INTRODUCTION

Northern Tepehuan is spoken by approximately 8,000 people in the state of Chihuahua in northern Mexico. It belongs to the Tepiman (Pimic) subfamily of Uto-Aztecan. The Tepehuan live scattered around a large area of the Sierra Madre Occidental where Chihuahua borders Sinaloa and Durango. The Baborigame dialect is the larger of two major dialects; the other is spoken in and around Nabogame.

The author has spent over half of the past thirty years living with and translating the New Testament for the Tepehuanes. The principal Tepehuan translator has been Narcisa Molina de Herrera. Nepomucemo Bueno helped during the preparation of this sketch. Others who have helped in years past, or whose stories or letters or other taped materials have been used in the analysis and as illustrative examples, are Celestino Carrillo, Adelaido Bueno, José Valencia, and Hermene, jildo Carrillo.

The only extant grammar of Northern Tepehuan is Benito Rinaldini's Arte de la Lengua Tepeguana, Mexico 1743. Current linguistic studies are: K.L. Pike, R.P. Barrett, and B. Bascom's 'Instrumental Collaboration on a Tepehuan (Uto-Aztecan) Pitch Problem', Phonetica 3.1-22 (1959); Burt Bascom's 'Tonomechanics of Northern Tepehuan', Phonetica 4.71-88 (1959); Bascom's unpublished dissertation, Proto-Tepiman (Tepehuan-Piman), University of Washington, 1965; and Nancy Woo's 'Tone in Northern Tepehuan', IJAL 36.18-30 (1970).

PHONOLOGY

Phonemes

p b v m	t d s n	t ^y d ^y š ñ č	k g h*	i † u o a Vowel length is interpreted as geminate clusters.
	1			Tone: there are two tones, high tone /// and low tone
	r			(unmarked).

^{*}Note that h stands for the velar fricative [x].

Stress is noncontrastive. It is freely fluctuation in many words. č is found in relatively few words. In most of these č fluctuates with š or t^y or both. Nonfluctuating: čffkl a few Vs. šíffkl how many?.

Intonation, when marked, will be indicated by a raised arrow: ${\cal A}$.

Major Phonological Processes

Allophonic Variation

Stops, fricatives, and nasals have long allophones following #(C)V.

Velars have back variants preceding o or a.

n or ñ becomes n before velars.

Vowels become voiceless before pause.

Morphophonemic Alternation

Exceptions include:

tasíána	in the sun	(cf. tásai	sun)
kášiat í í	he already went		
mianióma	closer	(cf. míánai	close)
miadíáva	he did come in	(cf. míád÷i	come in)

Loss of velar consonants and d is frequent following a high-toned syllable. vigí-kidi > vigíidi the red ones.

Loss of word final vowel(s) or syllable occurs in fast speech. vóórai who? > vóór góó who is that?; kifga good, well > kff mááti he knows very well.

v > p in reduplicated forms. váákti enter > vapákti enter repeatedly. For some speakers vapákti > papákti.

Vowel harmony is not infrequent. tatáka roots / tatákirii it is getting roots; áálit u to cause to become small / áálit it is shrínking.

For a more complete phonemic statement see Bascom's $\ensuremath{\textit{Proto-Tepiman}}$.

BASIC SENTENCE STRUCTURE

Word Order

Normal word order for sentences in descriptive discourse is as follows: Major (i.e., nuclear) constituents are V S O. Only V is obligatory. Peripheral constituents are somewhat free as to their order.

INTR TIME MAN LOC V S O LOC COM BEN INSTR

dal saapáto-ko čivuaavúá-íñd[†]iri íh-i aatími and Saturday-TEMP PN-from RDP-went we PI.

meehiko amakoga

PN towards

And on Saturday we left Chihuahua for Mexico.

takávo savíli pild^Yúru itmádu ándirtši múi ffkoli yesterday bought PN with PN many orange

Sốn im-vittári gi-tumíñši-ga-kidi me me-for their-money-POSSD-with Yesterday Peter and Andrew bought many oranges for me with their own money.

Topicalization

A constituent may be emphasized by placing it before the ${\tt V.}$

piid^yūru=a=t savfli go-ffkoll PN=B=COMPL bought the-orange <u>Peter</u> bought the oranges.

a**áni ff**gi giñ-gifgi I alone REFL-hit I alone hit myself. naváít^yi yffi gf-gir-du-kidi corn drink RDP-big-QNT-AG liquor PL Adults drink corn liquor.

Pronoun Copies

A subject clitic occurs following the first constituent of an independent clause. The subject clitic co-occurs with an optional independent pronoun.

```
gii=á=n=t ááni
fell=B=I=COMPL I
I fell.
```

An object pronoun occurs prefixed to the verb and co-occurs with an optional independent pronoun.

```
plid<sup>Y</sup>úru iñ-gifgi ááni
PN me-hit me
Peter hit me.
```

An indirect object pronoun occurs prefixed to the verb and cooccurs with an optional independent pronoun.

```
aáni giñ-maá fgai imó ffkoli
me me-gave he one orange
He gave me an orange.
```

The set of object pronoun prefixes occurs also with postpositional elements (locative, comitative, benefactive, etc.).

```
tán dáha go-dál-karoi áán iñ-†b†gi
here sit the-sit-INSTR me me-behind
Here's the chair behind me.
```

A possessor pronoun occurs prefixed to a noun (except for 3P POSSR, which is a suffix) and co-occurs with an optional independent pronoun.

```
kavámi kóko áán† giñ-t<sup>y</sup>oóna
hard hurt my my-knee
My knee really hurts.
```

A reflexive pronoun occurs prefixed to the verb and co-occurs with an independent pronoun.

```
ffgi g†-g†fg† fgai
alone REFL-hit him
He hit himself.
```

ffgi fgai gi-gifgi fgai alone he REFL-hit him He hit himself.

ffgi áánt giñ-gifgt áánt Cf. pild V úru giñ-gifgt áánt alone I REFL-hit me PN me-hit me I hit myself. Peter hit me.

The subject pronoun clitic occurs also preceding WH words and conjunctions and co-occurs with an independent pronoun. The conjunction and the WHW occur first in the clause, the independent pronoun following the verb.

```
n=ai n†id<sup>y</sup>i-ña áán† kíámo-ko
I=and saw-PAST I morning-TEMP
DUR
And I saw (them) in the morning.
n=oor áán†
I=who I
Who am I?
```

A slightly different set of subject pronoun clitics occurs following a verb preceding ágai INTEN will, gonna or agáltadai IMPRF INTEN. These pronoun clitics co-occur with an independent pronoun.

```
imi=á=iñ ágai áán†
go=B=I will I
I'm going to go.
```

Presumptive and Resumptive Pronoun Constructions

A presumptive pronoun construction is attested with pronominalized numerals or quantifiers.

```
vff gooká-tai bir-1ímii i-ki-kffli
all two-PRONR this-come the-RDP-man
way PL PL
Here come the two men.
```

Adverbial constructions relating to location and time (and manner) all display presumptive "pronoun" constructions. Location constructions with adverbial demonstratives:

```
vốibid<sup>9</sup>i aatimi gáámo báág ibigi
went we there eagle behind
around
We went around behind Eagle Mountain.
```

A discontinuous adverbial demonstrative construction:

```
tán dáha ááni giñ-kil-f-ri
here sit I my-house-LOC-in
Here I am in my house.
```

A resumptive pronoun construction:

áid^yiši vúsai vuaána áid^yi augusto ir gfi when came PN then PN be big out bait^yf kiáá-kami-ka-tadai room-í-ri ahead stand-AG-STAT-PAST PN-LOC-in chief CONT When John was born, then Augustus was the Emperor in Rome.

Clefting

The cleft sentence construction involves a subject followed by a pronoun which translates as X is the one. This expression is followed by and plus a clause. The whole sentence is translated as X is the one who did Y.

piid^yúru fgai dal bł1 go-úúnu-i PN he and grasped the-corm-ABS Peter is the one who took the corn.

adeláído-av fgai daid^yt asavfli go-ffkoli PN-AFF he and bought the-orange Adelaido is the one who bought the oranges.

Apposition

When two nouns occur in apposition, the second further identifies (modifies) the first.

vấí tasá-í-kidi d^Yíviaid^Yi i-kilí-ódami three day-ABS-with came the-male-person old man

kuná-di šianki sói mááši id^yuí husband-her one <u>bad appear</u> did who <u>evil</u>

After three days the old man, husband of her-who-did-bad, came.

PARTICLES AND CLITICS

Conjunctions

Let it rot a little.

go-to6ši alífši a-++ší-d^yi t+lígi the-rabbit very UNSPEC-rob-APPLIC wheat OBJ

The rabbit was really stealing wheat.

Modal

=ši Question (cf. QUESTIONS) ⇒sa∼s≃ Quotative

The QUOT clitic =sa occurs as the final element of the QUOT clitic group which is: =SUBJ:PRON=sa. The QUOT clitic group may occur following the verb or following other elements which precede the verb.

imf-na≃p†=sa go-POT=you=QUOT He says you should go. gáámo=a=pt=sa imf-na there=B=you=QUOT go-POT He says you should go there.

 $s\!=\!$ QUOT occurs preposed to CNJ and WHW. See COORDINATION and QUESTIONS.

ši=~iš= SUBR (if, so that)

fgal óbha iš-maakidi áági-d^yi áa lš-maakid-ir he wrote SUBR=that told-APPLIC others SUBR=who=be which

n†ihá-da-mi see-APPLIC-NR

He wrote what others who were witnesses told him.

See sections on complex sentences for further examples.

Subject Clitics

	SG	PL	
1P	n∼an∼iñ	$t \sim t \dot{t} \sim t \dot{t} t$	
2P	p∼pt∼pi	m ∼ m†	
3P	ø		

See DEFINITE PRONOUNS for a more detailed analysis of the pronouns.

Tense/Aspect

TNS/ASP morphemes are suffixes except in verb Stem III, the PERF(ECTIVE) stem, where they are treated as clitics:

See also NONSYNTACTIC AFFIXATION.

Auxiliary

The auxiliary group is a group of clitics phonologically bound to the first constituent of an independent clause. The BASE drops out in some cases. The structure of the auxiliary group is:

BASE=SUBJ=NEG=TNS/ASP/MDL

The AUX group occurs as enclitic to verbs, pronouns, and adverbs.

áán+=a=n=t íí q†i=á=n=ta fell=B=I=COMPL I=B=I=COMPL went I fell. I went. káši=a≖n=t 11 káši=a≕n=mai=ta im+-da now=B=I=NEG=COMPL go-? already=B=I=COMPL went I already went. (any more) I'm not going to go now. a+1=ñ=t^yiki g†í≕ñ=ši fell=I=COMPL fell=I=QDEFDid I fall? I fell.

imf-na=pt=sa go-POT=you=QUOT He says you should go.

|Š=+p+-duñ1 á agáf-t^Yada; |SUBR=happen will will-PAST |CONT

All that he told me would happen has already happened.

tum<mark>á vúááyi</mark> what do What are you doing? mff k61d^ya ga-vaak1-t^yal giñ-t^yuúba there below UNSPEC-house-make my-father INDOBJ -in-law My father-in-law is building a house down below.

NONDISTINCT ARGUMENT PHENOMENA

Reflexive

There are four reflexive pronoun prefixes, as seen below. (Second person singular and plural have merged with third person singular and plural respectively.)

SG		PL	
1P (g) iñ-		(g) +r-	
2 P /3P	(g)+-	(g)†n-	

The reflexive pronouns may co-occur with subject pronouns. The reflexive pronouns are used for simple reflexive, reciprocal, or for the passive. A few verbs always occur with the reflexive prefix.

giñ-ñfíd^yi áánt ntid^yá-karol-ktdt myself-see I see-INSTR-with I see myself in the mirror.

vffš-ka-tal gɨn-gɨ-gɨfgɨ aipá-koga all-STAT-PRONR themselves-RDP-hit all-towards PL directions

They all hit each other.

ffgi ááni giñ-gffgi ááni alone I myself-hit I I hit myself.

káši=a=p†=t g†-ái áápi g†-yúúkuši already=B=you=COMPL yourself-put you your-clothes on

You already put on your own clothes.

plid^yuru gi-kffsimai ffgi fgai PN himself-scratched alone he Peter scratches only himself.

Passive

Passive is always marked with a reflexive prefix:

gi-aag-áva lñ-š=imí-ági REFL-must-AFF I-SUBR=go-UNR I ought to go.

Cf. áágai as used with the whole set of reflexive pronouns, in which case it means to be needed:

ali-ši iñ-áágai ááni vavili-ana very-INTNS REFL-need I PN-in I'm really needed in Baborigame.

alî-ši ir-áágai aatími vavfli-ana very-INTNS REFL-need we PN-in We're really needed in Baborigame.

Verbs which always occur with reflexive prefixes:

giáágai to begin (cf. COY 16) giááhagii to begin gitóúmadai to get well

> dai amááši káši iñ-t^yóúmada-n táda áán† and then already REFL-feel-POT felt I better

And by that time I felt better.

suúši víááka-tadai pari imó kóbai dan baivušt^yááma Jesus have-PAST about one twenty and ten CONT

uumīgi áid^yiši gi-áágai gi-aadúíñ-d^yaga years when REFL-began his-work-ABSTR Jesus was thirty years old when his work was begun.

Unspecified Arguments

ga- UNSPEC POSSR/INDOBJ/OBJ of VERB/OBJ of P
m+= ~m= UNSPEC SUBJ

The unspecified possessor pronoun ga- is prefixed to nouns. It co-occurs with the suffix -ga POSSD.

ga-ma-mááti-tul-d^ya-dami-ga UNSPEC-RDP-know-BEN-APPLIC-AG-POSSD REPET

someone's teacher

mo dâha ga-s61-ga (gog66š1) there sit UNSPEC-DOM-POSSD dog There's someone's dog.

The unspecified indirect object pronoun ga- is prefixed to ditransitive verbs.

ga-66toš-d^Yi áán† imó takúku kaayá-mu UNSPEC-sent-APPLIC I one chicken street-to I sent a chicken to the village.

To see the function of ga-, compare the preceding sentence with the following:

óótoš-d^yl áán+ vúáána +mó takúku sent-APPLIC I PN one chicken I sent John a chicken.

The unspecified object pronoun ga- is prefixed to transitive verbs. Since ga- sometimes occurs along with an explicit object, the meaning of UNSPEC here must be qualified. ga- is not used with a specified object when that object is made emphatic or is contextually identified as the specific center of interest or comparison. Note the contrast in the following sentences.

mo daráha mui 6ódami ga-yíf-i (naváít^yi) there sit many people UNSPEC-drink-PRES corn PL liquor There are a lot of people drinking (corn liquor).

yff-i viíba-i ááli naváít^yi yff-i drink-PRES milk-ABS children corn drink-PRES liquor

gf-gir-du-kidi RDP-big-QNT-AG PL Children drink milk, adults drink corn liquor. The use of ga- with a specified object may convey some type of partitive notion as seen with verbs such as eat and drink. With verbs such as burn or curse which resist a partitive interpretation, ga- does not co-occur with a specified object.

fgai mfhi eskúéla he burned school He burned down the school.

go-kffli kffda-i gf-ooñf-ga the-man cursed-PRES his-wife-POSSD own

The man cursed his own wife.

Swallow a pill contrasts with eat and drink in that pill-swallowing tends to be an all-or-nothing affair; thus ga- cannot be used in the following sentence where the object is specified:

fgai baá imó doad^Yi-gami pastíya he swallowed one cure-AG pill He swallowed a pill.

But ga- does occur with baá in the following sentence where the object is not specified.

go-<mark>66dami ga-ti-tf</mark>ñi-a-ki-d^Yi the-people UNSPEC-RDP-mouth-STAT-TRNSR-APPLIC REPET VR

ga-baá dan vúááyi UNSPEC-ewallow ? do/make People open their mouths wide to swallow.

The unspecified postpositional object $\ensuremath{\mathsf{ga-}}$ is prefixed to postpositions.

ga-báít^yi dáha UNSPEC-in sit front of

ga-tbfgl dáha UNSPEC-behind sit It's behind someone.

It's in front of someone.

The unspecified subject pronoun $m + \infty$ occurs as a proclitic to conjunctions and WHW.

mi=tai tfhai i-6ódami sai íími-na šíááko vuvááha UNSPEC=and order the-people that go-POT where come SUBJ out PL PL mt=sal fkald a-na UNSPEC=so count-POT

SUBJ that

And they ordered the people to go to the place where they were born so that they might count them.

QUESTIONS

Yes/No Questions

=ši Q ő Q ≯rising intonation Q mal=šíú not=no TAG O

=\$i always occurs preceded by a SUBJ pronoun clitic. The Q CLT group occurs either following a verb or following certain particles which precede the verb. It also occurs following nouns, adjectives, pronouns, and adverbs.

koi=pi=ši slept=you=Q Did you sleep?

kól=pi=ši enake=you=Q Are you a snake?

vi+ñi-ga=Ø=ši tasty-ADJR=it=Q Is it good tasting? fmal=g=ši id^yi utúdai=g=ši
another=it=Q this new=it=Q
Is this another one, is it
new?

++gſ=p+=ši dáhâ
alone=you=Q sit
Are you alone? (cf. also BIRD 1; COY 7, 8.)

 \eth always occurs at the end of the clause with extra-high tone (intonation).

ááp1 o
And you? (response to How are you?)
(cf. also BIRD 4; COY 8.)

Rising intonation on the final syllable of the last word or particle in a clause is another way of indicating a question.

```
káaká mááši góő
taste appear that
Q Q
How does it taste? What does it look like?

(cf. also BIRD 7, 17.)

čigíá mááši go-yóóšigai mai=šíű
pretty appear the-flower not=no
The flower is pretty, isn't it?
```

Some verbs occur in interrogative sentences with no overt marker.

mááši go-t†šívagai úúvai góóvai appear the-lizard smell that
What does the lizard one look like? What does it smell like?

túige go-óódami
character the-person
What kind of a person is he?

WH Questions

```
mááškidi ~ maakidi
                                which one?
duukátai ~ dúúka ~ dúú
                                how?
túíga-ko
                                when? (at what particular time)
tuí=ši ~ tuí
                                why?
tumáá≕ši ~ tumá
                                what?
v=óórai ~ vóór
                                who?
v=aakoga ~ vááko ~ váá
                                where?
                                when? (past)
v=++k1
v=ffkidyu ~ vffki ~ vff
                                how many?
v=ffšiga ~ vffsi ~ vff
                                how much?
v=ffš-kidi
                                when? (future)
v=úíd<sup>y</sup>uru
                                what size?
v=uu
                                what time?
```

Question words occur initially in the sentence. In embedded clauses they are preceded only by the subordinating proclitic $\S i = -i \S = .$

The first two WHW are single morphemes.

```
máák†d† áága-i
which wænt-PRES
one
Which one does he want?
```

dúú taapáni-na go-ááyi ffgi how break-POT the-olla alone How could the olla break by itself?

túíga-ko occurs with the temporal suffix -ko.

túíga-k=†r tasá-ga-d† when-TEMP=be day-POSSD-his When is his saint's day (birthday)?

The next two WHW occur with the Q CLT =\$i.

tul=p+=ši iñ-gffg+ why=you=Q me-hit Why did you hit me?

tumáá=ši g66 dai 6d dán káát† what=Q that and rock on lie What's that on the rock?

The remaining WHW occur with subject pronoun clitics plus a set of aspect clitics, in the following order: SUBJ=ASP=WHW.

	SUBJ		ASP	
	SG	PL		
1P	n∼an∼iñ	tit ~ ti	t s	COMPL QUOT
2P	p ~ pi	m ∼ m÷	ši	DUB
3P	V /	~ Ø		

n, p, v, tit, m occur before a vowel. an, pi, \emptyset , ti, mi occur before a consonant. Iñ occurs before š.

n=66r áán† p=66r áápi
I=who I you=who you
Who am I? Who are you?

v=66r g66vai t†t=66r aatfm†
he=who he we=who we
Who is he? Who are we?

m=66r aap1m+ you=who you PL PL Who are you PL?

Ø=t=66r dá1vusai ††k1ápo
he=COMPL=who passed earlier
Who went by earlier?

dai aapími ő mi=káít^Yi an=s=66r ááni and you Q you≠aay I=QUOT⇒who I PL And you PL? Whom do you PL say that I am?

\$1=66r máát† iš=t^Yumáá=ši-ka-mu góóvai DUB=who know SUBR=what=Q-STAT-FUT he Who knows what he will turn out to be?

p=áá lmí ágai you=where go will Where are you going? pi=t=iikî d^yîvia you=COMPI=when came PAST When did you come?

Ø=\$i=ff\$-k+d+ imf-mu g66 he=DUB=how-with go-FUT he much

when FUT

When will he go?

v=úſd^Yuru g†-sóſ-ga miišſt^Yu he⇒what your-DOM-POSSD cat size What size is your cat?

v=GG dGGku ŠIvI
it=how time now
 much
What time is it now?

By this analysis vff preceding dúúku > vuu by vowel harmony. Some of the WHW take verbalizing suffix -ka plus verb inflections and auxiliary verbs ágal is going to and agáitadai was going to. Cf. the example above involving išt umáášikamu What will he be?

ti=t=ffki-d^yu-ka-tadai aatimi takávo we=COMPL-how-QNT-STAT-PAST we yesterdau CONTmanu

How many of us were there yesterday?

ší-ffšia-ka-mudai óna-i iñ=š=mai ášt^ya-mudai ááni DUB-how-STAT-PAST salt-ABS I=if=not spill-PAST PERFHow much salt would there have been if I had not spilled it2

How many and how much also are reduplicated for distributive:

m=ffh-iki áága-i aapím÷ dúlse uou=RDP- how want-PRES uou PL DISTR manu PLHow many candies do each of you want?

IMPERATIVES

The positive imperative is signalled either by a suffix or by the bare verb stem, or in some cases of the plural, with a particle. The negative imperative uses the bare verb stem preceded by mai not.

IMP SG ∽ñ î IMP PL -vuraì IMP PL virai

náa An interjection used for Here (take this)!. Can

be used alone or preceding a verb.

kɨkíva-ñi tabíá-dɨrɨ îîmi-vurai aapîmi stand-IMP here-from go-IMP you uр PL PLPLGet out of here! You go!

The plural imperative particle viral ~ vir appears as the first element of a clause or as an enclitic to the first element.

maráá-t ágal ∔mó alí gffli v†rai ai-ooñi-aa uour-wife-POSSD child-make will one little boy TMP PL

294 BURTON BASCOM

vúáána tfft†i g†n-mára PN call your-child PL

Your wife will have a child and you PL will call him John.

Either of the two nonperfective verb stems, and Stem I plus -i PRES, can be used for the imperative (cf. STEMS).

báí bífkai go-doad^yí-ga-mi this carry the-cure-ADJR-NR way Bring the medicine here!

Bring me the hat that used to be mine!

odá-piga-ñi go-bávi rock-PRIV-IMP the-beans Clean the rocks out of the beans!

Plural

Plurals are formed by (1) reduplication of initial (C)V(V); (2) lengthening of V; (3) shortening of V. Associated changes involve a shift of tone; v > p; or some combination of the above processes. (4) Some forms manifest no change. (5) Some

borrowed forms (and possibly one native word) reduplicate medially and/or have some of the other pluralization features listed above. A complete analysis of the morphophonemic rules will simplify the rules for pluralization.

POSSESSIVES

Morphology

Possessor affixes:

	SG		PL	
1P	(g) iñ-	my	(g)+r-	our
2P	(g)+-	your	(g)+n-	your
3P		-d i	his, thei	!r
UNSPEC		(g)a-	someone's	, the

In addition to the possessor pronouns there is a suffix $\neg ga$ occurring with domesticated animals, persons, and alienable things.

giñ-kii my-house my house dif-di mother-his his mother

ga-ma-máát†-tul-d^ya-dami-ga UNSPEC-RDP-know-CAUS-APPLIC-AG-POSSD someone's teacher

gl-mára †pfga-dad† t††gíd^yu <u>adelaido bueno dubles</u> daíd^y† my-child first-PRSNR be PN and named

go-t6-r-dadi tiigid^yu rosario bueno dubles dai two-?-ORD-PRSNR be PN and named

ga-dif <u>vuañíta dubles kiñones</u> UNSPEC-mother PN POSSR My first child is named Adelaido Bueno Dubles; my second child is named Rosario Bueno Dubles; their mother is named Juanita Dubles Quiñones.

giñ-maá pild^Yúru gi-baví-ga me-gave PN his/-beans-POSSD your Peter gave me his/your own beans.

bor-îmi-i dorôli gi-ooñi-ga iimádu this-go-PRES PN his/-wife-POSSD with way your Here comes Dolores with his/your wife.

bor-îmi-i doróli ooñi-ga-di fmal fimádu this-go-PRES PN wife-POSSD-his another with way Here comes Dolores with another's wife.

bor-îmi-i dor611 ga-ooñî-ga iimâdu this-go-PRES PN UNSPEC-wife-POSSD with way POSSR

Here comes Dolores with someone else's wife.

Syntax

In a possessive noun phrase the POSSR pronoun prefixes are obligatory. An independent pronoun may also occur as the first constituent of the possessive noun phrase. Possessed domesticated animals do not take the possessive affixes directly. They are preceded in the noun phrase by $\mathfrak{s}6i\mathfrak{g}\mathfrak{a}$, which takes the POSSR pronouns and the POSSD suffix $\mathfrak{-}\mathfrak{g}\mathfrak{a}$. This construction may occur in place of the possessed animal.

áán iñ-šó1-ga ašñít^yu my my-DOM-POSSD burro my burro

fgai giñ-ffši imó giñ-šói-ga kaváyu he me-stole one my-DOM-POSSD horse He stole one of my horses. go-kffli kffda-i giñ-šói-ga the-man curse-PRES my-DOM-POSSD That fellow curses my mule (or any animal I own).

Inanimate objects may take the possessive affixes directly or they may be preceded by tuid, which, if present in the construction, takes the POSSR pronouns and the POSSD suffix -ga. This construction may stand alone in place of the possessed object.

ka=mii áán iñ-t^yúíd^ya-ga vááki already=burned my my-INAN-POSSD house My house already burned.

ka=m†í áán im-vááki My house already burned. ka=m**†í** lm-vááki My house already burned.

ka=mií áán iñ-t^yúíd^ya-ga Mine already burned.

Recursion is allowed:

stilí-kidi či-gíá mááši piid^yúru ooñí-ga-di straight-with INTNS-EMPH appear PN wife-POSSD-his

mará-di soi-gá-di maa-mára-di moo-mó-di child-her DOM-POSSD-his RDP-offspring-his RDP-head-their PL PL

Peter's wife's child's pet's offsprings' heads are really cute.

POSTPOSITIONS

There are free postpositions and bound postpositions. The free postpositions occur following the object. When a free postposition occurs with an object pronoun, the object pronoun is attracted to it as a prefix.

Free postpositions include simple forms and complex forms. Some complex forms are composed of body parts plus postpositions. Others are composed of a locative base plus a postposition or other combinations.

Simple Free Postpositions

úta under

daáma over, above, on

iimadu with (accompaniment)

šikóli around saagíd^ya among, in viitári for bait^yfki ahead of iibfgi behind

> múá-vurai go-táíšoli dai mo d†vfrai úta yáása kill-IMP the-pig and there ground under bury PL

Kill the pig and bury it under the ground!

mo kurárai daáma dáha go-pišfli there fence on sit the-chipmunk There's the chipmunk sitting on the fence.

múi óódami gin-fmpagi i-paavóra šikóli many people RCPR-gathered that-PN around Many people gathered around Paul.

móvai go-úún saagíd^Ya aimfrai i-takúku there the-corn in walk the-chicken around

The chickens are walking around there in the cornfield.

savfli áánt válk ímai glñ-ooñí-ga vtitárt bought I three squash my-wife-POSSD for I bought three squash for my wife.

váák; †bfg; kaát† †-kúág; house behind lie the-wood The wood is behind the house.

Complex Free Postpositions

Some complex postpositions are composed of body parts plus -na in, at, -diri away from, or -pi in.

taagi-ña vui-d^yfrt
chest-at eye-away
in front of from
in front of (facing)

vúí-t^Ya-pi Cf. tasá-pi in the sun eye-?-in ††ká-pi in the shade in front of, in presence of

vááki t^yaagí-ña kaát† †-laapíši house in lie the-pencil front of

The pencil is in front of the house.

vffši 66dam! vúí-t^ya-pi ga-nfí all people <u>eye-?-in</u> UNSPEC-sang in presence of OBJ

He sang in the presence of all the people.

Other complex postpositions are composed of a locative base plus -ana at, in, -iri in, at, or -aba on (attached to).

ab-ána right-on next

tr-éba inside-on inside, between, middle

to
beside (touching),
on (attached to)

sonó-ána near-at beside, next to

all kahóñi <u>ab-án</u> dáha go-rádio little box beside sit the-radio The radio is beside the box.

giñ-kóko giñ-onóma †móko giñ-<u>†r-ába</u> me-hurt my-rib one me-inside One of my ribs hurts inside of me.

túku vuhí-di <u>ir-ána</u> black eye-his inside The middle of his eye is black.

vááki <u>sonó-án</u> kaát† †-vaakáši house beside lie the-cow The cow is lying beside the house.

Two complex postpositions appear to be composed of N plus -ana in, at and N plus -iri in, at. The analysis of one of these is ambiguous. It could be a locative use of gookifri

second, in second place, behind. More likely it is from gook1-d+ his footprint.

ki-d^yi-g-ana /ki-d^y-ana house-his-POSSD-at house-his-at outside

gooki-fri footprint-in behind ug1-d^y-ana finish-his-at at the edge of

dai vavfli ugʻ-d^Y-ana vʻiáa and wild at left fig edge of

And they left him on the outskirts of Wild Fig Village.

A postposition may occur preceding the object and may be discontinuous. This may be for focus or it may be to avoid piling up postpositions after the object.

vffši šikóli íí kurárai ugíd^yi-a-mu all around went fence edge-LOC-to He went all around the edge of the fence.

bait^yfki 11 áánf giñ-šukúli ahead went I my-younger siblina

I went ahead of my little brother.

kid Yana kaáti go-laapíši go-kahóñi outside lie the-pencil the-box The pencil is outside of the box.

trána vááki koší-mu alí gffli inside house sleep-FUT little boy The baby is going to sleep inside the crib.

The above postpositions occur with the object pronoun prefixes. The resultant form is optionally preceded by the corresponding independent pronoun.

giñ-taagíña me-in front of in front of me giñ-†bfgi kaát† áán iñ-šóíga me-behind lie my my-pet My dog is behind me.

áápi gi-sonóáñ yóma kaáti go-sárui you you-next more lie the-hoe to

The hoe is closer to you.

gim-pu-púi-d y iri guúka ši-ší n ora RCPR-RDP eye-away stand RDP-lady from facing

The ladies are facing each other.

giñ-gooklfrt 11mti vtiši giñ-šu-súkuli me-behind go all my-RDP-younger PL PL sibling

All of my younger brothers and sisters are walking behind me.

áán iñ-šikóli daráha múi ááli me me-around sit many children PL

Many children are around me.

vúáa ááni imó išt^yumááš! áápi gi-viitári brought I one something you you-for I brought something for you.

g†r-saagíd^ya u*e-among* among us

together.

ga-iimádu UNSPEC-with OBJ with someone

Some of the free postpositions occur with RDP, lengthening of V, and tone shift (cf. BASIC INFLECTIONAL ELEMENTS, \underline{Plural}) to agree with the plural object.

gin-so-sónoan iimi-i
RCPR-RDP-near go-PRES
PL PL
They are walking close

gɨn-áában guúka go-úúši RCPR-close stand the-tree beside PL The trees are standing right next to each other.

gin-vu-púid $^{\rm Y}$ iri guúka go-ki-kíili RCPR-RDP-facing etand the-RDP-man $_{PL}$ $_{PL}$ $_{PL}$ $_{PL}$ The men are standing face to face.

There are a number of location words which are free postpositions but do not take the object pronouns. A complete description of these forms would involve a careful study of all location words. The following are illustrative:

amákoga towards amádiri from apákoga towards apádiri from taiákoga upwards utanákoga downwards tapákoga this way koid^yamákoga downstream

> saapátu-ku dáán dúúku čivuavúáñ-diri ihi aatími Saturday-TEMP <u>over time</u> PN-from went we noontime

meehiko amákoga PN towards On Saturday we left Chihuahua for Mexico.

bffkat^yi ááni kóági giñ-kíl amádiri carry I firewood my-house from I carry firewood from my house.

ga-óhai ááni ogíš apádiri siilíš apákoga UNSPEC-write I left from right towards INDOBJ I write from left to right.

kóko giñ-t^Yoóna tai-ákoga hurt my-knee up-towards (My leg) hurts from my knee up.

mai kóko giñ-t^yoóna uta-n-ákoga not hurt my-knee down-at-towards It doesn't hurt from my knee down.

Some complex postpositions occur as possessed nouns and combine with other elements to form compounds.

g|ñ-†rána-ga my-inside-POSSD my insides giñ-utána-ga my-under-POSSD my underclothes 320 BURTON BASCOM

giñ-yúúkuši utána-ga giñ-daamána-ga my-clothes under-POSSD my-over-POSSD my underclothes my outer clothing giñ-yúúkuši daamána-qa qiñ-út bakúli my-clothes over-POSSD my-under pants my outer clothing my underpants giñ-d^yáám vasára-ga utána-ga-di giígi shirt-POSSD under-POSSD-his lard mu-over my shirt lard settlings daamána-ga-di naváít^yi bait^Yf kiáá-kami ahead stand-AG over-POSSD-his corn chief, leader liquor head on corn liquor/beer ki-t^yaaqiña sonfr gúúka-kami house-in near stand-AG frontPLlesser chiefs ofdoorway †ran-úku irán tukári middle-week middle night (2) midnight midweek, Wednesday

Bound Postpositions

Bound postpositions occur suffixed to nouns, pronouns, adverbs, and free postpositions.

If anyone is ashamed of me...

I came from Deadwood Village on foot.

When -kidi occurs with adverbs or with adjectives, it can be interpreted as -kidi with or -ki-di AG.

STAT-NR

• go-ikúši vɨɨgí-kɨdɨ the-cloth red-with/AG the red cloth This could be: the-cloth with-redness the-cloth the-one-whichis-red siili-kidi straight-with/AG really This could be: with straightness that which is straight

DEMONSTRATIVES

There are five demonstrative pronouns. All function as third person independent pronouns and may stand alone as the subject or object of a sentence. They indicate distance from the speaker ranging from proximal to distal.

	SG/PL		
PROX	íď i	this one, these	
\$	gốvai	that one, those	(nearby)
DIST	Fgal	that one, those	(far)
	(g) fmai	the other one	
	(g) áa	others	

Truncated forms of the first three serve as definite articles. They are prefixed to nouns.

PROX	i-)	
\$	go- }	the
DIST	÷-)	

Six complex demonstrative pronouns are derived by combining each of the first three with (g) fmal the other one and \acute{a} a the others.

PROX	id ^y i~gfmai	this other one	id ^y i-gáa	these others
‡ DIST	go-g∓mai	that other one	go-gáa	those others
DÍST	i-qimai	that other one	+-gấa	those others

siili-kidi vitñi-ga id^yi ffkoli <u>straight-with</u> flavor-ADJR this orange <u>really</u> This orange is really tasty.

one bigger and the other smaller

ADVERBIAL DEMONSTRATIVES

Adverbial demonstratives include those elements referring to manner, time, and location. For each of these classes we will list the WHW and the any form corresponding to the members of the class.

<u>Manner</u>

duukátai ~ dúúkai ~ dúúka ~ dúú

tomašduukátai
póva! ~ póva ~ pov- ~ popo-dúúkai
a-dúúkai
imá dúúkai
ipán dúúkai
again how

how? (cf. QUESTIONS for inflection of these forms) however thus this way this other way another way like, in the way

duukátai lduuñí-mu áán† íd^yi aa-dúíñ-d^yaga-i how do-FUT I this ?-make-ABSTR-ABS /do work

How shall I do this work?

ffgi pi=š=d^Yuukátai ipilíd^Yi alone you=DUB=how want /only just as you'd like to

toma-š-d^yuukátai even-DUB-how however (you may want to) poval in-t^yi-tida-l thus me-RDP-say-PRES CONT thus he said to me (that's what he said to me)

pordűű gfá čúu a-dűűkai gfá thus-how EMPH no this-how EMPH other way

That way NO! (Do it) this way.

tmå dúúkai id^yuí fgai one how did he other He did it another way!

id^yuuñí-ñi áápi po-dúúkai iš=d^yúúkai gi-tina-i ááni do-IMP you thus-how SUBR=how you-order-PRES I Do it as I told you to.

Time

When? involves a variety of forms and occurs as first element in the clause. It occurs with person and TNS/ASP clitics.

viłkíd^yi when? PAST vffškadi when? FUT vúú dúúku what time is it? túlgako when? FUT (at what particular time)

The temporal adverb when also has forms for PAST, FUT, and time of day, some of which correspond to the WHW for when?.

áíd ^y ŧši	when	PAST	(at the time)
šíffškadt	when		(at any time)
šíúú dúúku	when		(at what specific hour)
tuigako	when		(at the time expected)
tomašíáíd ^y i	whenever	FUT	(within a given period)
tomašíffškad†	whenever		(anytime)
tomašíýú dúúku	whenever		(at whatever time of day)
tomašt ^y úigako	whenever	FUT	(at whatever time expected)

There is a group of related introducer elements ranging from temporal adverbs to conjunctions with no clear dividing line between these two classes.

áíd ^y †ši	when	PAST	(at the time, an INTR in time clauses)
áíd ^y i	then	PAST	(at that time, an INTR in a time clause, referring to the time specified by aid'+%i in the preceding clause)
dai dai áíd ^y i	and and then		
dáíd ^y i	and chen		(contraction of dai áíd ^y †)

All of the above forms take PERS and TNS/ASP clitics. Enclitic =ši, which may be DUB (cf. proclitic ši= DUB with WHW) attracts the PERS markers to enclitic position. Other PERS and TNS/ASP markers are proclitics.

Proclitics

n=áíd ^y †	then I then you then he, they then we then you PL	an=t=áíd ^y †	then I	PAST
p=áíd ^y †		p†=t=áíd ^y †	then you	PAST

QUANTIFIERS

Quantifiers precede the noun they modify and may be preceded by NEG/INTNS and may stand alone in their pronominalized forms. When they occur as the subject of a sentence, they follow the verb. They show agreement in number with the noun they modify and with the verb they relate to as subject or object.

ADJECTIVES

Morphology

Some adjectives consist of only a stem:

váági	wet
gáki	dry
vffti	heavy
tốñi	hot
ffp1dY1	cold
tóha	white
túku	black
v i fgi	red
vúááma	yellow
t i i dốg i	green/blue
gíff	fat
gaakîñi	skinny
utúdai	new

There is a group of adjectives which end in -11. This morpheme (?) has not been otherwise identified. Since it also occurs on a number of nouns we hesitate to call it "adjective" or "adjectivalizing."

```
vigíši-li fine, small
suusúku-li tender
```

Others which take -11 will appear below with additional suffixes.

Some adjectives take the stative suffix -ka.

vúúsa-ka rough kavóra-ka round dapá-ka smooth móí-ka soft kavá-ka hard guvú-ka strona kavú-li-ka short komá-li-ka thin

Some adjectives take the QNT suffix -du.

gf-du big al1-d^Vu little kiigá-du good tivf-du long

-ga is an adjective or an adjectivalizing suffix occurring with words which appear to be basically adjectival, with nouns, with verbs, and with borrowed adjectives.

Syntax

Adjectives occur in two distinct syntactic relationships: as the complement in a VERB-COMP-SUBJ sentence in which the verb is zero (cf. BE/HAVE/DO, BE); and as an attributive in a noun phrase, preceding the noun it modifies. Particles which precede and modify adjectives include: all very, -\$! INTNS, bal a little bit, sitlikidi really, truly, palipi=oma (a little bit=COMPAR) less, vaami=oma (more=COMPAR) more. Adjectives as complements occur in their basic form: unmarked, or with -1!, -ka, -1!ka, -du, or -ga.

takávo alí tildógi go-váso-i dai šívi alí gáki yesterday very green the-grass-ABS and today very dry Yesterday the grass was very green and today it is very dry.

all vigiš†li id^Yi váso-i dai ali kaváka góvai very fine this grass-ABS and very hard that This grass is very fine and that grass is hard.

bái gfdo góvai dai omáliga
a big that and mean
bit one
He is a bit large and mean.

A few adjectives occur before the noun they modify in a NP. There are others which occur before the noun in names of types of corn, beans, trees, etc. These latter appear to be loosely bound compounds.

ipfga digávusa-i aatími go-gff áki dai go-t6-ri first pass-PRES we the-big stream and second-?-in PL

go-alí áki the-little stream First we crossed the big stream and afterwards the little stream.

kavá vásoi hard grass
vipf úkui red pine
tuutú úkui black pine
totó úkui white pine
vipf úúnui red corn
titffdo úúnui blue corn
tuutú bávi black beans

DEFINITE PRONOUNS

Independent

any-when

The independent pronouns may occur as the sole marker of the subject or as the optional pronoun copy of any of the dependent pronouns (cf. BASIC SENTENCE STRUCTURE, <u>Pronoun</u> Copies).

	SG		PL	
1P	aán i	I	aatfm i	we
2P	aápi	you	aapîm i	you
3P		DEM		

In the normal order of elements in the sentence the subject pronoun follows the verb. Where the subject is in focus it comes first in the sentence. In complex sentences the subject pronoun occurs with one clause and may be dropped from the other clause or clauses as long as the subject remains the same.

ka ugí-mu ááni already eat-FUT I I'm going to eat now. aáni-v fgai dai ñíóóka-i mai=šíú fmai fgai dai I-EMPH he and speak-PRES not=no another he and

ñ**íóóka-**i speak-PRES

I am the one who is talking, not someone else.

 $\operatorname{all} d^{Y}$ iši miká-r vuváka $\operatorname{all} d^{Y}$ i kiigá-ki-r 11mil aatími when there-at left then good-STAT-in go we PL PL

dai kitgá-ki-ri ááyi šiaako íímia r≖ágai and good-STAT-in arrived where go we=INTEN PI.

On leaving there we travelled in good shape and arrived in good shape where we were going.

Dependent

There are two sets of subject clitics which occur as proclitics to WHW and CNJ. Set I occurs before vowels, and Set II before consonants (i \tilde{n} = before a palatalized C).

SET I	SG 	PL	
1P	n= I	t † t=	we
2 P	p= you	m=	you they UNSPEC
3P	v= he,	they	
SET II			
1P	an=/iñ= I	t+=	we
2 P	p†= you	m†=	you they UNSPEC
3Р	Ø he,	they	·
			

Cf. PARTICLES AND CLITICS, Subject Clitics; QUESTIONS, WH Questions; ADVERBIAL DEMONSTRATIVES; and COORDINATION.

bo ma-máákova tasá-í-kɨdɨ íh-i mi=t=ai UNSPEC=COMPL=and from RDP-four day-ABS-with RDP-went PLSUBJthen PL

And after eight days they went.

áíd^y=ir túkamid^yiri-ka-tadai mi=ši=íkal-d^y then=be first-STAT-PAST UNSPEC=SUBR=count-APPLIC CONTSUBJ

ágai óódami INTEN people

That was the first time they had counted the people.

áíd^yi mi=ši=fkali †-66dami at UNSPEC=SUBR=counted the-people the SUBJtime when they counted the people

There are two other sets of subject clitics, which occur with verbs. Set III are either enclitics (well attested) or proclitics (not so well attested).

SET III SG			PL	
19	=n†	I	≖timi we	
2P	=p i	you	=pim+* you	

նն=n÷ ate=I I ate. úú=p i ate=you You ate.

bií=timi autovús took=we bus We took a bus.

^{*-}pim+ is not attested but included by analogy (-pim+ < aapim+ you PL analogous to -timi <aatimi we).

pt=s=mai=t^yi kikiva nt=kapiña imóko
you=if=not=COMPL get I=elap one
INDF out
If you don't get out of the way I'll slap you.

Set IV are prefixed to the verb. First and second person singular and first person plural have been observed.

SET IV	SG	PL
1P	an- I	t i - we
2P	ap- you	?

masád† vusáí-ko an-imí-ági takú kúí-ko an-d^yiví-ági moon come-TEMP I-go-UNR rooster crow-TEMP I-come-UNR out

I'll go when the moon rises, I'll return when the rooster crows.

ti-gaága taí sabáí tigáá-na we-look fire see find-POT for if

Let's look for fire and see if we might find it.

aapīmi o mi-kāīt^yi an=s=66r aani you Q you-say I=Quot=who I You? Whom do you say that I am?

One other set of subject pronoun clitics occurs as enclitics to the AUX BASE preceding auxiliary verbs, and as proclitics to the auxiliary verb when the AUX BASE is not present.

SET V	SG		PL		
1P	=jñ	I		≖fr	we
2P	=pf	you		=m	уои
3P		_	Ø	he, they	
UNSPEC			= M	they	

imī=ā=iñ āgai go=B=I INTEN I'm going to go. im1=6=iñ agá1-tadai go=B=I INTEN-PAST CONT I was going to go.

ifmi=a=r ágai
go=B=we INTEN
PL
We are going to go.

Object pronouns occur prefixed to verbs and postpositions.

SG			PL		
1P	(g)iñ-	me	(g) ÷ r-	us	
2P	(g)+-	уоц	(g)†n-	уои	
3P		Ŕ	3		
UNSPEC		(g)a-	someone		

ááni giá giñ-óígida-i giñ-áámu I AFF me-love-PRES my-boss My boss really loves me.

áán fp† ga-t†káka-i !Š=d y ukátai †p†-duí I also UNSPEC-ask-PRES SUBR=how also-did I too asked what had happened.

giñ-bait^yfki îm+-i g+-sukúli me-ahead go-PRES your-younger of brother Your younger brother is walking ahead of me.

ga-†bfgi dáha UNSPEC-behind sit It's behind someone.

Possessor pronouns occur affixed to the possessed noun (see POSSESSIVES); reflexive pronouns occur prefixed to verbs.

SG PL (g) iñ-(g) irmy, our, ourselves myself (q) inyour, your, yourselves, yourself, their own, his own, themselves himself. -d÷ his, their POSSR 3P UNSPEC gasomeone's, the POSSR

káši=a=n=ta giñ-aí (áán+) giñ-yúúkuši already=B=I=COMPL myself-put I my-clothes on

I already put on my clothes.

káši=a=ta g+-a1 (góvai) g+-yúúkuši already=B=COMPL himself-put he his-clothes on own

He already put on his own clothes.

káši=a=ta g†-aí (góvai) g†-šíffgi yúúkuši-d 9 † already=B=COMPL herself-put she her-older clothes-her on own sister She already put on her older sister's clothes.

Certain verbs always take the REFL prefix:

gi-áágai to be needed gi-ááhagii to begin gi-táúmadai to get well

> alíf-ši gi-áágai góvai vavíli-ana very-INTNS REFL-need he wild-at fig

He is really needed in Baborigame.

káši g†r-ta-táúmadai-mi aatfm† already REFL-RDP-get-PROG we PL well We are already getting well.

REFL PF is used for passive:

kifga gi-mááti lš=ir vávoi good REFL-know SUBR=be true It's well known that it's true.

STEMS

Verb stems undergo suppletion and/or reduplication to indicate plural subject or object and also for REPET/CONT/DUR action. In some verbs the suppletion is complete, in others it is partial, and in still others suppletion and reduplication combine. Intransitive verbs reduplicate for plural subject. Transitive verbs reduplicate for plural object.

Number

Suppletion in intransitive verbs:

CC CLID 1 DI CLID 1	SG SUBJ	PL SUBJ	
CC CLID 1 DI CLID 1	múúkui kaát† k†fka d ^y ívia mfrai aimfrai gffs†i dáívusai dáha	kőőyi víftt gűűka dáda vőőpoi aihőpai/ahíópai suulígti d†gávusai daráha	die lie down stand up come run walk around fall pass by be seated
múúkui kóőyi die kaáti vííti lie down kifka gúúka stand up d ^V ívia dáda come mfrai vóópoi run aimfrai aihópai/ahíópai walk around gífsii suulígii fall dáívusai digávusai pass by dáha daráha be seated	dáíva vañíg i i	daráíva vaapáíg†i t††tfíd ^y ai	sit get up
múúkui kóóyi die kaáti víftt lie down kifka gúúka stand up d ^V ívia dáda come mírai vóópoi run aimfrai alhópai/ahíópai walk around			
múúkui kóőyi die kaáti vííti lie down kifka gúúka stand up d ^V ívia dáda come mfrai vóópoi run			
múúkui kóóyi die kaáti viiti lie down kifka gúúka stand up d ^y ívia dáda come	aimfrai	aihópai/ah1ópai	walk around

műűkui kőőyi die kaáti vííti lie down	ktika d ^y ivia		_
		vfft†	
20 2000 FT 3000	múúkui	kốốyi	die
CC CLID 1 DI CLID 1	SG SUBJ	PL SUBJ	

Suppletion of second element of compound form:

SG SUBJ	PL SUBJ		
bíúgi-mu kooší-mu tonó-mo navá-mu ibí-mu uvá-mu	bíúgi-koi kooší-koi tonó-koi navá-koi ibí-koi uvá-koi	be be be be	hungry sleepy thirsty drunk tired cold
baá-mu	baá-koi		angry

Suppletion in transitive verbs:

SG OBJ PI OBJ múááyi kóóda i k111 vűűkai vűíd^yai vűúkait^yai totőíd^yai dad^yíd^yai bfhii bfid^yai grasp bring bfkait^ýai tikíďai carry bet divid visit

Reduplication in verbs is similar to RDP in plurals of nouns and adjectives in that a shift of tone and v > p accompany the reduplication of initial syllables.

Reduplication in intransitive verbs:

SG SUBJ PL SUBJ îm†i 11m+i go uutýv†i oid^yága g†lbfšt^yai úútyvii óíd^yaga trip live g+îîb+št^yai rest váftivii vapáftivil bathe tudákii tuutúdakii dance

Reduplication in transitive verbs:

SG OBJ PL OBJ biid^yai bibîd^yai feed kustivi kukúúsp†i load savfdai sápidai buydigárai didiqarsai/didiársai dig

Aspect

Reduplication for REPET-CONT-DUR action of verbs:

Nonrepetitive	Repetitive	
váák† i	vapák t i	enter
gffrai_	g†gffral b†bfkait ^y al	grow
bfka <u>i</u> t ^y ai	b i bfkait ^y al	grasp
gffraí bfkait ^y aí bííd ^y ai	bib íá dai	feed
kóósai	kokósol	sleep

vffš t^yása-i mo va-pák† áán all day-ABS there RDP-enter I REPET

Every day I go in there.

vffš t^yása-i gi-gffra-i go-áki all day-ABS RDP-grow-PRES the-stream REPET

Every day the stream rises.

cf. vffš t^Yása-i gffli-mi go-tilígi all day-ABS grow-PROG the-wheat Every day the wheat grows.

mai=t^Yi fpid^Yi bi-bfkait^Yai
not=COMPL quit RDP-grasp
INDF REPET
He doesn't quit holding on to it.

mai bi-bíá-da-mudai áápi mai gitlí-muda góvai not RDP-feed-APPLIC-had you not grow-had he REPET

If you hadn't fed him he would not have grown.

Some verbs always occur reduplicated. These verbs are inherently durative/continuative/repetitive.

totópikii boil
ninfírakai wait for
titfdai say to him (used before and after
quotation)
gigfísii (SG) swim cf. gifsii fall (SG)
susúúligii (PL) swim cf. suulígii fall (PL)

One other type of suppletion involves different forms for PERF vs. IMPRF and PRES/HAB vs. other TNS/ASP: vúááyi to do and kúááyi to eat are found only in the PRES/HAB tense-aspect. For other tenses and aspects of to do and to eat the verbs dúúnul to do, make and úúgal to eat, finish are used.

tumá vuááyi tumá duuñí-mu áápi what do what do-FUT you What are you doing? What are you going to do?

i-óódami kúááyi bávi vífš t^yása-i the-people eat beans all day-ABS Tepehuanes eat beans every day. vffši úú fgal tumált^yi all ate he tamales He ate all of the tamales.

 d^{y} ivia to come never occurs in the PRES tense. The verb imit to come/go is used as to come in the PRES tense.

šíóro-ko d^Yiví-mu fgai tomorrow-TEMP come-FUT he He will come tomorrow.

ka d^Yívia already came He already came. bir-imi-i this-come-PRES way Here he comes.

Stem Alternates

The following sets of forms represent a large class of verbs (Class I) which have three stem alternates. The formulas illustrate how Stems II and III are predictable from Stem I. Each of these stems occurs with a certain set of suffixes.

Stem I ... (C)(V)VCV- IMPRF
Stem II ... (C)(V)VCI- IMPRF/PERF
Stem IIIa ... (C)VV PERF
Stem IIIb ... (C)VI PERF

Stem II is predictable from Stem I by V > i. Stem III is predictable from Stem I by loss of CV and by (V)V > VV or Vi.

Class I verbs will be subclassified by the different ways in which their Stem III is formed. Class Ia verbs use Stem IIIa: (C)VV.

mááka-i maakí-mu maá

he gives (him) he will give (him) he gave (him)

```

INCORPORATION

A noun or an adjective (not always identifiable) may be used as the first element of a verb to indicate the instrument of an act.

Nouns:

m áíš ai máíñai	throw rocks (cf. mataka palm of hand) throw rocks (cf. PAP: ma'i object from
máíkarsal	throw rocks, shoot hand)
máíšapai	throw in to person
kííšanai	bite (cf. PAP: ki'i teeth)
k i ki-šapai mõi-t ^y ukasai kfi-t ^y ukasai	hold in teeth
mố1-tyukasai	hit with head, butt (Cf. mooy! head)
kf1-t ^y ukasai	kick (as mule kick)(cf. PAP: kil foot)
kfi-kakarai	kick (a football)
k+i-šai	step on

Adjectives:

va-kúánai	wash (cf. vagi wet)
vá-ft i vil	bathe
va-kfa	wring out
va-kát†	soak corn
va-ráíd ^y a	put water on food
va-šíbal.	dip
va-gúgid ^y a	rinse
va-húrai	sweat
vá-ga i	irrigate
va-súdai	blister

SYNTACTIC MARKING

Pronominal elements on the verb include a set of SUBJ prefixes; a set of DIR/INDOBJ prefixes; a set of REFL prefixes; and a set of POSSR affixes. See DEFINITE PRONOUNS.

Nonsubordinating grammatical suffixes include -ava AFF; -ñi IMP SG; -vurai IMP PL. On verbs which do not show SG vs. PL by suppletion or RDP (cf. STEMS) this suppletive suffix pair serves to distinguish SG vs. PL SUBJ.

as**†-áv**a laugh-AFF

Yes, he's laughing.

giñ-vúáápi-d^ya-ñi me-bring-APPLIC-IMP (You) bring it to me. kooso-áva sleep-AFF

Yes, he's sleeping.

giñ-vúáápi-d^ya-vurai

IMP

(You PL) bring it to me!

-vurai has alternate forms =av+r, which is attached to the element preceding the verb, and v+rai, which acts like a CNJ.

mal=t^ya=v†r oiñf-á-da not=COMPL=IMP move-?-APPLIC PL

Don't (you PL) move!

mó=a=vir iñ-d^Yaráš-d^Ya aapími there≂B=IMP me-put-APPLIC you PL PL PL You PL put it there for me!

tɨgī-ági vɨrai dadá-kai giñ-aagī-d^Ya n=ai áán÷ find-UNR IMP come-having me-tell-APPLIC I=at I PL PL that time

fpt mtt stad dúú túd-agi
also there ? ___-UNR

You PL go look for the child and when you find him and come back let me know so that I can go and worship him too.

Subordinating suffixes on verb include:

-kai/-tai while, as, when, since

-na POT -gi/-agi UNR

Cf. ADVERBIAL CLAUSES, <u>Temporal Clauses</u>; NONSYNTACTIC AFFIXATION, Aspectual.

NONSYNTACTIC AFFIXATION

Causative

-da ~ -d^yi APPLIC (VR/TRNSR/DITRNSR)
suffixed to Stem II (with some
exceptions)
-tuda ~ -tud^yi ~ -tu
-tulda ~ -tuld^yi ~ -tuli
-mada ~ -mad^yi
-ka
-oko REV

Several of these forms I analyze as complex units whose second element is -da APPLIC. Listing each of these with -da and with their stem alternates reflects the view that each is probably derived from a verb in Proto-Tepiman or P-UA.

-da as verbalizer:

kovő-ha-da-i dapákadai smooth, make smooth swell, become thick (cf. dapáka smooth) (cf. kovóka thick) kukűrušd^yai make the sign of the cross (cf. kurűši cross SP)

-da as transitivizer:

mu-múúka-da-i kuugá-di laapíši
RDP-die-TRNSR-PRES point-its pencil
REPET
He is sharpening the pencil. (cf. múúkui die)

to-tópiš-d^ya aatín gípi suudági
RDP-boil-TRNSR we lots water
REPET of
We will boil lots of water. (cf. totópikii boil)

Note also the following set of intransitive vs. transitive verbs:

T	ħ	T	n	M	c
	IN	ш	к	w	•

TRNS

Aspectual

In addition to suppletion and reduplication of verb bases (which signal SG vs. PL SUBJ/OBJ and repetitive action) and alternation of verb bases (which signal PERF/IMPRF), there are several tense-aspect suffixes in Northern Tepehuan. They will be listed by their order and by the stem alternate with which they occur.

Order 1

Suffixes occurring with Stem I:

-: PRES The present tense suffix is used for present tense, habitual or repeated action, and for the past tense in narratives.

mo imi-i there go-PRES There he goes.

vffš t^yása-i vakúána-i yúúkuši †-óódami all day-ABS wash-PRES clothes the-people The Tepehuanes wash clothes every day.

dii-digara-i diviral dal vupúid ir daráiva RDP-dig-PRES earth and facing sit PL hole PL PL OBJ

They dug holes and sat down facing one another.

Suffixes occurring with Stems I and II:

-mu FUT (used in PAST TNS context as well as future)

-imi ~ -mi PROG/INCEPT (cf. fmi-, Stem II of verb to go)

-muda ~ -mud^y↑ PAST PERF

-na POT -gi UNR

-mu FUT

gi-taañí-t^yul-d^ya-mu ááni you-ask-BEN-APPLIC-FUT I I'll ask for it for you!

agi-mu go-kfva-i šióro-ko
melt-FUT the-enow-ABS tomorrow-TEMP
The snow will melt tomorrow.

gaagá-mu=ši vaakáši look-FUT=Q cow for Did he go look for the cow?

-imi PROG/INCEPT

divá-ími rot-PROG It is rotting. kiil-mu-imi man-die-PROG He is getting old.

+š1-mi q++11-mi grow-PROG plant-PROG He is growing. He is beginning to plant. -muda ~ -mud^yi PAST PERF yová-muda mai fší-muda harvest-PAST not plant-PAST PERFPERFHe would have harvested. He would not have planted it. mai adái-mud^yi not chase-PAST PERFHe would not have chased it. -na ~ -ña POT pari válka tukági óótosa-i igai i-gií-du-kidi alí about three nights send-PRES he the-big-QNT-AG little m**ff** nu-núkada-i gffli s=ai toóši mai ugá-na boyQUOT=at there RDP-watch-PRES rabbit not eat-POT thatCONTtime tiliai wheat For about three nights he sent the big boy to watch for Rabbit so that he might not eat wheat. ašī-ña=p+=sa laugh-POT=you=QUOT He says for you to laugh (that you should laugh). -gi∼ -agi UNR p∔≃š≖mai kikíva-gi you=if=not get-UNR out of way If you don't get out of the way... vffkiadi iñ-gagááli-agi how me-sell-UNR much For how much will you sell it to me?

Suffixes occurring with Stems II and III:

-to finish (cf. maáto to finish)

ka ugí-t^yo ááni already eat-finish I I already finished eating.

káši=a=n=t 11-t^yo already=B=I=COMPL drank-finished I already finished drinking.

cf. káši=a=n=t nááto íí already=B=I=COMPL finished drink I already finished drinking.

Order 2

Order 2 suffixes occur following -i PRES or -ka STAT:

-tadai PAST CONT -ña PAST REPET/HAB/DUR

> asf-i-t^yadai laugh-PRES-PAST CONT He was laughing.

vffš suivíši-ko apašíáru-i-ña aatín all Thursday-TEMP go-PRES-HAB we SP for ride

Every Thursday we go for a ride.

ááni mai vukát^yi-ka-tadai áíd^yi tumíñši I not carry-STAT-PAST at money CONT that time

... I wasn't carrying any money at that time.

Clitics occurring with Stem III:

=t^YI COMPL INDF =t^Yiki COMPL DEF =ta COMPL -tadai PAST CONT

The first three of these TNS/ASP clitics combine with subject pronoun clitics and the AUX base to form the auxiliary group (cf. PARTICLES AND CLITICS). The AUX group attaches phonologically to the first element of a clause.

šíá imí-da aapí (ši=mai=t^yi kukú-n áán+) where go-? you SUBR=not=COMPL eat-POT I TNDF

Where could you go so that I might not eat you?

vuű≖ñ=t^Yiki tie=I=COMPL up DEF I tied it up (I remember doing it).

I already drank.

ka

káš i=a=n=t alreadu=B=I=COMPL drank I alreadu drank.

yốga kuú-tadai fgai already almost close-PAST they CONT

They were about to close it.

There is another set of subject pronouns which occur as enclitics to Stem III verbs. These may be phonologically determined variants of those listed as part of the AUX base. The AUX base subject pronouns may occur only word medial and the other set only word final.

≕n† ig= you =timi we

> նն=n÷ ka already ate=I I already ate.

ka նն≖pi already ate=you You alreadu ate.

ii≖á≖n≃ta

already drink=B=I=COMPL

biī=timi autovus took=we bus We took the bus.

The question clitic = i was treated under OUESTIONS. Further examples here will illustrate how =si (along with the SUBJ PRON) occurs with any form of the verb.

a-kúmu-l=Ø=Šl UNSPEC-eat-PRES=he=Q OBJ countable things Is he eating?

báid^ya-mu=Ø=š! fgai go-kúáá-daga-i cook-FUT=he=Q he the-eat-ABSTR-ABS Is he going to cook the food?

ih-i=mi=ši RDP-go=you=Q PL PL Did you PL go?

The QUOT clitic =sa is preceded in the verb by a SUBJ PRON. These clitics occur postposed to the verb, following -na POT. The variant s= QUOT occurs preceding WHW, introducers, and conjunctions. (See PARTICLES AND CLITICS, Modal).

imf-na=pi=sa kodá-na=pi=sa káit^yi
go-POT=you=QUOT kill-POT=you=QUOT eaid
He said that you should go.
PL
OBJ
He said that you should
kill them.

gáámo=a=pi=sa imi-na there=B=you=QUOT go-POT He says you should go there.

AUXILIARY VERBS

Auxiliary verbs follow the main verb. They never occur apart from the main verb. They occur with a set of subject pronoun clitics (cf. DEFINITE PRONOUNS, Dependent, Set V), which precede them as proclitics except when the AUX BASE is present. The AUX BASE attracts the subject pronoun to it as an enclitic.

INTEN ágai agáít^yadai PAST INTEN

> imí=á=iñ ágai go=B=I INTEN I'm going to go.

imíágai fgai go INTEN he He's going to go.

kood-á-iñ ágai kill=B=T TNTEN PLOBJI'm going to kill them.

dai ipámu suúli vavfli-amu gáága ágai and again fell PN-to look INTEN

PLreturned

And they returned to Baborigame to look for him.

CONT

COORDINATION

Conjunctions

Syntax

Introducer particles occur as the first element of a clause. In addition to PAST, NON-PAST, and QUOT clitics, so that takes SUBJ PRON clitics (cf. ADVERBIAL DEMONSTRATIVES for a set of temporal introducers which take the same set of clitics). The remaining conjunctions either introduce clauses or join elements in a syntactic construction.

The following account contains illustrations of various introducers and conjunctions. / indicates end of sentence.

The following example shows that embedding can go at least four

levels deep:

[iš=t^Yumááši giñ-tfhai giñ-óóka]]]] ast†tfdai SUBR=what me-order my-father said "Don't you PL know that I must do what my father tells me to do?", he said.

EMBEDDED OUESTIONS

WH Questions

Unmarked

Marked by clitic iš= SUBR

The embedded question follows the main clause and has the same internal order as the corresponding question.

mai máát† áán† [šíááko old^ýága góvai] not know I where live he I don't know where he lives.

cf. šíááko oid^yága góvai where live he Where does he live?

t=1m+ n+-nf1-d y i [§íááko k+1 áápi +-moono] we=go RDP-see-APPLIC where stood you the-doll DUR up Let's go see where you stood up the doll.

vffši šik6li 11 kurára-i uugíd y i-a-mu n $^{+}$ -nfíd y i [y i a i a all around went fence-ABS edge-LOC-to RDP-see where CONT

sffli pa-páki-i toóši] straight RDP-enter-PRES rabbit REPET

All around the edge of the corral he went looking to see where exactly Rabbit kept getting in.

Clitic iš≖ SUBR is preposed to the first element of the clause, and =%I Q is deleted from WHW.

dúú maatf-ka-na áán† [iš=t^Yumá púáápa góvi] o how know-STAT-POT I SUBR=what bring they Q How could I know what they would bring?

Cf. tumáá=ši vúáá góvai what=Q bring they What did they bring?

gin-aagí-d^Ya-mu ááni [iš=t^Yumá vúáayi aatfmi] you-tell-APPLIC-FUT I SUBR=what do we I'll tell you what we are doing.

gin-aagf-d y a-mu ááni [i y -t y úíga gá-mu imi=á=iñ you-tell-APPLIC-FUT I SUBR-when there-to go=B=I FUT

á][iš=máá tas-í-ri mff d^yívia iñ≠ágai] INTEN SUBR=which day-LOC-on there come REFL=INTEN

[š!=ká maatf-ka-mu aapímɨ]
SUBR=already know-STAT-FUT you
PI.

I'm going to tell you PL when I'll be going there, what day I'll be arriving there, so that you PL will know.

Yes/No Questions

Embedded yes/no questions take the proclitic iš= SUBR, delete =\$i 0 from the verb, and change the intonation.

kffga mááti ááni [iš=glñ-yaatági-i giñ-mára] [iš=čó fpi] well know I SUBR=me-lie-PRES my-child if=not also if

I know very well if my child is lying to me or not.

cf. giñ-yaatág+-i=ši fgåi me-lie-PRES=Q he Is he luing to me?

RELATIVE CLAUSES

Relative clauses occur following the nouns which they modify.

Finite

The finite relative clause is introduced by the proclitic is=~\$i=, which occurs on the relative pronoun (the first element of the relative clause). There are three relative pronouns: is=máákidi~is=mááki the one who, which; ší=ánkidi~\$í=ánki the one who, which; is=t umáási the one which. The first two are either animate or inanimate, the third is only inanimate.

káši=a=n=t íí áán† go-pastí a liš=máák†d† already=B=I=COMPL drank I the-pill SUBR=which

giñ-máá fgai] me-gave he

I already took the pill which he gave me.

s=aid^yi ka duaad^yimu i-óóki [ši=anki kóóyi QUOT=then already scared the-woman SUBR=who snake

gi-nááto] REFL-became

Then the woman who had become a snake was frightened.

vitšiafkatai [iš=t^yumāáši iñ-t^yikāka-i fgai] áánt vffši everything SUBR=what me-ask-PRES she I all

aagi-d^yi told-APPLIC

I told her everything she asked me.

Some headless relative clauses are quasi-headless; i.e., there is a pronoun outside the relative clause to which the relative pronoun refers. In the following example this pronoun is the POSSR PRON -di her, which occurs suffixed to the noun preceding the relative clause.

s=ai váík tasá-í-kidi d y íviaid y i i-kilíódami QUOT=then three day-ABS-with came the-old man

kuná-d† [ši=ank† <u>s6i mááši</u> id^yu1] husband-her SUBR≔one bad did who

Then after three days the old man, husband of the one who did bad, came.

Here is an example of an oblique relative:

ka ááyi †-<u>šíáá duu</u>-dágai [Iš=t^yúíga-ko already arrived <u>the-respect-ABSTR</u> SUBR=when-TEMP holy days

gi-kuaa-dá-na i-kapirotáda] REFL-eat-APPLIC-POT the-capirotada SP

The time for the fiesta during which the capirotada is eaten has arrived.

Nonfinite

Nonfinite relative clauses are participials, which can orrur either with or without a head.

bir-îmi-i imó gi-víid^ya-kami
this-come-PRES one REFL-be-PRTC
way left
over
rich
man

There comes a rich man.

 čigíá mááši go-viigí-kami pretty appear the-red-PRTC The red one is pretty.

šíóóro-ko d^yívi ágai i-bait^yf kiáá-kami tomorrow-TEMP come INTEN the-ahead stand-PRTC leader

Tomorrow the leader is going to come.

cf. mo bait^yfki kɨfka gɨñ-śifši there ahead stand my-older brother There's my older brother up ahead.

imó imí-d^Yaga-i oid^Yá-ka-tadai imó gi-vííd^Ya-kami one go-ABSTR-ABS live-STAT-PAST one REFL-be-PRTC

CONT left
over
rich

dai fgai gi-aadáí-ña yúúkuši dai kffga t^y i- t^y íód y i-kami and he REFL-put-PAST clothes and well RDP-pretty-PRTC on REPET

dai vffš t^yása-i ivuaadá-na vagími gf-g†r-du-kami and all day-ABS make-PAST fiesta RDP-big-QNT-PRTC REPET PL

Once upon a time there was a rich man, and he wore very pretty clothes, and every day he would throw a biq party.

The nonfinite relative clause with a head normally occurs following the head. When topicalized, however, the modifying clause precedes the head.

maatf=mɨ=ši aapímɨ Gürugi [gff kii-frɨ oid^yá-kami] know=you=Q you bird big house-in live-PRTC PL PL

Do you PL know the bird that lives in the big house?

Note the contrast in:

[gff kii-frt oid^yá-kami] úúrugi áánt gíá nfid^yi big house-in live-PRTC bird I AFF saw I really saw the bird that lives in the big house.

ADVERBIAL CLAUSES

Adverbial Relative Clauses

Some temporal clauses are formed like finite relatives. They take the subordinating proclitic iš=/ši= and may occur with a head which it follows. The first example shows how location words double as time words.

ka=ááyi imó fkali [šl=amí-f-r+ mal already=arrived one week SUBR=<u>here-LOC-in</u> not since

ko-kóósi-i ááni] RDP-sleep-PRES I DUR It's now been a week since I've slept.

klá kóóso all gffli [lš=d^Ylvia oogá-d†]
already sleep little boy SUBR=came father-his
vhen

The boy was still asleep when his father arrived.

The how clause is like a relative clause in that it has a head preceding it and a relator element dukátai how as the first element of the clause. The proclitic iš= SUBR occurs with this clause.

áági-d^Yi ig-ímai kilíódami ñíóóki [iš=d^Yuukátai told-APPLIC he-the old word SUBR=how other man one

id^yuñí-á fgai] *do-UNR he*

The other old man gave him advice on what he should do.

Temporal Clauses

-kai ~ -tai* when/while/after/having/because

Temporal clauses may immediately precede or follow the head which they modify (the head is optional). They are not relative clauses since the clauses include no relator element.

dai asta šíáád^yi [vuusáí-kai tása-i] váñi and until next come-having sun-ABS got day out up

... And the next day when the sun came up, I got up. (Taken from a first person account of a trip in which the larger context identifies the subject as 'I'.)

dai [ka maaší-d^ya-tai] íí †-kffli ámi and already appear-APPLIC-having went the-man there

vavfli-a-iñdi-ri wild-LOC-from-at

... And as it was getting light, the man left Wild Fig Valley.

[ka=ibi-kai úúnu-i] d^yúúki ógai oid^yígi already=yielding-when corn-ABS rain stop world When the corn has ripened, it will stop raining.

mááko tása-i lí-liči iñ-ki-kíš-d^Ya-ña ígai four day-ABS RDP- little me-RDP- put-APPLIC-PAST they REPET bit REPET on DUR

in-ikáso [in-dúin-d^ya-kai] my-leg me-make-APPLIC-having For four days they put my leg on for a little while, after having made it for me.

For other examples of -kai \sim -tai, cf. COY 1, 28.

^{* -}kai has a punctiliar connotation; -tai has a continuous connotation. Cf. váávoit udakai having believed (at a certain time) and váávoit udatai having believed (and still continuing to believe).

Locative Clauses

Locative clauses are like relatives in that they have a relator element \$164ko ~ \$164 where which occurs first in the clause. They are all finite and occur with a head which usually precedes the clause but may also follow it. The locative complex may include as many as three elements: first, the prolocative here, there, far away; second, a location such as in the woods; and third, a relative clause which either further specifies the head it modifies or defines the head. Either of the first two elements may occur alone; the third may occur with either of the first, but not alone.

old^Yága óódami] live people

The man went quite far into the uninhabited area where no one lives.

dai abf [šíáá pa-páki-i toőši] abf and there where RDP-enter-PRES rabbit there REPET

kit^yaagi-ña kii <u>house-chest</u>-at stood doorway up

And there where Rabbit kept getting in, there in the passageway he stood it up.
