آپ 'it is a long time since your

honour's letter came.'

'I am afraid lest he should curse دُرتا هُوں کہ شایَد دُعائے (me).'

'it is the order of government سرکار کے اُکم نہیں ک

سڑکار کے گئم نہیں ک دُوکاندار کِسي سِپاهي کے هاته سے کچھ چیزلے that no shopkeeper should buy anything of a soldier' (lit. it is not the order of government that any shopkeeper should take anything of a soldier).

# Repetition of Words.

385. The repetition of words, or the coupling of words of similar sound, is a very favourite device; for anything in the way of a rhyme or jingle is acceptable to Indian taste. Sometimes the repetition or coupling is made for the sake of the mere sound, but frequently it strengthens or modifies the sense. (See R. 135).

Nouns and Pronouns and Numerals are often repeated to convey the idea of distribution, such as is expressed by our words 'each,' 'every,' 'one by one.'

having well warmed them' خُرب سینک سائک کے (sānk having no distinct meaning).

weeping and wailing (lit. \* رونا دهونا خُوب نهیں ' washing) is no good.'

'as morning approaches.' صُبْحِ هوتے هوتے فل 'as morning approaches.' 'wife and husband united 'خلے رهنے 'began to dwell together.'

having ascertained the أَيْنَا مَالَ مِعِ مِنَافِعِ سَمْجَةٍ

کھے پیس پاس رھے تھے

amount of your property as well as the profit.'

having known and understood (i.e. designedly, of malice aforethought).'

> 'they kept grinding something.'

'without being asked.'

'being amazed (I) flung down my clothes.'

'many people go on babbling falsehoods.'

relate in detail the account of every moment and every hour, of every watch and every day, month after monthand year after year.'

'things of many kinds.'

the ship having received a blow from a rock (having struck on a rock), went to pieces.'

'he gives to each one 5 or 7 rupees apiece.'

### Verbs.

386. انافي, 'to eat;' لاتيانا, 'to raise;' ليخانية, to draw. These three verbs are used similarly but not interchangeably, in the sense of 'to feel,' 'to experience,' 'to endure,' 'to suffer.'

'to receive a wound.' 'to feel compassion.' 'to take an airing.' 'to take an oath.' 'to backbite.' حُيغُلَى كَيانا

'I received a beating.' میں نے مار پیت کھائی

I was suffering immersion! خوطے پر غوطے کھاتا تھا after immersion.'

'to endure grief.' رضي أتهانا

'to receive blows.' صدّمے أَتَّهَانا

'to feel pleasure.' حظ أَتَّانا

'he underwent great labour.'

enjoy the pleasures of مزا جُواني كا أَتَّهَا youth.'

'to suffer annoyance.'

'to feel vexation.'

'he suffered many hardships.' أس نے بہنت سختياں كيَانچيں

I endured two or three میں نے دو تین فاقے کیاچے fasts.'

'he had been expecting me.' وُه ميرا إنْتِظار كَبَيْنِي رَهَا تَهَا

# 387. لگنا .

This Verb means 'to touch,' come in contact,' etc., etc., and it is used in a great variety of phrases, which should be examined and committed to memory whenever met with.

to come to hand (to be obtained).' هاتبه لکّنا گبرمیں آگٹ لگی to catch fire,' thus گبرمیں آگٹ لگنا 'a fire broke out in the house.'

one's precious life even حان شِيرِين بهي تُلْخ لُكتي هَي becomes bitter.'

The Active form UD is also similarly used.

'to set on fire.' آگ لگانا 'I applied the sword (I مُسِى نِے تَلُوارِ لگائي struck with the sword).'

388. LL 'to meet, accrue.'

This word is in common use. Being a neuter verb it does not exactly correspond with the word 'meet,' but generally takes a Dative case of the person, and a Nominative of the person or thing which is met or obtained.

the right will come to the rightful owner.'

a river encountered (us) in the way (we came to a river).'

to you in return for kindness ' تُم كو نيكي كے عِوض kindness will accrue; (you will meet with kindness in return for kindness).'

Sometimes, however, is connected with the Nominative, and the person or thing met or obtained is put in the Ablative.

give me leave that I may meet 'رُخُصت دے کہ مَیں 'give me leave that I may meet my friend.'

أَوْهُ أَنَّهِ كُرُ مَحْمُودُهُ سِهِ وَلِي ' she arose and met Mahmūda. ' مُعْمُودُهُ سِهِ وَلِي اللهِ اللهِ مَا كُرُ

'to wish.' چاڏنا .389

The employment of this verb for the formation of Desiderative verbs, and the use of its respectful Imperative, have been explained in Rules 126, 332, and 333.

Used as a simple verb, it also signifies to be about to do a thing, and is generally followed by  $\leq$  with the Aorist.

he wished to go; or, he was من في حاوي 'he wished to go.'

'he was about to attack (me).' چاهتا تها که حمّل کرے

390. رهنا 'to remain.'

Forms Continuative verbs. See Rule 123.

It is added to a Root or a Participle, to convey the idea of continuation.

may the king's life and prosperity continue increasing.' بڑھتے رقبے 'she remained seated near her اپنی ماں کے پاس بَیٹھی

mother.' 'he kept saying this.' یہ کہہ رہا تھا

'he kept waiting for me.' مَيرا إِنْتِظار كَهَيَجِ رها تها

The compound جاتا رها signifies 'he went right away,' 'departed,' or 'died.'

he departed from his senses (he was هوش سے جاتا رها quite bereft of his senses).'

# 391. نارنا 'to strike.'

This is used in forming nominal verbs, as U, L. sī 'to sigh,' دم مارنا 'to speak, boast.'

It is compounded with the name of an instrument or weapon without any particle, in the sense of 'to strike with;' and when more than one blow is given, the name of the instrument is put in the plural.

> 'to strike (with) a sword.' تلوار مارنا 'to strike (with) a whip.'

'he struck a blow (with his) fist.' '(he) kicked me.' فیجے ایک لات ماری

if any one beat a brahman with اگر کوئی بُرهُمن کو لکّریاں a stick' (lit. 'strike sticks').

'he shot an arrow' أس نے قير مارا

# 392. نرمانا ' to command.'

This word is used for 'to speak' or 'to say,' when the speaker is a king or any other great personage, whose word is a command.

the king commanded,' but often meaning simply 'the king said.'

It is also used in the formation of nominal verbs, instead of دينا ,کرنا, etc., when applied to a king or eminent person.

'he) did justice.' إنَّصاف فرمايا 'to show kindness.'

393. 'to be made.'

This frequently signifies to assume the appearance.

having assumed the appearance of 'بُرهُمنوں کی صُورت the brahmans' (having dressed like the brahmans).

نگیند کي صُورت بنکر 'having taken the shape of a ball.' The Intensive بن جانا has a similar meaning.

# 'to sit.' بَيْتَهِنا .394

The Past Participle of this verb is used where we use the Present. 'Seated' is preferred to our 'sitting,'

he was seated at his door.' وُه دَرُوازِ بِر بَيِتُهَا تَهَا لَهُ اللّٰهِ 'seated and being made to sit,' signifies being inactive and involuntary.

# ئونا .395 ' to fall.'

# 396. ليقنا 'to repose.'

The Past Participle of this verb is used for 'lying,' in the sense of 'reposing.'

having gone, I reposed on that ' أُس بِحِبُونِ پر جاكر ليٿا couch.'

the stag was lying (lit. lain) فرن اگے لیتا هي before him.'

### ADDENDA.

## To Paragraph 9, page 11.

The short vowels zabar, zer, and pesh are generally modified in sound when they are followed by 7 or 3 sākin. The zabar approaches in sound to ai, the zer to e, and the pesh to o. Thus Lipahlā is pronounced, and indeed is sometimes written, paihla; mihnat approaches in sound to meḥnat; and مُحَيت suḥbat and tuhfa are pronounced soubat and tohfa. So also the pronoun s, is sounded noh and is now often written on no.

## To Rule 310, page 169.

The Verbs is and is are neuter, but they govern an Accusative.

I have brought that merchant ' أَس سَوِدا كَر كُو اَيْنَ سَاتَهِ with me.'

whatever goods you have ' جو كَتُهِ جِنْس لائه هو

brought.'

in what way shall I convey علوں سے إن لَعلوں كو يادّشاه ياس الحجاوِّي these rubies to the king?'

## APPENDIX.

### I. THE NAGARI ALPHABET.

The Nagarī, or more properly the Deva-nagarī alphabet, is the character in which Sanskrit is written. It runs from left to right, like our own alphabet. This character is used by Hindus in their books, but a modified form is employed in correspondence and ordinary writings. The intention of the present chapter is only to give the learner such a knowledge of the printed character as will enable him to read the Baitāl Pachīsī, Singhāsan Battīsī, and similar books: all beyond this appertains to Hindī rather than to Hindūstānī, and must be sought for in Hindī Grammars.

The Deva-nāgarī alphabet has five simple vowels, each having a short and long sound.

The last three never occur in Hindustani, so they may be passed over.

It has also four diphthongs.

The first two are combinations of the first and second

vowels, the other two are combinations of the first and third.

The consonants are—					
	HA	RD.	so	FT.	VASALS.
Gutturals	व	ख	ग	घ	ङ
	ka	kha	ga	gha	ña
Palatals	च	更	ज	झ	ञ
	cha	chha	ja	jha	na
Cerebrals	ट	ढ	ड	ढ	ग
	ţa	tha	da	dha	ņa
Dentals	त	थ	द	ध	न
	ta	tha	da	dha	na
Labials	प	फ	ब	भ	म
	pa	pha	ba	bha	ma
Semivowels	य	र	ल	व	
	ya	ra	la	va	
Sibilants and Aspirate.	श्र	ष	स	ह	
	sha	sha	8a	10	

Besides these there is the  $anusn\bar{a}ra \cdot \hat{n}$ , which is the proper nasal of the sibilants and of the aspirate; and the sign: or visarga, which is a final h.

[In the above table the consonants are divided into classes. The first two of each class are hard, and the next two are the corresponding soft letters. The last is the appropriate nasal. In Sanskrit a hard and a soft consonant can never combine; so when a hard consonant is followed by a soft, it is changed to its corresponding soft; and a soft one followed by a hard one is changed to its own hard form. No consonant should be joined by any but its own nasal, though in common practice the anuswāra \* is used, but it is then considered as the representative of the real nasal. The letters of the Dental class are weak; and when they are followed by a Palatal or Cerebal

letter, they are changed into that letter (like as the sounds of t and d are merged in the English words pitch and hcdge). The Hindūstānī student is not required to work these permutations, but a knowledge of them will be of advantage in enabling him to recognize prefixes in different forms; thus the initial syllable of the words उत्सव utsav, उद्यम udyam, उजाल ujjal, and उचलना uchalnā, is the preposition ut, 'up'; and the preposition sam, 'with' (con), appears in the words सम्पत sampat, सङ्गत sangat, सन्तप santap सञ्चार sanchār and संसर्ग sansarg.]

The forms of the vowels given above are the initial forms, as they stand at the beginning of words. When medial or final they have other shapes.

The short fi, it should be observed, is written before the consonant, though it is pronounced after it.  $\tau ru$   $\tau ru$  and  $\tau ru$  and  $\tau ru$  are exceptional forms of combination.

When two vowels are in contact, the first is written in the medial form, and the following one has the initial form, thus  $\overline{s}$   $\overline{s}$   $\overline{u}$   $\overline{u}$ 

The first vowel,  $\mathbf{x}$  a, is written only when it is initial It is inherent in every consonant, and should be pronounced along with it, unless some other vowel has taken

its place, or there is an indication that the vowel sound is absent. When a consonant has no vowel sound, it should be either joined to the consonant with which it is combined in sound, thus, an nt, or it should have the mark virāma frest, subjoined, as in अन्तर antar. The virāma is the equivalent of the Arabic jazm. In common use, however, this is generally neglected, and the reader is supposed to know that बोलना is bolnā. not bolanā. Still, compound letters are used, and the following are examples of some of the most usual forms. It will be seen that in the formation of the compounds the stem T of the first consonant is rejected, and that the distinctive portion of the letter is then joined to the one with which it combines in sound. Thus  $\pi$  n and z d coalesce, and form z nd. The letter r is so frequently joined to other letters that special forms have been devised to represent it. When it precedes a consonant, it is written over it in this form , as र्त rt; when it follows, it is subjoined in this form -, as a or = tr, प्र pr. There are two compounds in which the original elements are not discernible. These are ZI or 3 ksh, which in Sanskrit has the sound of x in the word fluxion; and In, which has the sound of gn in bagnio and in the French digne. But in Hindi the former commonly has the sound of chh or kh, and the latter of gy, as परीचा parichhā, पच pakh, आजा āgyā.

### Compounds.

要 kk, त kt, च ky, ज kl, ग gg, ग gdh, प gn, ा gb, च chchh, ज jj, ज jm, त tt, त्य tth, त tn, ता tm, त्य ty, ल tv, इ dd, ड ddh, दा dm, च dy, द dv, न nt, च nd, न nm, न्ह nh, प्र pt, प्र pn, प्य py, प्प ps, ब्ह bd, भ्य bhy, भ mbh, ज्ञ ll, ष्ट sht, ष्ठ shth, प्या shn, स्व shch, प्रम shm, य shr, स shw, त st, त्र sn, स्व sm, स्व sy, ह्य hy, ह्य hm.

Compounds of three letters are rare, and in such as do occur one of the semivowels य, र, ज, व, is generally the last of the three, as न्त ntr, स्य sty.

There are Hindī and English Dictionaries in which the Hindī words are printed in Nāgarī characters, and are arranged in the order of the Nāgarī alphabet; but the Dictionaries generally used by Englishmen are arranged according to the Persian alphabet. This makes it necessary to show how Hindī words may be found in their Persian dress.

### Initial Vowels.

ঘ	ऋा	द्	द्	उ	জ	<b>च</b>	Ų	प्	ऋो	ऋौ
1	ī	1	15	Í	-أو	2	اي	أي	او	أو

# Appended Vonels.

क्षव	काब	विव	कीव	वुब	कूब
کب	کاب	کِب	کِیب	گب	گوب
. छब	वेब	ৰীৰ	कोब	कौव	कः
کرب	کیب	گیب	کوب	گوب	که

### Consonants.

The aspirated letters of the Nagarī are invariably represented by the  $\xi$  or butterfly form in the Arabic character, and the  $\xi$  by  $\zeta$  or s. Modifications of three Arabic letters,  $\ddot{\xi}$ ,  $\ddot{\xi}$ , have been formed to represent the cerebral letters  $\xi$  and  $\xi$ . A dot placed under the letter  $\xi$  and its aspirate  $\xi$  shows that they have the sound of  $\ddot{\xi}$   $\dot{\xi}$  and  $\dot{\xi}$   $\dot{\xi}$   $\dot{\xi}$ .

In the Arabic alphabet, on the other side, there are several letters which have no equivalents in the Nāgarī, and so substitutes have to be found. This is done by placing a dot under the letter which most nearly approximates in sound; thus

This arrangement answers for all practical purposes, and marks the etymology of the Arabic words used in Hindī. The more, however, the language approaches pure Hindī, the fewer are the Arabic words employed, and such as are used colloquially are made to assimilate in sound to the nearest Hindī letter; thus  $zab\bar{a}n$  and  $z\bar{\imath}n$  are pronounced  $jab\bar{a}n$  and  $j\bar{\imath}n$ .

# II. ARABIC WORDS IN HINDŪSTĀNĪ.

Arabic words enter largely into Hindustānī, and some knowledge of Arabic grammatical forms is essential to the attainment of a thorough acquaintance with Hindustānī. A perusal of the following observations will open the student's eyes as to the full force and intimate connexion of many words which to the ordinary reader seem to have no relation to each other.

The Verbal Root is the main source from which Arabic words are derived. This is generally triliteral, but there are roots consisting of more letters. The following observations are confined to such roots as are composed of three consonants. Roots consisting of more than three letters, and roots containing one of the weak letters 1, and , present difficulties which place them beyond the scope of this very elementary notice.

The Root of the Verb is the third person singular of the Preterit فَوَتَ 'he divided,' and the Verbal root is developed into an infinite variety of forms by altering the vowel points and the jazm, and by weaving into it one or more of the seven servile letters comprised in the word معتمد yatasamanū-ā, 'they fatten,' which word is used as a memoria technica. All other letters must be radical, but these seven may be either servile or radical.

The simple noun very frequently consists of the same letters as the root of the verb, but the points generally differ.

```
المحتالة ال
```

Other useful forms of the simple noun are:

From the simple or ground verb fifteen other forms

are derived by weaving into it one or more of the servile letters. There is no verb which runs through the whole of these forms, nor is there any rule as to the number of forms in which a verb may appear. Some of the forms are of very rare occurrence even in Arabic, and those which are worthy of notice by the Hindustānī student are still fewer. The chief parts of the Verb which are of use in Hindustānī are the Infinitive or Verbal Noun and the Active and Passive Participles. The following table exhibits these parts of the simple or ground verb, and of eight derivative forms, using the word "accept' as the model.

PASSIVE PART.	ACTIVE PART.	INFINITIVE.	PRETERIT.	CONJ.
وَ عُبُول	قابِل ا	etc. كُنْل قُبْل	قَبَلَ	I.
وُ قُبُّل	مُ قَبِّل	تَقْبِيل	قَبَّلَ	II.
مُقَابَل	مُقَابِل	مُقَابَلَة	قَابِلَ	111.
مُقْبَل	مُقْبِل	إِتَّبَال	أَقْبَلَ	IV.
مُتَقَبّل	مُتَقَبِّل	تَقَبُّل اللهِ	تَقَبَّلَ	v.
م تقابل	مُتَقَابِل	تَقَابُل الله الله	تَقَابَلَ	vı.
وُ مُنْقَبَل	مُنْقَبِل	اِنْقبَال ا	اِنْقَبَلَ	VII.
<ul><li>مُقْتَبَل</li></ul>	مُقْتَبِلُ	اِقْتِبَال اِقْتِبَال	إِقْتَبَلَ	viii.
• سُتَقَبِل	مستقبل	الله تُقْبَال الله	اِسْتَقْبَلَ	х.

The Ninth Form, and all above the Tenth, are omitted as unnecessary. The Active and Passive Participles have been given throughout, to make the table perfect; but the only difference between them in the derived Forms is that the Active has kasra, and the Passive fatha, in the last syllable.

The Infinitive or Verbal Noun and the Active and Passive Participles are very common in Hindūstānī. The use of the Noun is sufficiently obvious. Active Participles are used with the powers of Participles, of Adjectives, and of Verbal Agents or Nouns; some having all these powers, others only one of them. The Passive Participle is used principally as a Participle or Adjective; but it is sometimes employed as a Noun, especially in its Feminine form.

The following are examples of simple roots and of their various derivative Forms; but such words and meanings only are given as are actually in use in Hindustant.

Model.—Act. Part. قابل kābil.
Pass. Part. مُقْبُول makbūl.

Form I. Simple Verbs.

ROOT AND NOUN. ACTIVE PARTICIPLE. PASSIVE PARTICIPLE. passive participle. passive participle. known, علم known. learned,

a learned man.

ROOT AND NOUN. ACTIVE PARTICIPLE.	PASSIVE PARTICIPLE.

plunder.	plundering.	one who prizes	
، نخب	إنتخاب		منتجب
extract.	selection.		selected.

#### X.

Among other powers this expresses desire.

The Abstract Noun is formed by means of the feminine termination at, or iyat.

know.	learning. عِلْمِيَت
allot.	fate.
باک possess.	property. مِلْكِيَت
known.	a science. مَعلُومَت

Another form interchangeable with the above is the Masculine termination a ah; as

a picture, plan. نَقْشَهُ a point, dot. فَقْطَهُ a story. قَصْبُهُ a town. حادِثُهُ an event.

There are also some feminines made with this termination, instead of at.

اعربه صاحبه صاحب lady. ملک ملک princess. ملک pregnant.

The Noun of Place is formed after the manner of the examples following.

ورج go out. جَرِّف place of going out. بخره a school. بعثر a ferry. بعثر a resting place متزل descend. بعثر an assembly. متبع worship. متبع place of worship, a mosque.

The Noun of Instrument.

a key. مِغْتاح a key. مِغْتاح a pair of scissors.

The Arabic Noun has three numbers, Singular, Dual, and Plural, and three cases, Nominative, Genitive and Accusative. The Accusative singular in is the Adverb, and as such is much used.

especially. خُصُوماً perchance. تَصْداً intentionally. اتَّفَاقاً occasionally. أَخَياناً by estimate.

The Dual oblique form is occasionally met with, as والدين 'parents,' from والدين 'a parent.'

The Oblique Plural is also met with.

The regular Feminine plural in  $\vec{a}t$  is of frequent occurrence.

actions. حَرَكَت actions. مَرَكَت offering. مَدَقات offerings. مُدَقات letters. وأقعات annoyance, troubles: مُشَكِلْت kindness. تُوجُّها مُشْكِلْت kindness. مُشْكِلْت difficulty.

Besides the regular plural forms, there is a great variety of what are called 'broken plurals.' Some of these are very common in Hindūstānī, and deserve particular attention.

1. The most common of these is made by inserting two alifs; thus

property. ومثلث goods and chattels.

بر reason. بر reasons. اسباب reasons.

مر order. اسباب orders.

مر orders. المخام army. أفواج armies.

مر time. افوات newspaper.

When the singular ends with  $\underline{z}$  the plural is formed thus:

a thing. أشّيا things. أشّيا a prophet. أنبيّا

2. When the singular has a medial alif, the plural is made by means of alif and nao.

state. اَحُول circumstances. الله wealth. أَول possessions.

3. The following form, made by means of zamma and nao, is of frequent occurrence.

a king. مُلُوك kings. مُلُوك kings. مُلِك kings. عِلْم science. مُلُوم sciences. عُلُوم towers. بُرُوج a tower. بُرُوج a heart. عُلُوب a right. حُقُوق rights. عُطُوط letters.

4. By insertion of alif before the final consonant.

a hill.

hill. جِبال

a man.

men. رجال

Some Nouns ending with the abstract at take this plural:

a quality.

qualities, dispositions.

also:

a ruler. حاكِم a lover. عاشق rulers. حُكَّام lovers.

The following have three syllables:

a sage.

a learned man.

a poet. شاعر

a noble.

a poor man.

sages. ککما

the learned.

poets. شُعَرا

I, i nobles.

the poor. فقرا

a king.

a devil.

مُلْکُ kingdom.

a mosque. مَدْرَسَهُ a college.

a benefit.

a rule. قاعده

kings. سلاطين

devils. شياطين

kingdoms,

mosques,

colleges. مدارس

benefits. فوائد

rules (rules of

drill).

a subject.	subjects. توابع
هُفِّ a curiosity.	مانحة curiosities.
a marvel.	marvels.
a wonder.	بثاجة wonders.
a tribe.	tribes. قبائل
a beginning.	beginnings. أوائل
near, relative.	relations. اِقْرِبا
friend, companion وَلِي	. أوليا companions.

The superlative form of the Adjective is worthy of notice. The power of it is sometimes intensive rather than superlative.

most beautiful. اشرف most noble. اشرف most noble. اشرف most excellent. اقضل excellent. وافضل great.

We will now track a few words, not through all their

possible forms, or even through all that are actually used in Arabic, but only through such forms as are found in Hindūstānī.

## حکم

The meaning of this root is 'order, rule.'

an order. احكام pl. orders. حكم pl. pl. pl. orders.

an umpire.

a ruler. حگام pl. rulers.

wise, a sage. کما pl. sages. superl. احكم strongest, wisest.

rule, dominion.

wisdom.

subjected, subject. المحكوم fem.

(noun of place), place of orders, a court of justice. pl. courts.

(IV.) strengthened, confirmed, strong.

ر (v.) ruling, dominion. مارکزی (x.) corroboration.

#### III. SHIKASTA WRITING.

Before attempting to read a document written in Shikasta, the student should be thoroughly conversant with the plain written character used in lithographed books. The following pages will then smooth the way to a knowledge of the writing used in the ordinary affairs of life. But the ability to read shikasta depends upon a good mastery of the language; without this, the attempt to decipher manuscript documents will be lost labour.

Later State of the Dines

The Plate comprises some of the most common and complex forms employed in *Shikasta* writing. But it is impossible to give all the varieties that may be met with; for in India, as in England, each handwriting has its own peculiarities and varieties. The following are some of the most marked peculiarities:

The letter alif is liable to considerable modification; as an initial, it may stand separate, or it may join the following letter, as in No. 4. It may also have the addition at the top shown in Nos. 1 and 7. As a medial, it assumes the form of an upright oblong loop as No. 2, and it is then identical with l; a medial d resembles it, but the loop of the d is round, not oblong.

The letters of the informare too simple to admit of any radical change, but as initials they have sometimes the addition seen in No. 20 (second example). The dots over the informare are sometimes written as in No. 42.

Letters of the  $\tau$  form are generally easy to distinguish; but in careless writing,  $racktooldsymbol{=}$  and  $racktooldsymbol{=}$  are very similar. As medials, they are sometimes written as in Nos. 7, 13, and 35.

The letter 3 is written 3. When it follows alif it is written as Nos. 5 and 6; and when combined with a 3 it assumes the peculiar form of No. 40. As a medial, it is a round loop, as in Nos. 8, 22 and 30.

The, is often disguised by being joined to the following letter, as in Nos. 22, 45, and 50; and the combination, is occasionally found, as in No. 44.

The succeeding letters down to all for no special remark; the examples sufficiently show the peculiarities.

The letters  $\mathcal{L}$  and  $\mathcal{L}$  are liable to material changes. The conjunction  $\mathcal{L}$  is written as in No. 73. The genitive particles  $\mathcal{L}$  and  $\mathcal{L}$  are peculiar, as in Nos. 74 and 75; so also is the future termination  $\mathcal{L}$  in Nos. 83 and 110.

The letter  $\mathcal{J}$  as a medial is written as a loop, and is then similar to the *alif*; as a final it is written as in Nos. 15 and 16. The final  $\mathcal{J}$  is often written as in Nos. 33 and 54; occasionally as in 86 and 87, where the end of the letter is curled round to represent the dot.  $\mathcal{J}$  is very commonly joined to the letter which follows it,

as in Nos. 13, 34, and 35. The combination is should be noted in Nos. 105, 106, 107, as also the final forms of a exhibited in Nos. 21, 68, and 101. The tick placed under the letter h is a valuable indication. Final  $\omega$  is written as in Nos. 7 and 8; the form shown in Nos. 59, 93, and 111 is sometimes met with, but it is not common.

The plate and these explanations will enable the student to read the following letters with the help of the transcriptions. But the student is again warned not to waste his time over them until he can read off fluently similar documents written in a distinct hand, and can understand them as he reads them.

To the lord of lords, the bestower of bounty and the dispenser of favour to his slaves, may his prosperity endure!

[Persian]. To the source of bounty it is communicated.

The master (you) inquired from your slave's agent, Nand Kishor, trooper, whether in the purchase of Rām Parshād Sūbadār-major's mares, the Government money had been spent or that of his own house. Consequently, your slave, with the greatest respect, represents to the presence of his master that in the purchase of those mares some Government money and some of the slave's (own) house has been expended. And these mares, with the approbation of his highness Captain Scott Sāhib Bahādur, have become servants (have been admitted for service). This was (is) the statement of the case which

Cherisher of the poor, hail!

My lord, in consequence of the order issued on the 13th July of the present year, I have entirely cut away the jungle of Bhaṭh, and what remains is being now cut down. And 560 rupees have been expended in clearing the jungle, of which 340 rupees have been collected and 220 rupees remain. I am hopeful that an order will be issued in the name of the tahsīldār, so that I may receive the outstanding money. Afterwards I will send a statement of the account to the Huzūr. Finis.

May the sun of your prosperity continue resplendent. The Report of Монах Lāl, thānādār of Goshāban. Written on the 21st July, 1860.

عرضي بهادر علي تهاندار فتح گامج معروض عما ماد مي سن ١٨٦١ عــــ

Cherisher of the poor, salutation!

My lord! yesterday at ten o'clock an old man came into the bazar to the shop of Gulab Rai, banker. and said that he had a pair of gold bracelets which he wished to sell. The banker told him to show them to him. Then he took the pair of bracelets out of his waist(band) and gave them to the banker. The banker and two or three other shopkeepers well examined the gold, and found it very pure. In the end he sold them to the banker at seventeen rupees per tola. Then that old man, in an artful and tricky way, took another pair of bracelets, of base gold, from his waist, and having substituted these he handed them over. Then receiving the price he went away. When, subsequently, the banker discovered that they were of base metal, although he made a great noise and outcry, he got no remedy. Finis. It was needful, and so I have made this statement. May the sun of your prosperity continue shining.

Report of ĀLT BAHĀDUR, thānādār of Fath-ganj. Written on the 4th May, 1861 A.D.

#### IV. THE CALENDAR.

The Era used by Muhammadans is that of the Hijra, or Flight, which dates from the retreat of the Prophet from Mecca to Medina on the 16th July, 622 A.D. The year is purely lunar, and consists of twelve lunar months, commencing with the new moon. The months consist of 30 days and 29 days alternately; and eleven times in every thirty years one day is added to the last month. This brings the average length of the year very close indeed to the true length of the twelve lunations. So the year consists of 354 days, and in the leap years of 355 days. Being thus about eleven days shorter than the solar year, it gains upon the latter at the rate of about one year in thirty-three.

Tables showing the concurrent Christian and Hijra years are easily procurable; but in their absence the concurrent years may be found by the following rule: "From the given number of Musulmān years deduct three per cent., and to the remainder add 621.54: the sum is the period of the Christian era at which the given Musulmān year ends." "When greater accuracy is required, and when the year, month, and day of the Muhammadan era are given, the precise period of the Christian year may be found as follows: Rule. Express the Musulmān date in years and decimals of a year;

multiply by '970225; to the product add 621'54, and the sum will be the precise period of the Christian era."

There are two Rabīs and two Jumāds, which are distinguished as annal first, and sānī second, or ākhir last. Zī-l kāda signifies 'the month of rest;' and Zī-l hijja; 'the month of the pilgrimage.'

In India the Musulmans have adopted the Hindu

names for the days of the week with the exception of the names for Thursday and Friday. They also use the Persian names.

HINDÜSTÄNI. HINDI. Sunday. اتمار Itmar. اسوموار Somnār. Monday. Som-bar. Do-shamba. منگا. Tuesday. Mangal. Mangal-bār. Sih-shamba. عارشنیه بُدّهٔار بُدّه Wednesday. Budh-bār. Chār-shamba. Budh. The Calendar of the Hindus is peculiar, and has no parallel in any other part of the world. Hindu life is one perpetual round of festivals and ceremonies, and these, with one or two exceptions, are regulated by the motions of the moon. Their ceremonial year therefore is lunar; but the great inconvenience of reckoning by years differing from the natural solar year has led them.

to invent and employ a complicated method of keeping the two concurrent, by establishing what is called the "Luni-Solar Year." The Hindu Solar year, which is about 23½ minutes longer than the European reckoning, commences with the entrance of the sun into the sign Aries; and the Luni-solar year begins immediately after the new moon which immediately precedes the commencement of the solar year. The beginning of the year being thus settled, the lunar months and days are kept concurrent with the solar months and days by intercalation and omission. This repetition and removal occurs very frequently in respect of days; but it is unnecessary here to enter into the technicalities which regulate it. The rule as regards months is that when two new moons fall in the same solar month that month is repeated. This occurs in every third or second year. Once in 160 years there is no new moon in one of the solar months, and when this occurs that month is struck out; but this involves the necessity of intercalating two other months in the same year. An intercalated day is called adhik, and an intercalated month adhik, laund, or malmas. The term nij, 'proper,' is used to distinguish the real from the intercalated day or month. An expunged day or month is called kshay, 'perished.' The term adhik is also applied to the year in which a month has been intercalated, and the term kshay to one from which a month has been expunged.

#### Hindū Solar Months.

بيساكه Baisākh, begins on 11th April			31
Jeth, May			31
اساؤه Asāṛh, June	•		32
ساؤن Sānan, July			
ياكري Bhādūn, August			
Asin or Kū'ar, September			31
لاتكت Kārtik, October			
Aghan, November			30
بوس Pūs, December			
Al Māgh, January			
پاگی <i>Phāgun</i> , February			30
Chait, March			
Total	11		365

The Solar year begins with Baisākh, on the sun's entrance into Aries. This, according to Hindū reckoning, now occurs on the 11th or 12th of April. As the beginning of the Luni-solar year depends upon the moon, it varies to the extent of 28 days from that time, in the same way as the time of our Easter varies.

As stated above, the Luni-solar year begins at the new moon which precedes the sun's entrance into Aries; but there is a difference as to the commencement of the months. In the Dekhin and in Guzerat the month begins at the new moon with the 1st of Chait; but in Hindustan and in Telingana the months begin with the

full moon, and so according to this reckoning the year begins in the *middle* of Chait. The former is called the *Suklādi*, and the latter the *Krishnādi*, reckoning. In the Dekhin, the former is known as the Mārū or Mārwārī reckoning, from its being employed by the commercial people of Mārwār.

In the Luni-solar reckoning the month is divided into two pakshas, pakhs, or fortnights; the one from the new to the full moon is called sud or sudi, bright or increasing half; and the other from the full to the new moon is called krishn, bahula, bad, or badi, dark or decreasing half. The last day of each fortnight bears a name which means respectively full and new moon; the other days are simply numbered, but the Sanskrit numbers, or slight modifications of them, are used, not the ordinary Hindūstānī numerals.

## Kali Yug.

The fourth of the Hindu yugs, the Kali or Iron age, dates its epoch from the 18th February, 3102 B.C., so that the present year 1872 is 4973 of the Kali yug. It is a solar year, and begins on the 11th April. This era is rarely if ever used for ordinary purposes. To convert it into Christian years deduct 3101 for the first nine months, and 3100 for the last three.

### Samvat or Era of Vikramāditya.

The name Samvat or Sambat is a contraction of the Sanskrit Samvatsara, 'year.' This era is supposed to date its commencement from the accession of the renowned monarch Vikramāditya to the throne of Ujjain, 57 B.C. This is pre eminently the Luni-solar year, and in it the months are divided into pakhs, or fortnights, marking the increasing and decreasing moon. This era is used principally in the countries north of the Nerbadda, and commences at the new moon in the middle of the month of Chait, because, as already explained, the lunar months

of Hindustan begin with the full moon. In the Mahratta country and other parts south of the Nerbadda the year commences on the same day; but as the months are here reckoned from new moon to new moon, the first day of the year is also the first day of the month. To convert Samvat into Christian years deduct 57 for the first nine months and 56 for the last three.

### The Saka or Era of Sālivāhana.

This era takes its name from Salivahana, a great king who reigned in the Dekhin, and its epoch is 78 A.D. It is a solar year beginning on the 11th April, and is used chiefly in the south. To convert it into Christian years, add 78 for the first nine months and 79, for the last three.

#### Faslis or Revenue Eras.

These eras owe their origin to the attempts of the Muhammadan Emperors to make the Hindu eras uniform and concurrent in number with the Musulmān era of the Hijra. The difference in length between the Solar year of the Hindus and the purely lunar year of the Hijra seems to have been overlooked, and no provision was made to keep them concurrent; so that although they started equal, the Hijra soon outstripped them. Most of these eras date from Akbar's accession in Hijra 963, and the new eras were made to start equal in number with this year, which began in November, 1555 A.D.

#### Bengal San.

This solar year of Bengal commences on the 1st Baisākh. To convert it into Christian years add 593 for the first nine months and 594 for the rest.

### Wilāyatī or Amlī of Orissa.

This is a Solar year, and commences on the first Āsin. Add 592 for the first four months and 593 for the others.

## Fasli of the Upper Provinces.

This is used in Bihār and in the Upper Provinces of Bengal. It is a luni-solar year, and begins with the month Āsin at the full moon. The days of the month are numbered consecutively from the beginning to the end, and the division of the month into light and dark halves is not observed. Add 592 for the first four months and 593 for the remainder.

### Mulkī era of Purnea.

This seems to be a solar year commencing with the month Sāwan. It agrees numerically with the other revenue eras of Bengal. Add 592 for the first half and 593 for the last.

#### Madras Fasli or Fasli of the Dekhin.

This is a solar year beginning at the summer solstice with the month Sāwan, but the government of Madras has fixed its commencement on the 12th July. It is two years and two months behind the Faslīs of Bengal, in consequence of its having been established later, in Hijra

1047, agreeing with 1637 A.D. Add 590 for the first half and 591 for the last half.

The Shuhūr-san or Sur-san of the Mahratta country.

This 'year of months' is the earliest of the Revenue Eras, and was probably established by the Sultān Muhammad Tughlik in the year 743 of the Hijra, or 1342 A.D. The year begins in June with the entrance of the Sun into the lunar asterism Mriga. The chief peculiarity of this Era is that its years are numbered with the Arabic numerals. Add 599 for the first half and 600 for the last.

There are some other Eras besides these, and also some Cycles, particularly the Vrihaspati cycle of sixty years, which is much used in the south. Full information upon the chronology of India will be found in Prinsep's Useful Tables, in Jervis's Reports on the Weights and Measures of the Konkan, and in that learned work the Kālā Sankalita of Warren. The Tables of the Sudder Dewanny Adawlut of Bengal afford the easiest means for ascertaining the exact corresponding Christian dates for the dates employed in Bengal.

THE END.
